Monarch Knitting Company.—Net profits of the company during the year ended November 30, 1917, after all fixed charges, amounted to $202,413, as compared with $145,534 the year before. Profits represented 27 per cent. on the preferred stock and 11¾ per cent. on the common. After providing for dividends and adding the balance from the previous year, the amount carried forward into the current year aggregated $442,212, as compared with $340,423 in 1916. Following is a comparative statement of the profit and loss account:—

	1917.	1916.
Net profits	$202,413	$145,534
Dividends	52,500	48,125
Balance carried forward	149,913	292,298
Balance from 1916	292,298	149,889
Balance at credit of profit and loss	442,212	340,423

At the end of November, 1917, the working capital stood at $526,336, as against $455,023 in 1916. The assets, exclusive of good-will, were equal to $196 on each preferred share and $56 on each common share. Accounts receivable were $235,955 greater than in 1916. Properties increased $137,000 and inventories increased $71,000. Over against these two items were an increase in bank loans of $102,500, in sundry loans and employees' deposits of $47,000, and in accounts payable of $162,000.

New Brunswick Power Company.—The first annual meeting of the company was held on February 25th, 1918. The statement presented covers the period of ten months from March 1st, 1917, when operations commenced. During that period the total operating revenue was $569,200, and the total operating expenses were $424,893, leaving a gross income of $144,306. The net revenue from non-operating departments, such as the Eastern Electric Company, amounted to $21,553, making for the year a gross income of $165,860 available for the payment of bond interest and preferred dividends. Of this amount $74,344 was paid in bond and other interest. The dividends on preferred stock paid for the nine months amounted to $70,875, and accrued dividends for December $7,875, leaving a surplus of $12,766.

During the past year extensive additions were made to the plant. In the power house $72,112 was spent, very materially increasing the boiler capacity, thus enabling the company to generate a larger amount of current. In the railway department $14,543 was spent on new equipment, and $11,803 for replacement of special work, etc. In addition to these figures a considerable sum was spent in improving the tracks by using arc welding machines and rail grinder, building up the cupped ends of rails and welding the joints, which secured a smooth roadbed and easier riding for the street car patrons, This work will be continued during 1918. Additions and extensions were also made in the electric and gas departments, amounting to $24,476.

Maritime Telephone and Telegraph Company.—Messrs. F. B. McCurdy and Company, Halifax, are asking the shareholders of the company for proxies for the special general meeting to be held in the last week of March, when the question of the company's sale of its shares in the Prince Edward Island Telephone Company will be considered, as arranged at the last annual meeting. Mr. McCurdy is opposed to the company disposing of its interest in the Prince Edward Island Company, not only on the ground that it is not to the advantage of the Maritime shareholders, but owing to the manner in which the deal was carried through with Howard P. Robinson, of the New Brunswick Telephone Company in the interests of a new company, the Eastern Telephone Company. The circular setting forth the objections to the deal takes up various phases of the controversy at length. With reference to the relations of C. F. Sise, Jr., and L. B. McFarlane, of the Bell Telephone Company, to the matter, the circular says:—

"C. F. Sise, Jr., of Montreal, P.Q., a director of Maritime appointed by the Bell Telephone Company, stated at the meeting, in response to a question, that he heard about the charter of the Eastern Telephone and Telegraph Company being put through the Federal House last year, and went to Ottawa to oppose it. While there he was informed that it did not affect the Bell Company's territory, and when told that the charter was being asked for by friends in the Maritime Provinces, he withdrew his opposition. It is understood that directors C. F. Sise, Jr., and L. B. McFarlane, have had no connection with the proposed sale of Prince Edward Island shares. In fact, at the meeting, Mr. Sise stated that he had not considered the merits of the proposal, and at that time did not wish to be considered as expressing any opinion in the matter."

Montreal Cottons, Limited.—A satisfactory year's business was reported at the annual meeting of the company, held in Montreal recently, net income for 1917 exceeding the previous high record of 1916 by $6,575, while the gain over 1915 was $88,822.

The business profits tax and special donations figured for an extra $35,000 in the year's appropriations, reducing the balance carried forward to surplus account after paying dividends. The balance at $89,175, however, may be considered substantial in view of the company's stability, and the fact that surplus account stands at $2,420,383. Cloth sales for the year were $4,308,520, against $4,397,823 in 1916, and $3,055,000 in 1915. Comparisons of profit and loss figures for three years follow, the usual appropriations of $115,000 for depreciation being deducted before showing profits:—

	1917.	1916.	1915.
Profits	$492,720	$473,688	$394,898
Rents	3,887	16,344	12,886
Net income	$496,607	$490,032	$407,785
Charges	42,432	43,250	53,777
Balance	$454,175	$446,782	$254,008
War tax, etc.	35,000	......	......
Balance	$419,175	$446,782	$354,008
Dividends	330,000	330,000	330,000
Surplus	$ 89,175	$116,782	$ 24,008

Relatively small changes are shown in the balance sheet. Property account increased about $141,000 in the year; the surplus of working assets over current liabilities was $2,087,140, or about $79,000 less than at the end of 1916. Mr. S. H. Ewing, in his report as president, states that the general business of the company through 1917 was very satisfactory and orders in hand promise favorably for the current year. The company is daily adding new automatic machinery which will ensure the largest possible production and will tend to overcome difficulties arising from the scarcity of labor now existing and likely to continue. The loss of the company's hydraulic electrical plant in December, a loss fully covered by insurance, seriously disturbed business towards the close of the year. Restoration of the plant is proceeding rapidly, the new installation embracing the latest hydraulic improvements.

Penmans, Limited.—The company's business showed a satisfactory increase over the 1916 year and an enormous gain over the figures of a few years ago. The company's sales in 1917 amounted to $6,896,000, an increase of $1,056,000 as compared with 1916, and of $2,153,000, as compared with 1915. The surplus of liquid assets over liabilities was increased during the year by $664,000, the active surplus now amounting to $2,649,000. The active surplus is, therefore, almost half a million dollars greater than the common issue. The company is exceptionally strong in current assets. Raw and manufactured stock jumped from $2,190,000 to $3,244,000. In accounts receivable, cash and Victory bonds, the company has $1,219,000 and its total current assets are $4,463,000.

The Bank of British North America

Incorporated by Royal Charter.

The Court of Directors hereby give notice that a dividend of Forty Shillings per share, less Income Tax, will be paid on the 5th April next to the Proprietors of shares registered in the Dominion of Canada, being at the rate of 8% per annum for the year ended 30th November last.

The dividend will be paid at the legal par of exchange on the 5th day of April next.

No transfers can be made between the 22nd inst. inclusive and the 4th prox. inclusive, as the books must be closed during that period.

JACKSON DODDS,
Secretary.

No. 5 Gracechurch Street,
London, E.C.

which compare with $3.217,000 last year and current liabilities of $1,418,000 this year. Of the profits $119,000 were used for wiping off building and plants, but, although the contributions to patriotic funds increased, war taxes were actually reduced. Net earning for the year were $915,518 after various charges, which compares with $738,753 in 1916. The net was over four times what it was three years ago. The main items of the profit and loss statement compare as follows:—

	1917.	1916.	1915.
Profits	$1,135,742	$864,779	$779,933
Bond interest, etc.	220,223	126,026	136,784
Net earnings	$ 915,518	$738,753	$643,148
Preferred dividends	64,500	64,500	64,500
Balance	$ 851,018	$674,253	$578,648
Common dividends	107,530	107,530	86,024
Balance	$ 843,488	$566,723	$492,624
Patriotic Fund	16,300	10,000	3,500
Balance	$ 827,188	$556,723	$489,124
War tax	91,813	104,129	......
Balance	$ 735,375	$452,593	$489,124
Reserve	500,000	400,000	400,000
Surplus	$ 235,375	$ 52,593	$ 89,124
Previous surplus	672,492	619,899	530,774
Surplus	$ 907,867	$672,492	$619,899

Although bank advances increased by $500,000 to $1,500,000, this is more than offset by the large increase in inventories.

Canada Steamships Lines, Limited.—The detailed balance sheet of the company for 1917, shows some fairly large changes, an interesting feature of which is a reduction of about $1,300,000 in the funded debt of the company, although property account, after heavy writing-off for depreciation, stands $1,350,000 higher than a year ago. First mortgage bonds, at $1,315,026, show a reduction of about $900,000 in the year. The two sets of changes, increase in property account and reduction in funded debt, are factors in lowering the net surplus of working capital, from $1,167,110 a year ago to $260,817, but they plainly improve the general position of the company. In the past two years the company has made a net addition to its vessel account of about $3,100,000 before depreciation, while funded debt has been reduced about $1,900,000. Some leading figures of the balance sheets of 1917 and 1916 follows:—

	1917.	1916.
Property	$24,405,355	$23,058,657
Current assets	4,065,008	3,432,119
Total assets	38,676,584	37,918,958
Capital	24,500,000	24,500,000
Funded debt	7,896.367	9,202,013
Current liabilities	3,804,191	2,265.009
Reserves	101,273	103,710
Surplus	2,374,754	1,848,225

As stated recently, surplus after charges, but before special writing off, equalled 10.8 per cent. on the company's common stock, when allowance is made for a full year's dividend on the preferred. Comparisons of profit and loss and surplus figures for three years follows:—

	1917.	1916.	1915.
Revenue	$13,533,816	$12,122,128	$7,775,034
Expenses	9,509,951	8,062,583	6,042,977
Net earnings	$ 4,023,864	$ 4,059,544	$1,732,052
Less:			
Bond interest	392,305	443,044	457,785
Other interest	5,721	15.319	85,276
Depreciation	1,061,563	805,309	476.938
Bad debts	25,579	27,500	35,000
Directors	25,000	15,156	14,906
War tax	300,000	322,046	......
Bonus	35,294	40,140	......
Total deductions	$ 1,845.463	$ 1.668.517	$1.069.905
Net profit	2,178,401	2,391,028	662,151
Written off	114,586	87.415	70,835
Balance	$ 2,063,815	$ 2,303,613	$ 591,316
Profit on sales	941,881	179,979	......
Balance	$ 3,005,696	$ 2,483,592	$ 591,316
Dividends	2,479,167	656,250	......
Surplus	$ 526,529	$ 1,827,342	$ 591,316
Previous surplus	1,848,225	20,883	*570,433
Surplus	$ 2,374,754	$ 1,848,225	$ 20,883

*Deficit.

Asbestos Corporation of Canada.—The profits of the company, including income from investments, amounted to $563,069 in 1917 against $537,938 in 1916. As the gain of about $27,000, or 5 per cent., followed one of $151,500, or 40 per cent. in 1916, the showing may be considered highly satisfactory. After deductions for renewals and betterments, $159,280 and bond interest, $150,000, the surplus profit for the year was $253,789, equal to 6.3 per cent. earned on the preferred stock, against $215,476, or 5.4 per cent. earned the previous year and $93,594, or 2.3 per cent. in 1915. Comparisons of profit and loss figures for three years follows:—

	1917.	1916.	1915.
Profits	*$563,069	$537,938	$386,377
Renewals, etc.	159,280	172,461	142,782
Balance	$403,789	$365,477	$243,594
Bond interest	150,000	150,000	150,000
Balance	$253,789	$215,476	$ 93,594
Dividend	160,000	......	......
Surplus	$ 93,789	$215,476	$ 93,594
Previous surplus	500,102	284,626	191,031
Total surplus	$593,892	$500,102	$284,626

*The 1917 statement gives operating profit and income from investments separately for the first time, but they are lumped in the foregoing for purposes of comparison. Profits from operation are $506,542 and income from investments $56,527.

The company continues to improve its financial position. Adding investments in war bonds and the company's own bonds to ordinary working assets, the total at the end of 1917 was $1,692,347, against current liabilities of only $143,496. The surplus of working capital at $1,548,851 compares with $1,459,966 at the end of 1916. Comparisons of balance sheets of the past two years follow:—

Assets:

	1917.	1916.
Property	$ 9,058,423	$ 9,055,359
Trust department	11,335	10,531
Investments	622,912	457,000
Inventories	357,494	252,196
Accounts received	404,931	411,688
Cash	307.010	450,139
Insurance	......	14,245
Deferred charges	30,280	......
Total	$10,792,388	$10,651,161

Liabilities:

	1917.	1916.
Preferred stock	$ 4,000,000	$ 4,000,000
Common stock	3,000,000	3,000,000
Bonds	3,000.000	3,000,000
Accounts payable	138,663	105,341
Accrued liabilities	4,832	5.717
Reserves	55,000	40,000
Surplus	593,892	500,102
Total	$10.792.388	$10.651.161

The transfer of the old Dominion Mill at Black Lake, long idle, to East Broughton, has been accomplished in the past year, and the development of the company's Fraser Mines there is now being proceeded with. The opening up of this property is with a view to placing the company in a position to meet the demand for raw asbestos, which continues to grow.

BRANCHES AND CONNECTIONS THROUGHOUT CANADA

NEW INCORPORATIONS

Electro Products and Zinc Companies Have Obtained Charters

The largest companies incorporated during the past week were: Federal Zinc and Lead Company, Limited, Montreal, $3,000,000; American Electro Products Company, Limited, Montreal, $1,500,000.

The following is a partial list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The amount noted is the authorized capital and the persons named are provisional directors:—

Lethbridge, Alta.—Bijou Motor Parlors, Limited, $20,000.

Lomond, Alta.—The Frank Brown Company, Limited, $10,000.

Dayton, Ohio, Alta.—The Ohio Farming Company, $150,000.

Mannville, Alta.—The Panar Ranching Company, Limited, $20,000.

Cardston, Alta.—Chief Mountain Creamery Company, Limited, $20,000.

Carmangay, Alta.—The Carmangay Grounds Company, Limited, $20,000.

Prince Rupert, B.C.—Fishermen's Club, Limited, $10,000; Grand Terminal Club, Limited, $10,000.

Edmonton, Alta.—The Solomon Creek Coal Company, Limited, $600,000; R. F. Howard, Limited, $5,000.

Laval de Montreal, Que.—La Compagnie des Jouets Bruyere, Limited, $190,000; H. J. Brunelle, R. d'Orsonnens, Saint Roch-du-Richelieu, A. Langelier.

Vancouver, B.C.—Premier Agencies, Limited, $10,000; Wrigley Directories, Limited, $10,000; Ranier Hotel, Limited, $10,000; Reo Motor Car Agency, Limited, $10,000.

Victoria, B.C.—Queen Charlotte Spruce Company, Limited, $500,000; Empress Auto and Taxi Company, Limited, $10,000 Quesnel Land Company, Limited, $10,000.

Calgary, Alta.—The Cloverdale Dairy Farm, Limited, $20,000; Genco Electrical Engineering Company, Limited, $20,000; the R. P. Rithet and Company (Calgary), Limited, $10,000.

Sherbrooke, Que.—Codere and Fils, Limitee, $500,000; J. A. Leblanc, E. Boisvert, A. Coderre. Auto Piston Ring Company, Limited, $149,000; M. Standish, O. B. Somersworth, A. Graham.

Winnipeg, Man.—The Birt Saddlery Company, Limited, $40,000; J. Birt, L. D. Birt, J. Birt. New Cut Rate American Shoe Store, Limited, $20,000; J. H. Buckler, S. E. Buckler, V. Buckler. McRae and Griffith, Limited, $75,000; R. F. McRae, D. W. Griffith, H. R. Hay. The Magnet Metal and Foundry Company, Limited, $150,000; J. B. Coyne, S. F. Moffatt, F. K. Hamilton.

Montreal, Que.—Federal Zinc and Lead Company, Limited, $3,000,000; M. M. A. Plimsoll, R. Brodeur, H. Langevin. La Compagnie Laurin and Preville, Limitee, $20,000; E. Laurin, J. A. Preville, J. O. Desy. Old England, Limited, $10,000; I. Greenberg, S. Garmaise, M. Rosen. Campbells' Florists, Incorporated, $90,000; C. M. Holt, L. Gosselin, P. E. Lanctot. American Electro Products Company, Limited, $1,500,000; L. Macfarlane, W. B. Scott, J. MacNaughton. Les Placements Municipaux, Limitee, $40,000; H. J. Brunelle, R. d'Orsonnens, A. Langelier. High Wah Club, Limited, $5,000; L. Y. Lim, C. Bock, L. H. Yee. Metcalfe Realty Company, $45,000; G. A. Coughlin, F. G. Bush, G. R. Drennan. Wasserman Dressmaking and Ladies' Tailoring, Limited, $10,000; H. Wasserman, M. Rosen, E. Jodoin.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended March 1st, 1918:—

Hudson Bay Mine, 82,313; La Rose Mine, 87,702; Kerr Lake Mine, 60,728; Buffalo Mine, 153,675; total, 384,418 pounds, or 192 tons.

The total shipments since January 1st, 1918, now amount to 1,776,877.8 pounds, or 8,884 tons.

BANK OF BRITISH NORTH AMERICA

At the annual meeting in London of the Bank of British North America the chairman, while stating that the results of the year's business were satisfactory, profits being £137,000, reminded the proprietors that a large proportion of those profits had accrued from war credits. The present, he said, was not the time for new branches. In the past there had been far too much competition in these in central Canada. He noted especially that deposits were now over twelve million pounds, the highest amount in the bank's history. Canada, he said, continued to prosper, but he could not look to the future without a certain reserve, for which reason accounts had been scrutinized with unusual care.

ABITIBI POWER AND PAPER COMPANY

Mr. F. H. Anson, president of the Abitibi Power and Paper Company, says that the entire paper output of the company and a portion of its excess pulp production for 1918 has been contracted for. The financial statement of the company for the year ended December 31st last shows earnings of $1,323,001, and after deducting interest, depreciation, etc., there was a net profit of $341,122 from the year's operations. This, together with the amount carried forward from the previous year, made a total available for dividends of $702,047. Preferred dividends amounted to $70,000, leaving a net surplus to be carried forward of $632,047.

Expenditures during the past year on property account included $2,162,896 on extensions and improvements, by which the daily capacity of the plant has been increased to 325 tons of ground wood pulp, 130 tons of sulphite pulp and 225 tons of paper.

The company's assets are now placed at $16,290,792, compared with $13,158,756 a year ago.

CANADA NEEDS LONG-TIME CREDITS

Sir Edmund Walker, president of the Canadian Bank of Commerce, said in an address at the weekly luncheon of the Republican Club, of New York city, last week that the United States would be asked to include Canada in the list of Allies to which she is extending credit. Canada was manufacturing large amounts of munitions for England, he explained, using largely steel and other raw materials from the United States. He pointed out that England was not paying cash for these supplies, but had been granted credits by the Dominion. Therefore, he said, it was not practicable for Canada to continue paying cash to the United States for materials, but that Canada should have credits there. He pointed out that in granting such credits, financiers of the United States would be but extending credits to England.

After telling of the joy and appreciation of Canada at the entrance of the United States into the war, Sir Edmund said: "If we fight together over there, we must work together over here."

In 1913, he continued, the exports of Canada were $1,063,000,000, and the imports were greater than the exports, making Canada a borrowing nation. He said that in 1917 the exports were $2,043,000,000, and had become greater than the imports. But, he said, this did not mean that Canada was getting a correspondingly great amount of gold. He pointed to the shipment of $1,000,000,000 in gold to the United States from England in the first part of the war, and said that it soon became apparent that that had to stop. Therefore, credits for England were arranged in the United States. He said that England had begun by paying large amounts to Canada for supplies, but then credits for England were established in Canada.

"Now, to make these supplies," he said, "we have to buy materials from the United States. Canada is giving long-time credits to England to pay for the supplies she sends them. The United States must give Canada long-time credit, and by that I mean credit until after the war. By giving us credit for the materials bought in Canada, the United States is but extending credit to England, for she gets the munitions. It will not do for Americans to say in response to this that you might as well make the supplies here. I say to you that all the munitions and all the ships that everyone of us can make will be needed, and that on no excuse should production be curtailed, but ships built where there are facilities and munitions made where there are plants."

BRITISH COLUMBIA'S FINANCES

Analysis of the Latest Balance Sheet of the Province—Tax Arrears Not Shown as Asset

Comparing the balance sheet of the province of British Columbia for the year ended March 31, 1917, with that of the preceding year, it is seen that a departure has been made from the practice heretofore prevailing, and that with a view to presenting the assets and liabilities with greater clearness the balance sheet has been divided into three sections, viz.: (1) Capital Assets and Liabilities; (2) Current Assets and Liabilities; (3) Deferred Assets.

Capital Assets.

These again are broadly divided into: (1) those which are realizable or income producing; and (2) those which represent public buildings and improvements. (1) Taking the items seriatim we have:—

Dominion of Canada, capital account, "Terms of Union" $12,462,710.40

Under the "Terms of Union," the Dominion government covenants to pay annually in perpetuity to the province certain fixed sums on account of interest, annual subsidy grant per capita, and for lands conveyed. These have been capitalized at 5 per cent., or in other words, this annual revenue has been placed on the same capital basis as if the government had invested $12,462,710.40 in Dominion government stock at 5 per cent.

Investment for redemption of B.C. stock and debentures $3,429,135.37

This represents the total amounts set aside annually, together with interest thereon for the repayment of loans at maturity.

Dyking districts. (Dyking Assessments Adjustment Act, 1905.)

Capital account	$544,464.99	
Maintenance account	104,092.83	
Interest account	18,283.15	
	$666,840.97	
Less sinking fund assessments	87,877.76	
		$ 581,963.21

Briefly, the history of these items is that in 1905 the dyking districts being unable to meet their obligations, the government assumed their indebtedness and fixed a capital sum for each dyking district on which it was anticipated they could pay the interest without undue hardship. The government also advances all moneys for maintenance during the calendar year, after which a rate is struck and the lands assessed to bring in that sum of money. The interest account is the balance of interest owing by the various dyking districts at March 31st, 1917. The dyking districts are accumulating a sinking fund which will eventually refund to the government the amount of the indebtedness which was charged against them in 1905, being a portion of the full amount assumed by the government. It will be noted that at March 31st last their sinking fund amounted to $84,877.76.

Former Indian reservation acquired .. $ 1,225,652.72

This amount represents the purchase price of the Kitsilano and Songhees Indian reserves, together with the cost of improvements to March 31st.

Railway subsidy lands repurchased .. $ 1,509,114.75

The government having repurchased certain railway subsidy lands in the Kootenays, the lands are now shown at their cost price to the government.

Fairview Works, Fairview .... $ 29,447.26

Advances were made under authority of an act of the legislature to the Canada Zinc Company, and these premises were acquired by foreclosure of the mortgage the province held as security for the loan. These works are now under lease and option to the French's Complex Ore Reduction Company, Limited, at a higher figure than the value shown in the balance sheet.

Livestock, Colony Farm, Essondale .. $ 68,465.00

This is the inventory value of the livestock on hand at March, 31st, 1917.

(2) Buildings, roads, bridges and other properties $20,255,964.20

These figures, supplied by the Public Works Department, represent the expenditures made on provincial buildings, trunk and main roads, bridges, wharves and other properties, incurred in carrying on the functions of government, from which no income is derived, and which would in the main not be subject to realization.

Capital Liabilities.

British Columbia stock and debentures $23,153,146.00

The foregoing amount is the total of the funded debt, being the borrowings which have been made against the issue of stocks or debentures at March 31, 1917.

Mortgage on British Columbia Building, London .... $ 274,025.00

This represents the balance of the mortgage on the above building which will be reduced annually until final extinction in 1945.

In addition to direct liabilities the province has a contingent liability on account of securities which have been guaranteed both as to principal and interest. The amount of such securities issued at March 31st, 1917, aggregated $64,437,929, the details of which are shown as an inset in the balance sheet.

Turning next to the second section of the balance sheet:—

Current Assets.

Cash and advances .... $ 922,393.20

This is made up of cash in the hands of government agents and collectors, advances to departments and trustees of rural school districts.

Accounts receivable .... $ 555,371.98

Representing amounts which will eventually be received in cash by the government.

Livestock, stores and equipment ..... $ 291,354.38

Being the value of the above on hand in the various departments of the government at March 31st, 1917.

Special deposits, trust accounts ...... $ 6,278,145.33

With the exception of the first item (Land Registry Assurance Fund) under this head which is only kept separate from the general funds of the province to meet any liabilities which might arise in connection with the registration of titles, the individual accounts set out are all offset by liabilities of a similar amount.

Current Liabilities.

Temporary loans .... $ 2,094,689.17

This represents the amount of unfunded debt to be repaid out of revenue, or taken care of by the issue of stocks or debentures, as may be decided on.

Accounts payable .... $ 318,034.10

With the exception of $2,299.71 due to sundry creditors this is a charge set up on account of interest accrued on the public debt, due at various dates in the ensuing fiscal year.

Revenue received in advance .... $ 173,496.00

Being the proportion applicable to the fiscal year 1917-18 received in the fiscal year 1916-17 from the Dominion government under the "Terms of Union."

Special funds: Trust accounts .... $ 6,889,627.18

With the exception of the last nine items the funds of which are incorporated in the consolidated revenue fund of the province, these items are all offset by special deposits of a like amount.

The third section of the balance sheet comprises:—

Deferred Assets.

This is represented by the book values of certain payments and loans on account of the Nakusp and Slocan and the Pacific Great Eastern Railway Companies, together with a deposit in the Bank of Vancouver now in liquidation.

In view of the fact that payments are still being made on account of interest on the bonds of the railways in ques-

A GENERAL BANKING BUSINESS TRANSACTED

H. O. POWELL, General Manager

tion, together with loans to the Pacific Great Eastern, it is considered advisable to retain these amounts on the balance sheet, as "Deferred Assets," with a special notation to the effect that they are shown at their book values and that their ultimate realization cannot be determined at this date.

Unlike the municipalities, the province has never shown as an asset the arrears of taxes, and has only brought to revenue the amount of current taxes and arrears actually paid within the fiscal year. It was not possible to place the figures of these and other assets such as unpaid probate and succession duties, royalties, interest and principal on land sales, etc., on the balance sheet, as the system of accounting in force did not permit of these figures being readily obtained, and while it is the intention to place these on the balance sheet as soon as practicable, some time must necessarily elapse before a thorough investigation can place all such outstanding items on a basis sufficiently reliable to warrant inclusion in the balance sheet.

CONCERNING STEEL SHIPBUILDING

In answer to the enquiry of the St. John board of trade as to whether the government would furnish the builders with steel plates in the event of a steel shipbuilding yard being established in St. John by private capital, the deputy minister of marine advises that it is the intention of his department in connection with the proposed programme of shipbuilding to enter into contracts only with such firms as are now equipped with the necessary machinery and labor for the delivery of steel steamers complete.

The suggestion that St. John is favorably situated for the establishment of a steel shipbuilding plant has brought an enquiry as to whether there is available here a water lot with deep water frontage of 5,000 feet and a depth of 1,500 feet that would be suitable for a comprehensive shipbuilding plant. The size of the plant contemplated would involve an expenditure of between eight and ten million dollars and would employ from five to seven thousand men all the year round.

OCCIDENTAL FIRE INSURANCE COMPANY

The heavy fire losses in Canada last year are reflected in the financial statements of the fire insurance companies, now being published. The ratio of net losses of the Occidental Fire Insurance Company to net premiums was 49.9 per cent. in 1917, or 6.2 per cent. higher than in the previous year. Similar increases in this ratio have been experienced by other companies. The ratio of expenses to net premium revenue of the Occidental stood at 35.5 per cent. as compared with 40.1 per cent. in 1916. The amount paid for taxes and licenses, including war tax, was $7,423, or 4.3 per cent. of net premiums, constituting a substantial factor in the cost of operations. Considering the volume of business transacted and the general increase in the cost of so many items entering into operations, however, the ratio of expenses to net premiums must be considered as highly satisfactory.

Premiums, less rebates and cancellations, amounted to $298,850 as compared with $223,721 in 1916, or an increase of $75,128. This increase is fairly evenly divided between the East and the West. The company has continued the same conservative underwriting policy of the past, and protected itself fully by reinsurance, which accounts for the rather large premium paid for same, viz., $127,866. The increase in net premium revenue is $30,090, a very satisfactory record.

The company has placed to reserve for unearned premiums an additional sum of $22,128. This is in accordance with Dominion government requirements.

Interest and principal repayments were well met last year and investments are in good condition. All debentures have been taken into accounts at actual market value. During the past year, the company, which has its head office at Winnipeg, purchased for investment account $37,000 Dominion of Canada third war loan and $25,000 United Kingdom one-year notes. When the Victory Loan was issued in December it was decided to consolidate all Dominion of Canada war loans, which at the time totalled $102,000, and at the same time subscription was made for an additional $63,000, making a total of $165,000 of this loan underwritten by the company. Mr. C. A. Richardson is vice-president and secretary of the Occidental Fire Insurance Company. He is a careful and experienced underwriter and the company's management is in good hands.

VALUE OF CANADA'S FARM LAND

Average Has Increased Three Dollars Per Acre Since 1916 —Farm Wages Highest on Record

The average value of farm land for the whole of Canada, including land improved and unimproved, together with dwelling houses, barns, stables and other farm buildings, is approximately $44 per acre, as compared with $41 in 1916, according to returns of the Census and Statistics Office. The average values, by provinces, are as follows: Prince Edward Island, $43.7; Nova Scotia, $33.6; New Brunswick, $28.8; Quebec, $53; Ontario, $55.3; Manitoba, $31; Saskatchewan, $26; Alberta, $26.7; British Columbia, $149. In the last-named province the higher average is due to orcharding and fruit-growing.

Wages of Farm Help.

The average wages paid for farm help during the year have increased substantially since 1916 and have again reached the highest level on record. In many cases they are double what they were before the war. For the whole of Canada the wages per month of farm help during the summer, including board, average $63.63 for male and $34.31 for female help, as compared with $43.23 and $22.46 in 1916. For the year 1917, including board, the wages averaged $610.60 for males and $364 for females, as compared with $397 and $228 in 1916. The average value of board per month is returned as $19.44 for males and $14.79 for females, as compared with $17 for males and $11 for females in 1916. By provinces, the average wages per month for males and females, respectively, in the summer season, including board, were as follows: Prince Edward Island, $39.74 and $22.63; Nova Scotia, $53.75 and $24.43; New Brunswick, $57.19 and $28.14; Quebec, $59.09 and $28.98; Ontario, $59 and $31.96; Manitoba, $67.97 and $40.28; Saskatchewan, $73.21 and $41.09; Alberta, $76.09 and $44.44; British Columbia, $78.12 and $48.30.

Values of Livestock.

On the whole, there is but little change reported in the value per head of horses; in some of the provinces the value has remained stationary or has even declined. For cattle, sheep and swine, however, values are substantially higher than last year, and are higher than in any previous year for which records have been collected. For Canada the average value of horses, three years old and over, is $167, as compared with $160 in 1916; milch cows are $84, as against $70; cattle between one year old and three years average $52, against $43; sheep are $14.93, against $10.48 last year; and swine are $17.33, against $11.98 per cwt. The average value of wool is 59 cents per pound unwashed and 75 cents per pound washed. Correspondents were requested to ascertain, as nearly as possible, the average value per head of each description of farm animal, and for calculation of total values these averages have been applied to the total number of farm animals as returned in June last. The results are as follows: Horses, $429,123,000, as compared with $418,686,000 in 1916; milch cows, $274,081,000, as against $198,896,000; other cattle, $270,595,000, as against $204,477,000; sheep, $35,576,000, as against $20,927,000; swine, $92,886,000, as against $60,700,000.

The total value of farm livestock in Canada is estimated to be $1,102,261,000, as compared with $903,686,000, the estimate for 1916 as finally revised by the census returns for the prairie provinces. This is the first time the total value of farm livestock exceeded one billion dollars.

BANK BRANCHES OPENED AND CLOSED

FEBRUARY FIRE LOSSES

Many Large Fires—Nunnery Fire Adds Sixty Deaths to Total Fatalities

The Monetary Times' estimate of Canada's fire loss during February, 1918, is $2,321,762, compared with the January loss of $2,688,556 and $2,009,953 for February, 1917. The following is the estimate of the February losses:—

Fires exceeding $10,000	$1,879,500
Small fires reported	61,750
Estimate for unreported fires (15% of total)	302,512
Total	$2,243,762

The Monetary Times' record of the past three years and this year to date, shows the following monthly losses:—

	1915.	1916.	1917.	1918.
January	$ 1,249,886	$ 1,649,217	$ 1,918,660	$ 2,688,556
February	1,019,556	3,275,600	2,009,953	2,243,762
March	1,632,696	1,406,501	2,050,650	....
April	1,463,747	1,460,437	1,317,714	....
May	881,855	1,850,205	1,163,110	....
June	1,157,156	494,557	1,184,627	....
July	773,269	3,039,634	1,101,734	....
August	403,693	1,057,109	1,230,183	....
September	1,116,109	981,703	1,301,700	....
October	1,290,325	1,077,815	704,605	....
November	1,087,980	923,235	959,049	....
December	1,595,255	3,271,496	5,144,100	....
Totals	$13,671,527	$20,487,509	$20,086,085	$ 4,932,318

The fires reported in February, at which the losses amounted to $10,000 and over, were:—

Winnipeg, Man., February 1, Canadian Pacific Telegraph block, $500,000.

Quebec, Que., February 2, Quebec stock yards, $150,000.

Renfrew, Ont., February 5, block of Mr. T. W. Guest, $12,000.

Toronto, Ont., February 5, Metropolitan Railroad Company's barns, $40,000

Toronto, Ont., February 5, Toronto Laundry Machine Company's plant, $175,000.

Winnipeg, Man., February 5, Riverview Hotel, Lauren block and adjoining buildings, $180,000.

Sorel, Que., February 6, block of stores and houses, $100,000.

Armour Heights, Ont., February 7, six automobiles, five motorcycyles and side cars, $17,500.

Dundas, Ont., February 10, Boyle block, $25,000.

Englehart, Ont., February 12, block of buildings, $12,000.

Toronto, Ont., February 12, Hunter-Rose building, $30,000.

Montreal, Que., February 14, Grey Nunnery, $185,000.

Preston, Ont., February 16, clothing store of J. P. O'-Connor, $10,000.

Halifax, N.S., February 17, building of Furness, Witby and Company, $70,000.

Rosenfeld, Man., February 17, Lake of the Woods Milling Company's grain elevator, $30,000.

London, Ont., February 22, Thomas Knowles engraving plant, $18,000.

Burlington, Ont., February 22, residence of Stewart Bruce, $10,000.

Peterboro, Ont., February 23, Peterboro planing mill, $10,000.

East Toronto, Ont., February 24, Toronto and York Radial Railway Company's barns, $25,000.

Edmonton, Alta., February 24, Maryland Hotel and Drake garage, $250,000.

Penetanguishene, Ont., February 26, Palmer block, 30,000.

Destroyed or Damaged.

Among the structures damaged or destroyed last month were: Residences, 16; factories, 2; school, 1; stores, 5; hotels, 7; stock yard, 1; business blocks, 7; plants, 2; railway station, 1; car barns, 2; society hall, 1; office, 1; planing mill, 1; barn, 1; restaurant, 1; warehouse, 1; tenement, 1; lumber yard, 1; nunnery, 1; woolen mill, 1; grain elevator, 1; business buildings, 5; engraving plant, 1; garage, 1; planing mill, 1; unoccupied building, 1.

Among the causes of fires reported last month were: Thawing frozen pipes, 1; overheated furnace, 1; defective wiring, 1; ignition from electric heater, 1; overheated stove, 2; hot ashes left in wooden receptacle, 1; accidental dropping of match 1; grounded power wire, 1; overheated stove pipes, 2.

Large Number of Fatalities.

The following is a list of the fires at which fatalities occurred last month:—

Toronto, Ont., Feb. 1	Fire from gas stove	1
Bryson, Que., Feb. 1	Trapped in burning house	1
Winnipeg, Man., Feb. 1	Trapped in burning building	1
Toronto, Ont., Feb. 2	Playing with fire from stove	1
Sarnia, Ont., Feb. 4	Explosion of oil lamp	1
Wainfleet, Ont., Feb. 5	Trapped in burning barn	1
Frankford, Ont., Feb. 5	Shock from fire	1
Winnipeg, Man., Feb. 5	Trapped in burning hotel	3
Ottawa, Ont., Feb. 11	Fire from stove	1
Montreal, Que., Feb. 14	Trapped in burning nunnery	60
Brockville, Ont., Feb. 17	Fell with burning lamp	1
St. Amable de Vercheres, Que., Feb. 21	Trapped in burning house	7
Toronto, Ont., Feb. 21	Fire from stove	1
Oven, Sask., Feb. 22	Trapped in burning house	4
Winnipeg, Man., Feb. 21	Trapped in burning house	1
Ottawa, Ont., Feb. 25	Trapped in burning house	1
Forest, Ont., Feb. 28	Fire from candle	1
		87

The following table compiled by *The Monetary Times*, shows deaths caused by fire during February, as compared with previous returns:—

	1911.	1912.	1913.	1914.	1915.	1916.	1917.	1918.

STERLING TRUSTS CORPORATION

A satisfactory report was presented at the annual meeting of the Sterling Trusts Corporation, held in Toronto recently. The capital account showed an increase of $56,273 over the account of a year ago; the guaranteed trust account showed an increase of $121,877, and the estates and agency accounts an increase of $564,496. The assets on capital account now amount to $519,603; on guaranteed trust account to $603,520, and on estates and agency account to $3,491,822, making a total of $4,614,946.

Mr. E. F. B. Johnston, K.C., the company's president, in presenting the directors' report, outlined the changes which have been made in the directorate and the enlarged scope of the company's operations as a consequence. The result has been the closing of a considerable volume of new business. This will add materially to the company's earning power, and will be reflected favorably in the current year's balance sheet.

From the net earnings last year $15,000 was added to the reserve fund, making that fund $75,000. The balance carried forward was $8,998.

Mr. H. Waddington is managing director of the company, and the directorate has been considerably enlarged. In addition to the president and managing director there are three vice-presidents and fifteen directors, including Mr. G. H. Bradshaw, the manager of the company's branch at Regina. The three vice-presidents are: John Firstbrook, Toronto, president, Firstbrook Brothers, Limited, director, the Confederation Life Association; Mr. W. H. Wardrope, K.C., barrister, Hamilton; and Major E. D. McCallum, Regina, president, McCallum, Hill and Company.

NEW WESTMINSTER'S PROGRESS

Expansion Last Year—Establishment of Shipyard—Waste in Fish Canning

(Special Correspondence.)

New Westminster, March 2nd, 1918.

The outstanding fact in the report of the trade and commerce committee submitted to the local board of trade by the chairman, Mr. J. W. Cunningham, was that the payroll of some nine leading industries in New Westminster ranges from $250,000 to $275,000 a month, and in this is to be found the basis of the better conditions of business which have prevailed during 1917, while the prospects for 1918 are even brighter.

New Industries in Operation.

Turning to new industries in operation, the report mentioned the Lumber Products, Limited, operating a sawmill with a daily cut of 25,000 feet, a box factory and a toy plant, employing 118 hands and paying out about $6,000 a month in wages; the establishment of the British Columbia Manufacturing Company's toy factory, and the operation of the machine shops at Port Mann, where the car shops are also ready to go ahead as soon as the transfer of the railway to the government is completed. This expansion at Port Mann is of direct advantage to New Westminster, because the men, particularly those with families, live in town. But the great industrial development of the year has been the establishment of the shipyard at Poplar Island, where the New Westminster Construction and Engineering Company is building four wooden steamers of 2,800 tons d.w., for the Imperial Munitions Board, and has facilities to build vessels up to 10,000 tons. Plans are being made for a marine ways capable of hauling vessels to 3,500 tons. The number of men employed ranges around 600, and the payroll for the last two weeks of January was $41,000, or at the rate of a million a year.

New Orders for Lumber.

Shipbuilding has brought orders for machine shops in its train, and as a result the Heaps Engineering Company is working to full capacity having in addition orders for machinery for spruce mills as a result of aeroplane construction development. The Heaps Company have started a new foundry, employing 15 moulders. Another concern affected by aeroplane construction is the Laminated Materials Company, which is supplying large quantities of its product for this purpose. The Timberland Lumber Company is proceeding with its plans for the erection of a big sawmill on the south side of the river opposite the city, and it is expected that this mill will be cutting lumber by October 1.

Mr. P. G. Macdonald, who has been vice-president for the past two years, was elected president by acclamation, and Mr. W. H. Elson was elected vice-president, Mr. J. R. Grant declining when nominated. Mayor Gray was re-elected secretary.

Should Conserve Fish.

The present method of canning salmon wastes a lot of good food, and pressure should be brought to bear to remedy this condition, in the opinion of Mr. Martin Monk, who recommended this in his report for the fisheries committee to the board. He pointed out that it takes 80 lbs. of raw fish to fill a case of 48 lbs. Apparently at present nothing can be done with the head and ova, although in European countries the head is used as food and the ova makes "red caviar," but at least it is quite possible under present conditions to use the shoulder and tail pieces, at present discarded.

The Royal Bank of Canada has opened a branch at Banes, Cuba.

CANADA'S MUNITION OUTPUT IS LARGE

Orders Have Been Placed for Over One Billion Dollars—Large Expenditures Made

"Through the Imperial Munitions Board orders have been placed in Canada for $1,100,000,000 worth of munitions, and the sum of $875,000,000 already has been expended in respect of these orders in plants established in every province of Canada outside of Prince Edward Island." This was the statement of Hon. Newton Rowell, president of the Privy Council, in an address at Toronto.

"There were between 500 and 600 munitions plants in the Dominion," he said, "employing between 250,000 and 300,000 workers, including as many as 35,000 women at one time. Now there were approximately 5,000 women engaged in munitions work. Canada has machined over 53,000,000 shells, 40,000,000 brass cartridge cases of 3½ pounds each, and 58,000,000 copper bands, and last summer, at one time, Canada was producing of one projectile 50 per cent. of the total number used by Great Britain and all her armies on all fronts.

Success on Fuse Output.

"When Canada first commenced making shells," he continued, "the fuses were made in the United States, because it was thought the manufacturers in the Republic were in a better position to produce them, but later on orders were placed in the Dominion, and in a short time Canada was turning out fuses at the rate of 2,750,000 per month of such a high degree of excellence that the Imperial authorities went out of their way to congratulate the Imperial Munitions Board. Canada had also manufactured 16,500,000 wooden boxes in which to ship munitions overseas. She had also been steadily producing explosives, such as cordite, 'T.N.T.,' acetone, methyl-ethyl and nitric acid, in order to keep the forces of the British Empire supplied. The refining of zinc, copper and molybdenite had been going on steadily, and the capacity for refining lead had been largely increased. Canada was also shipping overseas large quantities of asbestos."

Mr. Rowell stated that Canada is now rendering assistance to the United States in the production of munitions, and is at present engaged on orders for 7,000,000 shells, 10,000,000 forgings and 2,000,000 cartridge cases for the United States government.

Success in Aeroplane Industry.

"Canada has had phenomenal success in the aeroplane industry," said Mr. Rowell, "and is now producing more than 300 aeroplanes a month. She is supplying all the planes used by the Royal Flying Corps in 500 encampments, and also supplying planes to the United States government to a large extent. Also 1,000 high-grade aeroplane engines are at present being constructed in Canada. The sum of $10,000,000 has been spent in aeroplane plants and aerodromes in Canada. When the Camp Borden aerodrome was constructed the aviators were flying two months after the workmen started to clear the land of tree stumps. Canadians supply more than 25 per cent. of the entire flying forces of the British Empire.

Large Order for Steel.

"Orders have been placed in Canada for 350,000,000 tons of steel and wooden ships, at a cost of $64,000,000, and the Union government is now developing a large shipbuilding programme. Many of the ships being built will be owned by the government of Canada. More than eight times the tonnage produced the year before the war broke out, will be produced this year. Produce in Canada this year will be more than one-quarter of the commercial tonnage built in the United States, and more than one-fifth of the commercial tonnage built in Great Britain last year."

ST. JOHN HARBOR SURVEY

The comprehensive survey of the harbor of St. John, which the local board of trade is planning in conjunction with the federal authorities, is designed to bring out the full potentialities of the port, not only in its relation to its ocean connections, but also as to its land routes. It is one thing to have a natural port possessing water advantages, such as St. John possesses; it is another to have these advantages brought into efficient co-ordination with the land transportation lines.

This is a question that an answer will be sought for in the survey proposed. It is not expected that any real development work will begin until the war situation has been cleared up; the purpose is to prepare for the future and along intelligent, comprehensive lines.

Guelph and Ontario Investment and Savings Society

Incorporated A. D. 1876

DIRECTORS:

A. B. PETRIE, Manufacturer, Guelph and Hamilton, President.
GEORGE D. FORBES, Mfr., Guelph and Hespeler, Second Vice-Pres.
J. E. McELDERRY, Guelph.

H. HOWITT, M.D., Guelph, First Vice President.
CHARLES E. HOWITT, Retired Banker, Guelph.
W. E. PHIN, Contractor, Hamilton.

FORTY-SECOND ANNUAL REPORT

December 31st, 1917.

The Directors of the Guelph and Ontario Investment and Savings Society present to the Shareholders their report for the year ended December 31st, 1917.

After paying interest on deposits and debentures, war taxes and all other charges and expenses, the net profits for the year amount to $129,397.96, to which is to be added the balance brought forward from the previous year, viz.: $38,116.22, and premium on new stock $2,312.50, making a total of $169,826.68, which has been apportioned as follows:

Dividend No. 82, paid 2nd July, 1917	$37,465.17
Dividend No. 83, payable 2nd January, 1918	39,040.68
Added to Reserve Fund, (premium on stock)	2,312.50
Added to Reserve Fund from profits	50,000.00
Amount carried forward	41,008.33

The Reserve Fund now amounts to $739,435.00, the paid-up Capital Stock is $782,701.90 and the total Assets of the Society are $4,353,512.83.

The Securities held by the Society have been carefully examined by the Board and found very satisfactory. Payments on mortgages were well met during the year.

We have pleasure in reporting a further increase in the amount invested by the public in the Society's Currency Debentures. Sterling Debentures issued to investors in Great Britain amount to $171,183.97.

Our investments in the Dominion of Canada War Loans amount to $297,474.33.

The sum of $1,200.00 was subscribed by the Society to the Canadian Patriotic Fund, and $200.00 to the Red Cross Fund, in 1917.

The accounts have been audited each month, and the Auditors' Report is presented herewith.

All of which is respectfully submitted.

A. B. PETRIE, President.

		$1,602,185.91

J. E. McELDERRY, Managing Director.

We have audited the books and vouchers of the Guelph and Ontario Investment and Savings Society monthly during 1917, and found them correct. We have also examined the Mortgages and calculated the value and earnings of the Mortgages, Municipal Debentures and Government Bonds, checked the Savings Department and Debenture balances, proved the Bank balances and certify that the foregoing Balance Sheet is a correct statement of the Society's affairs at December 31st, 1917. All our requirements as Auditors of the Company have been fully complied with.

Guelph January 31st, 1918.

Standard Reliance Mortgage Corporation

ANNUAL STATEMENT

There was a fair attendance at the annual meeting of The Standard Reliance Mortgage Corporation held on Monday last, the 4th inst. The following were present:—J. A. Walker, K.C., Chatham; S. G. Bartlett, New Hamburg; A. W. Hilborn, Galt; W. M. Behrens, Elmira; John Laing, Freeman; David Ratz, New Hamburg; Henry G. Ruppell, Elmira; Robert Moon, Orono; Geo. Hufner, Hawkesville; W. C. Bates, Sackville, N.B.; A. H. Arnold, Brockville; Thos. Nihan, St. Catharines; N. H. Stevens, Chatham; C. A. Annis, Port Union; H. Schlemmer, Woodstock; Dr. J. T. Gilmour, John Firstbrook, F. C. L. Jones, J. A. Jackson, W. Crackle, R. S. Stonehouse, Rev. W. P. Dyer, D. D. James, F. W. Micklethwaite, G. M. Wright, E. F. B. Johnston, K.C., R. H. Greene, W. T. Cowan, R. H. Cosbie, Fred. Walker, B. H. Boyd, W. J. Fawcett, J. W. McKay, Chas. Bauckham, Rev. G. I. Taylor, Geo. A. Young, Alex. Stewart, H. Waddington, R. E. Walker, Rev. B. R. Strangways, W. Vandusen, H. A. McEvoy, David Kemp, Mrs. L. Micklethwaite, H. W. Maw, O. S. James, E. P. Beatty, R. S. Weir, Toronto.

The President of the Corporation, Mr. N. H. Stevens, took the chair, and Mr. H. Waddington, the Managing-Director, was requested to act as secretary.

The annual statement as set out below was presented and read to the meeting by the Chairman, and after dealing with the business of the Company generally, he moved the adoption of the report.

The motion to adopt was seconded by Mr. John Firstbrook, the Vice-President, after which the Managing-Director gave a detailed address dealing in particular with the several items in the balance sheet, and giving comparisons with the years passed, from which he showed that as compared with a year ago, the assets had increased $1,046,804.88; that the deposits had increased $314,289.67; that the debentures had increased $686,554.10, that the net earnings had increased $47,938.97, and that in liquid assets the increase had been $360,650.70.

As compared with five years ago, the increases were as follows:—Assets, $3,326,222.27. Deposits, $623,549.69. Debentures, $1,690,672.28. Net Earnings, $82,979.70. Liquid Assets, $580,290.00.

The Mortgage Loans by Provinces were shown to be as follows:—Newfoundland, $1,323.08. Nova Scotia, $72,054.36. New Brunswick, $1,875.62. Qubeec, $2,018.97. Ontario, $5,565,091.69. Manitoba, $140,392.94. Saskatchewan, $645,324.74. Alberta, $177,961.96. British Columbia, $10,163.77. These mortgage loans with accrued interest at the end of the year made up a total of $6,651,501.74. The valuation of the properties on which these loans were made and as taken from the records was shown to be $13,201,954.

Several of the shareholders present expressed their pleasure at the fine showing made and at the information given, after which the motion to adopt the report was put to the meeting and declared carried unanimously.

Messrs. A. C. Neff, F.C.A., and J. F. Lawson, F.C.A., were on motion re-elected the Auditors of the Company for the ensuing year On motion the following were elected Directors:—E. F. B. Johnston, K.C., John Firstbrook, Nathan H. Stevens, E. Jessop, M.D., J. A. McEvoy, Herbert Waddington, W. J. Fawcett, David Ratz, James Gunn, David Kemp, E. C. McNally, Rev. G. I. Taylor, M.A., R. H. Greene, J. T. Gilmour, M.D.

At a meeting of the Board of Directors held subsequent to the annual meeting. Mr. E. F. B. Johnston, K.C., was elected Chairman of the Board; Mr. N. H. Stevens, President for the year; Mr. John Firstbrook, Vice-President.

The Sterling Trusts Corporation

The Annual General Meeting of the Shareholders of The Sterling Trusts Corporation was held at the Head Office of the Company on Monday, the 25th of February.

On motion Mr. E. F. B. Johnston, K.C., was elected Chairman of the meeting, and Mr. H. Waddington, the Managing Director, was requested to act as Secretary.

In moving the adoption of the Report, the Chairman outlined the operations of the Company, and dealt particularly with the changes recently made in the directorate and the enlarged scope of the operations of the Company by reason of them. As a result of these changes the Chairman was able to report to the meeting some business of considerable volume closed, which will add materially to the earning power of the Company and which will show substantially in the the current year's operations.

The motion to adopt the Report was seconded by Mr. John Firstbrook, Vice-President, and the Balance Sheet and Loss and Gain Account were gone into in detail and explained by the Managing Director, and in so far as they referred to the Western business of the Company, were dealt with by Mr. Geo. H. Bradshaw, the Manager of the Branch at Regina.

The Capital Account showed an increase of $56,273.34 over the account of a year ago; the Guaranteed Trust Account showed an increase of $121,877.56, and the Estates and Agency Accounts an increase of $564,496.19. The assets on Capital Account now amount to $519,603.07; on Guaranteed Trust Account to $603,520.83, and on Estates and Agency Account to $3,491,822.14, making a total of $4,614,946.04.

From the net earnings of the Company the sum of $15,000 was added to the Reserve Fund, making that fund stand now at $75,000 and the balance carried forward was $8,998.45.

A by-law passed previously by the Directors increasing the number of the Board was submitted for ratification, and passed unanimously.

The nomination of Directors was then proceeded with, and the following gentlemen were declared elected for the ensuing year.

OFFICERS AND DIRECTORS

President

E. F. B. JOHNSTON, K.C., Toronto

Vice-President, The Royal Bank of Canada.

HEAD OFFICE - - - - TORONTO

WESTERN BRANCH OFFICE - - REGINA, Sask.

PERSONAL NOTES

Mr. C. S. Howard, lately of the foreign department of the Dominion Bank, head office, Toronto, has been appointed assistant manager of the Montreal branch in place of Mr. L. H. Seale, who has resigned.

Mr. A. H. Clement has been appointed manager of the Montreal branch of the National Life Assurance Company, of Toronto. Mr. Clement has been connected with the Gresham Life Assurance Society, and goes to the National Life well recommended by the Canadian management of that company.

Mr. V. E. Gray, M.A., LL.B., has been appointed by the Dominion Department of Finance, Ottawa, as assistant to the commissioner of taxation. He is a graduate of McMaster University and Osgoods Hall, joining the Trusts & Guarantee Company, as trust officer, immediately after leaving Osgoode Hall, in 1914. He was made manager of the Toronto branch of that company in 1917.

V. E. GRAY.

Hon. W. J. Hanna, K.C., has been appointed president of the Imperial Oil Company of Canada in succession to Mr. Walter C. Teagle, now president-elect of the Standard Oil Company of New Jersey. He was formerly provincial secretary for Ontario, and more recently food controller. Mr. Hanna has been the legal adviser of the Imperial Oil Company since its early days, and latterly has been one of its directors, although his activities have been largely of a public character. Mr. Hanna was appointed food controller on June 20th of 1916, and retired from that office on January 24th last. When he relinquished his duties as food controller it was stated that his services had been unofficially requisitioned for the greater task of increasing the production of crude oil and essential petroleum products, not only for munition manufacturing and other requirements, but to provide a larger volume of these products for export for the use of the Allies. It is understood that pressing needs of increased production in the petroleum industry occasioned Mr. Hanna's present visit to Peru, an important source of petroleum at present. Mr. Hanna first achieved a reputation as a business executive by the development of several government enterprises, originally designed only to employ prison labor, into profitable commercial propositions, and as a practical philanthropist by his complete revolution of the administration of penal institutions under his control as provincial secretary, and by the substitution of reformation for punishment in the treatment of inmates. He became a member of the Ontario legislature in 1902, and in February, 1905, was made provincial secretary. He held this portfolio until December, 1916, when he became minister without portfolio.

Sir John Aird, general manager of the Canadian Bank of Commerce, has sailed from New York for Brazil. The trip is expected to occupy about two months.

Mr. William Dineen has been elected a director of the Crown Life Insurance Company, Toronto. He is associated with the firm of W. & D. Dineen, the well-known fur, hat and dry goods retail house, Toronto.

WILLIAM DINEEN,

Sir Frederick Williams-Taylor, general manager of the Bank of Montreal, returned on March 2nd from Washington, where he spent several days with the Prime Minister and Hon. A. K. Maclean, acting minister of finance. In reply to an inquiry as to whether the mission had been successful, Sir Frederick referred to the statement of the Prime Minister expressing satisfaction with what had been accomplished.

Mr. L. H. Seale, formerly of the Montreal branch of the Dominion Bank, has left for New York to become head of the foreign exchange department of W. R. Grace & Company's bank. Mr. Seale resigned the assistant managership of the Montreal branch of the Dominion Bank to take up the New York post, being succeeded by Mr. C. S. Howard, formerly of the head office of the Dominion Bank, Toronto.

Mr. G. A. MacDonald, for thirty years with Justice Britton and J. L. Whiting, barristers, has been appointed inspector of taxation under the new Income Tax Act, with headquarters at Kingston. Mr. MacDonald's district comprises Frontenac, Leeds, Lennox and Addington, and Prince Edwards, Hastings, Northumberland and Durham. He will take over his duties at once and will open an office at Kingston.

PENMANS, LIMITED

At the annual meeting of Penmans, Limited, it was announced that the common stock of the company had been placed on a 6 per cent. per annum basis, a dividend of 1½ per cent. having been declared for the quarter ending April 30th.

Accompanying the increased quarterly dividend is a bonus of 1 per cent. Both will be payable May 15 to shareholders of record May 6.

The shareholders' return in the past two years has been 5 per cent., made up of 4 per cent. dividend and 1 per cent. bonus. As a quarterly dividend of 1 per cent. and a bonus of 1 per cent. have just been paid, the minimum return this year will be 7½ per cent., presuming the maintenance of the new 6 per cent. rate.

Sir Charles Gordon, president, commenting on the dividend question, stated that, while there had been complaint that the company should make larger distributions of profits, he considered it had been paying as much as it ought to. The company was obliged to carry large stocks of raw material and manufactured goods and had to borrow from the banks to finance them. He also pointed to the fact that a great deal of the company's recent activity was due to war conditions. These were instanced as reasons why the company should proceed cautiously in the matter of dividend distributions.

SUN LIFE KEEPS GROWING

THE results of operations for the year 1917 show a continuance of the notable expansion that has marked the career of the Sun Life Assurance Company of Canada. In Assets, Income, Surplus, New Business, and Total Business in Force substantial increases are recorded over the corresponding figures for previous years.

RESULTS FOR 1917

Assets at December 31st, 1917.			$90,160,174.00
Increase			7,211,178.00
Cash Income			19,288,997.00
Increase			789,866.00
New Assurances issued and *Paid for in Cash*			47,811,567.00
Increase			5,039,270.00
Assurances in Force at December 31st, 1917.			311,870,945.00
Increase			30,436,245.00
Profits paid or allotted to Policyholders			1,560,389.00
Increase			449,488.00
Profits paid or allotted to Policyholders, in past five years.			5,224,063.93
Total Payments to Policyholders, 1917.			8,840,245.00
Payments to Policyholders since organization	$69,094,316		
Assets held for Policyholders	90,160,174		
		$159,254,490	
Premiums received since organization		153,361,226	
Payments to Policyholders and Assets held for them exceed the premiums received by:		**$5,893,264**	
Undivided surplus at December 31st, 1917, over all liabilities including capital			**$8,550,761.00**

THE COMPANY'S GROWTH

YEAR	INCOME	ASSETS	LIFE ASSURANCES IN FORCE
1872	$ 48,210.73	$ 96,461.95	$ 1,061,350.00
1887	477,410.68	1,312,504.48	10,873,777.69
1897	2,238,894.74	7,322,371.44	44,983,796.79
1907	6,249,288.25	26,488,595.15	111,135,694.38
1917	19,288,997.68	90,160,174.24	311,870,945.71

The Company takes this opportunity of thanking its policyholders and the public generally for the continued confidence and goodwill of which the above figures give such strong evidence.

SUN LIFE ASSURANCE COMPANY OF CANADA

1871 HEAD OFFICE MONTREAL 1917

T. B. MACAULAY, President

CANADIAN NORTHERN STOCK ARBITRATION

The case for the Canadian Northern Railway, in connection with the Canadian Northern Railway arbitration proceedings at Osgoode Hall, Toronto, was concluded on Wednesday. As Mr. W. N. Tilley, K.C., government counsel, was not ready to go on with his case, Sir William Meredith, chairman of the arbitration, announced an adjournment of the hearing, sine die, with a proviso that a date be set by the arbitrators upon the application of either parties.

Hon. F. H. Phippen and Messrs. I. F. Hellmuth, K.C., and Pierce Butler, for the company, protested against a lengthy enlargement of the government's side of the case, on the ground that it would force the Canadian Northern Railway to assume the responsibility of unnecessary expenditures and the loss of $2,000 a day interest on the maximum amount of $10,000,000 set by the government to be paid Mackenzie and Mann for their common stock.

HAMILTON PROVIDENT AND LOAN SOCIETY

In four years, the Hamilton Provident Loan Society will celebrate its semi-centenary. Its report for the past year makes an excellent showing, indicating a strong financial position and satisfactory results achieved during 1917. Mr. George Hope is president of the company and with him on the directorate are a number of other influential and capable business men. Mr. D. M. Cameron is treasurer of the company and is an able official in whom the directors have complete confidence.

At the annual meeting this week, the president called particular attention to the satisfactory nature of the society's investments, which consist of $3,142,670 in first mortgages on improved farms, $775,816 in first mortgages on productive city and town property, $275,362 in government and municipal debentures, and $10,445 in call loans on stock. The net profits of the company for the past year, after providing for all interest due and accrued on borrowed capital, cost of management, contributions to Patriotic Funds, and all other charges, amounted to $177,267. Dividends absorbed $96,000 of that sum. Other appropriations were: Government and business tax, $3,026; war tax, $5,759; added to reserve fund, $70,000; credited to contingent fund, $2,481. The reserve fund now amounts to $1,130,000 and exceeds 94 per cent. of the paid-up capital. The contingent fund stands at $33,994.

Payments falling due under mortgages during the year, both in Ontario and the western provinces, have been particularly well met. It was deemed advisable, in view of the continued high rate of interest prevalent in Great Britain, to retire a considerable proportion of our maturing sterling debentures.

STEAMSHIPS DEAL

It became known in Montreal this week, says The Gazette of that city, that western interests, headed, it is understood, by James Playfair, of Midland, were bidding for the purchase of the Northern Navigation Company's passenger service on the Great Lakes, reports stating that $2,000,000 had been offered to Canada Steamships Lines, Limited, as owners of the Northern Navigation Company.

When the attention of Mr. James Carruthers, president of the Canada Steamships Lines, was drawn to the report, Mr. Carruthers admitted that there had been some negotiations, but stated that no price of $2,000,000 had been mentioned. At the annual meeting of the shareholders earlier in the day, Mr. Carruthers had pointed out that the company was continuing to make changes in its fleet, selling some vessels and buying others, according to its judgment as to the benefits of these sales and replacements on the future business of the company.

In connection with the current negotiations re the Northern Navigation fleet, Mr. Carruthers said that the company was prepared to sell if a favorable price was offered, but that nothing further could be said at this time. He intimated that if the $2,000,000 price suggested was offered there might be business doing.

Mr. James Playfair was head of the Northern Navigation Company, which was acquired by the old Richelieu and Ontario Navigation Company in 1911. For a time he was vice-president and managing director of the latter company, when control passed to the group which organized the Canada Steamships Lines, Richelieu's successor.

CITY DAIRY COMPANY

The net profits of the City Dairy Company for the past year, according to the company's annual report, were $70,374, after making the usual deductions. With $48,959 brought forward from 1916 there was a total of $119,334 for distribution. Of this $35,000 was carried to the general reserve account. The net profits for the year showed an increase of $52,256. Mr. C. B. McNaught, president of the company, made the following statements at the recent annual meeting:—

"The important operating economies which were introduced during the year have worked out the results expected, notwithstanding the very heavy increases in operating expenses which we have had to bear during the period under review. The volume of business transacted in the year shows a reasonable gain, and the general physical condition of the plant has been maintained at the highest point of efficiency.

"The balance sheet shows some important changes in amounts of assets and liabilities due principally to the fact that the bankers' advances to S. Price and Sons, Limited, were made to this company, and advances made by this company in turn to S. Price and Sons, Limited.

"The management has had in view for considerable time the actual merging of the business of S. Price and Sons, Limited, with that of this company, but for various reasons this could not be accomplished until the end of 1917.

"Toward the end of December the entire distribution of milk and dairy products, formerly made by S. Price and Sons, Limited, was taken over by the City Dairy organization, and is now being delivered from its plant, and, it is expected, the coming year will show important operating economies due to this change."

YIELDS ON INVESTMENTS IN STOCKS AND BONDS

The following table of investment yields of stocks and bonds has been compiled for *The Monetary Times* by Messrs. Morrow & Jellett, Members. Toronto Stock Exchange, 103 Bay Street Toronto:—

Mar. 6th, 1918.

	Div. Rate	Price about	Yield about

Hon. John Oliver, who has succeeded the late Hon. H. C. Brewster as premier of British Columbia, was born in Hartington, Derbyshire, Eng., on July 31, 1856, where he was educated. He came to Canada in 1870. He was married in June, 1886, to Miss Elizabeth Woodward, of Mud Bay, B.C. By occupation he is a farmer and rancher. He was elected to the British Columbia legislature for Delta in 1900, and sat for that riding until 1909, when he was elected leader of the then Liberal opposition.

PRICE, WATERHOUSE & COMPANY.

Montreal, March 2, 1918.

We have audited the books and accounts of the Nova Scotia Steel & Coal Company, Limited, and subsidiary companies, for the fiscal year ending December 31st, 1917, and we certify that, in our opinion, the attached balance sheet is properly drawn up and shows the true financial position of the combined companies at December 31st, 1917, and the relative profit and loss account is a fair and correct statement of the results of the operations for the year.

(Sgd.) PRICE, WATERHOUSE & COMPANY

COMPARATIVE PRODUCTION COSTS

How the Iron and Steel Industries of Canada and United States Compare in That Factor

In an exhaustive review of the position of the iron and steel industries in Canada, Mr. C. F. Whitton, at the annual meeting of the Iron and Steel Section of the Canadian Mining Institute, compared the cost of production of iron and steel in Canada and the United States.

"The bulk of the export trade of the United States in iron and steel products," he said, "has been developed from the beginning and is now being carried on extensively and principally by the United States Steel Corporation, the greatest undertaking of the kind in point of size, resources and variety of products in the world, and other large concerns located in the Buffalo, Cleveland, Youngstown, Pittsburgh and Chicago districts.

"The United States Steel Corporation, as is well known, owns vast ore deposits in the Lake Superior region with which its plants in these districts are supplied. It also owns and operates the mining railroads which transport the ore to the upper lake ports, the boat lines which carry ore to the lower lake ports and the railroads which take the ore from the vessel to the blast furnaces. All the other principal independent companies, practically own and control their supply of ore as well as vessels transporting it on the Great Lakes.

Ore in Open Market.

"Those iron and steel industries that are not so fortunately situated in this respect are forced to buy their ore in the open market, where a very large proportion of the total ore consumed is sold each year by mining companies that do not own blast furnaces or are not financially associated with blast furnace interests. The market price of ore is fixed each fall for the succeeding year, and the prices of various grades sold by different mines are based on four standard grades, namely, Old Range, Bessemer and Non-Bessemer; and Mesabi, Bessemer and Non-Bessemer. The metallic contents of these ores is taken as a standard, and the price of all other ores is adjusted according to their variation from this standard in metallic contents, phosphorus and moisture.

"The published prices for the last seven years of these four grades, which are based on delivery at Lake Erie docks, have been as follows:—

	Old Range		Mesabi		Frt. Rate G.T. to Lake Erie ports.
	Bess.	Non-Bess.	Bess.	Non-Bess.	
1910	$5.20	$4.20	$4.75	$4.00	$0.55
1911	4.50	3.70	4.25	3.50	.50
1912	3.75	3.00	3.50	2.85	.40
1913	4.40	3.60	4.15	3.40	.45
1914	3.75	3.00	3.50	2.85	.40
1915	3.75	3.00	3.45	2.80	.40
1916	4.45	3.70	4.20	3.55	.50

The standard iron content for Bessemer ores is 55 per cent.; for Non-Bessemer, 51.50 per cent.

"As all the figures in this paper relative to production, imports, and manufacturing capacities of plants are for the years 1911-1915 inclusive, the average of the ore prices for these years may be taken as representing the normal price during that period. This average is $3.08 per G.T. unloaded on Lake Erie dock for Mesabi iron ores.

Comparative Costs.

"The comparative costs of making pig iron and steel in the various processes of manufacture from pig iron to the finished product, may now be considered, and in this connection the estimated cost of mining and transporting Mesabi ore to Lake Erie ports in the years 1910 and 1915, respectively, is given in the following table:—

	1910.	1915.
Cost of ore at mine, including labor, expense, depreciation and royalty	$1.23	$1.23
Railway freight	.41	.40
Lake freight	.62	.40
Total cost lower lake ports	$2.26	$2.03
Quoted market price	4.00	2.80
Profit	1.74	.77

"The freight rates for the year 1910 as shown represent the net transportation costs of the United States Corporation, using its own railroads and lake vessels, whereas in 1915, the lake freight charge of 40 cents is the open market contract price. Taking the average of these two costs at lower lake ports as $2.15 and comparing it with average market price of $3.08 for the 5-year period, the average price paid in the open market by companies not controlling their own ore mines has been 93 cents above that of the Steel Corporation and other large United States companies. In addition to this difference, it should be pointed out that the average freight rates given above would include a profit of not less than 15 cents a ton on ore to companies owning their own mines, railroads, and lake vessels. It seems fair, therefore, to assume that small concerns which buy their ore in the market—and in this category is included all the Ontario iron and steel undertakings using ores imported from the United States—have to pay over $1 per ton on ore more than the large American companies. Assuming that an average of two tons of ore is required to make one ton of pig iron, the difference in increased cost of pig iron for ore alone is therefore at least $2.

Have Own Coal Mines.

"Most of the large concerns in the United States also own coal mines from which is obtained all the coal required by them for coking, miscellaneous heating and steam purposes. These coal lands are situated in Ohio and Pennsylvania where, in the Connellsville region mainly, the better grade of coal is found. These fields are in easy reach of Pittsburgh, and the cost of transuportation on coal is therefore very small. The greater part of the coal is brought to the coke ovens at the blast furnaces for coking. Coal used in the Chicago district is brought partly from Pennsylvania and partly from Illinois and Indiana. This coal is high in ash and volatile matter, and must be mixed with the better grade of coal from the Connellsville and Pocohontas region. It has been found that the average selling price of coke for the 5-year period, 1910-1915, was about $2 per N.T. at ovens, and the average cost to the United States Corporation was about $1.60. For the purpose of estimating the present cost of pig iron, a profit of 25 cents per ton has been assumed. The total profit on ore and coke per ton of iron would therefore be $2.40. It is apparent, therefore, that the cost of transportation of ore and coal or coke, is a very large factor in the cost of production of pig iron, and the total cost of assembling raw materials is the deciding feature affecting the economic location of blast furnaces.

Freight Rates Factor.

"The freight rates on ore and coal from Lake Superior mines to blast furnaces at three Ontario points and in the three principal American districts are tabulated hereunder. The three Canadian plants located in Ontario are selected for reference because they are principally concerned in the competition originating from the United States, especially on account of drawing their supply of ore and coal from the same districts as the American furnaces.

Freight Rates and Total Assembling Cost on Ore and Coke.

	Freight on ore G.T. Lake, rail and handling per ton iron.			Freight on coke (N.T.) rail and boat per ton iron.		Total cost per ton iron.	
				Basic.	Fdry.	Basic.	Fdry.
Sault Ste. Marie...	$0.30	$0.10	$0.80	$2.20	$2.64	$3.00	$3.44
Hamilton	.40	.65	2.10	2.40	2.88	4.50	4.98
Port Colborne	.40	.10	1.00	2.40	2.88	3.40	3.88
Buffalo	.40	.10	1.00	1.85	2.22	2.85	3.22
Pittsburgh	.40	.88	2.55	.75	.90	3.30	3.45
Chicago	.40	.10	1.00	2.00	2.40	3.00	3.40

	Basic.	Fdry.
Average cost at Sault Ste. Marie, Hamilton and Port Colborne	$3.63	$4.10
Average cost at Buffalo, Pittsburgh and Chicago	3.05	3.36

"Sault Ste Marie, Port Colborne, Buffalo, and Chicago are all lake points and the rail haul to the blast furnaces is therefore negligible. A charge of 10 cents for switching and unloading has been assumed as the approximate cost of handling at these points. The total freight charge on ore per ton of iron is based on the estimated consumption of two tons of ore per ton of iron. The freight on coke, in the case of Sault Ste. Marie, includes the cost of a rail haul to Buffalo and boat to the Sault; while in the case of Chicago, the freight rate is based on an estimate of the proportion of coal brought from Pennsylvania together with that mined in Illinois and Indiana. The freight rate on coke per ton of iron is based on

Totals	$837,818,893	$787,739,302	+	$50,079,591

The Toronto bank clearings for February are $207,252,188, compared with $205,245,019 for the same month in 1917, and $175,366,901 in February, 1916.

Mr. T. A. Russell has been elected president of the Canadian National Exhibition, Toronto, succeeding Lieut.-Col. Noel Marshall. The presidency went to the new incumbent by acclamation, as did also the first vice-presidency to Mr. C. A. B. Brown, and the second vice-presidency to Mr. Robert Fleming.

The Hamilton Provident & Loan Society

The Forty-Sixth General Annual Meeting of the Shareholders was held at the Society's Head Office at noon on March 4th, 1918.

The following were present: George Hope, Joseph H. Greene, Lt.-Col. Wm. Hendrie, W. H. Wardrope, Dr. E. B. O'Reilly, R. B. Davidson (Ottawa), H. W. Clarkson, John Hooper, F. W. Gates, Dr. F. Hansel, E. G. Payne, Wm. Dixon, John E. Brown, T. H. Crerar, W. A. Stewart, G. E. F. Smith, D. M. Cameron, Jas. Whicher, Wm. Aitchison, R. Butler, J. McCoy, F. H. Lamb, D'Arcy Martin, Chas. Judd, James E. Brown, Archdeacon Forneret, Dr. J. A. Locheed.

The President, Mr. George Hope, having taken the chair, the Treasurer, Mr. D. M. Cameron, acting as Secretary, read the notice calling the meeting, and the Financial Report, as follows:

The Directors beg to submit to the Shareholders the Forty-Sixth Annual Report of the Society's affairs, with accompanying Financial Statement for the year ending December 31st, 1917, duly audited.

The net profits for the year, after providing for all interest due and accrued on borrowed capital, cost of management, contributions to Patriotic Funds, and all other charges, amount to $177,267.17, which has been appropriated as follows:

Two half-yearly Dividends, at the rate of eight per cent. per annum...	$96,000.00
Government and Business Tax	3,026.42
War Tax...	5,759.61
Added to Reserve Fund	70,000.00
Credited to Contingent Fund	2,481.14
	$177,267.17

The Reserve Fund now amounts to $1,130,000.00, and exceeds ninety-four per cent. of the paid-up capital. The Contingent Fund stands at $33,994.20.

Payments falling due under Mortgages during the year, both in Ontario and the Western Provinces, have been particularly well met.

It was deemed advisable, in view of the continued high rate of interest prevalent in Great Britain, to retire a considerable proportion of our maturing Sterling Debentures.

The Directors have pleasure in again recording their appreciation of the valuable services rendered by Messrs. Gillespie & Paterson, W. S. Edinburgh, the Society's Agents in Great Britain.

The Officials and Staff continue to discharge their respective duties to the entire satisfaction of the Directors.

All of which is respectfully submitted.

GEORGE HOPE,
President.

Hamilton, January 26th, 1918.

D. M. CAMERON, Treasurer

The President called particular attention to the satisfactory nature of the Society's investments, which consist of $3,142,670.30 in first mortgages on improved farms, $775,816.65 in first mortgages on productive City and Town property, $275,362.60 in Government and Municipal Debentures, and $10,445.70 in Call Loans on Stock.

The Report was adopted on motion of Mr. George Hope, seconded by Mr. J. J. Greene.

The Directors were re-elected as follows: Messrs. George Hope, Joseph J. Greene, Henry L. Roberts, W. A. Wood, Stanley Mills and William Hendrie.

At a subsequent meeting of the Directors, Mr. George Hope was re-elected President, and Mr. J. J. Greene Vice-President.

VALUE OF LIFE INSURANCE

Here is an item from a Toronto daily paper:—

"Probate of the will of the late Walter Wilson Nation, manager of the Market branch of the Dominion Bank, was applied for by the widow, Mrs. Gertrude Emily Nation. The testator, who died on January 26 last, left an estate of $23,253 made up of $450 in household goods and personal effects, $11,650 insurance, $53 rent due, a summer home in Etobicoke $6,500 and $4,600 in real estate in Uxbridge."

DOMINION CANNERS, LIMITED

At the annual meeting of Dominion Canners, Limited, this week, the report presented showed net profits for 1917, before deducting bond interest, but after providing for business profits war tax, of $800,529, an increase of $132,522, or nearly 20 per cent. over 1916. The company wrote off for depreciation the sum of $258,182. The profits, with the credit balance brought forward from 1916, made a total of $1,258,944. The balance carried forward this year is $990,338 after paying interest on bonds of $108,263 and dividends on preferred stock of $160,342. In addition to this reserve the company has $150,000 as an insurance reservation. The results were termed satisfactory by President J. J. Nairn.

At the meeting all back dividends on the preferred stock, amounting to 12¼ per cent., and in addition a quarterly dividend of 1¾ per cent., were declared. payable 50 per cent. in cash and 50 per cent. in Dominion of Canada Victory Loan. This distribution is to be made on April 1.

SUN LIFE ASSURANCE COMPANY

From a little company in 1872 with income of only $48,210, and life insurance in force of $1,064,350. the Sun Life Assurance Company of Canada has grown in size and strength until at the end of 1917 its income had increased to $19,288,997 and its insurance in force to $311,870,945. This is a record of which this great institution may well feel proud. Under the direction of Mr. T. B. Macaulay, as president, in counsel with an active and influential directorate, the company's policy is one of continual progress. The company has also a splendid head office staff. the executives being men of experience and ability. The Sun Life's energetic field force, under capable branch managers, is also an important factor in the company's success. The rapid strides of the company are seen at a glance in the following table:—

Year.	Income.	Assets.	Life assurances in force.
1872	$ 48,210	$ 96.461	$ 1,064.350
1887	477,410	1,312,504	10.873.777
1897	2,238,894	7,322,371	44.983,796
1907	6,249,288	26,488.595	111,135,694
1917	19,288,997	90,160,174	311.870,945

In all branches of the company's business where increases are desirable the company recorded gains last year. The appreciation in various directions is shown at a glance in the following table:—

	At December 31st, 1917.	Increase during year.
Assets	$ 90,160,174	$ 7.211,178
Cash income	19,288,997	789,866
New assurances issued and paid for in cash	47,811,567	5.039,270
Assurances in force	311,870,945	30,436.245

The company has excellent records in other directions. The total payments to policyholders in 1917. for example, were $8,840,245. The payments to policyholders since organization amount to $69,094,316 and the assets held for policyholders total $90,160,174. The company has received premiums since organization of $153.361,226. Payments to policyholders and assets held for them exceed the premiums received by $5,893,264. The undivided surplus at December 31st, 1917, over all liabilities, including capital, was $8,550,761. These are remarkable figures and are additional testimony to the strength of one of our foremost financial institutions.

DOMINION FIRE INSURANCE COMPANY

The report of the Dominion Fire Insurance Company for 1917 reflects substantial progress, investments of an excellent character and a fair return. The company has a reputation especially for prompt payment and adjustment of claims and the company is very zealous in maintaining this good reputation along those lines. The directorate and management deserve credit for guiding this growing Canadian fire insurance company towards the right goal.

The fire premiums received last year amounted to about $46,000 and the hail premiums $50,000. The result of the year's operations was a surplus of $47,842. The assets total $426,858, and after writing off the security values by $13.587. the surplus on the policyholders' account is $34,412 more than at the end of 1916, being now $162,337. The list of the company's assets indicates conservative investment of the funds, which are of a liquid character.

NOVA SCOTIA STEEL AND COAL COMPANY

The annual statement of the Nova Scotia Steel and Coal Company is issued this year to cover the operations of the parent company and all its subsidiaries, thus a consolidated balance statement is issued to cover both the Nova Scotia Steel and Coal Company and the Eastern Car Company. On this account, comparisons with previous years cannot be made satisfactorily. The change has evidently been made at the suggestion of the auditors of the company, as the Scotia Company has guaranteed the bonds of the subsidiary and owns all the common stock. An analysis of the general consolidated balance sheet indicates that Scotia is now in a strong financial position, the total current assets being over $10,000,000 in excess of current liabilities. The combined profits from operations, after providing for maintenance and renewal expenditures, but before deducting depreciation, interest charges, etc., for the year ended December last was $3,069,449.23, before deducting proportion of commissions and discounts on securities written off, provision for depreciation, income tax, etc., which amounted to $976,113.20, leaving profits of $2,093,336.03. Deductions included interest on the 5 per cent. mortgage bonds of the Nova Scotia Steel and Coal Company, Limited, $287,121.13; on the 6 per cent. debenture stock of the Nova Scotia Steel and Coal Company. Limited. $263,296.87; on the 6 per cent. mortgage bonds of the Eastern Car Company, Limited, $58,401; on bank loans and advances, $144,040.20; total, $752,858.20, leaving total net profits of $1,340,477.83, which, added to the surplus on January, 1917. of $3,532,114.63, made an amount for distribution of $4,872,592.46. Other deductions included dividends on the 8 per cent. cumulative preference stock of the Nova Scotia Steel and Coal Company, Limited. $80,000; cash dividend declared on the ordinary stock of the Nova Scotia Steel and Coal Company, Limited. $562,500; stock dividends declared on the ordinary stock of the Nova Scotia Steel and Coal Company, Limited, $2,500,000. totalling $3,142.500, leaving the surplus carried forward $1,730,092.46.

The company is in a strong financial position and has a splendid future. The work of Mr. Frank H. Crockard, the general manager, has proved very effective, but its full value will be demonstrated after the war. when financial and general conditions are again normal. Mr. Crockard's ability and experience are assets of considerable importance to the company. Mr. Thomas Cantley remains as chairman of the board and his counsels have been of great use during the past year. The company has an influential directorate, Mr. W. D. Ross looking after the financial affairs of the corporation.

According to the Paris correspondent of the London Financial Times, it is estimated that the foreign capital invested in Russian State guaranteed securities and in Russian enterprises amounts to some £800,000,000, of which amount £600,000,000 is stated to be French capital. Of the total amount about £480,000,000 is invested in Russian State bonds and state guaranteed railways. Since the war the allied governments have given enormous financial assistance to Russia, thus greatly increasing the total indebtedness of Russia.

NEW ISSUE

Offering of

$6,900,000

Five Year 6% Refunding Gold Bonds

CITY OF MONTREAL

DATED 1st DECEMBER, 1917 DUE 1st DECEMBER, 1922

Interest payable half-yearly—1st June and December.

Principal and Interest payable in Gold at the City Treasurer's Office, Montreal, or at the Agency of the Bank of Montreal, New York.

Bonds issued in Coupon form in denominations of $100, $500 and $1,000.

ISSUE PRICE—PAR.

A full half year's interest will be paid 1st June, 1918.

The bonds therefore give a net yield to the investor of about 6½%

THE BANK OF MONTREAL, Fiscal Agent of the City of Montreal, is authorized to offer the above-named bonds for public sale on behalf of the City, at par, without accrued interest, payment to be made in full on 8th April, 1918, against delivery of the bonds at any Branch, in Canada, of the BANK OF MONTREAL, or of any bank the applicant may specify, or at the Agency of the BANK OF MONTREAL, New York or Chicago.

The issue is made to refund a like amount of Montreal Three-Year 5% Notes, the original issue having been made for public works, in anticipation of a permanent loan.

Beginning 25th February, 1918, applications for the bonds will be received by the BANK OF MONTREAL, MONTREAL, or any of its branches, from whom application forms and copies of the prospectus giving full particulars of the issue may be obtained on request. The offering is subject to withdrawal on or before the 18th March, 1918.

Applications should be addressed to the

BANK OF MONTREAL, MONTREAL

and should contain full instructions as to place of delivery and payment suitable to the applicant, and the denominations of bonds required.

The issue is made with the approval of the Minister of Finance, Ottawa.

CANADA'S GREAT OPPORTUNITY

Irish Flax Crop of 1918 from Canadian Seed, and Grown by Canadian Methods

BY ALFRED S. MOORE,
Author of "Flax from Field to Factory," etc.

Belfast, February 10th, 1918.

Work well begun is work half done. Surely the solid truth behind this aphorism cannot be too forcibly brought home to Canadian agriculturists just now with regard to the magnificent opportunity afforded them for taking a big share in the supply of the flax necessary for the world's linen trade. For years past the Dominion Department of Agriculture—and especially Mr. G. G. Bramhill, B.S.A., Chief of its Division of Economic Fibre Production—has labored incessantly to encourage Canadian farmers to grow flax for its fibre as a lucrative crop. It must be stated, however, that their labors have met with moderately varying success.

The cultivation of this crop was first introduced into the Dominion at the time of the American Civil Yar, and for a time certainly it was a flourishing industry in south-western Ontario. However, with the opening up of the Canadian North-West and the great industrial development of Canada came a change which had a potent influence on flax growing possibilities. Farm labor became both scarce and high priced. So under these adverse conditions it gradually became impossible to grow flax fibre in Canada to compete with that imported into the linen manufacturing centres of Ireland and Scotland from Russia. At one time so prosperous was not alone the growth of flax as a crop, but its further preparation, that there were some 80 scutching mills in the Province of Ontario, though before the present war the number had declined to about eight for that province, and only about 2,000 acres represented the flax growing area.

Canadian Flax Industry.

The Canadian flax industry has great possibilities—so great that just now the gate to success stands wide open awaiting its entry. Albeit, that success will only be achieved if growers and manufacturers alike will profit by the errors which have hitherto brought about the decay of the industry. Thus we may go back to the lesson taught by the failure of the first linen mill in Canada. That was in the sixties, when Mr. Elliott and Mr. Sheriff, woolen manufacturers of Almonte combined with Mr. George Stephen (the present Lord Mount Stephen), of George Stephen and Company, wholesale dry goods dealers, of Montreal, to form a linen manufacturing company. Machinery of the best type procurable was purchased by them, and so at Preston was established in a building—still existent as a portion of the woolen mills of George Pattinson & Company—the first Canadian linen mill.

Cotton Became Cheap.

Its career was not lengthy because with the cessation of the American War cotton became cheap again, but the still greater adverse influence was the impossibility of getting the Canadian farmers to grow the flax. So George Stephen and those with him in this hopeful concern had no other alternative but to close down the linen business and sell the machinery at scrap prices to minimize their loss of many thousand dollars. Similar causes—especially lack of raw material—brought about the untimely end of another and still larger contemporary linen mill, that run by Mr. Perine, of Doon, associated with the Gooderhams of Toronto. It is, of course, known that this mill at Streetsville, Ontario, is still in operation, but its survival was only due to herculean efforts on the part of Messrs. Perine & Company in insisting that a continuous supply of flax should be forthcoming from the farmers. I have mentioned these examples to show that if a flax—and linen—industry is to be successful in Canada it will only be by the reliable and mutual interdependence of the flax growers and linen manufacturers. It is the self-same cause—the unreliability of the raw supply—this time for Irish linen manufacturers, which gives Canada a magnificent opportunity to enter the industry not alone as growers of flax for the seed but also for its fibre, and further for its manufacture into the various linen products.

The activity shown at the convention of the Canadian Flax Growers held at London, Ontario, exactly a year ago—February 28th and March 1st, 1917—is one good omen that Dominion agriculturists are alive to the possibilities of the prosperous development of a Canadian flax industry. These possibilities further increased within recent months by other developments which should give an impetus to every progressive well-wisher of Canada in the hopes that the Dominion may aim not alone at home supplies, but also take a prominent position not alone in supplying the world's demands for seed and fibre, but also entering more largely in an enterprise to supply certain qualities of the finished linen goods.

Surely Canada is not behind either Russia—or Ireland for that matter—in friendly emulation and competition. So two examples of Irish enterprise in Canada are object-lessons in themselves. Thus it is well known that the chief shareholder of the Ontario Flax Company, which last season had about 1,400 acres as well as five scutching mills in operation, is Mr. James G. Crawford, the head of the York Street Spinning Company, of Belfast, Ireland. Another Irish firm also interested in Canadian flax is Lindsay Thompson & Company, of Belfast, and last season their manager at Sarnia had about 500 acres of fibre crop besides a well equipped mill under his control at Sarnia.

Can Canadian agriculturists and farmers not profit by these object lessons?

Irish Linen Manufacturers.

If further stimulus to activity and organization be needed it is forthcoming in the still more outstanding facts that at a mass meeting of the Irish linen manufacturers held in the Ulster Hall, Belfast, a few weeks ago, it was decided that to provide for this year's Irish flax crop not alone should Canadian seed be imported but also that the Canadian plan of cultivation should be largely pursued. While both these steps must be regarded as a high compliment to the Dominion one may well ask if it is not also an undeniable omen that Canadians must bestir themselves still more in the development of their flax industry.

What steps have rendered it necessary for the Irish linen trade to depend on Canada for their seed supply may not be fully known to the general reader, so some consideration of the causes cannot fail to be of interest. Although Ireland fifty years ago had over 300,000 acres growing flax fibre for her linen trade, this area—through the indifference alike of the farmer and of the manufacturer, it must be confessed—gradually dwindled during successive years, until in 1914 it was under 50,000 acres. In fact, in 1909, it was only 38,000 acres. One cannot altogether blame the Irish farmers for, as Mr. W. H. Webb, the president of the Linen Merchants' Association, has outspokenly declared, the manufacturers were lackadaisical and even unpatriotic to a degree. "They lived just by the will of the Lord. If He sent them flax no matter from where—all right. If He did not—then they groused." Into such a state had this indifference brought them, though the world still continued to clamor increasingly for Irish linen, that during the years preceding the war's outbreak the flax grown in Ireland had dwindled to be only one-fifth of the supply of raw material necessary for the great Irish linen industry, while of the remaining four-fifths the great bulk came from Russia. There were millions of acres in the British colonies quite hopeful and able to supply excellent fibre but no great encouragement was offered them. However, the linen manufacture—the third most important industry in the United Kingdom—slumbered on though on the top of a precipice until the extremely rude awakening came last November in the internal dissensions in Russia and the withdrawal of that nation from the ranks of the Allies.

Linen and Aeroplanes.

In an ordinary peace year this consequent shortage of raw material would merely have caused considerable inconvenience. But now when it is understood that the coming stroke of war must be decided in the mastery of the air, and linen is absolutely essential to the equipment of aeroplanes, it will be seen how grievous is the plight Russia's defalcation in raw flax places the Irish linen industry. As a matter of fact, one insistent order from the government was for 50,000,000 yards of the finest fabric for aeroplanes. It was only the initial order, and while it represents over one-third of the entire United Kingdom linen piece-goods exports for 1914, the surplus remaining for general civilian trade—together with the huge shortage by Russia's defection—was merely nominal, or at its best fractional. Such is the crisis the Irish linen trade found itself in at the dawn of the present year. Moreover, it was hopeless to trust any further to Russia. But there is no use of weeping over what must be endured, is there? It was up to the Irish linen industry to immediately

Exempt from Dominion Tax

It is good business to increase your holdings of **Victory Loan Bonds**, because the security is of the highest quality, the income return attractive, and you are not required to pay Dominion Income Tax.

ROYAL BANK BUILDING, TORONTO.

put their house in order so that they might not be caught slumbering again in false security.

Such was the state of affairs which brought about the great meeting, the most momentous meeting in the entire history of the linen manufacture, in Belfast the other week. There was no beating about the bush in a single sentence uttered either by the chairman, Mr. J. G. Crawford, the president of York Street Flax Spinning Company, or any other of the several speakers. It was an outspoken proclamation of intentions and determinations. Last year, entirely through government action, the Irish flax-growing area had been increased to 107,800 acres, though the yield through various reasons was not proportionate. For the coming season it would be necessary to increase this acreage almost three-fold, i.e., to at least 250,000 acres. The Irish farmer is sure that the crop will be lucrative to him since he will be rewarded, in addition to high prices, by bounties averaging $50 per acre. At present the price paid Irish growers for their flax fibre is round about $1,280 per ton, exclusive of the seed which he can retain. That price is not likely to diminish either for some years to come. Even should peace be declared today, there are linen stocks to be brought up to trading standard, and though the prices of the finished cloth has gone up by from 300 to 400 per cent. over pre-war prices, the demand of linen buyers has not been at all whetted.

Manufacturers Rent Acreage.

Further, too, the linen manufacturers—following the plan in Canada—have rented from the Irish farmers 4,000 acres of land ready for seeding in Ulster, and a similar 1,000 acres elsewhere in Ireland. A company representative of the entire trade will control these areas, supplying the seed, sowing the crop, harvesting the fibre and taking all the responsibility in its connection. And should the scarcity of labor prove a difficulty there is even in contemplation a plan whereby the mill operatives will be transferred to the country from the towns for a few weeks to engage in the pulling of the flax. Change of occupation is more or less a holiday, so to this latter part of the scheme the town dwellers are not likely to show any great aversion.

Coming to its financial side, the unanimous assent of the trade in general shows its declared verdict to the practicability of the scheme. As the failure of the linen industry would be more or less a national loss, the British government will be asked to guarantee $7,500,000 against any possible loss while the trade will provide another $2,500,000. Of this latter amount the spinners (on the basis of $1.20 per spindle) contribute $1,500,000; while the weavers, (on a like basis of $15 per loom), supply $500,000. The other branches of the trade, i.e., the merchants, bleachers and finishers, sign themselves responsible for another $500,000. In fact, so enthusiastic is the scheme taken up that although the Irish banks do not own a single loom or handle a yard of linen, they have sufficient faith to volunteer their backing against any loss to the extent of $2,500,000. So altogether it seems a pre-eminently business-like proposition and its working should interest the Canadian flax industry, both farmers and manufacturers alike.

Seed from Canada.

But where is the seed to come from?

For the first time in forty years the Irish farmers were last year introduced to the economical practice of growing the flax for its seed in part, as well as its fibre yield. The immense bulk of the seed, probably 96 per cent. of it, in previous years was imported from Riga in Russia, and from Holland. Now with these sources closed, where is it to come from? The Irish saved seed will only supply less than 8 per cent. of the supply necessary, and so while some further European seed is still in stock, the great bulk will come from Canada. In this connection I may be pardoned for republishing the reference thereto made by Mr. J. G. Crawford at the momentous Belfast meeting:—

"The question was, what seed could be got? In the western provinces of Canada there was annually a very large acreage under flax. In some years in the province of Saskatchewan alone there were a million acres under flax, sown with seed known as Canadian western seed, or Canadian common. It was known among the Canadian farmers as Riga flax. It had a blue flower, and the name 'Riga' was a sufficient indication of what its original pedigree was. Now in the view of the committee, and in my own view, seeing that they were so short of fibre, it was a legitimate risk to take to use Canadian common, which under favorable circumstances, produced a fibre plant. The yield of fibre may not be so great as in the case of Dutch or Riga quality. Not as good, but fibre there was in considerable quantity."

It will be guessed then that, grown with Canadian seed and to its cultivation under the methods hitherto adopted in Canada, the coming season's Irish linen production will have a very especial interest to the people on the western side of the Atlantic Ocean. It is undoubtedly an object-lesson to Canadian flax growers. Moreover, it is a magnificent opportunity which should be grasped in no uncertain fashion whereby the Dominion should in future years be foremost in having the British linen manufacture as its chief customer not alone for its flax seed but for its supplies of flax fibre.

CANADIAN FIRE INSURANCE COMPANY

The amount received in premium income by the Canadian Fire Insurance Company, of Winnipeg, during 1917 was $33,830 greater than in 1916, and there was a corresponding increase in expense and reinsurance reserve. The net result of the year's business was that after paying $60,000 dividends, or $10,000 more than last year, and providing for all ordinary and special taxation, amounting to $16,253, the sum of $67,552 was added to the shareholders' surplus.

During the year the directors thought it advisable to transfer $500,000 of the accumulated profits of the company into capital account, so that the share capital of the company has been increased from $500,000 to $1,000,000.

The loss ratio of the company for 1917 was 39.2, an increase over the loss ratio for 1916, which was 35.6. The assets of the company amount to $1,513,251, $1,000,000 of which is capital and $190,864 is to the credit of surplus account.

Mr. R. T. Riley is vice-president and managing director of the company, and is supported by the following directorate: Messrs. J. H. Ashdown (president), Sir James Aikins, R. J. Campbell, G. R. Crowe, John Galt and G. V. Hastings.

ÆTNA LIFE INSURANCE COMPANY

The Ætna Life Insurance Company was established in Hartford, Conn., sixty-eight years ago. It has been doing business in Canada for more than fifty years. The splendid reputation it holds in the United States is reflected in full measure in the Dominion, where it has an excellent organization. Messrs. T. H. Christmas and Sons are managers of the company at Montreal, Messrs. Johnson and Orr at Toronto, Mr. T. B. Parkinson at London, Ont., and Mr. Douglas J. Johnston at Winnipeg.

The company's balance sheet for the past year shows an unusually strong position. Assets were increased during the year by $9,285,820 and now total $140,584,445. Of these assets, $47,508,459 are represented by stocks and bonds, $61,990,138 by mortgages and $12,091,876 by policy loans. These show an increase of $250,000, following a slight decrease in 1916. The amortized value of bonds and market value of stocks at December 31st, 1917, less assets not admitted, was $3,073,045 in excess of their book value. The liabilities include a reserve on life, endowment and term policies of $101,544,616, a special reserve of $1,448,009 and a reserve for a special class of policies and for dividends to policyholders payable in 1918 of $3,621,339. Full provision is also made for the liabilities of the company on account of its steadily increasing accident, health and liability business. Unearned premiums on account of this business are calculated at $5,206,803, and there is reserved for liability claims, $5,968,462. There is a surplus to policyholders of $18,529,172.

The result of last year's operations were particularly favorable, there being substantial increases both in new business and business in force. New insurance paid for and in course of collection amounted to $193,817,782, a gain of $85,600,000 upon the new business of 1916. Business in force was increased by $105,370,626 to $572,916,282. The gain in this item during 1916 was $60,000,000. The premium income was increased over that of 1916 by $6,768,123. During the year the company paid to policyholders a sum of $19,875,699, representing an average daily payment of over $54,450. Since its organization in 1850 the Ætna Life has paid policyholders the large sum of $318,710,609.

THE PREFERRED ACCIDENT

INSURANCE COMPANY
OF NEW YORK

Announces that it is extending its operations to the Dominion of Canada,—with Offices and Agencies at leading points throughout the Dominion.

Accident, Health and Automobile Insurance

The PREFERRED is the only Company that confines its accident business strictly to Preferred risks, and to parties whose occupations come within that classification it is prepared to give greater benefits than can be secured from any Company insuring all classes of hazards.

FEBRUARY MUNICIPAL BOND SALES

Three Large Issues Responsible for Large Total Last Month

The municipal bond sales in Canada during February totalled $5,243,279, compared with $561,000 in January and $458,874 in February a year ago. The February records of municipal bond sales at home for the past nine years are as follow:—

February.	Municipal bond sales in Canada.
1910	$1,272,977
1911	1,037,287
1912	2,596,378
1913	1,038,806
1914	5,995,336
1915	3,047,011
1916	1,419,909
1917	458,874
1918	5,243,279

In addition to the $5,243,279 municipals sold in Canada, $300,000 were sold in the United States, making a grand total of Canadian municipal sales for February of $5,543,279, the largest February total in recent years, with the exception of February, 1914, when the sales were $5,995,336, or $553,000 greater.

The February, 1918, total was made up chiefly of three important sales—viz., Greater Winnipeg Water District, $2,000,000; Outremont, $1,500,000; and London, $1,346,000. In addition, there were substantial sales of western school districts bonds.

Details of February Sales.

The following is a list of the sales in Canada during February, 1918:—

Saskatchewan.

Municipality.	Rate %.	Term (years).	Amount.
Harris Village	..	..	$ 5,000
School Districts	..	..	43,400
			$ 48,400

Alberta.

Municipality.	Rate %.	Term (years).	Amount.
Oyen Village	6	8	$ 3,000
School Districts	..	..	32,350
			$ 35,350

Quebec.

Municipality.	Rate %.	Term (years).	Amount.
Outremont	6	5	$1,500,000
St. Lambert	5½	10	175,000
			$1,675,000

Manitoba.

Municipality.	Rate %.	Term (years).	Amount.
Greater Winnipeg Water District	5	5	$1,700,000
School Districts	..	..	36,500
			$1,736,500

Ontario.

Municipality.	Rate %.	Term (years).	Amount.
Kenora	6	35	$ 7,400
Trenton	5½	10	10,000
Trenton	5½	30	25,500
London	6	5 & 10	1,346,000
Sandwich	6	10	38,326
Sandwich	6	15	7,955
Sandwich	6	25	21,769
Sarnia	5½ & 6	8 & 9	24,031
Oakville	6	20	43,564
Ottawa	5 & 5½	10 & 20	223,484
			$1,748,029

The following table summarizes the above details:—

Province.	Municipal bond sales, February, 1918.
Saskatchewan	$ 48,400
Alberta	35,350
Quebec	1,675,000
Manitoba	1,736,500
Ontario	1,748,029
	$5,243,279

The only sale of Canadian municipals recorded in the United States in February was $300,000 of Greater Winnipeg Water District bonds. The sales of our municipals in that market during the past three years compare as follows:—

	1915.	1916.	1917.	1918.
January	$ 340,000	$ 3,183,215	$2,454,000	$ 10,000
February	6,471,000	899,500	485,725	300,000
March	6,543,947	595,000	120,440	......
April	7,100,825	2,158,306	1,563,200	......
May	600,000	7,219,000	Nil	......
June	Nil	3,393,243	80,000	......
July	890,000	3,631,200	1,530,000	......
August	750,000	97,300	Nil	......
September	6,748,342	200,000	Nil	......
October	1,589,000	Nil	Nil	......
November	4,000,000	7,894,000	Nil	......
December	450,000	3,065,000	Nil	......
	$35,483,114	$32,335,764	$6,233,365	$310,000

Bank Loans to Municipalities.

About $20,000,000 of Canadian municipals will mature in the United States this year. In view of the war financing requirements in that market, not only is it practically impossible to sell new issues there, but only in a few instances will we be able to effect renewals. This means that arrangements must be made in Canada to take up the greater part of the $20,000,000 municipal maturities. The Canadian banks are arranging in many cases to take up these maturities on behalf of the municipalities, making loans to the civic authorities, until they are able to market their securities. This is reflected in the bank loans to municipalities, which in January totalled $40,015,466, compared with $24,487,272 a year ago. The following table, compiled by *The Monetary Times*, shows the volume of bank loans to municipalities since January, 1915:—

	1915.	1916.	1917.	1918.
January	$35,952,805	$32,015,371	$24,487,272	$40,015,466
February	38,437,903	35,149,915	26,121,324	....
March	41,227,449	38,649,462	29,877,911	....
April	43,031,360	44,371,050	35,931,996	....
May	43,948,436	43,924,036	39,790,191	....
June	46,889,816	46,773,032	42,757,673	....
July	44,029,446	42,385,096	43,989,207	....
August	46,020,730	39,882,811	43,940,176	....
September	43,928,331	38,708,745	42,721,563	....
October	45,682,230	37,613,530	41,204,781	....
November	41,064,550	32,945,963	36,459,598	....
December	30,878,028	24,056,797	36,353,039	....

Sales for Three Years.

The following table shows the sales of municipal bonds, in Canada only, during the past three years and this year to date:—

	1915.	1916.	1917.	1918.
January	$ 1,784,947	$ 1,909,441	$ 1,969,256	$ 561,000
February	3,047,011	1,419,909	458,874	5,243,279
March	2,572,357	2,027,741	229,013	....
April	8,603,094	1,979,852	1,182,974	....
May	3,464,281	2,649,000	1,375,039	....
June	2,395,744	3,043,283	1,642,003	....
July	1,618,422	1,521,525	3,814,489	....
August	1,087,415	852,447	4,637,836	....
September	2,768,484	960,435	440,268	....
October	1,245,874	1,361,665	398,771	....
November	1,645,892	1,246,480	917,191	....
December	1,676,693	669,000	890,000	....
	$31,910,214	$19,640,778	$17,955,714	$5,804,279

The January, 1918, total was given a month ago as $461,000. This should have been $561,000, the difference being accounted for by the Moncton, N.B., sale of bonds which was put in at $18,000, instead of $118,000.

Winnipeg and Montreal.

The offering of $2,000,000 Greater Winnipeg Water District 5 per cent. gold bonds is included in the February, 1918, total. A few of these were sold in January and a few in March, but the majority of the bonds were sold during February. Approximately, $1,700,000 of the total was taken by Canadian investors, the remaining $300,000 going to the United States.

Subscription lists for $6,900,000 5-year 6 per cent. refunding bonds of Montreal were opened on February 25th, and will close on March 18th. This offering, if completely sold during March, will alone make a high total of municipal bond sales for that month.

MORTGAGE CLAUSE AND FIRE INSURANCE

It is One of the Most Common But Most Important Clauses in Policy

"The mortgage clause is one of the most common, but at the same time one of the most important clauses in use on fire policies at the present day," said Mr. E. Spencer, manager of the insurance department of the Yorkshire and Canadian Trust, before the Vancouver Insurance Institute, recently. "It is very extensively used," he continued, "more particularly so in Vancouver, where it is found that practically every building is mortgaged.

"There are numerous kinds of so-called mortgage clauses but I am just going to deal with the standard form of New York. To read this form through, one would not be given the impression that there was anything which would be likely to cause any dispute in the event of a loss, as it states clearly the meaning the company intends to convey to the mortgagee.

"Unfortunately, however, the meaning so set out is not adhered to when the clause comes before the courts, as by juggling with it they are able to place a different aspect on the various sections of the clause to the benefit of the mortgagee in practically all cases, and it is these points to which I will refer.

"It is a well-established principle in insurance law that a fire insurance policy containing a mortgage clause becomes a special contract with the mortgagee, and that the mortgagee is not bound by the conditions which restrict the rights of the assured. This is brought about by the provisions of the mortgagee clause which state 'that the policy shall not be invalidated by any act or neglect on the part of the mortgagor,' in so far as the mortgagee's interest is concerned. There is, however, a limit to the proviso, for although liberties may be taken with the printed portion of the policy, the written portion must always be respected. As an instance, there is the co-insurance clause. which if not complied with and applicable, would impair the rights of recovery of the mortgagee the same as it would the assured.

Contract of Company and Mortgagee.

"The special contract between the company and the mortgagee comes into existence as soon as the mortgagee clause is attached to the policy, but does not become active until there is some default or breach of conditions of the policy.

"In the wording of a policy we often find, 'Loss, if any, payable to ...., mortgagee, as his interest may appear, as per mortgage clause attached.' This clause is a very troublesome one, and has on many occasions made the companies pay losses for which they were not liable. The intention of the clause is, that loss, if any, shall be payable to John Doe, mortgagee, as his interest may appear as mortgagee, the balance, if any, to go to the assured. The courts, however, construe the words, 'as his interest may appear,' to mean such interest which by proper proof can be shown to exist at the time of the fire. John Doe, mortgagee, just designates who John Doe is; as his interest may appear, covers any interest he may have in the property at the time of the fire, whether it be that of mortgagee or owner.

"There is no need for the clause as the company would pay the amount due the mortgagee, the balance going to the owner without the clause on the policy.

Mortgagee and Foreclosure.

"A mortgagee during foreclosure proceeding is fully protected under the mortgage clause, but as soon as foreclosure proceedings have been consummated his position changes somewhat; he then becomes owner, and as such bears a different relationship to the property involved than formerly. His rights under the policy also undergo a change which must be provided for as he is no longer entitled to the benefit of the mortgage clause.

"An interesting case came before my notice a little while ago in connection with a foreclosure. For illustrating purposes, we will say the owner was 'A' and the mortgagee 'C.' A policy was issued to 'A' with loss payable to 'C,' with the mortgage clause attached which contained the usual provision that 'any act or neglect on the part of the mortgagor shall not invalidate the mortgagee's interest.' 'A' sold to 'B,' but the policy was not assigned. A fire occurred on, say, the 1st of January, and on the 1st of March the mortgagee foreclosed on the property and bought it at the mortgage sale. The company refused payment of the loss on the grounds that when the loss occurred, the policy was invalid as to the mortgagor though still binding as regards the mortgagee. The then mortgagee, now owner, by foreclosing on the property had released the mortgagor and taken away from the company the rights of an assignment of the mortgage, which right the company was entitled to under the last section of the mortgage clause. It is not necessary for a company to demand an assignment of a mortgagee until payment of the loss is actually made.

Neglect to Pay Premium.

"'Provided that in case the mortgagor or owner shall neglect to pay any premium due under this policy the mortgagee shall on demand pay same.' To read this clause one would naturally be given the impression that if a mortgagor neglected to pay the premium the mortgagee could be called upon to pay same, and if he refused, action could be taken against him under the conditions of the mortgage clause. This brings us back to the separate contract between the company and the mortgagee, which comes into existence at the time the mortgage clause is attached to the policy, but not active until there is a breach of the conditions or on account of non-payment of premium.

"A policy ran for six months and was then cancelled by the company for non-payment The company relying on the stipulations that the mortgagee would on demand pay the premium, took action against the mortgagee for the time they were on the risk, but the court ruled that the clause referred to only became active when the company demanded payment of the premium from the mortgagee, and he had the option of paying the premium and have the policy continue in force or cancel the policy, no liability attaching to him for payment except from the date of demand.

"This was a very unreasonable decision, especially as the intent of the clause, 'this policy shall not be invalidated as regards the mortgagee's interest by any act or neglect on the part of the mortgagor,' is very clear, that in consideration of certain privileges the mortgagee is to give some return and that is guarantee the premium.

Reserves Right to Cancel Policy.

"The company reserves the right to cancel this policy—10 days' notice to the mortgagee. Under the statutory conditions it is necessary when cancelling a policy to give the assured five days' written notice, but under the mortgagee's special agreement he is entitled to 10 days' notice. The variations of these two terms of cancellation is likely to cause no little trouble. If there is a policy for $10,000, the mortgagee's interest in which is $5,000, the company gives five days' notice to the assured and 10 days to the mortgagee, on the 6th day there is only $5,000 in force and should a loss occur between the 5th and 10th days the company would be liable to the mortgagee up to this amount. The point to be arrived at is the date on which the policy is cancelled to figure the earned premium. I have no definite information on this point, but my opinion is that the earned premium should be figured from the 10th day when the liability to the mortgagee has ceased. There is also another question with regard to the 10 days' notice of cancellation to the mortgagee which would arise should the insurance be replaced by the assured between the five and ten days, that is the payment of the loss should a fire occur. The property would be covered for $15,000, although the intention is that only $10,000 should be in force. It would, therefore, be necessary for the contribution clause to apply, hence my reason for stating that the earned premium should be figured from the 10th day.

Companies Must Pro Rate Mortgage.

"'In case of any other insurance, the company shall not be liable for greater proportion of any loss than the assured bears to whole insurance on property.' This clause is self-explanatory, but there is just one point I would like to mention and that is where there are two mortgagees on the same property, both mortgagees being insured in different offices. In the event of a loss, the companies must pro rate, the second mortgagee receiving the same consideration as the first mortgagee. The first mortgagee could not receive the full amount of the loss from his company and the company insuring the second mortgagee refuse payment on the ground that the amount to cover the loss had been paid by the company insuring the first mortgagee, as the insurer of the second mortgagee would then be pocketing premiums without assuming liability, and I think we would then all be looking for insurance from the second mortgagee in preference to the first."

DIVIDENDS AND NOTICES

PENMANS, LIMITED

HAD PURCHASER FOR C.N.R. STOCK

Government was Not Prepared to Sell Its Stock—Sir Donald Mann's Testimony

Sir Donald Mann, first vice-president of the Canadian Northern Railway system, set a value of 60 cents on the dollar on the Canadian Northern common stock last week, and declared that in five years' time it should be worth par. He made the declaration before the board of arbitration during the course of his hearing as witness for the company in the proceedings which are to determine a price for the 60,000 shares of the railway's common stock held by him and his associates. Sir Donald led up to his statement by reviewing the physical advantages which had been secured to the railway by the judgment of its locating engineers and the policy of the executive, which had been to choose productive territory and avoid natural barriers such as opposed all United States transcontinentals and the Canadian Pacific Railway in Canada.

Canadian Pacific Railway as Purchaser.

Sir Donald scouted the idea suggested by Mr. Justice Harris that the stock of the Canadian Northern Railway had no more value than the stock of any similar enterprise forced into a receivership. He denied that the Canadian Northern Railway was ever in that position and declared that had the Dominion government been willing to do so a sale of all the common stock might have been made a year ago. "The trouble then was," said Sir Donald, "our partners were too wealthy. We had an opportunity to sell, but the government would not sell with us." Sir Donald was about to divulge, in confidence, who the prospective purchaser was, but Mr. Tilley objected to any statement being made which was not given as subject to cross-examination. Later, and in reply to Sir William Meredith, the Canadian Northern Railway magnate admitted that the Canadian Pacific Railway was one of the likely purchasers a year or so ago.

"No definite price had been fixed for the stock at that time, said Sir Donald, but they had asked $30,000,000 for the 60,000 shares and had been prepared to accept $20,000,000." Sir William Meredith was of the opinion that later developments in the condition of world finance, chiefly produced by the entry of the United States into the war, had practically annulled all such negotiations, but Sir Donald differed with him.

Buyer Could be Found.

Sir Donald declared that a willing and able purchaser could be found, even under present financial conditions, if the Dominion government were willing to sell their 40 per cent. holdings along with the 60 per cent. held by Sir Donald and his friends. A most careful analysis, which examined every factor, had been made, he pointed out, and it had been determined by experts that in five years' time the earning powers of the road could be developed to a dividend-paying point and be established as a commercial success.

In testifying to his faith in the future good fortune of the Canadian Northern Railway, Sir Donald covered in a concise manner the ground which has been gone over in detail by many previous witnesses. Comparing the productivity of the territory served by the Canadian Northern Railway with the country adjacent to the Canadian Pacific Railway, he pointed out that whereas the Canadian Pacific Railway main line ran through 900 miles of "farmable" lands in the prairies, the Canadian Northern Railway had pre-empted an area of farming country on the plains which required 1,200 miles of main line to traverse it. Their mileage was greater on the plains and less in the mountains than the line of the Canadian Pacific Railway, he said, and as to gradients the comparison showed a tremendous advantage in favour of the Canadian Northern Railway. "The act is altogether wrong if it does not take cognizance of these facts as factors of value for the purpose of this arbitration," declared Sir Donald.

The Canadian Consolidated Rubber Company, Limited, have purchased the property at the south-east corner of Yonge and Front Streets, Toronto, at a price of $47,000 cash. The property has a frontage of 30 feet, and the price is more than $1,500 a foot. The buildings on the property were erected thirty years ago by the late Sir Frank Smith.

IMPORTANT INSURANCE GATHERING AT TORONTO

A meeting of the executive board of the Association of Life Agency Officers was held at Toronto this week. The membership of this organization includes agency officers of both the United States and Canada. Those attending the meeting this week were Messrs. Winslow Russell, vice-president, Phœnix Mutual, Hartford; Glover S. Hastings, superintendent of agencies, New England Mutual, Boston; Isaac Miller Hamilton, president, Federal Life, Chicago; W. E. Taylor, vice-president, Equitable Life, New York; G. E. Copeland, superintendent of agencies, Northwestern Mutual; Borden, superintendent of agency bureau, Equitable Life, New York; G. H. Hunt, superintendent of agencies, Imperial Life, Toronto.

It was decided to hold the next annual meeting of the association at the La Salle Hotel, Chicago, on October 1st and 2nd. A number of well-known insurance men will address the meeting, including Mr. J. F. Weston, managing director of the Imperial Life Assurance Company, Toronto. On the first day of the convention the delegates will be entertained at a banquet by the life insurance companies which have their head offices in the State of Illinois.

The association was organized at Chicago on October 16th, 1916, and its first annual meeting was held in conjunction with the World's Salesmanship Congress at Detroit in June, 1917.

STANDARD RELIANCE MORTGAGE CORPORATION

During the past year, the Standard Reliance Mortgage Corporation, Toronto, made substantial investments in government and municipal bonds. According to the financial statement, these, with cash holdings, amount to $735,000. Debenture liability increased by $686,544 to $3,810,000, or 21 per cent., and deposits rose $209,562 to $1,031,700, or 25 per cent. Net earnings for the year were $434,316, an increase of $47,938, or 12 per cent. There was an increase in the company's assets during the year of $1,046,000.

The following table shows at a glance the improvement in the company's position during the past three years:—

	1913.	1915.	1917.	Increase, per cent.
Assets	$5,110,332.81	$6,732,581.78	$8,436,555.08	65
Deposits . ..	512,877.58	605,698.53	1,136,427.27	120
Debentures ..	2,119,989.05	2,718,825.30	3.810,661.33	*80
Surplus security	2,399,139.53	3,272,593.56	3.362,378.63	*40
Net profits...	351,336.55	382,752.93	434,316.25	23
Mortgage loans	4,255,220.43	5,501,663.18	6,651,501.74	56
War loans, municipal debentures and cash...	140,388.97	174,028.33	720,679.57	415

---

*Nearly.

In the past four years the assets of the corporation have increased $3,326,000, or 65 per cent.. Deposits have increased $624,000, or over 120 per cent. Debentures have increased by $1,690,000, or nearly 80 per cent. Surplus security has increased $1,000,000, or 40 per cent. Mortgage loans have increased $2,400,000, and war loans, municipal debentures and cash have increased $580,000, or 415 per cent.

The usual 7 per cent. dividend was paid, provision made for government taxes, contributions of $3,150 to patriotic funds, and a surplus of $27,950 carried forward. The president, Mr. N. H. Stephens, states in his annual report that the real estate acquired under foreclosure shows a slight increase over the amount of a year ago, this owing to the cleaning up of the former Sun and Hastings mortgages during the latter half of 1917. The president adds that since the accounts were closed several of the properties have been sold. By the end of 1918 he expects to make a further reduction in this item. The president is also hopeful of the success of the policy of realization on the Dovercourt Land, Building and Savings Company investments. He intimates that a scheme has been arranged whereby this end will be more speedily accomplished.

Mr. H. Waddington is managing director of the company. He has had a long experience in the business, and brings to bear upon the company's affairs a conservative and progressive policy. He is supported by an active directorate.

MONTREAL STOCK EXCHANGE

SAVE MONEY
Invest in Securities

¶ It is only since the Victory Loan was marketed that the Canadian people have come to realize the value of investing their savings in securities.

¶ Most of us are prone to spend. We don't want to save. Securities offer a convenient and easy means of saving money. In fact, many people have started their first savings account with Victory Bonds.

¶ It is part of the service of the Members of the Montreal Stock Exchange to furnish you with complete information about investing—to show you the asset behind the security, the rate of interest it will pay, the probability of its increasing in value, and how it can be turned into cash should the necessity arise.

¶ Start your savings account today. Provide now for the future. Save money—Invest in Securities.

A valuable booklet has been prepared on "Investing." It is free. Write to the Secretary for your copy to-day. The edition is limited.

Address the Secretary Room 434, Stock Exchange Building, Montreal.

about our Special Book Offer

GUELPH AND ONTARIO INVESTMENT AND SAVINGS

After paying the usual 10 per cent. dividend, the directors of the Guelph and Ontario Investment and Savings Society decided to add $50,000 to the reserve fund out of the past year's earnings. This left a substantial balance of $41,008 to be carried forward. The reserve fund amounts to $739,435, and the company's assets total $4,353,512. The assets consist of first mortgages on improved real estate, chiefly farm property, also government and high-class municipal bonds. The company makes it a strict rule not to invest in any speculative securities of any kind, and the securities are carefully selected and approved of by the directors. This conduct of the business largely accounts for the company's excellent financial position.

The public confidence in the Guelph and Ontario is reflected in the increase in the company's own debentures. The savings deposit department affords every convenience to depositors. The company holds a substantial amount of Dominion war bonds, and during the past year $1,200 was granted to the Canadian Patriotic Fund and $200 to the Red Cross Fund.

Mr. A. B. Petrie is president of the company, which has its head office at Guelph. He is supported by a strong directorate, including Mr. J. E. McElderry, the capable managing director. The company continues to make progress and to maintain its strong position.

HOWARD SMITH PAPER MILLS COMPANY

The annual report for 1917 of the Howard Smith Paper Mills Company shows slightly higher earnings than in the previous year. The profit and loss account shows net profits of $200,546, against $159,153 in the previous year. Other sources, including previous balance, brought the amount available for distribution up to $237,113, against $193,097. After deduction of bond interest and dividends there was a surplus of $114,473, against $32,850 in the preceding statement. No provision is made for war taxes in the statement

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Brockville, Ont.—The rate of taxation for the year has been placed at 34 mills, an increase of two mills over last year. This is exclusive of the provincial war tax.

Raleigh, Ont.—Messrs. A. E. Ames and Company, of Toronto, have purchased a block of $29,923 6 per cent. bonds, payable in ten annual instalments, for drainage purposes.

Smith's Falls, Ont.—A block of $21,120.29 6 per cent. local improvement bonds, payable in twenty annual instalments, has been awarded to Messrs. Mulholland, Bird and Graham, of Toronto.

Hull, Que.—The annual report of the city assessor shows an increase of $841,285 in the total valuation of the city, of which amount $503,627 is taxable. In the last ten years the valuation of the city has increased by over $8,000,000, while the population has risen by 2,332 during the past twelve months.

County of Halton, Ont.—A block of $40,000 20-year 6 per cent. bonds, due on November 6th, 1937, for bridge purposes, has been awarded to Messrs. A. E. Ames and Company, of Toronto. Also a block of $74,000 6 per cent. good roads debentures, payable in twenty annual instalments, with principal and interest, has been awarded to them.

Saskatchewan,—The following is a list of authorizations granted by the local government board from February 18th to February 22nd, 1918:—

Rural Telephone Company.—Industrial, $800 15-years not ex. 8 per cent. annuity; P. J. Murray, Bradwell.

Village.—Pennant, $1,750 10-years and $1,500 7-years not ex. 8 per cent. instalment; R. L. Wright, Pennant.

Towns.—Leader, $3,500 10-years and $7,500 7-years 7 per cent. annuity; P. J. Hooge, Leader. Alsask, $3,250 10-years 7 per cent. annuity; Fred. J. Clark, Alsask.

The following is a list of debentures reported sold from February 18th to 22nd, 1918:—

School Districts.—Leader, $5,500, Paragon, $8,000; Great-West Life Assurance Company, Winnipeg. Davidson, $2,000; F. S. T. Hutchison, T. B. and E. B. Scott.

Rural Telephone Companies.—Great Deer, $3,200, Lundeen, $3,300, Outram, $3,000; W. L. McKinnon and Company, Regina. Leslie, $3,400; Northern Crown Bank, Foam Lake. Ridpath, $8,300, Togo, $12,300; J. A. Thompson, Winnipeg.

Rural Municipality.—Scott, $6,000; Great-West Life Assurance Company, Winnipeg.

Red Deer, Alta.—The following auditors' report has been made for 1917:—

"Sufficient depreciation has been provided for on all buildings and equipment belonging to the city, and in addition the real estate owned by the city has been written down to its assessed value. Sufficient has been written off the boulevards, cement sidewalks, roads, bridges and plank sidewalks, waterworks and sewers to bring the book value down to the unexpired value of the debentures issued against these utilities.

"We have inspected the titles and securities covering the real estate and other assets and find them to be in order with the following exceptions:—

"(1) We were unable to find the title for the rink site, and recommend that one be obtained forthwith.

"(2) There is no title for the Station Park, and, with regard to this property, we would suggest that this should not stand amongst the assets of the city. In the original survey of the townsite it appears as part of the street, and several years ago it was brought on to the books at a value of $30,000, but it appears very doubtful whether the city could ever get the title for this property, and we would recommend that the asset should stand on the books only at the cost of the improvements which have been done on it, and that the $30,000 should be written off capital surplus.

"We, however, would like an expression of opinion of the council on this matter before making an entry.

"(3) Agreement for sale of Cement Builders, Limited, $2,500. This remains in the same state as it was at the end of last year, no agreement apparently being in existence, but we are informed that the city will be taking title to this property during the coming year, when this matter will be finally adjusted.

"There are balances of money raised by debenture which are still unexpended as follows:—

City Square	$ 103.01
Isolation Hospital	28.63
Boulevards	33.52
Cement sidewalks	1,227.05
Waterworks	648.78
Sewers	88.35
	$2,129.34

"This amount is in a special savings account at the 31st December, 1917.

"The amount received during 1916 on the Inglewood lots still remains in suspense, but we understand that the city will be taking title for most of these lots, and this matter will be adjusted during the coming year."

The auditors signing the report are Messrs. Baldwin, Dow and Bowman, chartered accountants, who state that the city's books and records are in excellent condition.

MORTGAGE COMPANIES MERGE

The Holland Canada Mortgage Company, Limited, of Winnipeg, with offices in the Curry building, has amalgamated with the Netherlands Mortgage Company of Canada, which has in the past maintained an office in the Electric Railway building.

The merged companies will be known under the name of the Holland Canada Mortgage Company, and Mr. J. G. Coster, who has been the general manager of the Holland Canada company, will be the general manager of the combined companies, and will continue his offices in the Curry building.

Prior to the present amalgamation the Holland Canada had investments in this country ot $5,400,000 and the Netherlands Mortgage Company had investments of $2,400,000. The total investment of the new company will, therefore, be $7,800,000.

The two companies, which are now uniting their forces under one management, are the oldest of the Holland companies operating in this country, the Holland Canada being the first to commence business here.

The Holland Canada opened its offices in Winnipeg in the month of March in 1910, and the Netherlands Mortgage Company followed a few months later, in June of the same year. The business of the merged companies will be carried on along the same lines as in the past.

BRITISH NORTHWESTERN INSURANCE COMPANY

A properly conservative attitude has been taken by the directors of the British Northwestern Fire Insurance Company, of which Hon. Edward Brown is president. While the balance sheet may appear to warrant it, the directors are of the opinion that it is in the best interests of both the shareholders and policyholders of the company that until the future can be viewed with greater certainty, the surplus revenue will be better employed for the present in strengthening the position of the company by building up its reserves rather than using the surplus revenue for dividends. This policy has been followed, therefore, and, after providing usual allowances for depreciation in office equipment and for reduction in value of securities to government valuation, the balance of the past year's revenue was transferred to general reserve account and profit and loss and surplus account.

The increase in the company's business last year was uniformly distributed over the provinces of the Dominion in which the company is operating. While 1917 was an unprofitable year for the business of fire insurance, the company's loss ratio was below the general average for all companies. The operating expense ratio was reduced below that of 1916. The large increase in premium income, 30 per cent. over that of 1916, was not obtained by taking on business of a greater hazard than the company has been in the habit of writing. No change had been made in the underwriting policy. Mr. F. K. Foster is managing director and secretary of the company.

"MUTUAL" PROTECTION AGAINST DISABILITY AND DEATH

Many Policyholders fear that a time will come when, owing to permanent disability from illness or accident, they will be disqualified from earning an income and paying their premiums. The Mutual Life of Canada issues a Policy which not only waives further payment of premiums but provides a monthly income of $10.00 per thousand of insurance, should such a condition develop and be clearly proven. This is a Policy which affords protection to the full amount of the policy at death for the beneficiary and protection for the assured while helpless—Write for full particulars.

One of the most perfect Insurance Policies issued.

The Mutual Life Assurance Co. of Canada
Waterloo Ontario

TO PROVIDE PROTECTION
for dependents is by no means the only function of a Life Insurance Policy. Some of the other uses to which the Great-West Policies may be put are:

Protection for one's own future.
Protection for business enterprises.
To compel systematic saving.
Provision for paying a mortgage.
Providing a life income for self or dependents.

The Company issues many different plans of insurance. Premiums are low and the profits to policyholders remarkably high. Information on request.

PREMIER TRUST COMPANY

One of our youngest financial corporations, the Premier Trust Company, of London, Ont., shows satisfactory progress, according to its second annual report. Mr. W. F. Roome is president, Mr. A. A. Campbell is general manager, and Mr. W. A. Spittal is secretary-treasurer.

The gross revenue, including $3,066 carried forward from the previous year, amounts to $13,115, and after defraying the expenses of management, head office and branch at Windsor, Ont., Dominion government taxes and all other charges, there remained $8,818, which has been distributed as follows, viz.: Dividends, $6,953; balance carried forward to revenue account, $1,864.

"In the early life of a trust company," says the directors' report, "it is not expected to have many wills probated, yet, notwithstanding this fact, two probates have been taken out during the past year, and, in addition thereto, a number of administrations, amounting in all to $31,039."

The statement of assets and liabilities discloses the total assets in the hands of the company amounting to $179,976, being an increase of $65,409 over last year.

INSURANCE MANAGERS, REINSURANCE ADVISERS

The Sterling Offices, Limited, have been registered in the United Kingdom to act in the capacity of managers, secretaries, underwriters, reinssurance advisers, trustees, etc., for insurance companies. They will take over a large portion of the insurance and financial business now transacted by Mr. A. Rendtorff, of 25 Birchin Lane, London, E.C., 3, as a private individual. By the articles of association only British subjects may at any time be shareholders. There are no foreign financial interests whatsoever associated with the flotation. Mr. Rendtorff is a naturalized British subject, born in Denmark of Danish parents. By the transfer of Mr. Rendtorff's staff the Sterling will have at their disposal a large organization, by which they will be enabled to render immediate service to any company desiring to open new departments or to extend their present activities. They have already been authorized to act in various managerial capacities for the London Guarantee and Accident, the Century, Essex Union and the Norske Lloyd Insurance Companies.

The officers will also act as reinsurance advisers and intermediaries. A separate department has been established to deal with reinsurance treaties to companies not officially represented by the Sterling.

PREFERRED ACCIDENT COMPANY IN CANADA

With offices and agencies at leading points throughout the Dominion, the Preferred Accident Insurance Company, of New York, one of the strongest accident corporations of this continent, will shortly have its Canadian organization complete. The company recently decided to extend its operations to Canada, and all the necessary preliminaries have been completed. A deposit of $75,000 has been made with the Dominion government, and the company is now ready to issue its attractive policies.

The Preferred Accident Insurance Company writes accident, health and automobile insurance. It is the only company that confines its accident business strictly to preferred risks. To parties whose occupations come within that classification it is prepared to give greater benefits than can be secured from any company insuring all classes of hazards.

The company is in a strong financial position and has an excellent reputation in the United States. At December 31st, 1917, its assets amounted to $4,657,672, with a surplus and voluntary reserve of $1,464,786, or over double its paid-up capital of $700,000. Since organization the company has paid in losses $12,500,000.

Mr. J. W. Mackenzie has been appointed manager for Canada. Although a comparatively young man, he has had a lengthy experience in the accident insurance business, both in the United States and Canada. His widespread connection in this country and his ability will be valuable assets to the company in relation to their Canadian business. The company has made Toronto its headquarters for Canada, and offices have been taken in the Canadian Pacific Railway building. Applications for Toronto agencies are now being received.

CONTINENTAL LIFE INSURANCE COMPANY

The financial statement of the Continental Life Insurance Company for 1917 reflects a strong position. The net reserves held by the company for its policy liabilities now amount to the sum of $2,025,475. The assets of the company, consisting principally of first mortgages, policy loans, bonds and debentures, and the company's head office building, amounted to $2,376,161 at the end of the year.

Despite war conditions, the directors were able to report for 1917 the largest amount of new insurance ever written by the company in a single year, showing, as the directors stated, "that the people have every confidence in the stability of the financial institutions of the country, and that the unparalleled protection afforded by life insurance is in greater demand than ever."

The applications for new insurance and revival of policies amounted to $3,059,137. The insurance issued and revived reached the total of $2,917,589, a gain of $646,030 over the year 1916, and the insurances in force at the end of the year amounted to $12,031,151, a gain of $1,465,277 during the year. The annual premiums on the business in force amount to $439,410. The net premium income after taking off the premiums paid for reinsurance was $406,564. The net income from other sources was $109,153, making the total income $515,717

Mr. George B. Woods is president of the company, and he has had a successful regime. The company has an active directorate, a capable head office staff and an energetic field force.

HAIL INSURANCE LAST YEAR

A statement of the premium income received and losses paid by the various companies underwriting hail insurance in the province of Saskatchewan has been prepared by Mr. A. E. Fisher, superintendent of insurance. The statement shows that $2,203,493.27 was paid in premiums for hail insurance, while the losses paid totalled $744,902.45. The loss ratio works out approximately at 33.8 per cent. The figures given below are subject to correction:—

Company.	Premiums.	Losses.
Acadia Fire Insurance Company.	$ 60,905.68	$ 11,828.34
British America Assurance Company .	69,446.20	20,570.21
British Crown Assurance Corporation .	308,372.81	51,373.93
Canadian Indemnity Company ...	145,832.86	32,593.98
Canada Hail Insurance Company.	49,475.97	12,359.30
Canada Security Assurance Company .	112,258.60	13,800.49
Connecticut Fire Insurance Company .	102,696.79	32,827.91
Dominion Fire Insurance Company .	77,489.97	17,117.09
Excess Insurance Company	192,075.00	47,963.11
Great North Insurance Company..	89,449.00	19,491.73
Home Insurance Company	293,603.86	64,787.73
Hartford Fire Insurance Company	182,332.57	71,506.28
Middle West Insurance Company.	54,282.01	12,633.65
Nova Scotia Fire Underwriters...	47,279.39	11,320.37
New York Fire Underwriters.....	55,836.77	46,515.80
Rochester Underwriters	94,334.33	20,208.40
St. Paul Fire and Marine Insurance Company	109,032.25	100,583.94
Winnipeg Fire Underwriters	23,355.16	2,320.43
Westchester Fire Insurance Company .	135,434.05	26,344.00
	$2,203,493.27	$744.902.45

When to these figures are added the payments made to the Municipal Hail Commission, approximately amounting to $930,000 (the claims paid by them totalling $830,000), it will be seen that hail protection during 1917 cost the people of Saskatchewan a little over three million dollars, while one and a half million was returned in loss claims.

Figures published by the insurance department of the province of Alberta shows that the hail companies in that province received $1,786,101.02 and paid out $1,148,438.75. The premium rate is much higher in Alberta than in Saskatchewan.

PEOPLE'S LOAN AND SAVINGS CORPORATION

The gross revenue of the People's Loan and Savings Corporation, of London, Ont., including $1,789 carried forward from the previous year, amounts to $65,061, and, after providing for interest on deposits and debentures,, Dominion, provincial and municipal taxes, patriotic subscriptions and general expenses, there remained $31,644, which has been distributed as follows, viz.: Two half-yearly dividends at the rate of 6 per cent. per annum on the capital stock, $28,694; transferred to reserve fund, $2,000; carried forward to the credit of revenue account, $949; total, $31,644.

The reserve fund now amounts to $50,000, being 10.39 per cent. of the paid-up capital stock. Deposits and debentures have increased $54,923 over the previous year, indicating increasing public confidence. There are few other depositories for money that offer the exceptionally high ratio of security, being $2.48 security for every dollar of liability to the public.

Mr. W. F. Rome is president of the company, Mr. A. A. Campbell is managing director, and Mr. W. Spittal is secretary-treasurer. The company has been in business for twenty-five years.

CANADIAN STEEL PLANTS EXPECT CONTRACTS

That all steel plants in Canada will probably be operating at full capacity throughout the year under heavy demand, and that large new munitions contracts are expected from the United States and Great Britain, are opinions expressed by Colonel Thomas Cantley, chairman of the board of directors, Nova Scotia Steel and Coal Company.

The production of steel ingots and direct castings in Canada in 1917 was approximately 1,700,000 tons, creating a new record, the previous banner year being 1916, when about 1,300,000 tons were produced. The production of pig iron likewise advanced in 1917 to 1,200,000 tons. About 13,000 tons of this came from electric furnaces. The electric furnaces accounted for 45,000 tons of steel last year, as against 19,000 tons in 1916.

LOAN TO CANADA WILL HELP TRADE

Canadian Credit Will Benefit Future Relations, Says the Wall Street Journal

The Wall Street Journal editorially says:—

"Even were a considerable part of a Canadian credit here employed in exports of competitive manufacture the ultimate benefit in eloquent dollars and cents would far outweigh any small share of trade which our merchants might meanwhile miss. It would do more in adding to a secure foundation of trade such elements as esteem and confidence as would give to the permanency of our future commercial relations a guaranty to which none other would be comparable.

Canadian-American Trade.

"Trade between Canada and this country amounted in 1917 to $1,243,000,000, or nearly 14 per cent. of exports and imports. Exports to Canada were more than $829,000,000 in value, while imports ran over $413,000,000, leaving balance in our favor of $416,000,000. How largely Canada bulks in our imports of essentials is evident from the fact that over 13 per cent. of such purchases were made there. On the other hand, 13 per cent. of all our sales were to Canada.

"Trade balances for five years, including 1917, totalled $1,394,000,000 in our favor. Our trade is even more closely interwoven from the fact that a large part of our shipments is of steel and its products, tractors and farm machinery, automobiles and all kinds of farm supplies and equipment from the United States factories to their branches in Canada.

British Investments Ceased.

"With the declaration of war British investments in Canada came to a standstill. That source of revenue has been cut off to the last farthing. With the curtailment of immigration another source of cash income has been materially diminished. Canada sold her farm products in British markets, in which there were large holdings of American investments and securities, and was in this way able to provide for a considerable part of her current trade indebtedness in United States markets. Exporters, however, are now called on to arrange Canadian credits for wheat and other foodstuffs sold to the old country. Canada's war industries are placed in a similar position.

"In the circumstances various plans have been suggested for a Canadian credit here—one which would create a reservoir of $300,000,000 to stay the wasteful progress of hostile exchange rates and to lubricate the great war industries built up on the other side of the St. Lawrence. All these plans are meritorious in principle. It no longer calls for more than ordinary commonsense in the credit department of any business to realize a merchant is as much interested in the means available to his customer for payment as in the original sale of the goods."

MORE PROVINCIAL GOVERNMENT LOANS PROPOSED

The Ontario legislature on Monday voted $9,000,000 to the Hydro-Electric Power Commission for development work and extensions to the various systems of the commission. Hon. T. W. McGarry, provincial treasurer, stated that if the commission required all the money this year, "we will have to go into the market to borrow it." There is a probability, however, that the commission may not use the whole amount this year.

A bill was introduced in the Nova Scotia House of Assembly on Monday giving authority to the government to borrow $1,000,000. The purpose of the loan is intended for the payment of any of the existing obligations of the province, the payment of any debentures of the province when the same becomes due or payable, and payment for services chargeable to capital account that may be authorized by the legislature.

There have been four provincial government issues, amounting to $6,620,000, this year to date, as tabulated in *The Monetary Times* last week. This compares with a total of $6,382,500 for the twelve months of 1917. With the proposed Nova Scotia issue and several millions for the Ontario Hydro-Electric Commission, the current year's provincial government borrowings will exceed those of last year.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Aurora, Ont.—March 3—The Salvation Army Barracks on Mosley Street was damaged. Estimated loss, $1,000.

Blenheim, Ont.—March 6—A Canadian Pacific Railway refrigerator car containing 150 barrels of apples was destroyed. Estimated loss, $8,000.

Blytheswood, Ont.—March 1—Home of Robert Jolliffe was damaged. Caused by defective stove pipe. Estimated loss, $100.

Kitchener, Ont.—March 2—Departmental store of Weseloh, Gouldie, Limited, on the corner of King and Frederick Streets, was destroyed. Estimated loss, $65,000.

Lakefield, Ont.—March 3—The Cavendish stable, used as a storehouse for motor boats and canoes, was destroyed. About 100 new canoes, along with several launches and a new Overland automobile, belonging to the Brown Boat Company, were consumed, with heavy loss.

Montreal, Que.—March 2—Establishment of the D'Allard Manufacturing Company was damaged.

New Toronto, Ont.—March 4—The Central Prison brick plant was destroyed. Caused by defective wiring.

Quebec, Que.—February 21—Building owned by Dr. E. Laberge and occupied by Mr. Emile Le Lievre, plumber and tinsmith, on Bridge Street, was damaged. Estimated loss, $2,000.

Stratford, Ont.—March 2—Garage of the Canadian Cereal Company on George Street was damaged.

Tillsonburg, Ont.—March 6—The Huntley Machinery Manufacturing Company's main plant was destroyed. Estimated loss, $75,000.

Toronto, Ont.—March 4—Some officers' uniforms in the Railway Building at Exhibition Camp were damaged. Estimated loss, $300.

March 6—Contents of building at 1741 Dundas Street were damaged. Estimated loss, $100.

Vancouver, B.C.—January 27—Premises of the Electrical Repairing and Engineering Company and the British Columbia Gramaphone Company were damaged.

Victoria, B.C.—February 24—Residence of Mr. Frank Scott, of 1407 Walnut Street was damaged. Caused by overheated stove. Estimated loss, $150.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Esterhazy, Sask.—February 14—Building owned and occupied by W. H. Blyth and Company, and Manhinnick Renuart and Company was destroyed. Estimated damage on stock $20,000, on building $7,500. A total insurance of $21,500 is divided among the following companies: Canada National, $2,000; Queens, $7,500; British Colonial, $1,000; and $11,000 in an unknown company. Out of the amount of insurance $4,000 is carried on the building.

Rosenfeld, Man.—February 17—Grain elevator owned by the Lake of the Woods Milling Company was destroyed. Estimated damage on contents $18,000, on elevator $3,000. The loss is fully covered under a blanket policy covering all the company's property from St. John, N.B., to Vancouver.

CANADA NORTH-WEST LAND COMPANY

The financial statement of the Canada Northwest Land Company for the year 1917 shows sales of the company's farm lands amounting to 32,312.23 acres for $494,037.51, as compared with 16,898.20 sold for $247,627.47 in 1916. Townsite sales also show an increase over the preceding year. The amount received from these sales has been transferred to profit and loss account, which stands at $1,757,277.13. Average price obtained for farm land in 1917 was $15.29 per acre, compared with $14.65 an acre in 1916.

A distribution on realization of assets amounting to $5 per share was paid during the year. The financial statement draws attention to the fact that these payments are bound to come at irregular intervals and cannot be in any way regarded as dividends, as the assets of the company are proportionately depleted.

The last $5 distribution of assets, the eleventh, was made in September.

Opportunities in Canada for Research

Valuable Fertilizers Are Wasted—New Method of Briquetting Peat—Substitutes for Gasoline—Conservation of Heat—Chemical Research—Many Kinds of Fish, Valuable for Food, Neglected

By A. T. DRUMMOND, LL.D.

SINCE my communication, a year ago, in *The Monetary Times*, on this subject, the changing conditions, then in process, throughout the world, resulting chiefly from the war, and affecting not only industry, but the mental attitude of the people towards current problems, have led to many new promising opportunities for research in the different departments of industry, and have emphasized the importance of others. A year of experience has also raised the question as to how best research can be practically carried out.

Presently research has been practically relegated to a committee, with headquarters at Ottawa, but whose members are scattered over the Dominion, and not every one of whom is known to be a specialist in research work. The ground to be covered, geographically speaking, is vast, the number of lines in which investigation, requiring expert knowledge, can be made, is large, and it is not possible, under present arrangements, for any one individual, however high his attainments in his past special work have been, to grapple with the situation. The original suggestion made to the government still commends itself—that the work of research should be commenced, under a committee, by directly utilizing the extensive laboratories of McGill, Toronto and Queen's Universities—each in the special lines for which it was equipped and in which it was already doing effective work in research; that special experts in these lines, with post-graduate assistants, devoting their whole attention to the work, should be employed in each university; and that all work should be co-ordinated by the committee, in order that each laboratory should have before it only those problems which it could efficiently undertake.

From this as a beginning, the research investigations could be extended to other institutions, especially in the industrial centres, which, in time, provided the necessarily large equipment; or, as in Great Britain, the government could aid with grants, through the research committee, any institution which was grappling with a special industrial problem of great interest to the country. Thus, our Canadian industries could, in a larger way, have trained expert knowledge placed at their disposal in overcoming difficulties which often present themselves, or in seeking new and improved methods of manufacturing, or in discovering and adapting to industrial uses, the numerous possibilities which are stored away among the vast resources of this country. At the same time, in the post-graduate assistants, men would be specially qualified as experts, who will be invaluable in the laboratories, which must accompany all the great manufacturing and mining establishments of the future. This suggestive plan can still be carried out. The cost to the government would be a bagatelle. The German State Governments have for a great many years in the past expended vast sums annually on their universities, especially in research on industrial lines, and it is claimed that whatever position that empire has attained in commerce, manufacturing and agriculture, as well as in the army and navy, is due to the direct work of its universities, and the men who have been trained there.

The two problems which have, this winter, entered deeply into the public mind, are those of food for ourselves and the allied nations, and fuel for domestic, manufacturing and transportation purposes. Food is chiefly an agricultural problem, involving, not so much increased areas under cultivation, as our governments appear to imagine, but much larger production on existing areas, through more fertilizing of the land and better cultivation. What have our farmers to say when the average production in Scotland, for ten years past, has been, of wheat over 39 bushels and of barley over 35 bushels per acre, as against the averages for Canada last year of 16 bushels of wheat and 23 of barley?

With the lower prices here than in Scotland, the question may well be asked, "Does grain farming pay?" And yet, Prof. Zavitz tells us that at the Guelph Farm, 55 and 59 bushels of barley have been obtained to the acre by the use of fertilizers. Our clear need is cheap, concentrated, standardized fertilizers, which divested as far as possible of all unnecessary associated matter, can be transported at low cost over the long railway journeys to the farms. In pursuance of this, our chemical and mining laboratories should further investigate the problems of separating the potash from our abundant feldspars, the phosphates from their associated rock, ammonia sulphate from the peats, nitric acid from the coke oven products, and of other sources of fertilizers, whilst they may well examine further into the extraction of nitrogen from the air, which, under present methods, requires too much power to be economical, not only in this process, but in view of the many other industries needing hydro-electric power.

But there are many other valuable manures, lying at our doors, which are at present neglected and which can be applied directly to the soil, or chemically or mechanically prepared for it. Fallen leaves in the forests and on our streets are more valuable than stable manure; the garbage and sewage of the cities and towns are so effective as fertilizers that every municipality should investigate methods for their disposal in this way, instead of carelessly permitting them to be accumulated in dumps, or to be deposited in the rivers and lakes, there to endanger the lives of the citizens of its own and other municipalities; the wastage and offal from the abattoirs, and of the fish, fruit and vegetable canneries are in the same way valuable, whilst the straw and chaff so often burned in our Northwest after the thrashing of the grain, the lawn cuttings of the cities, seaweed, shell marl, peat, sawdust, wood ashes, soft, and probably even hard coal ashes—all have their values in the soil and need only more detailed research on the part of the chemist to indicate the particular plants and particular soils for which they are suited. What is much needed is a farmers' and gardeners' vade mecum which would in brief, popular language, tell them of the special soils and fertilizers best suited to each of the different grains and vegetables, and of the various fruit trees, and the best methods of cultivation in each case.

Fish Valuable for Food.

There are other lines of research in food products. Investigation is greatly needed into the food values of the great numbers of species of fish found on both the Atlantic and the Pacific coasts, which are at present unfamiliar to the public, and not therefore being easily marketable, are not sought for by the fishermen, or, if caught, are thrown away. Probably every fish found in our cold northern seas is edible, and if the fishermen could sell everything they catch, not only would the supply be much greater, but the prices could be correspondingly lowered. Why should haddock and cod, and, to less extent, salmon, halibut, mackerel and smelts almost monopolize the public taste in its too limited demand for fish from the sea? As to fresh-water fish, the great problem is the systematized restocking on a large scale and at frequent intervals, of our lakes and rivers, already so largely depleted. This should be an international matter, in consequence of the vast areas occupied by the Great Lakes, separating there the United States and Canada, and the direct interest both countries have in sustaining the fishing industry. What appears to be needed is co-operation in finding the best methods of rearing the fry, transporting them to their feeding grounds at distant points, and caring for them there during their earlier stages.

Briquetting of Peat.

The problems connected with fuels involve not only an ample supply being available, but the conservation of heat itself, such a large proportion of which, under present methods, is allowed to be dissipated into the atmosphere without any attempt at utilizing it. Peat has from time to time attracted attention with us as a fuel, in consequence of the extensive areas occupied by it in Canada, but thus far, the problems of successfully briquetting it to ensure that it will stand weathering, rough handling, and long transportation, as well as of its adaptability to steam and domestic purposes, and as a coke for smelting, have not been worked out. As peat is largely composed of fibres or tubes filled with water, a new English proposal is to grind the peat to a pulp, mould this pulp into briquettes, and submit these briquettes for a few hours to a drying machine, from which they emerge as hard, densified blocks, ready for steam or domestic purposes, and which can be converted into a charcoal or coke for smelting ores. How far is this a suggestion for economical application to our Canadian peats? The resulting coke represents about 40 per cent. of the densified peat, whilst the valuable by-products include sulphate of ammonia, acetic acid, phenols, alcohol, oils and a gas of which about 14,000 cubic feet can be obtained from a ton of the densified peat.

Conservation of Heat.

The large proportion of the heat derived from our fuels which goes up the chimney, without being utilized, may well be the subject of investigation. Probably two-thirds of the heat from our grate fires is, in this way, absolutely lost, and, in a less degree, this also applies to the furnaces in our houses, offices and factories. In our homes, where ample fires are maintained in these furnaces for at least seven months of the year, there seems no reason why arrangements might not be made, through alterations in the chimney and furnace, for utilizing the same fire for cooking as well as for heating. Further, by having the chimney in the centre of the house, instead of in the cold outside wall, the heat, as it ascended, could be utilized from floor to floor, radiating into at least four rooms on each floor, and utilized also there, for special purposes, as well as for heating. These ideas require careful thinking out, but are quite practicable, and, in our severe winter climate, would not only add to our comfort, and economize fuel elsewhere in each home, but would further utilize heat which is now thoughtlessly wasted.

Substitutes for Gasoline.

Notwithstanding Dr. Rittman's discovery of a process under which the production of gasoline from petroleum can be more than doubled, a pressing transportation problem at present is the scarcity and consequent high price of that motor fuel. In England, compressed gas, held in steel tanks with reducing valves, is being tried as a substitute, but attention here should be centered most on the possibilities of alcohol, the sources for which are so numerous on our American continent. The only satisfactory results obtained by the South African Research Committee were from alcohol derived from the cheap, Natal, sugar cane molasses, by adding a certain proportion of pyridine bases and wood naphtha or benzine. This may convey suggestions to our chemical experts in their investigations with alcohol from waste wood, sawdust, pulp mill liquors, potatoes, corn, and other readily available material. In Sweden and Norway, a sulphate spirit from the pulp mills has already been successfully used. In each country, it is a question of relative cost, as well as of the availability of the raw material.

Chemical Research.

Stimulated largely by the needs of the Allies in the war, many brilliant discoveries have been made in the domains of chemistry and of electro-chemical metallurgy, particularly in explosives and the methods of using them; in the extraction of copper, zinc, and other metals from refractory ores; in the Bessemer process of steel production; in dyestuffs; in anaesthetics; in manufactures of the finer grades of glass; and in scores of other important lines. Many of these discoveries are now being practically applied in the conduct of this great war, in which science is playing such a leading part, but will find their equal value in more peaceful operations when the war clouds have passed by. Chemistry has now found its place in the public mind as one of the most important aids to industry, and in its bearing on the needs of the future, it affords abundant further opportunities for research. Even when chemistry has only a partial, although important, part to play in what are, otherwise, mechanical or metallurgical processes, the opportunities are large. For instance, some of our common plants, and weeds of the wayside, capable of extensive cultivation, may yet furnish fibres of a fine grade suitable for high-class paper, or for use directly for, or mixture with, silk goods, or for mixture with wool to give a closer texture and a more attractive and warmer material than the present union goods. The discovery would be very important if, by some chemical or mechanical process, or both, the curl which is characteristic of sheep's wool, and which chiefly gives rise to the warmth of woollen material, by creating air interspaces everywhere with similar effect to that of the double window, could be communicated to any other sort of hair or fibre which is available in quantity.

CANADA AND WEST INDIES

Transportation Facilities Must Be Improved—Halifax and St. John

Editor, *The Monetary Times*:—

Sir,—The subject of closer commercial relations between Canada, the British West Indies and contiguous British territory—a reference to which appeared in a recent issue of *The Monetary Times*—is an opportune one for consideration at any time, and particularly now that Britishers everywhere should be arranging their post-war trade programmes. So far as Canada and the British West Indies are concerned, each country has commodities the other needs and which could be exchanged with mutual profit.

It was this feeling of mutual interest which led to the extension in 1913 of Canada's preferential tariff to the British West Indies and to the adjoining colony of British Guiana. Under this tariff there has been an increased development of trade between Canada and the British West Indies, but this has been comparatively small. If our manufacturers and shippers were thoroughly alive to the importance of their West India trade connection, and the necessary transportation facilities were available, it would be much larger.

During the fiscal year 1917, the exports from Canada to the British West Indies amounted to $5,179,083, as compared with $4,134,901 in 1916. Imports from the islands showed a much greater increase the figures for 1917 being $14,239,595, as against $6,354,991 in 1916.

Exports and Imports.

An analysis of the export figures shows increases in coal, codfish, herring, planks and boards, butter, canned or condensed cream and milk, flour, cereals, potatoes, clothing, cordage, drugs, fertilizers, glassware, rubber tires, boots and shoes, nails, steel manufactures, harness leather, paper, paints, ships, trunks, automobiles and household furniture, while there was a decrease in meats, pork, mackerel, pickled fish, salmon, scantling, staves, oats, peas, biscuits, brooms, oil cake, parts of automobiles and carriages and manufactures of wood.

In the matter of imports from the West Indies, increases are noted in beans, cocoanuts, cocoa, coffee extract, feathers, package fruits, honey, lime juice, sponges, nutmegs, sugar, syrups, vegetables, wax, cocoa beans, dyeing articles, drugs and old copper, the decreases being chiefly noticeable in molasses, salt, hides, oranges and grape fruit, bark extracts and crude lime juice.

The Barbados Advocate, in discussing improved commercial relations with Canada in a recent issue, remarked that:—

"It cannot be too strongly pointed out that this one market, that of the British West Indies, is comparatively close at hand, is waiting for further development, and possesses these direct advantages that the merchants there (in Canada) are strongly desirous of having more extensive and closer relations with us, and that, already, throughout these colonies there are active branches of two leading Canadian banks, ready to assist with information and banking facilities in developing our trade."

Transportation Facilities.

The same paper declares that these advantages would be futile if they were not linked with such transportation conditions as more frequent and quick steamship services between near Canadian ports and the British West Indies, fast through freight services with Canadian business centres timed to meet the arrival and departure of the steamships, and through freight rates and charges between the West Indies and Montreal and Toronto via a Canadian port not exceeding those via New York and Boston. There must also be cold storage facilities, cool, ventilated accommodation, especially for fruits, in both steamships and cars, rapid sailings and prompt handling of cargoes.

These results can be obtained only by the utilization to the fullest extent of the advantages possessed by the Canadian ports of Halifax and St. John. Both ports are open the whole year round. Both have close connection with central Canadian points, St. John having two transcontinental lines, the Canadian Pacific Railway and the Canadian Government Railway, while Halifax has the Canadian Government Railway. There is practically little difference in the ocean distances between Halifax and St. John and the West India Islands, Halifax having the advantage in the run to Bermuda of 21 miles. Against this, St. John has a decided advantage in the matter of land haul, by both transcontinental lines. By the Canadian Pacific, the rail and ocean mileage, from Montreal to Bermuda via St. John is 1,254 miles, while via Halifax and the Canadian Government Railway it is 1,588 miles. If the Canadian Government Railway line via Moncton were employed, St. John would still have a considerable advantage in the rail haul. This advantage will be increased with the completion of the Valley Railway connection with the government transcontinental line.

A recent bulletin from the trade commissioner at Barbados shows that in the shipment north of the molasses crop of 1917, a much larger proportion came via St. John than via Halifax. In other commodities, no doubt, Halifax excelled St. John.

St. John and Halifax.

In any scheme for increased development of West India and contiguous trade, which may be exploited after the war, the ports of St. John and Halifax must be considered together. Neither St. John nor Halifax would be satisfied with anything less. Whether the increased development scheme would be covered by an alternate direct service from and to the ports of St. John or Halifax by the Royal Mail Steam Packet line, or a direct service by either the Canadian Pacific Railway or the Canadian Government Railway, or both, are matters for future determination. There is no doubt that considering the short railway haul a direct Canadian Pacific Railway steamship line from St. John via Bermuda to the West India Islands and contiguous British territory in South America would be a most attractive one to Montreal and Upper Canadian shippers, and would greatly facilitate trade in the directions indicated.

What is more particularly needed at this moment is the concentration of the business thought of Canada upon the possibilities of these trade connections for Canadian manufacturers and shippers. The more publicity that can be given to this matter the better. Geography can be relied upon to furnish the balance of the argument.

Yours, etc.,
R. E. ARMSTRONG

St. John, N.B., March 12th, 1918.

ANOTHER PROVINCIAL GOVERNMENT LOAN

Another provincial government loan will be offered next week, the amount probably being $1,000,000. The prospectus is in preparation. So far this year $6,630,000 of Canadian provincial bonds have been successfully floated, at prices yielding the investor from 6 to 6½ per cent. The provinces thus accommodated are Saskatchewan, Manitoba, New Brunswick and Ontario. In the entire year 1917, the provinces borrowed only $6,382,500. Next week's loan will bring this year's total of provincial bond sales to $7,630,000.

PROPOSED FEDERAL RESERVE SUBSIDIARY

Suggested Bank in the United States and Its Relations to Canadian Banks

It is generally conceded that the suggested subsidiary of the Federal Reserve banks of the United States to handle foreign business, would have a considerable effect in promoting international trade and in facilitating financial intercourse. Canadian bankers naturally have been much interested in the recent Washington dispatches giving details of the organization and powers of the proposed bank, as set out in the bill just introduced to the Senate. In view of the more definite nature of the proposals, and on the presumption that Congress will enact the necessary legislation, Mr. H. M. P. Eckardt, who contributed several valuable banking articles to *The Monetary Times Annual*, discusses in The American Banker, of New York, some of the features or points which will particularly affect the business of the Canadian institutions.

To Every Bank in Country.

It is stated, he says, that the new Federal Reserve Foreign bank would extend accommodation not only to the twelve Federal Reserve banks, but also to every bank in the country, whether a member of the Federal Reserve system or not. Apparently the branches established in the United States by Canadian banks might thus be permitted to obtain accommodation. The seven New York agencies of Canadian banks carry on operations by authority of the New York State legislature. Similarly the Bank of Nova Scotia in Boston derives its powers from the State government of Massachusetts; the Bank of Montreal and the Bank of Nova Scotia in Chicago get their authority from the State of Illinois; the Bank of Montreal and the Canadian Bank of Commerce have the status of State banks in Washington—the latter institution having the same standing in Oregon; and the Canadian Bank of Commerce and the Bank of British North America, each have an establishment in California, which is subject to the control of the government of that state.

Canadian Banks' Position.

So, unless these institutions are excluded specifically or by means of a general prohibition, it would seem that they, along with the State banks of purely United States origin, would be eligible for participation in the benefits arising out of the change in the banking system. That is to say, these branches and agencies of the Canadian banks could presumably dispose of their foreign exchange bills, direct to the new bank, and also buy exchange directly from it when occasion required.

It appears that some of the important dealers in the New York exchange market have been somewhat apprehensive over the prospective encroachment of the Federal Reserve banks upon their special field of activity. They fear that if the new organization sets out to monopolize the exchange business, or if it over-regulates the market, there may be a drastic readjustment, which would affect them severely. The Canadian bank agencies have always been numbered among the important private dealers in exchange at New York. Not so long ago the leading Canadian banks were reputed to be the largest dealers in exchange, but latterly several of the great American banking institutions have developed this department of their business to very large dimensions, and have taken the leading places in the market. However, the Canadian banks still constitute an important factor; and they, like the big New York banks, would be affected if the new quasi-official bank adopts an aggressive policy.

Foreign Exchange.

At present several of the leading National and State banks negotiate the sterling and other foreign exchange sent to them by their numerous correspondents at interior points, and they buy exchange in large amounts direct from shippers or exporters, not only from those domiciled at New York, but also from many large concerns located elsewhere. The Canadian bank agencies naturally derive a considerable supply of exchange from their own branches in the Dominion, and they also have connections with a few American banking institutions at interior points, and quite a number of important American exporters. So far as the exchange from their Canadian offices is concerned, they are practically certain to retain it. On receiving the bills from Canada, they would perhaps dispose of the exchange to the new Federal bank, if it offered the best rates. Perhaps, in any case, there will be enough exchange business for all the recognized dealers, even after the new institution begins its operations. It will represent an additional place at which the other dealers may transact business; and conceivably it will furnish them with funds on satisfactory terms for carrying on their own deals.

Canadian and Federal Reserve Banks.

Then the new foreign bank is to be authorized to receive deposits from American and foreign banks, and from the American foreign governments. This clause if enacted would apparently open the way for the head offices of Canadian banks to carry accounts with the Federal Reserve Foreign bank. If the operations of the new foreign bank are to be restricted to exchange bills relating to imports to, or exports from the United States, that would prevent the Canadian bankers from utilizing there the large volume of bills drawn against Canadian exports to Great Britain. These bills are now largely negotiated in New York, and it would seem to be a good point if the new bank were empowered to take them. Since the war began it has been demonstrated time and again, that special legislation on trade and finance, which treats Canada as a foreign country, creates hardships, and causes loss to business men in both countries. Examples of this are seen in the United States embargo upon exports and the recently imposed regulation regarding imports into the United States. To broad minded observers it seems that the best results are obtained from the policy of recognizing that in these matters the United States and Canada are practically one country. Both are now giving all their energy and attention to the sacred purpose of preserving the world from the domination of a cruel military oligarchy; and that being the case it seems to many of the bankers, and business men that the cause of the Allies and the best interests of the United States and Canada would be promoted if Washington in placing its embargoes, regulations, and prohibitions re foreign trade, specifically excepted Canada. This would make for closer harmony and greater efficiency; and would also tend to make the post-bellum trade and financial intercourse of the two North American countries more intimate and more advantageous to both, concludes Mr. Eckardt.

NIAGARA FALLS POWER COMPANY

The Niagara Falls Power Company and the Canadian Niagara Power Company for the year ended December 31st last showed a total operating revenue of $3,225,115, as opposed to $3,062,835 in the preceding year. The operating expenses showed a great expansion, totalling $1,207,886, as against $851,896 in 1916. The net operating revenue was $2,017,229. The net income was $2,195,804, as against $2,365,815 the previous year. The surplus is $1,200,064; at the end of 1916 it was $1,362,116. The companies have $25,565,711 invested in real estate, power stations etc., $2,200,525 in investments, and $1,605,617 in cash. During the year $300,000 was put into United States government 4's and $250,000 into the Canadian Victory Loan. The total assets of the companies amount to $32,303,382. The Niagara Junction Railway Company, a subsidiary, showed an operating revenue of $184,365, as against $156,053 the previous year. The operating expenses were $115,395 and the net earnings $68,970. The net earnings, owing to the higher operating costs, showed a slight decrease from those in the previous year.

FOR CANADIAN EXPORTERS

In view of the fact that the prohibited list of imports into the United Kingdom is subject to change at any time, Canadian exporters should communicate with the department of trade and commerce, Ottawa, before making arrangements to ship articles to the United Kingdom. When possible the information desired will be furnished.

If the shipment is destined for any country other than the United Kingdom or British possessions, inquiries should be addressed to the customs department, Ottawa, to ascertain whether or not an article is prohibited from being exported and if a license for the export of the commodity referred to can be granted.

NEED FOR BANKRUPTCY ACT

For twenty years, the advisability of enacting a federal bankruptcy law has been discussed. We are still without that very necessary and desirable legislation. Public opinion is now practically unanimous in its demand for this legislation. There is no reasonable objection to the government taking steps at the coming session to give Canada a bankruptcy law for which we will not be compelled to apologize every day. In an address to the Ontario Bar Association at Toronto recently, Mr. S. W. Jacobs, K.C., a barrister of Montreal, made a forceful plea for proper bankruptcy legislation. After tracing the numerous attempts made from year to year to get Parliament to act in the matter, he described in detail the dangers and disadvantages of the existing and diverse legislation in Canada. He made it quite clear that laws affecting bankruptcy and insolvency go to the very root of our present-day civilization.

One of the important points made by Mr. Jacobs was the relation of our defective bankruptcy laws to the development of Canada's trade abroad. While traders from the United Kingdom, France, Belgium, the United States, and so on, are met with uniform customs, banking and other laws, they are met also with insolvent laws enacted by the various provinces of the Dominion, which do not possess that uniformity which is so desirable in such matters. It is of the utmost importance that we should have a uniform legislation, applicable to the whole Dominion, in order that outside traders in their dealings with us may not find themselves face to face with a country divided, from a legislative standpoint, into four or five provinces, in matters of such considerable importance.

Mr. Jacobs pointed out that the British North America Act gives to the Parliament of Canada the power to enact legislation on bankruptcy and insolvency, recognizing, no doubt, that legislation of this kind, intimately bound up, as it is, with trade and commerce, should have application throughout the Dominion. "Trade interests are of national importance," he said, "and local or provincial considerations should be brushed aside, when measures looking to stimulation of commerce are in question. A merchant in one part of the country should be encouraged to deal with a trader in any other part of the country, and the greater the expansion of trade effected in this way, the more does it make for the breaking down of prejudices, petty rivalries, and provincial differences. In the effort to stimulate trade, a harmonious legal system is bound to be a factor of no small importance." There is no good excuse for delayed action in this matter.

FOR INVESTORS

Many of the 800,000 people of Canada who made their first investment during the Victory Loan campaign are already being approached by unscrupulous dealers and asked to sell their securities at ridiculously low prices. The warning issued by the department of finance in this connection is very timely. It must not be forgotten that there are many legitimate channels for investment and that there are well-organized and established organizations from whose members quotations on all securities may be procured, such as the Montreal or Toronto Stock Exchanges. Membership in these bodies is composed of firms who have well established a recognized permanent business office address and who must live up to the ethical standards established by the exchanges.

At considerable expenditure, facilities have been installed for procuring all kinds of information which may affect security values in any way by numberless private wire connections with all parts of the world. Seeking investment knowledge and advice of such investment houses will, unlike the counsel given by other specialists, cost nothing. Though money may sometimes be easily made, it can be far more easily lost, if carelessly invested.

TRADE RETURNS

The transportation difficulties, rail and ocean, are reflected in the trade figures. Our exports of agricultural products in January were valued at only $26,000,000 compared with $91,000,000 in the previous month, despite the urgent demand of the United Kingdom for our products. A better record was made in regard to manufactures. In December, the total volume of exports under that head was the smallest during the past year. A considerable improvement occurred in January when exports of manufactures were valued at $41,383,115, an increase of nearly $8,000,000, representing more than 40 per cent. of the total exports of all classes. Another satisfactory gain was $4,500,000 in "animals and their produce," while increases were shown under the heads of "the mine" and "the fisheries." How our export totals during January and December last were made up, is shown in the following table:—

Exports of—	January, 1918.	December, 1917.
Mine	$ 5,528,992	$ 5,026,041
Fisheries	3,390,587	3,016,059
Forest	3,110,324	3,836,909
Animals	15,918,079	11,433,910
Agricultural	26,390,294	91,216,447
Manufactures	41,383,115	33,635,790
Miscellaneous	494,893	246,763
Total	$96,216,284	$148,411,919

Our imports in January were valued at $60,000,000 compared with $61,000,000 in December and $107,000,000 in May. Imports, which have been decreasing steadily since the summer of 1917, largely because of the difficulty of securing raw materials in the United States, were the smallest reported in any month in more than a year. Because of a decrease of $13,000,000 in the import figures the net trade balance in favor of Canada was in January last nearly $9,000,000 higher than in January a year ago, and a new record for the month. If our imports continue to decline and our exports increase, the trade balance will rapidly improve. At the same time, as a large part of our imports are raw materials from the United States and as much of the product is finished here for export, a decrease of imports will to some extent affect the volume of our export trade also. Our trade balance may possibly be improved by a compulsory reduction of the importation of articles which may properly be considered luxuries. This matter is having the consideration of the War Trade Board.

BANK AMALGAMATIONS

The continued amalgamation of banks in the United Kingdom has excited much comment in banking and trading circles. The extent to which they have proceeded in the last twenty-five to thirty years is seen from figures presented in a recent issue of The London Economist. The thirty-four English joint stock banks in existence in 1917 have been reduced to thirty-three as a result of the amalgamation of the London and Provincial and London and Southwestern. If the provisional agreements between the National Provincial Bank of England and the Union of London and Smiths and the London County and Westminster and Parr's are completed there will be a further reduction to thirty-one. The Banking Almanac for the current year shows that in 1886 the average amount of deposits in each bank was about £2,750,000, while by the end of 1917 it had increased to £40,000,000 or £42,500,000 on the assumption that the mentioned amalgamations will proceed. In 1872 one bank office existed for every 12,766 inhabitants, but now there is one for every 5,030.

While certain important proposals for further bank mergers were being discussed, Mr. Bonar Law, chancellor of the exchequer, was asked by a member of parliament whether his attention had been called to the possible danger to the commercial community of the concentration of banking business into monopoly concerns. The Chancellor did not accept this definition of the movement, which was obviously exaggerated, but, without expressing any opinion on the question of principle, considered that the matter was one of public importance, and intimated his intention of appointing a committee consisting of bankers, merchants, and manufacturers to consider and report to what extent they thought it desirable in the public interest to interfere with such arrangements. In the meantime he expressed the hope that any further schemes which might be contemplated would not be proceeded with, the hope in such a case being almost tantamount to a demand. The London correspondent of the New York Annalist crystalizes the objections heard overseas as to the concentration of banking resources. The feeling is, he says, that a money trust may be the outcome, with results detrimental to the national interest. This is not the case in Canada. The approval of the Royal-Northern Crown bank merger by the department of finance indicates that amalgamations are sometimes a source of strength to the banking and business position, rather than otherwise.

ARRANGEMENTS FOR RAILS NEARLY COMPLETE

Arrangements whereby the need for rails for renewals on the Canadian government railways and the Canadian Northern system during the present year will be met have been practically completed by Hon. J. D. Reid, the minister of Railways and Canals. The purchase of 355 miles of 67-pound rails, which were rolled in the United States under orders placed there by the Russian Purchasing Commission, has been completed, and some of the steel is now on its way to Canada.

Negotiations for an additional 150 miles of rails, manufactured for Russia, have also been practically completed, making a total of some 500 miles available for replacement on the lines now owned or controlled by the Canadian government.

There is also a possibility that 350 miles of 80-pound rails on the Hudson Bay Railway will be lifted for use on lines where traffic is more dense and will be replaced by the lighter rails being obtained from the United States.

RIORDON COMPANY'S SHIPMENTS MOVING FASTER

An official of the Riordon Pulp and Paper Company states that the difficulty experienced in getting shipment of stocks on hand through shortage of cars is gradually adjusting itself. Shipments are now going forward much more freely and orders awaiting shipment are being reduced. The situation has not entirely clarified itself as yet, but with more favorable weather conditions now in sight there should be a distinct improvement from now onward. The United States still owes Canada about 20.000 cars, and these are said to be coming in more freely of late.

Sales of the company are running most satisfactorily, and the company is assured of capacity business for a long time to come.

Mr. E. B. Leroy, resident manager of the Canada Permanent Mortgage Corporation, of St. John, N.B., will retire May 1st, and be succeeded by Mr. H. M. N. Stanbury. Mr. Leroy is coming to Toronto to reside.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Kingston, Ont.—March 12—The Central Public School, on Sydenham Street, was damaged. Estimated loss, $5,000.

London, Ont.—March 8—Contents of the United Typewriter Company's office in the Ashplant building were destroyed.

Marysville, N.B.—March 6—Home of Mr. E. J. Kingsley was destroyed. Caused by defective flue.

North Toronto, Ont.—March 12—House of Edward Hurst, Willowdale, North Yonge Street, was destroyed.

Point Edward, Ont.—March 6—The old office building of the late Dr. McLaren on Front Street was destroyed. Estimated loss, $500.

Quebec, Que.—March 8—Back part of Messrs. Dombrowski Brothers' furniture store, situated on the ground floor of the Merger building, on St. Joseph and Crown Streets, was damaged.

Saskatoon, Sask.—March 10—The J. H. Ashdown's wholesale hardware store was destroyed. Estimated damage to building, $100,000; to stock, $500,000.

South Devon, N.B.—March 4—House of George Ward was damaged. Caused by defective flue. Estimated loss, $60.

Souris, P.E.I.—March 10—Building owned by Dr. Sullivan, and used by himself and the Eastern Grocery Company, was destroyed. An estimated loss of $9,000 is divided between them.

Sydney Mines, N.S.—March 7—The McRae block and several adjoining buildings were destroyed. Estimated loss, $75,000.

Toronto, Ont.—March 11—Grocery store of Mr. Leparick, 150 Dundas Street, was destroyed. Caused by rats nibbling matches. Estimated damage to contents, $1,000; to building, $700.

March 12—Two ferry boats of the Toronto Ferry Company were destroyed.

March 13—The Adams Furniture Company's garage, four auto trucks and adjoining buildings were damaged. Estimated loss, $3,500.

Vancouver, B.C.—March 3—Vacant house at 2003 Hastings Street East was damaged.

Windsor, Ont.—March 5—The brick block on the corner of Hall Avenue and Wyandotte Street was damaged. Caused by overheated stove in E. Miller's apartment. Estimated loss, $3,000.

Winnipeg, Man.—March 7—The B. Miller's stationery store, in front of the Grand Theatre, on the corner of Main Street North and Jarvis Avenue, was destroyed. Estimated loss, $3,500. Insurance to the amount of $1,000 was carried in the Yorkshire Fire Insurance Company.

ADDITIONAL INFORMATION CONCERNING FIRES RECENTLY REPORTED

Conaston, Ont.—February 26—The frame schoolhouse was destroyed. Estimated damage to building, $10,000; to contents, $1,018. Insurance on building is carried in the Phœnix of England, Employers' Liability and Springfield Fire Insurance Companies. Insurance on contents is carried in the Phœnix Insurance Company.

Orillia, Ont.—The Royal Bank was damaged. The building was owned by Mrs. Breen, and the loss was $780. Royal Bank supplies were damaged to the extent of $150. Insurance was carried in the Liverpool and London and Globe Insurance Company.

Saskatoon, Sask.—Fire Chief Heath submits the following report for the month of February to *The Monetary Times*:—

An apartment block, owned by Mr. J. D. Ferguson, was damaged on February 9th. Caused by dropping of lighted match into varnish can. The estimated damage to building was $50, and the insurance was carried in the General Accident Insurance Company to the amount of $63,000.

On February 15th a dwelling-house, owned by Murray and Munroe, and occupied by Mr. Morton, was damaged. The cause was reported as children playing with matches. The estimated damage to building is $300; to contents, $199. A total insurance of $10,800 is carried in the Atlas, Commercial Union and Fidelity Phœnix Fire Insurance Companies.

Toronto, Ont.—February 26—The Hunter, Rose building, occupied by the Hunter, Rose Company, Limited, on Sheppard Street, was destroyed. The cause was reported as spontaneous combustion. Estimated damage to building, $5,000; to machinery, $20,000. The total insurance carried on building is $40,000, and is divided among the following companies: British America Assurance Company, $5,000; British Dominions General Insurance Company, $5,000; Caledonian Insurance Company, $5,000; Employerss' Liability Assurance Corporation, $5,000; Law, Union and Rock Insurance Company, Limited, $5,000; National Fire Insurance Company, of Hartford, $5,000; Northern Assurance Company, Limited, $5,000; Nova Scotia Fire Underwriters, $5,000.

The total insurance carried on machinery is $85,000. The following companies are interested: Dominion Fire Insurance Company, $10,000; Employers' Liability Assurance Corporation, $5,000; Liverpool and London and Globe Insurance Company, Limited, $5,000; London Guarantee and Accident Company, Limited, $2,500; London Guarantee and Accident Company, Limited, $2,500; London and Lancashire Fire Insurance Company, $5,000; London and Lancashire Insurance Company (Fire), $5,000; National Fire Insurance Company, of Hartford, $5,000; New York Underwriters' Agency, $5,000; Niagara Fire Insurance Company, $2,500; Norwich Union Fire Insurance Society, $5,000; Ocean Accident and Guarantee Corporation, Limited, $2,500; Phœnix Assurance Company, of London, $10,000; Provincial Insurance Company, Limited, $5,000; Union Insurance Society, of Canton, Limited, $5,000; Yorkshire Insurance Company, Limited, $10,000.

Vancouver, B.C.—Fire Chief Carlisle submits the following report for the month of February to *The Monetary Times*:—

The fire department responded to 46 alarms during the month of February.

The estimated total damage resulting from fires for this period was $5,586, of which amount $5,056 was covered by insurance, leaving the property loss above insurance at $530. The total value of the property involved was $277,550.

The following shows the cause of fires, alarms, etc., for the month: Children playing with matches 1, carelessness with matches, cigarettes 1, chimney fires 16, city limits (out of) 1, defective chimney and stovepipe connections 1, electrical origin (short circuit in wiring) 2, false alarms 5, fire escaping through check-draft in furnace pipe 1, firewood left on top of furnace and too near stove to dry 2, flying sparks (from chimney) 3, match in shavings on floor 1, overheated hot air furnace 1, overheated range 1, overheated stove 1, overheated stovepipe 1, smoke scares 3, stove placed too near wall 1, too big a fire in open fireplace 1, trucks loaded with matches caught in passing 1, unprotected chimney pipe 1, and unknown 1.

The following shows the value of property involved by fire, the total loss and the insurance carried: Fires where damage occurred, 17; total value of property involved by fire, $277,550; total insurance carried, $191,150; total loss, $5,586; insurance paid, $5,056; property loss above insurance, $530.

Victoria, B.C.—Fire Chief Davis submits the following report for February to *The Monetary Times*:

Loss by fire on buildings, $353; Loss by fire on contents, $55. Total loss by fire on buildings and contents, $408. Insurance on buildings, $18,800; insurance on contents, $1,000. Total insurance on buildings and contents, $19,800. Property at risk, $330,400.

NOTICE TO APPLICANTS FOR PRIORITY ASSISTANCE

The war trade board desires to make the following suggestions to firms in Canada making applications for priority assistance: If all applicants for steel plates, for instance, would attach to their applications a letter giving full details of dimensions, sizes, and, when necessary, analyses, it would assist materially in the consideration of their application by the war trade board. The board has also sent out report blanks to dealers in scrap, and the prompt filling in and return of these would go a long way to assist the board in compiling correct statistics as to the quantity of this material in Canada. Report blanks have also been sent for the same purpose to those dealing in tin ingots, and the prompt return of these is equally desired.

The Bank of British North America

Incorporated by Royal Charter.

The Court of Directors hereby give notice that a dividend of Forty Shillings per share, less Income Tax, will be paid on the 5th April next to the Proprietors of shares registered in the Dominion of Canada, being at the rate of 8% per annum for the year ended 30th November last.

The dividend will be paid at the legal par of exchange on the 5th day of April next.

No transfers can be made between the 22nd inst. inclusive and the 4th prox. inclusive, as the books must be closed during that period.

JACKSON DODDS,
Secretary.

COINSURANCE CLAUSE IN FIRE POLICIES

Percentage of Coinsurance Principally Used in Fire Insurance is Eighty—An Interesting Explanation

"The percentage of coinsurance principally used in fire insurance is 80," said Mr. Fred. A. Burgess, manager of the insurance department of Messrs. Waghorn, Gwynn and Company, Limited, of Vancouver, in his address on February 11th, before the Insurance Institute of that city, "and the clause is usually worded as follows:—

" 'It is a part of the consideration of this policy, and the basis upon which the rate of premium is fixed, that the insured shall maintain insurance concurrent in form with this policy, on each and every item of the property hereby insured, to the extent of at least 80 per cent. of the actual cash value thereof, and that, failing so to do, the insured shall be a coinsurer to the extent of an amount sufficient to make the aggregate insurance equal to 80 per cent. of the actual cash value of each and every item of the property hereby insured, and, in that capacity, shall bear his, or her, or their proportion of any loss that may occur.'

Added to Clause.

"To this clause," he continued, "is generally added the following:—

" 'In the event that the aggregate claim for any loss is less than $2,500 (provided, however, such amount does not exceed 2 per cent. of the total amount of insurance upon the property described herein and in force at the time such loss occurs) no special inventory or appraisement of the undamaged property shall be required.'

"The 80 per cent. coinsurance clause," said Mr. Burgess, "is an obligation on the part of the assured to maintain insurance during the currency of the policy equal in amount to at least 80 per cent. of the actual value of the property insured. The fixing of values in advance—i.e., at the time of the effecting of the insurance—as a basis for the settlement of the loss in connection with this clause, is not sufficient. In the actual settlement of losses account must be taken of changes in values, by reason of increased or decreased cost of materials or labor or depreciation through age, use or fluctuation in market prices of commodities. A revaluation of buildings or plants after a term of years, and stocktaking at least once a year, or at seasons when stock fluctuates should therefore be recommended.

When Property is Destroyed and Insured.

"The 80 per cent. coinsurance clause would not affect the settlement of a loss under a policy in the following cases: 1st. When the property insured is totally destroyed, as the full amount of insurance would be paid upon satisfactory proof of such total loss. 2nd. When the property is insured for not less than 80 per cent. of its actual cash value, whether the loss be total or partial.

"A percentage coinsurance clause affects the settlement only when both the amount of the loss and the percentage of insurance carried to value are below the coinsurance percentage stated in the policy as per the following example:—

"Assured sustains a loss of $400 on property worth at the time of the fire $1,000. He holds a policy for $700 subject to the 80 per cent, coinsurance clause. Sound value of the property at the time of fire, $1,000; amount of insurance required under the 80 per cent. clause, $800; amount of insurance actually held, $700; showing a deficiency (which is the amount the assured contributes on as a coinsurer) of $100. The loss, amounting to $400, is apportioned as follows: The company insured $700 and contributes 700/800ths of the loss, $350; the assured is a coinsurer for $100 and contributes 100/800ths of the loss, $50, showing the assured a loser by $50 for not having maintained insurance up to 80 per cent. of the value, as agreed upon under the 80 per cent. coinsurance clause.

"One of the first features noticed by the underwriter in examining a report of a policy issued on a building of ordinary, substantial or fire resistive construction is whether the contract carries a coinsurance clause, and this also applies to risks on stocks or to special hazards, after the commercial rating of the assured has been accepted as passable.

"It will thus be seen that from the standpoint of the insurance company coinsurance is considered one of the most important features in the contract, and it naturally follows that there must be sound reasons for this. If you will kindly bear with me I shall endeavor to elucidate.

"For example, a building is not encumbered in its revenue producing career by a mortgage, and therefore not compelled to carry insurance at all. The owner finds he has a very valuable piece of ground in the heart of this city and decides to erect a fine building of such construction and appearance as to last many years and thus insure tenantry. He studies the fire-fighting apparatus, water supply and personnel of the city's fire department and decides that on account of the class of exposing buildings and the class of any new ones likely to be erected, he does not believe his block will have one chance in a hundred of being totally destroyed or even damaged to a very high percentage by fire. Like every other human being he wants a very low rate of insurance, claiming that on account of the superior construction of his block and of those blocks exposing, his building cannot be totally destroyed by fire. He obtains his very low rate, not only because he wants it, but because the system of rating gives it, and then proceeds, after being canvassed very ardently, to place an amount of insurance, say, $30,000, which, to his mind, is about the maximum amount of damage which could be done before the city's department extinguished a fire. The agent may be successful in persuading his company, he tries hard anyway, and succeeds if the company represented by him is hungry for premiums or is new in the agency and wants to cultivate it, to write the risk.

Company Gets Advice.

"The company will, no doubt, be in receipt of some very nice letters telling it how to properly underwrite and what a lot of new risks it will get if it takes this line; but on the other hand the owner of the building will be probably told by the agent that he is in receipt of a letter from his company to the effect that it does not care to only insure the painting, wood trim, glass and frescoe work of the building without insuring the rest of the structure. This argument or stand of the company is no doubt considered by the owner to be unreasonable and befogging, but the agent says the company knows that its stand is not clear to the owner, but if he will agree to insure his block up to 70, 80 or 90 per cent. of the value and maintain that amount of insurance, they will give him certain percentages of reduction from the very low rate which the owner at present enjoys.

Universal Schedule.

"In 1902, after several years of labor, a committee of 34 eminent fire insurance men of the United States closed its work of endeavoring to form what was called a universal schedule. This committee went into the question of coinsurance very carefully, and in the universal schedule the reasons for the coinsurance clause from the companies' standpoint are carefully set forth and give a clear conception of the why of coinsurance and the reduction of rate therefor.

"The experiences of companies as to the distribution of losses according to percentage of value in fire department cities is about as follows: 68 per cent. are under $100 in amount: 15 per cent. are over $100 and under 25 per cent. of the value of the property; 7 per cent. are between 25 per cent. and 50 per cent. of the value of the property; 5 per cent. are between 50 per cent. and 80 per cent. of the value of the property; 5 per cent. are total losses.

"It will be apparent that coinsurance or contribution is of no value to the insurance company on total losses or those under $100 as the coinsurance clause has a waiver.

"It is on the remainder, or 27 per cent. of the losses (those that are over $100 in amount, but not total), that the coinsurance clause is a benefit, but the fact must not be lost sight of that insurance companies grant reduction in rate on policies written with a coinsurance clause. Therefore, they have a chance to receive a benefit salvage on but 27 per cent. of the losses, and reduce their premium income without securing a resultant benefit on 73 per cent.

No Allowance in Rate.

"In the part of the Dominion where the Canadian Fire Underwriters' Association rating schedule is in use, no greater allowance is made in the rate for the 90 per cent. coinsurance clause than for the 80 per cent. clause. In British Columbia a greater reduction is allowed from the rate, for the higher percentage of coinsurance. In Eastern Canada blanket cover is allowed for 90 per cent. or 100 per cent. coinsurance and in British Columbia we do the same, only in the blanket cover we do not allow a greater reduction for the 90 per cent. than for the 80 per cent. specific as the blanket cover is obviously worth something to the assured. So that in the matter of reduction in the rate for coinsurance British Columbia is more lenient than they are in Eastern Canada. If we adopt the Canadian Fire Underwriters' Association system, we must

BRANCHES AND CONNECTIONS THROUGHOUT CANADA

fall into line with the rate reduction for coinsurance and will be bound to have an argument to face from the intelligent assured. Our system is certainly more scientific, but may be too fine to be of much practical use.

Gambling or Carelessness.

"A great amount of either gambling or carelessness takes place in the amount of insurance carried, and the following are the figures of the adjustment of the loss of the Quaker Oats Company, of Peterborough, Ont., by the fire of December 11, 1916. It will be observed that through under insurance the assured became a coinsurer to the extent of nearly $800,000:—

Sound value as adjusted	$2,228,416.03
Adjusted loss	1,852,218.46
Insurance required under 90 per cent. coinsurance clause	$2,005,574.43
Insurance carried	1,206,500.00
Deficit	$ 799,074.43

Apportionment.

Insurer.	Insures.	Pays.
Companies	$1,206,500.00	$1,114,245.14
Assured (shy)	799,074.43	737,973.32
	$2,005,574.43	$1,852,218.46

"The Quaker Oats plant was sprinklered and 'fireproof,' but that did not prevent an immense loss. Owing to conflagration experience the insurance companies fortunately no longer use the word 'fireproof,' they use the term 'fire resistant.' One manager said that he missed the Quaker Oats loss because the coinsurance clause had a 10 per cent. waiver in it, and he refused to write the risk, which shows his good judgment, and he certainly cannot be classed as one of the insurance gamblers.

Are Clauses Traps?

"It has very often been claimed by those ignorant of the application of coinsurance conditions, that such clauses are tricks or traps laid by insurance companies to catch the unwary and as a matter of fact some States in the United States have legislated against the coinsurance clause. Nothing is further from the truth, however, and court decisions are sufficient evidence to refute any such statement. The name of the clause is bad and tends to misunderstanding and if we in Canada changed it to 'reduced rate average clause,' it would be much better.

"The coinsurance clause should be explained to the assured on every possible occasion, and for this reason I am of the opinion that a clause by another name and more simply worded should be used. I like the 'reduced rate average clause' as follows:—

" 'In consideration of the reduced rate at which, and the form under which this policy is written, it is expressly stipulated and made a condition of the contract that, in the event of loss, this company shall be liable for no greater proportion thereof than the amount hereby insured bears to 80 per cent. of the actual value of the property described herein at the time when such loss shall happen, nor for more than the proportion which this policy bears to the total insurance thereon. This clause, however, shall not apply to any loss which does not exceed 2 per cent. of the total insurance on the property.

" 'If this policy be divided into two or more items, the foregoing conditions shall apply to each item separately.'

Ignorant of Coinsurance.

"Those not engaged in the insurance profession are to a very great extent entirely ignorant of the meaning of coinsurance and look upon the slight saving of premium at the outset only too readily and then, when caught by not living up to their end of the contract, blame the agent for not explaining more fully. I have from time to time been told by business men that the insurance business is not brought out enough as an educational factor, as it is the bulwark of business and the backbone of all credit and being such a very important feature it should be studied. Speaking along this line I wish to mention a point pertaining to the mortgage business. A man loans a sum of money on a property and often takes in perfectly good faith a policy with loss payable to him as mortgagee, the amount of which is equivalent to his loan. The policy has a coinsurance clause in it and the mortgagee thinks he is fully protected, seeing he has a good company. He may, or may not be, but the fact that his policy reads for, say, $5,000, is by no means evidence that it is $5,000 of insurance. If the mortgagor wishes to take advantage of the lower rate by having his policies subject to a coinsurance clause then he should hand over to the mortgagee, and the mortgagee should also insist on it, all his insurance with loss, if any, payable to the mortgagee as his interest may appear. I saw an article on a case where the mortgagee being caught brought suit to the effect that the mortgage clause over-rode the coinsurance clause; but the decision was against him. The case was tried in New York State. The mortgage document provides that the mortgagee may demand insurance up to the full insurable value of the property with loss payable to him, and in my opinion the mortgagee should take advantage of this feature, as he is not called upon to take unnecessary chances when putting out his funds. This is particularly important at the present time when values are appreciating so rapidly. In fact, it is very dangerous just now for a mortgagee to accept as security a policy which is subject to a coinsurance clause.

Coinsurance was Compulsory.

"I have been informed through reliable sources that very many years ago the British government exacted a duty on all fire insurance contracts and at that time there was a law to the effect that no one could recover under a fire insurance policy more than a proportion of his loss unless he was carrying coinsurance up to 100 per cent. of the value of the property. To this extent 100 per cent. coinsurance was mandatory or compulsory at that time.

"There are, of course, many very simple examples of the coinsurance clause which could be set out, such as insurance on two or more buildings under one sum or the subject of blanket insurance.

"The point I wish to bring out most forcibly is the fact that there is not sufficient educational propaganda in the insurance business for the benefit of those engaged in other lines of endeavor and from whom we must obtain premiums.

"The insurance profession is an honorable one. It is the backbone of all credit, the bulwark of business and a most generous, economical and efficient collector and distributor of funds for those in adversity by reasons of calamity, and as such an important part of the business of the world, I hold it should command the dignity and respect it so ably deserves."

LIFE INSURANCE IN CANADA

Commenting on life insurance in Canada, the Insurance Press, New York, says:—

Attempts to approximate the effect of war upon the insurance production of United States companies by a comparison with the experience of English companies have proven unsatisfactory by reason of the general difference in human traits and office practices between the two nations.

A more reliable basis for comparison is furnished by the preliminary reports of life insurance transactions in Canada in 1917. Conditions across the border, both with respect to public attitude, agency management and business customs, are somewhat akin to conditions in the United States.

Despite the fact that the Dominion has loyally borne a heavy burden in the form of taxation and drafted men, the people of Canada last year purchased 10 per cent. more life insurance than in any previous year, the total being closely estimated to be $260,000,000, against $231,101,625 in 1916.

One might naturally suspect that the heavy mortality from war losses, and the financial drain upon the public of providing for war taxes and war loans would cause a high lapse ratio of outstanding insurance. But, according to the estimated figures, it would appear that the insurance gained last year was considerably greater than the increase for any preceding year, thus indicating that the war acually produced a stabilizing effect upon life insurance in force.

It may be difficult to explain satisfactorily these two significant increases, by reason of the fact that Canada is not presumed to enjoy a corresponding prosperity with the United States. However, the experience of Canadian companies and agents last year should be most reassuring and encouraging to their comrades on this side of the boundary, who, by reason of the tremendous impetus to United States industry as an outgrowth of the production of war necessities, have vastly superior opportunities, and accordingly should secure a proportionately greater share of the nation's prosperity.

CANADIAN BANKRUPTCY LAW

Montreal Barrister Makes Strong Plea for Its Enactment —Banks and Other Creditors

"Why is it that year after year bills should have been introduced into our Federal parliament, having for object to correct abuses and simplify the law, without legislative effect being given to them?" This question was asked by Mr. S. W. Jacobs, K.C., barrister, Montreal, in a plea for a Canadian bankruptcy law, at the recent meeting of the Ontario Bar Association. After outlining the attempts to obtain this legislation Mr. Jacobs stated that it was admitted on all sides that a universal bankruptcy act makes for stability in commercial relations throughout the country. "It unifies the various provinces to this degree that it makes the law on this subject the same in all parts of Canada, permitting the lawyer to advise his Halifax client on the law as it exists in Vancouver," continued Mr. Jacobs. "It familiarizes the Bar of one section with the jurisprudence of the other section. It permits merchants throughout the country to know exactly what their legal position is, with regard to their various customers, and does away with the old feudal idea which in some parts of Canada would seek to prevent outsiders from having similar rights to those of their own province. (An instance of this may be cited from one of the Maritime Provinces, where a few years ago, and probably still to this day, traders assigning for the benefit of their creditors had the right, under the provincial act, to mention, in the deed of assignment, the parties whom they wished to have preferred over other parties and the court was bound to give sanction to such preferred creditors, to the detriment of others not so preferred.)

Duty of Parliament.

"Is it not the paramount duty of parliament to brush away every obstacle standing in the road of a uniform bankruptcy act, simple in its design, unequivocal in language, and expeditious in procedure? The great difficulty has been with regard to the provisions regarding discharge to the insolvent debtor, and this difficulty has no doubt been responsible for the failure of the measure to go through. The Federal authority, as already observed, by virtue of the British North America Act alone, is empowered to grant a discharge, and provincial legislative bodies are, under the British North America Act, prevented from dealing with this phase of bankruptcy law. Indeed, so far as the power of provincial legislatures is concerned, these can only apply the provisions of their respective local acts to the distribution of the debtor's assets, and nothing more, and it is therefore more or less of a misnomer to refer to statutes of the legislatures dealing with insolvent traders as 'insolvency' and 'bankruptcy' laws. It can readily be seen that any act which would seek to deprive a certain class of creditors of the full amount of contract obligations due to them, would meet with organized and concerted opposition at their hands.

Discharge to Insolvents.

"The Fortin and Monk bills were careful in their provisions to deal as lightly as possible with the question of discharge to insolvents, Mr. Fortin's bill providing that to obtain a discharge it was necessary to secure the consent of three-quarters, in value, of the creditors, as well as the payment of all privileged and preferred claims, and that the discharge to the debtor would not operate a discharge to the endorser on promissory notes, and further, that banks could in no way be affected by the provisions of the bill respecting discharge. Mr. Monk's bill contained provisions that all privileged and preferred claims were to be paid, and the consent of the creditors of at least one-half of the amount of the claims should be obtained, to give the insolvent his discharge.

"The objection, in my view, to these provisions, is that they did not deal widely enough in the matter of discharge. Where a debtor has been obliged to go through the insolvency courts, through misfortune, and as a result of uncontrollable circumstances, the law ought to give him an opportunity of obtaining a clean bill of health, without interference by his creditors, and any bankruptcy law which gives the creditors the right to declare whether a debtor should or should not be given his discharge is an infringement on the rights of the court, which alone, after hearing the evidence, ought to decide whether the circumstances justify a release from obligations. Were this not the case, the door is left open to abuses produced through the desire by certain creditors to obtain advantages over others. The debtor could be harassed by his creditors, with the threat that failure to pay an increased dividend, on the side, would bring about organized opposition of those who have it in their power to prevent the victim's rehabilitation.

Debtor and Misfortune.

"I do not presume to suggest that discharge be granted lightly or without careful investigation of the debtor's entire management of his business. Were this to be done, it would put a premium upon inefficiency and shiftlessness, and it must be the duty of the court to decide the extent to which the debtor has been responsible for his own misfortune, and where it is shown that the disordered state of his business is brought about through no dishonesty or wilful negligence, the law ought to consider it a matter of public policy to see that after a certain length of time the debtor is once more permitted to engage in business on his own account. This is in line with the well-considered opinion of the present day in all civilized communities, and differs materially from the rule which at one time prevailed throughout the world.

Banks and Other Creditors.

"Banks should have no rights different from general creditors, and any attempt to place these institutions on a footing different from others is bound to carry in it the germ which will ultimately destroy the benefit sought to be given to honest traders, and incidentally to the general community.

"Creditors recognized as privileged and preferred by law, such as landlords, might very well be brought into line also, in such a way that large portions of the assets belonging to the insolvent should not be diverted for the payment of these preferred claims, to the exclusion and detriment of general creditors, as is now the rule, particularly in the province of Quebec.

"Official assignees ought not to be given the extensive powers, or permitted to occupy the autocratic positions held by them under the old bankruptcy acts, and provisions whereby insolvent estates should be placed in the hands of an officer of the court, and under the direct supervision of such court, ought to find a place in any new bankruptcy measure brought before the House."

DENOUNCES PREMIUM BONDS AS LOTTERY

The proposal that Great Britain issue "premium bonds" with the view of stimulating the sale of its war loans has been criticized, and recently the Government Select Committee, which investigated the subject, decided against the measure. Among the severest critics of the plan is Sir Robert M. Kindersley, a director of the Bank of England and a financial expert of high standing. In view of the beginning of some talk in the United States in favor of a similar issue, his remarks may be of interest.

"The advocates of premium bonds," he says, "argue that to buy a premium bond is not gambling, because the purchaser can never lose his capital. This argument is hardly convincing when a certain portion of his yearly interest is to be used for a pure lottery. What they, in fact, say is this: 'If you will invest your money in a certain government security we will give you leave to subscribe a portion of your interest each year to an out-and-out government lottery.'

"But apart from the specious excuse that no gamble is involved in the issue of premium bonds, let us examine the real basis of the appeal. Is it to patriotism? Is it to the wise provision for old age or sickness? Is it to self-denial for the sake of those we have sent to fight for us? Is it to steady, continuous effort to help win the war? Surely it is to none of these. The appeal of the premium bond is frankly to the baser instinct of cupidity—to the desire to 'get-rich-quickly-without-effort.' It is suggested that the state should deliberately play upon and cultivate what is well known to be a weakness of human nature—a weakness which has probably wrought to mankind more mischief in the economic sphere than almost any other failing."

Disscussing what would happen after the war, Sir Robert says: "Even the most ardent supporters of premium bonds only look upon them as a war measure. Is it reasonable to suppose that, having cultivated this gambling spirit, the millions of small investors would return to the ordinary solid but unexciting investments? It is much more probable that they would become the prey of any financial shark who might dangle in front of them the possibility of a big increment of capital from some worthless mining or other speculative share, while their betting propensities would be found to have been greatly intensified."

LOAN COMPANY'S AFFAIRS WILL BE CONSIDERED

Mr. J. A. C. Cameron, the Official Referee, has announced that a meeting of the debenture-holders, depositors and creditors of the defunct Dominion Permanent Loan Company will be held at Osgoode Hall on March 21st for the purpose of considering the position of the company's affairs. The shareholders' meeting, at the same place and for the same purpose, will be held on the following day. Prior to these meetings Mr. G. T. Clarkson, who has been acting in the capacity of provisional liquidator, will be appointed permanent liquidator.

On April 22nd the official referee will sit at Osgoode Hall to hear the report of the liquidator upon the claims of the creditors submitted, at which all parties interested are invited to attend. It has also been directed by the official referee that debenture-holders, depositors and all others having claims against the company must submit the same to Mr. G. T. Clarkson not later than March 18th.

LARGE FIRES IN MANITOBA

Mr. H. O'Connor, deputy fire commissioner for Manitoba, has made a report to Hon. Edward Brown, provincial treasurer, as to recent fires in that province. He says: "During February 91 fires were reported. Of these, 74 were in Winnipeg and 17 in other parts of the province; 41 of these have been adjusted at losses amounting to $174,141, and 50 fires in course of adjustment. Further adjustments have been made with respect to fires occurring during January with losses amounting to $129,001.83, bringing the total adjustments for that month to $201,413.34. In connection with the Caldwell Block fire, at the corner of Main and McDermot, the Riverview fire, the fire at 1010 Magnus Avenue, McLaughlin farm, Neepawa, and at La Riviere, there has been deplorable loss of life—seven in all. Carelessness in the use of matches and on the part of smokers is responsible for numerous fires, involving serious loss."

LIFE INSURANCE AND BANK CREDITS

Relation of One to the Other — Some Considerations for Business Men

"The corporations and partnerships of the nation are only beginning to awaken to the part which life insurance can be made to play in the affairs of not only large, but of the moderate and small sized business as well," said Mr. A. Gordon Ramsay, assistant superintendent of agencies of the Canada Life Assurance Company, Toronto, at a recent meeting of the Kiwanis Club, Hamilton.

"Until a few years ago," he continued, "the protection of the family was the only function of life insurance to be generally appreciated or even recognized. One of Canada's foremost bankers in referring to the intimate relationship between commercial life insurance and the extension of credit by his bank, recently said:—

" 'This bank always regards it as a favorable feature in a borrower's application when he is able to show that both his family and his business have been protected by life insurance against the contingency of his unexpected death. It often happens that the prosperity of a business is, in a large degree, dependent upon the continuance of a single life. In such a case, it is more than usually important to cover by insurance the risk of disaster to the business through the unexpected death of that individual. The bank, moreover, is always glad to see the position of a firm fortified by partnership policies, especially where the capital is so moderate in proportion of the volume of the business that no portion of it could be withdrawn without embarrassment.'

Success in Business.

"Commercial life insurance also interests the banker when he is passing on a credit risk from a moral standpoint. Of this the president of the Chase National Bank of New York says:—

" 'When a man comes to us to borrow, we want to know how much life insurance he carries, not so much because of its bearing on his financial power, but as an indication of his type of mind, for the type of mind that induces a man to insure his life, is the type of mind which makes for success in business.'

"Until lately, business insurance has been considered mainly in connection with the affairs of the larger firms. It is, however, becoming recognized that this form of protection is just as necessary, if not more so, to the smaller corporation, partnership or business man. One need only look round the city corner or enter a village to discover a modest partnership, be it a grocery, butcher or drygoods store, or a general store, which at this moment needs a class of protection for its business and its credit which the life insurance company alone can provide.

Death of Partner.

"The banker and wholesaler feel they are vitally interested in how this partnership customer will be affected by the death of one of the partners. What funds will be available for the purchase of his interest or for the continuation of the business? There may not be available sufficient capital or borrowing power to enable the surviving partner to purchase the interest of the deceased. Another partner with capital is difficult to find, particularly in a hurry. Frequently, it means a winding up of the business with loss to all concerned.

"If the estate retains its interest in the business, a situation in all probability develops which produces lack of harmony damaging to the efficiency of the surviving partner and hence damaging to the business. A partnership with his friend John's widow or executor will be very different from the old partnership.

"There are other aspects of this subject in which the bank is interested. To cite a few only. Business insurance protects the firm against the direct financial loss due to the death of, say, its highly trained technical man, who may be the only one familiar with an important chemical formula in their manufactured product. There may be a silent partner who is depended upon for regular or periodical endorsement of the firm's paper.

"A manager of a department or branch may have connections belonging to the firm which would be seriously affected by the death of that manager. For instance, a firm of cattle commission merchants with widespread interests insures the lives of its branch managers.

"Many businesses depend upon the capital, experience, initiative or technical ability of one or more individuals. The business may be largely protected from the loss due to the death of such a man by business insurance. Apart from the protection against death, business insurance provides a convenient means which appeals strongly to a banker, for gradually building a reserve or surplus, whether its purpose be to retire a mortgage, or a bond issue, or merely an ordinary precaution."

TIN PLATE FOR CANADIAN CANNERS

The War Trade Board of Canada has been successful in making an arrangement with the War Trade Board of the United States whereby the fruit, vegetable and fish canners of Canada will be enabled to obtain supplies of tin plate from the United States at a price which will approximate to the price of $7.75 per base box of 300 pounds, now paid by United States canners.

An order-in-council has been prepared by which the Canadian government will take power to purchase on behalf of the canners the total supply of tin plate necessary to meet the requirements of the canning industry. The individual canners will through their organizations indicate their requirements to the government, supplemented by the guarantee of a chartered bank, and in due course the government will see that tin plate is shipped to them. The government will act as a clearing house for the transactions, but the trade will facilitate the work.

It is estimated that through the work of the War Trade Board a saving of $600,000 a year will be effected for the food canning industry.

BRITISH AMERICA ASSURANCE COMPANY

Fire, hail and marine insurance are written by the British America Assurance Company, a Toronto underwriting corporation which has been doing business for eighty-four years. During that period the British America has built up a substantial financial position, which is clearly reflected in its latest balance sheet, presented to the shareholders at the company's recent annual meeting. Its reputation for efficient service, fair treatment and prompt payment has been strengthened year by year, until to-day it ranks as one of the leading underwriting corporations of this continent, with a world-wide reputation.

The results of operations last year in the company's fire and hail department show premiums, less reinsurances, amounting to $2,442,577 and losses (paid and outstanding) amounting to $1,236,646. After charging agents' commissions, taxes and general expenses here is a credit balance of $266,957.

The premiums, less reinsurances, in the marine department amounted to $1,390,785, and the losses (paid and outstanding) totalled $748,934. After charging agents' commissions, taxes and general expenses there is a credit balance of $379,220.

Including interest and rents, there is a total balance to the credit of the year's operations of $726,791, a satisfactory outcome of the year's work.

From the fire and marine profits of $646,177, plus interest and rents of $80,613—a total of $726,791—the company paid dividends on preference stock up to 30th June, 1917, have taken care of the decrease in the market value of securities and have reduced the value of head office buildings to $220,000. The company also got rid of the item of $6,958, which appeared in assets last year for insurance maps, although these have a marketable value in the insurance world of at least four times that amount. Then the directors have earmarked a special reserve for hail business. The new Dominion Insurance Act of 1917 calls for a special hail reserve of one-half of the profits until that reserve reaches one-half of the year's net premiums, but instead of this the directors have set aside the total amount of the year's profits in this branch. The company have made provision for taxes to the extent of $30,000. In this connection Mr. Meikle, president, said that the insurance business meets levies for taxes in nearly every country in the world, and in some parts the tax is so heavy as to make an insurance manager think he is working for the governments instead of for his stockholders. However, with all these payments and provisions, the company have the large balance of $482,029 to carry to reserves.

Mr. W. B. Meikle is president and general manager of the British America Assurance Company, and Mr. John Sime is assistant general manager. Mr. E. F. Garrow is the secretary of the company.

THE
TORONTO GENERAL TRUSTS
CORPORATION

DIVIDEND No. 87

Notice is hereby given that a dividend of Two and one-half per cent. (2½%) has been declared upon the paid-up Capital Stock of this Corporation for the quarter ending March 31st, 1918, being at the rate of Ten per cent. (10%) per annum, and that the same will be payable on and after the Second day of April, 1918.

The Transfer Books of this Corporation will be closed from Saturday, March 23rd, to Saturday, March 30th, both days inclusive.

By Order of the Board,
A. D. LANGMUIR,
Toronto, March 5th, 1918. General Manager

Your Estate may be Small, But—

whether it involves one or one hundred thousand, it is equally entitled to the advantages of Trust Company administration.

This Company welcomes its appointment as executor of small estates, and gives them the same care, the same business experience and judgment and the protection of the same safety measures as larger estates.

Read "I Give, Devise and Bequeath." Copy on request.

The Union Trust Company, Limited

NOVA SCOTIA STEEL COMPANY

Pig Iron Produced Cheaply—Investment Bankers' Views —Merger Discussion

Messrs. Hayden, Stone & Company, the New York-Boston investment banking house which has taken so large an interest in the affairs of Nova Scotia Steel & Coal Company, in their current weekly letter express complete confidence in the outlook of the company. They believe that nowhere on the continent, with possibly the exception of Alabama, will pig iron be produced any cheaper than, if as cheap as, at the plant of tht Nova Scotia Steel, when the plans of the present management have made reasonable progress.

As the view of the banking house which stood behind the company's recent $5,000,000 stock issue, the following comment is of interest in Canada, especially because of current discussion on the possibilities of a merger between Scotia and Dominion Steel Corporation.

Report Somewhat Disappointing.

"The report for 1917 will be, on the face of it, somewhat disapointing. It is, however, very satisfactory to those who have realized the necessities of this business as well as its opportunities. There is ahead of this company a great programme of development of its ore and coal properties, and a reconstruction and vast enlargement of its manufacturing plant. Obviously this is not the wisest time in which to indulge in expenditures for plant enlargement, and, in fact, the programme in that respect, as well as with respect to development of coal and ore properties, is not fully matured.

"Meanwhile, the work of the management is to consolidate its position and increase in every way its available working capital. Great progress in that respect was made in 1917, particularly by the issuance of new common stock, and to a very large extent by conversion of slow and very uncertain assets into the quickest form of assets. The result is that the net working capital on December 31st, 1917, was $5,750,525 against $2,281,730 on December 31st, 1916.

Eastern Car Company.

"One of the departments of the Nova Scotia Steel Company which has absorbed a great deal of working capital, and which has hitherto yielded very unsatisfactory results, is the Eastern Car Company. At one time in 1917 there was practically $5,000,000 of Nova Scotia money locked up in that business. Since the year 1918 opened some very substantial amounts on that lockup have been converted into cash, and there is a good prospect that within the next few months the remaining amounts will be materially reduced.

"The programme such as we have hinted at above will require time and considerable investments. The fundamental fact about Nova Scotia Steel which appeals to us, and which we are sure will make it a big winner in time, is that it has a very high grade iron ore deposit within a very short distance of a good coal deposit, and transportation between the two, or to an assembling plant, is very inexpensive.

"Meanwhile, there is no incentive to display net earnings other than are necessary to give shareholders a moderate rate of interest on their investment. Everything else should be reserved and go back into plant or working capital."

As to Merger Discussions.

The Scotia-Dominion Steel merger discussion may be resumed shortly, but expressions of opinion as to whether anything will come of the plans are showing greater divergency. The financial editor of the Montreal Gazette says:—

"One obvious reason for greater scepticism is furnished in the financial statement of the Scotia company made public early last week. With a large number of Iron shareholders the effect of the statement has probably been to raise new questioning as to whether the merger was desirable from their standpoint, the presumption with such shareholders being that Dominion will make a better showing than Scotia. In Scotia quarters, on the other hand, there is some resentment against the attitude that the Scotia statement is to be read unfavorably in view of the fairly obvious fact that the company, under new management, set about what has been described as a house cleaning.

"With all that, there are indications of a feeling that the possibilities of a merger becoming a fact have been hurt by premature discussion of supposed details, which at the best could be only guesswork at this stage of negotiations."

MANITOBA'S WORKMEN'S COMPENSATION BOARD

Mr. Herbert G. Wilson is to be retained as commissioner to administer the Maintoba Workmen's Compensation Act. In accordance with the recommendation of the Fallis Commission, the responsibility of the administration is to be shared by two directors to be appointed by order-in-council.

CANADA'S NET DEBT SHOWS LARGE INCREASE

Canada's net debt stood at $1,010,780,470 on February 28th, an increase during February of $13,251,263. The total gross debt of the Dominion on February 28th was $1,996,393,359. Total assets were $985,612,889. Total war expenditures for the eleven months' period to the end of February was $207,849,726.

Revenues show an increase. In February, 1918, the revenue was $21,225,872, as compared with $17,513,473 in February of last year. Expenditure on account of consolidated fund was $11,323,497 in February of the present year, in comparison with $12,581,954 in February, 1917.

WESTERN LEGISLATION CRITICIZED

Judicial methods in Manitoba and Alberta were the subject of pointed comment by Mr. H. S. Osler, K.C., vice-president of the Canadian Mortgage Investment Company, at the company's recent annual meeting.

"In the western provinces," he said, "there has been no modification of the injurious legislation to which we referred a year ago. On the contrary, the Alberta legislature has since given a finishing touch to its almost spoliatory enactments by depriving lenders of the customary recourse under the personal covenants of borrowers. In fact, had the purpose of the governments in the provinces of Manitoba and Alberta, which have been pre-eminent in the devising of legislation of this character, been to impair the value of mortgage investments, and to drive capital from their provinces, it may be questioned whether any course could have been better suited to that end.

"In addition to those legislative acts, we have had to deal, in the two provinces named, with judicial decisions of so grave a character as ought not, it seems to us, in the public interest, to be passed over without discussion. It is impossible to refer to these matters here with the fullness and details necessary. For the present, it is sufficient to say that six judges in Manitoba and three in Alberta have concurred in rendering decisions of such a character that no directors or trustees responsible for the investment of moneys on mortgage in the provinces named, can, in our opinion, wisely overlook their significance. We have been forced to the conclusion that there are now in office a certain number of judges for whose conduct in the exercise of judicial functions government and parliament should be invited to assume responsibility. If the subversion of mortgage contracts and the spoliation of investors is to be brought about judicially by deliberate loading of the scales of justice in favor of debtors, then, in our judgment, it will become necessary that government and parliament be told that the power that appoints these men to the Bench must find a way of controlling them, or accept responsibility for the consequences that must follow. A few more such judgments as those we refer to, and this country will be in danger, in our opinion, of reaching the level of a Latin American republic, as regards insecurity of contracts and cynical perversion of the forms of law.

"The fount and origin of the evil is everywhere recognized, and need not here be referred to. Contrary to a common impression, judicial appointments are not made for life, but 'during good behavior'; and there appears to be a growing conviction that in this country a definition of judicial good behavior is overdue. An instructive debate on this subject took place in the Senate a few months ago, and the trenchant and learned addresses delivered by some of the members on the subject indicated a full realization of the nature of the conditions existing, as well as the altered mental atmosphere in which the question is likely in future to be discussed and considered.

"At a time of tension like the present, and with the many emergent matters demanding attention, it would be inadvisable to ask the first minister and parliament to deal immediately with the question of the subversion of contracts which has been attempted in Manitoba and Alberta. But the facts in the case will, in good time, be submitted in the proper quarters, and steps taken to secure a full and public discussion of the considerations involved."

FIXED EXCHANGE FOR THE EMPIRE

Exchange in Canada is Naturally More Closely Associated With New York Than With London

The remarks made by Mr. Goodenough, general manager of Barclays Bank, at the annual meeting of the shareholders of that institution, as to the desirability of securing an inter-Imperial trading preference by establishing and maintaining a fixed rate of exchange within the Empire, has naturally excited much interest in Anglo-Canadian banking and financial circles. The question is one about which the average business man hesitates to express an opinion—at least for publication. It is one rather for the expert in economic questions. Mr. Moreton Frewen's writings on such subjects have made him a recognized authority, and when asked by a representative of the Canadian Gazette, of London, to give his opinion, he made the following statement:—

Winnipeg and Chicago.

"Any suggestion from Mr. Goodenough is entitled to respect, but on the face of it I can see no possible method by which we could maintain a fixed exchange within the Empire. What regulates exchange is the bill market—some relation between exports and imports, which again depends upon weather, harvests and other things. The exchange, again, of Canada must always be more closely associated with the exchange with New York, Chicago and St. Louis than with London. Nothing we could do that I see could dissociate the exchange of Winnipeg with Chicago. As far as I can foresee Canadian exchange on London after the war should strongly favor Canada. In Britain we are likely to see strange results. I should think our exchange on New York and thus on Montreal may go for a long period to some point well below $4.50, perhaps to $4; that will make the American market a better market for Canada to sell in than this English market. On the other hand it will greatly stimulate British exports to Canada and the United States and in this way ultimately restore exchange.

Form of Steady Exchange.

"There is a form of steady exchange which is extremely important and which could be easily obtained, and that is the exchange between silver-using nations (all Asia) and gold-using nations. If that is fixed it would be the reddest of red letter days in the financial history both of Canada and the United States, immensely improving all trade across the Pacific. The exchanges with Asia have fallen with the great fall in silver to a point where China, for example, can often no longer buy gold exchange at all. Last September the great advance in silver had really returned China to the world's finance and trade as a solvent and prosperous customer. The rise in silver then had enabled the Shanghai merchant to buy a bill on London for a gold sovereign with, say, four of his taels, whereas a couple of years earlier such a bill had cost him eight taels.

"But while I see quite easily how the exchange of silver money for gold money can be fixed and maintained, I see no possible means of fixing exchange between distant points in the Empire. If Mr. Goodenough has a plan in his mind, we would all gladly consider it; for the rest there is no exchange trouble ahead for Canada, but there is a perplexing position growing up in England. I think, however, the issue of the small five-shilling notes here, now pending, will relieve the strain on our depleted gold stocks and have other beneficial results."

WILL WRITE AUTOMOBILE INSURANCE

The British America and the Western Assurance Companies, Toronto, will write automobile insurance. In announcing this, Mr. W. B. Meikle, president of the companies, stated that it is not likely that the business transacted in this new department will be large.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ending March 8th, 1918:—

Dominion Reduction Mine, 88,000; Silver Queen Mine, 74,615; Buffalo Mine, 131,930. Total, 294,545 pounds, or 147 tons.

The total shipments since January 1st, 1918, now amount to 2,071,422.8 pounds, or 9,031 tons.

COPPER PRODUCTION LAST YEAR

It was Less Than in 1916—New Refinery at Trail—United States War Industries Board Fixed Price

The production of copper in 1917, amounted to 108,860,358 pounds, valued at $29,588,254, as against 117,150,028 pounds valued at $31,867,150 in 1916, a decrease of 7.08 per cent. in quantity and 7.15 per cent. in value, according to the preliminary statement of Mr. John McLeish, B.A., Chief of Division of Mineral Resources, Ottawa. Though less than the previous year, the 1917 production was greater than any other previous record. In 1916, the increase over the production of 1915 had been 16.2 per cent. in quantity and 83.0 per cent. in value. The electrolytic copper refinery installed at Trail, B.C., began operations about November 1, 1916, with a capacity of 10 tons of refined copper per day, which has been increased to 20 tons per day.

Of the total 1917 production, 86,508,758 pounds were contained in blister copper and in matte produced in Canada, and 22,351,600 pounds estimated, as recovered from ores exported.

In addition to the recoveries from domestic ores, there were also recovered in British Columbia smelters, 5,033,630 pounds of copper from imported ores.

From Pyrite Ores.

The production in Quebec from pyrite ores was 5,013,560 pounds, valued at $1,362,636, as against 5,703,347 pounds valued at $1,551,424 in 1916. These are the quantities reported as being paid for; the actual metal contents were much higher.

The Ontario production is derived chiefly from the nickel-copper ores of the Sudbury district and of the Alexo mine in Timiskaming supplemented by a small recovery from the Cobalt district silver ores and by shipments made from a few copper properties under development. The total production in 1917 amounted to 42,796,213 pounds valued at $11,632,014, as against 44,997,035 pounds valued at $12,240,094 in 1916 a decrease of 4.0 per cent. in quantity.

There was an important copper production in Manitoba in 1917 derived from the ore deposits at Schist Lake northwest of The Pas operated by the Mandy Mining Company. These sulphide ores as well as those at Flin Flon Lake in the same district, have had a very large amount of development work expended upon them during the past two years. The ore shipments which amounted to 3,388 tons were made under great difficulty of transportation having been hauled 40 miles by sleigh in winter, then 190 miles by barge during summer and then 1,500 miles by rail to the smelter at Trail.

British Columbia Production.

The British Columbia production was 57,717,535 pounds valued at $15,687,631, as against 63,642,550 pounds valued at $17,312,046 in 1916—a decrease in quantity of over 9 per cent.

The production included 40,720,413 pounds recovered in blister and matte and 16,997,122 pounds being the estimated recovery from ores shipped to United States smelters.

The production from the Yukon in 1907 amounted to 2,182,050 pounds valued at $593,081, as against 2,807,096 pounds valued at $763,586 in 1915. The production is derived from the mines of the Whitehorse district in southern Yukon.

Prices: The New York price of electrolytic copper, which was 28 cents early in 1917, increased to a maximum of 32 cents towards the middle of February though small lots sold as high as 34 cents. Then there was a gradual falling-off till it reached 24⅓ in July. The price remained uncertain until October when the United States War Industries Board, by agreement with the copper producers, fixed the price at 23½ cents which remained the price for the last quarter of 1917.

The dividend on the common stock of Twin City Rapid Transit Company, which has been 6 per cent. per annum since 1910, was reduced to 4 per cent. this week, with a declaration of 1 per cent. for the current quarter. The 1917 statement of the company, issued about a month ago, showed a heavy rise in expenses, with a reduction in net that left only $8,050 to be carried forward after the common stock dividend had been paid. The total net income available for dividends was only $1,538,050, against $2,237,547 in 1916, and the final surplus of $8,050, compared with $707,547 the previous year.

NO TEMPORARY LOAN FOR TORONTO

Board of Control Agrees With Finance Commissioner's Recommendation

A temporary loan to meet war expenditure will not be made by the city of Toronto, according to a recommendation of the board of control, based on a report of Finance Commissioner Bradshaw, whose expert advice cannot, without serious results, be ignored by the civic authorities, especially in these difficult days of financing. In his report, the commissioner said:—

"The suggestion of seeking a temporary loan was no doubt prompted by the hope that it would lower this year's tax rate, but I fear that consideration has not been given to the effect that such a course would have on the rate in future years, when such loan with interest would have to be paid."

Effects of Loan Policy.

Commissioner Bradshaw presented a classified statement of the city's war expenditures totalling $4,340,324.09, of which $1,190,025 was incurred but not paid last year.

The amount was partially offset by a special credit of $1,540,420.16, which would pay last year's balance of war debts and leave $350,394 to meet those of the current year.

On the assumption that a loan of two million dollars was obtained at six per cent. for one year, Mr. Bradshaw showed the effect on the 1919 war expenditures, first, if the war is over this year, and, secondly, if it was not, as follows:—

Debt charges on the $4,500,000 debentures already issued	$ 580,372
Balance of $1,000,000 grant to the Toronto and York Patriotic Fund, which Council decided should be passed over to 1919	500,000
Repayment of temporary loan and interest	2,120,000
One-half of life insurance liability and of civic employees' wages during period of demobilization	1,034,699
	$4,235,071
Second case (war not over) the war expenditures would be the foregoing, and the other half of life insurance liability and of civic employees' wages	1,034,699
Total	$5,269,770

In the first case the amount meant 7½ mills on the present assessment and 8½ mills in the second case, which the commissioner stated would not be offset by special credits.

Means Adding to Burden.

"If the loan were obtained for a longer period, say two or three years," said Mr. Bradshaw, "it would simply mean that the agony would be deferred, but would be intensified through interest charges."

After dealing with the taking over of the street railway, outstanding debentures and the extent to which the city is now leaning on the banks, Mr. Bradshaw said, in concluding his report:—

"While the prospective tax rate is high, yet citizens generally are well aware of the reason. Moreover, in meeting it they will have the assurance that debts and debt charges are not piling up; that there are no deferred liabilities to increase next year's rate, and that when normal times come we shall again get back to a reasonable rate, which will not only relieve the taxpayer, but will tend to encourage the establishment of new industries and manufacture in our midst, and especially in the new industrial area which the city harbor commission is preparing."

Mayor Favors 27 Mill Rate.

The mayor said he did not agree with the report, and thought that the tax rate could be brought down to 27 mills by a short-term loan. The banks, he held, were full of short-time money which could be procured at 4½ or 5 per cent.

Asked by Controller O'Neill if this were so, the commissioner said he could doubtless bring the tax rate down to 25 or 24 mills, but thought it would be a crime to do so, as it would load next year with an unbearable tax rate. When he entered office there were $17,000,000 of floating loans and that was a condition which should not be repeated.

Mineral Production of Canada in 1917.

* Tons of 2,000 pounds.

(a) Shipments by mine operators. The final shipment of ores and concentrates (including customs mill shipments) were 23,327 short tons valued at $572,115 and containing 8,465 tons of Cr_2O_3.

(b) Owing to delay in receipt of returns, the value of the production of barytes and part of the production of asbestos is not included in the total value.

The N. Bawlf Grain Company has bought all the elevators, thirty-two in number, of the Imperial Elevator Company of Alberta.

A London despatch announces that for the protection of holders of Russian railway, municipal and government bonds, for the instance of which they have been responsible, the following six banking institutions have agreed to work together: Barings, Hambro, Lloyds, London County and Westminster Bank, Rothschilds, and Schroeder.

A Dominion license has been issued to the Security Mutual Casualty Company authorizing it to transact in Canada the business of employers' liability insurance and workmen's compensation insurance, restricted to the issue of policies to the Swift Canadian Company, Limited, and allied interests in Canada.

Royal Bank Absorbs Northern Crown

Purchase Price Will Be Approximately $200 Per Share, Part Stock and Part Cash—Finance Minister Consents to Amalgamation—There Are Now 20 Chartered Banks Compared With 29 Nine Years Ago—Latest Accounts and Figures of the Two Banks.

ARRANGEMENTS have been completed for the purchase by the Royal Bank of Canada of the Northern Crown Bank. Shareholders of the Northern Crown benefit from the transaction by receiving a relatively high price for their holdings. Approximately $200 a share, partly in cash and partly in Royal stock, will be paid to he stockholders of the Northern Crown. As the stockholders had to submit to their stock being cut in two in 916, the price paid by the Royal will give them back heir full capital. Their loss will be confined to the oss of interest sustained through the suspension of dividends between November, 1914, and the early part of 1917. The minister of finance has officially given his consent to the sale, it is announced.

The Royal Bank, prior to the purchase of the Northern Crown Bank, had paid-up capital of $12,911,700. The paid-up capital of the Northern Crown Bank was $1,431,200.

The purchase of the Northern Crown Bank by the Royal Bank places the Royal Bank second in standing in Canada, according to assets. By the addition of over $27,000,000 of assets of the Northern Crown Bank to those of the Royal Bank, the latter now has total assets of $348,396,309.

PERSONNEL OF THE TWO BANKS

Royal Bank Recently Introduced System of Officers in Vogue in London

Sir Herbert Holt, president of the Royal Bank of Canada, as been aptly described as "a power in constructive Canadian finance." His career is one of practical attainment losely associated with the period of marked railway expansion n Canada occupying the two decades from 1870-1890.

SIR HERBERT HOLT,
President, Royal Bank of Canada, which has purchased the Northern Crown Bank.

Born in Ireland in 1856, in the pursuit of his chosen vocation of engineering, Sir Herbert came to Canada in 1875. During 1883 and 1884 he was engineer and superintendent of construction for the Prairie and Mountain sections of the Canadian Pacific Railway, and successfully carried out extensive ontracts for the same corporation in the Rocky Mountains, he province of Quebec and the State of Maine. He built lines ggregating five hundred and fifty miles for the Mackenzie nd Mann interests in the Canadian West from 1889 to 1892, nd since then has devoted himself exclusively to financial ffairs. In 1911 Sir Herbert joined the board of directors f the Sun Life of Canada.

Mr. Edson L. Pease, who was appointed in January, 1916, as managing director and chief executive officer of the Royal Bank, had been general manager since 1900. He resigned that office, Mr. C. E. Neill succeeding him. These changes were made in conformity with the bank's plan to introduce the system of officers in vogue in British banking houses in London. Mr. Pease has been a banker all his business life. Born in Quebec province, he entered the service of the Canadian Bank of Commerce at Montreal in 1874. In 1883 he joined the Merchants Bank of Halifax (afterwards absorbed by the Royal Bank) as accountant. In 1887, he went to Montreal and became successively branch manager, assistant general manager, general manager and vice-president of the Royal Bank. Like most of the chief executives of Canadian banks, therefore, Mr. Pease has risen from the ranks to his present high and responsible position. He is a good banker, and is well liked. As one would expect, he is associated as director with a number of financial and business concerns. His present position as managing director and chief executive officer of the Royal Bank has given him time to forward still further the best interests of the institution and its clients.

E. L. PEASE,
Vice-president and Managing Director, Royal Bank of Canada.

Mr. Pease, at the last annual meeting of the Royal Bank, created widespread comment by his suggestion that a bank of re-discount should be established in Canada, patterned after the Federal Reserve Bank in the United States. On this point, he said:—"We cannot foresee all the difficulties of finance that are likely to beset us. In my opinion, the question of providing supplementary banking facilities in this country is very important, and should receive the consideration of the government and the banks. If we had a bank of re-discount patterned somewhat after the Federal Reserve Bank in the United States, it would render legitimately available millions of assets in the form of high-grade commercial paper, now lying dormant in the portfolios of the banks, and thereby greatly increase our financial resources. I think the government should appoint a committee of experts to investigate the suggestion."

General Manager Neill.

Mr. C. E. Neill, who was appointed general manager of the Royal Bank in January, 1916, had acted as assistant general manager since 1907. He is a capable banker and measures fully the high standard required in his responsible position. Mr. Neill comes from the Maritime Provinces, from whence so many expert bankers have been drawn. He was born at Fredericton, N.B. Some years ago he managed the Vancouver branch of the Royal Bank, later becoming supervisor of the branches, and then inspector. Mr. Neill has been closely associated with Mr. Pease for a number of years, and his latest appointment was taken as an indication of the continuance of the successful policy which has marked the bank's administration in the past.

C. E. NEILL,
General Manager, Royal Bank of Canada.

General Manager Campbell.

Mr. R. Campbell, the general manager of the Northern Crown Bank, has held that position for several years. He is a capable and conservative banker and has had the full confidence of his directors.. Mr. Campbell has been with the Northern Crown Bank as general manager for about ten years. At the annual meeting of the bank held at Winnipeg in February, 1910, Mr. Edward Gurney, then vice-president of the institution, said:—

"The bank may now be considered to have passed through the infantile stage, which has in it more or less of solicitude. The bank now has secured the services of an efficient staff, and I think no one but a banker can appreciate the import of this. To secure a staff of bank men capable of handling real money, is one of a very serious character, and I think it may be said that we have after the usual vicissitudes of such a performance, secured an efficient staff of men well qualified for the work and thoroughly and loyally identified with the institution. The servant of a bank needs to have a good degree of initiative, plenty of enterprise tempered by thorough conservatism. He must not be a speculator, either for himself or the bank, and he should not be a borrower from the institution, and I think I may say that the staff which we have working for us is thus well described."

The following is the directorate of the Royal Bank of Canada: Sir Herbert S. Holt, K.B., E. L. Pease, E. F. B. Johnston, K.C., Jas. Redmond, G. R. Crowe, D. K. Elliott, Hon. W. H. Thorne, Hugh Paton, Wm. Robertson, A. J. Brown, K.C., W. J. Sheppard, C. S. Wilcox, A. E. Dyment, C. E. Neill, Sir Mortimer B. Davis, K.B., G. H. Duggan, C. C. Blackadar, J. T. Ross, R. MacD. Paterson, G. G. Stuart, K.C. Sir Herbert S. Holt is president, Mr. E. L. Pease vice-president and managing director, and Mr. E. F. B. Johnston, K.C., second vice-president.

The following is the directorate of the Northern Crown Bank: Capt. Wm. Robinson (president), A. McT. Campbell, E. F. Hutchings, John Stovel (vice-president), Geo. Fisher, Sir D. C. Cameron, W. R. Bawlf and H. J. Symington.

Two directors from the Northern Crown board will be elected to the board of the Royal in due course. The Royal already has two directors in the west, and it is the intention to form an advisory committee of these four western directors, the committee to meet at Winnipeg and deal with matters of direct importance to the western provinces.

TWENTY CHARTERED BANKS NOW

Thirty Years Ago, There Were 41 and Nine Years Ago, 29 —Advantageous to Shareholders

Only two bank mergers have occurred in Canada since the war commenced. One was the absorption of the Quebec Bank by the Royal; the other was announced yesterday—viz., the purchase of the Northern Crown Bank by the Royal. A third might have been consummated had the department of finance approved, and that was the proposed amalgamation of the Bank of Hamilton with the Royal.

The first banking amalgamation in Canada since July, 1914, occurred in 1916, when the Royal Bank purchased the Quebec Bank. The directors of the banks reached an agreement whereby for every three shares of Quebec Bank stock shareholders of the Quebec Bank received one share of Royal Bank stock and $75 in cash.

Tendency of Banking Business.

The directors of the Quebec Bank informed their shareholders that "with the present condition of business in the west, your directors cannot hold out the hope that if the separate existence of the bank is maintained, the dividends would be continued. On the contrary, your directors feel that it is necessary for them, owing to severe competition, if the proposed amalgamation were not sanctioned by shareholders, to reduce the dividend for some years to come."

It was also pointed out that "the tendency of modern banking business has been towards the amalgamation of banks and the creation of financial institutions having large resources for the purpose of financing modern industries. It has happened that your directors have been obliged to refuse advances to some of the bank's best customers because, in their opinion, the amount asked for, though safe and profitable, bore an undue proportion to the resources of the bank."

Advantageous to Shareholders.

It was added that the experience of banks, both in Europe and in Canada, had shown that amalgamations such as that proposed were highly advantageous to the shareholders.

The bank amalgamation of 1916 reduced the number of chartered banks in Canada to 21, and the present merger to 20. How this compares with the position in certain previous years is shown in the following table compiled by *The Monetary Times*:—

July.	No. of chartered banks in Canada.
1869	27
1879	40
1889	41
1899	38
1909	29
1912	26
1914	22
1916	21
*1918	20

---

*March.

ROYAL BANK HAS 425 BRANCHES

Merger Does Not Duplicate Branches at Many Points—Strong Connection With West Indies

A comparison of the situation of the bank branches of the Royal and Northern Crown banks, indicates that there will be little duplication of branches as a result of the merger. The following table, compiled by *The Monetary Times*, shows the number of branches which the two banks had at the end of 1917 in the various provinces and abroad:—

	Royal.	Northern Crown.
Ontario	123	25
Quebec	52	..
Nova Scotia	54	..
New Brunswick	19	..
Prince Edward Island	5	..
British Columbia	38	7
Manitoba	4	22
Saskatchewan	37	55
Alberta	28	4
United States of America	1	..
England	1	..
Newfoundland	6	..
West Indies	47	..
British Honduras	1	..
British Guiana	3	..
Costa Rica	2	..
Venezuela	4	..
Totals	425	113

In Ontario and West.

The Northern Crown Bank has branches only in Ontario and the four western provinces. The Royal Bank is represented in every province and also in the United Kingdom and the United States.

By the acquisition of the Northern Crown, the Royal has strengthened its position in the two provinces in which the system was weak, namely, Manitoba and Saskatchewan. The Royal has only 3 branches in Manitoba, against the Northern Crown's 22; in Saskatchewan the Royal is better represented, but it was late in getting into the field, while Northern Crown was in early, so that the Royal has been as strategically weak as the Northern Crown is strong in this particular territory.

There are fifteen towns and cities where the two banks have been competing and where branches will be closed. These include Toronto, Winnipeg, Vancouver, Victoria and Ottawa. In Toronto the Northern Crown Bank has three branches and the Royal Bank has thirteen branches. In Winnipeg there are three branches of the Crown Bank and two of the Royal Bank. There are three branches of the Northern Crown in Ottawa and three branches of the Royal Bank. Vancouver has ten branches of the Royal Bank and two branches of the Northern Crown Bank. In Victoria there are three branches of the Royal and one of the Crown Bank. The other places in which the banks overlap are: Brandon, Man.; Calgary, Alta.; Edmonton, Alta.; Kingston, Ont.; Marpole, B.C.; Moose Jaw, Sask.; Regina, Sask., Saskatoon, Sask.; Swift Current, Sask., and Woodstock, Ont.

West Indies and South America.

It has developed strong connections in the West Indies and South America, in which sections it has no less than 57 branches.

During the winter of 1917 six of the directors of the Royal Bank, including Sir Herbert Holt, the president, and Mr. E. L. Pease, the managing director, made a tour of inspection of the branches in the south. None of the directors had previously visited any branch south of Cuba. They returned most favorably impressed with the excellent connection acquired in Cuba, Porto Rico, Santo Domingo, Costa Rica and the British West Indies by many years of patient work. It was distinctly advantageous to obtain a personal knowledge of local conditions, and to meet the bank's leading customers. The directors were pleased with the buildings erected by the Royal Bank and the locations in general, and were happy to learn that the Royal Bank is held throughout the south in the highest esteem. They also visited the republics of Venezuela and Colombia. Since then the bank has opened 4 branches in Venezuela, where the outlook is promising. The directors were gratified to receive from Viscount Grey, the late Foreign Secretary, his approval of the establishment of branches in that country, and a promise of support from the British government.

The Royal Bank has 2,948 employees for its 425 branches, an average of 6.93 employees per branch. The Northern Crown Bank has 477 employees for its 113 branches, an average of 4.22 employees per branch.

FINANCE DEPARTMENT'S SANCTION RECEIVED

Bank Merger Has Official Approval—In Public Interest—What Bank Act Says

The proposed purchase of the Northern Crown Bank by the Royal Bank of Canada has been sanctioned by the department of finance.

It will be recalled that when the Royal Bank in August, 1915, desired to amalgamate with the Bank of Hamilton, Sir Thomas White, on behalf of the government, refused consent, and issued the following statement:—

"With regard to the tentative proposals for the amalgamation of the Royal Bank of Canada and the Bank of Hamilton, which have been placed before him, the minister of finance, Hon. W. T. White, has stated that after giving the matter very careful consideration he has reached the conclusion that as both the banks in question are strong, favorably known and well-established institutions, and are actual and potential competitive factors in the Canadian banking field, it would not be in the public interest that he should give the consent required from him under the terms of the bank act, and the interested parties have been notified accordingly."

Early in 1916, there were persistent stories that negotiations were proceeding with a view to the absorption of the Northern Crown Bank. Several banks were named as likely purchaser. While an amalgamation was discussed in January of that year with a bank with head office in Montreal, the negotiations fell through. The finance department at Ottawa was not then approached on the matter by either of the banks concerned, and no formal application was made to the finance minister. The matter was mentioned to the minister, however, by an agent interested in the affair and Sir Thomas White informed him that any application would be considered on its merits and that good reasons for a merger would have to be presented.

The fact that the present amalgamation has been sanctioned by the finance department is a plain indication that the government deem the purchase of the Northern Crown by the Royal to be in the public interest.

What Bank Act Says.

The bank act allows any bank to sell the whole or any portion of its assets to any other bank which may purchase such assets. The minister of finance must consent to the entering into of an agreement between the two banks before an agreement is made. Nothing in the act "shall be construed to prevent the governor-in-council or the treasury board from refusing to approve of the agreement or to recommend its approval."

It is interesting to recall the report of Professor Joseph French Johnson, New York University of Finance and Commerce, on Canada's banking system, prepared for the National Monetary Commission of the United States about four years ago. He said: "The tendency in Canadian banking, as in all forms of business activity, is unmistakably toward combination. . . . It will not be surprising, therefore, if Canada has fewer banks ten years hence than now. One or two mergers would give the country a bank as dominant in its field as is the Bank of France or Bank of Germany."

* * *

The Canadian Pacific Railway's surplus available for dividends on the $260,000,000 ordinary stock—including in surplus the amount earned in special income as well as railway account—amounted to $41,334,215 during the year ended December 31st last. That represented earnings at the rate of 15.89 per cent. on the ordinary stock, against 16.76 per cent. in the twelve months to June 30th, 1916, the last full year for which complete figures are available.

CANADIAN BANK AMALGAMATIONS TO DATE

COMPILED BY "THE MONETARY TIMES"

Name of Purchasing Bank	Name of Bank Absorbed	Date of Absorption	Details of Terms of Amalgamation or Purchase	Price of Stock of two Banks concerned at time of Absorption.
Bank of Montreal	Exchange Bank of Yarmouth, N.S. Position of Royal after Merger.

The principal items of the balance sheets of the two banks compare as follows, and the position of the Royal, after the merger, is shown in the third column:—

(Three last figures omitted.)

	Royal.	Northern.	(Amal.)
Capital authorized	$ 25,000	$ 6,000	$ 31,000
Capital paid up	12,911	1,429	14,340
Reserve fund	14,000	715	14,715
Demand deposits	70,991	9,099	80,090
Notice deposits	108,938	11,017	119,955

	(Three last figures omitted.) Royal.	Northern.	(Amal.)
Current coin	15,018	185	15,203
Dominion notes	18,203	1,534	19,737
Canadian government securities	14,329	8,210	22,539
Municipal and foreign securities	22,763	2,921	25,684
Railway and other bonds	12,571	1,424	13,995
Call loans	11,866	269	12,135
Call loans outside	8,574	....	8,574
Current loans	96,747	7,733	104,480
Total liabilities	292,809	24,805	317,614
Total assets	321,145	27,251	348,396

How Other Banks Compare.

The relative standing of the leading six Canadian banks so far as assets are concerned, according to 1918 returns, are as follow:—

Bank of Montreal	$392,625,438
Royal Bank	348,396,309
Bank of Commerce	333,531,870
Union Bank	132,847,139
Bank of Nova Scotia	130,608,152
Merchants Bank	130,510,378

The following statement shows the relative position of the three largest Canadian banks, with the Northern Crown figures included in those of the Royal, as they will be from now on:—

	(Three last figures omitted.) Commerce.	Montreal.	Royal.
Capital authorized	$ 25,000	$ 25,000	$ 31,000
Capital paid up	15,000	16,000	14,340
Reserve fund	13,500	16,000	14,715
Demand deposits	95,324	108,250	80,090
Notice deposits	118,198	143,559	119,955
Current coin	19,045	20,668	15,203
Dominion notes	20,099	57,253	19,737
Government securities	17,307	11,139	22,539
Canadian and other government securities	25,195	40,128	25,684
Railway and other bonds	6,108	12,504	13,995
Call loans (Canada)	14,767	......	12,135
Call loans (outside)	19,314	77,623	8,574
Current loans (Canada)	139,767	99,789	104,480
Total liabilities	303,022	356,954	317,614
Total assets	333,531	392,625	348,396

The acquisition of the Quebec Bank by the Royal, brought the latter institution third in the matter of paid-up capital, the Bank of Montreal leading, and the Canadian Bank of Commerce being second. The present merger places the Royal Bank second in point of total assets, although the Canadian Bank of Commerce leads all the banks in the matter of commercial loans in Canada, with a total of $139,767,000.

BOTH BANKS REPORTED STRONG

"Never Freer from Doubtful Debts"—Royal. "Funds Safely Invested"—Northern Crown

Discussing the position of the Royal Bank at the last annual meeting, held in January, Mr. E. L. Pease, managing director of the bank, said:—

"There never was a time when we were freer from doubtful debts than at present. Recoveries have been made to a remarkable extent in connection with advances, of which ultimate payment was regarded as doubtful three years ago. This is probably the experience not only of all the banks, but of merchants and manufacturers generally."

Funds Safely Invested.

Reviewing the operations of the Northern Crown Bank for the past few years at the last annual meeting of the bank in January, Capt. Robinson, president, said:—

"We may congratulate ourselves upon what has been accomplished and the position we now find ourselves in. Increased resources have enabled us to take up our full allotment of loans made to the government by the banks for the purpose of financing the war, and on more than one occasion to take considerably more than was expected of us. We have at the same time always been in a position to amply supply the needs of our clients. Our funds are now safely and profitably invested, and, owing to the liquid nature of a large proportion of our loans, we are in an excellent position to take up any new business of a desirable character that may be offered to us."

When Capital Was Cut.

At the annual meeting of the Northern Crown Bank in January, 1917, Mr. J. Ashdown, a director of the institution, referring to the position of the bank, said:—

"A year ago, when we cut our stock in half, I was one of the strongest advocates that this should be done. I cannot see that the position of the shareholders was in any way impaired by it, but we put ourselves in a better position. There was some opposition to this, but I noticed that in all the financial journals it was favorably commented upon, and the passing of the dividend in the same way. Now we have gone on, and we are in a very strong position. With the number of other large and strong institutions to compete with we have not got the amount of mercantile business that we would like to have, and we have been obliged to invest the money largely in government loans. These loans do not pay the percentage of profits that you expect, because you have got a large proportion of your deposits, which are themselves interest bearing. You must take into consideration the expenses of maintaining an institution of this sort."

DOMINION FIRE INSURANCE COMPANY

In commenting upon the excellent report of the Dominion Fire Insurance Company in these columns last week, it was stated that the fire premiums received by the company last year amounted to about $46,000 and the hail premiums $50,000. It should have been stated that these amounts were the increases in the premium receipts during the year, as would be observed from an examination of the company's financial statements for the past two years. As stated in our issue last week, the Dominion Fire Insurance Company is making substantial progress and has an unusually good reputation for prompt payment and adjustment of claims.

PETROLIA SELLS BONDS

The Canada Bond Corporation, of Toronto, have purchased a block of $26,752.42 6 per cent. bonds of Petrolia, Ont., payable in nineteen annual instalments. These bonds have been issued for general purposes.

ALLIED BONDS IN NEW YORK

The following table shows the high and low prices since issued and the last price on March 7th, 1918, of the active foreign bonds dealt in on the New York Stock Exchange:—

British and French.

Bonds.	High.	Low.	Last.
Am. Foreign 5's	99¼	90½	95⅝
Anglo-French 5's	98¼	91⅞	99¾
Bordeaux 6's	88	74	86⅛
Lyons 6's	98½	74	87

Russian 5½'s (1921)	94¾	34	38

CANADA

THE DOMINION INCOME WAR TAX

Its Meaning and Application

THE Dominion Income War Tax Act, passed at the last session of Parliament, is now in force, and all those liable to taxation under the provisions of the Act must file the required returns for the year 1917, on or before 31st March, 1918.

The Act provides that there shall be assessed, levied and paid upon the 1917 income of every person residing or ordinarily resident in Canada, a tax upon income exceeding $1500 in the case of unmarried persons and widows, or widowers without dependent children, and upon income exceeding $3000 in the case of all other persons.

Corporations and joint stock companies carrying on business in Canada, no matter how created or organized, shall pay the normal tax upon income over $3000. The fiscal year of corporations and joint stock companies may be adopted if desired.

Your Immediate Obligation.—You are now required by law to fill out in triplicate, one or more of the five special forms enumerated below. Read the particulars about the forms provided, then note the form or forms that fit your case. Don't forget to make three copies. You keep one copy, and in the case of Forms T1 and T2, deliver two to the Inspector of Taxation for your district. In the case of Forms T3, T4 and T5, two copies must be filed with the Commissioner of Taxation at Ottawa.

Penalties.—Default in filing returns renders the person or persons liable on summary conviction to a penalty of one hundred dollars for each day during which the default continues. Any person making a false statement in any return or in any information required by the Minister of Finance shall be liable on summary conviction to a penalty not exceeding ten thousand dollars or to six months' imprisonment, or to both fine and imprisonment.

FORMS TO BE FILLED IN AND FILED

Individuals—Form T1 is for all individuals having the requisite income. Fill in pages 1, 2 and 3, make no marks on page 4.

In giving particulars of dividends received, state amount received from each company, listing Canadian and Foreign Companies separately.

Partnerships as such need not file returns, but the individuals forming the partnerships must.

Corporations and Joint Stock Companies must fill in Form T2, showing total income. Amount paid during the year to Patriotic and Canadian Red Cross Funds, and other approved war funds, should be shown under Exemptions and Deductions. A financial statement should also be attached. In giving particulars of dividends received, state amount received from each Company, listing Canadian and Foreign Companies separately.

Trustees, Executors, Administrators of Estates and Assignees use Form T3, to state particulars of the distribution of income from estates they are handling. A separate form is required for each estate and total incomes must be given as well as distribution thereof.

Employers.—On Form T4 employers shall make a list of the names of employees and amounts paid to each in salaries, bonuses, commission, or other remuneration wherever the combined sum of such remuneration for the calendar year 1917 amounted to $1000 or more. This applies to all classes, regardless of number of such employees.

Corporations Listing Shareholders.—Corporations and Joint Stock Companies shall list on Form T5 Shareholders residing in Canada to whom Dividends were paid during the calendar year 1917, stating the amounts of dividends and bonuses paid to each.

Don't wait to the last minute. Get the necessary forms now, and make your information accurate and complete.

Forms may be obtained from the District Inspectors of Taxation and from the Postmasters at all leading centres.

Postage must be paid on all letters and documents forwarded by mail to Inspector of Taxation.

Department of Finance
Ottawa, Canada

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Shaunavon, Sask.—Tenders are called up to March 16th for $10,000 7 per cent. debentures on annuity basis. Mr. F. G. Horsey is the town clerk.

Moncton, N.B.—The city will make application to the legislature for authority to issue $30,000 bonds for permanent streets contracted for in 1917.

Etobicoke, Ont.—Messrs. G. A. Stimson & Company have purchased $36,000 6 per cent. 40-year debentures. This sum will be used by the township for hydro-electric extensions.

Port Coquitlam, B.C.—An issue of $30,000 treasury certificates on security of 1917 unpaid taxes, amounting to $38,904, has been purchased by the National Bond Corporation at 86.

North Vancouver, B.C.—A temporary loan by-law which was introduced on February 28th provides that the corporation may borrow up to $170,000 from their bankers, to be secured by this year's taxes.

Gananoque, Ont.—A rate of 37 mills on the dollar taxes has been decided upon by the town council for 1918, made up as follows:—22 mills for general purposes and local improvement, 12 mills for schools, half-mill for public library, one and a half mills for patriotic fund and one mill provincial war tax.

Red Deer, Alta.—The following particulars are given in the pamphlet recently issued with the auditors' report for 1917, which was printed in *The Monetary Times* last week:—Assessment, 1917—City, $3,195,580; business, $52,700; public school, $4,753,880; and separate school, $146,800. Tax rate—General, 8.5; debenture, 7.5; school, 6.5; total, 22.5 mills. Mr. A. T. Stephenson is secretary-treasurer of the city.

Trail, B.C.—Permits have been given to the city for three separate bond issues, namely: To issue and offer for sale $50,000 in sewer debentures, 20 years, at six per cent., the money having already been borrowed by the city from its banker and the work completed; to issue and offer for sale $6,400 in waterworks debentures, 20 years at six per cent., being the balance of last year's issue, on account of the discount on the $80,000 issue of 1917; to issue and offer for sale $15,000 school debentures for 20 years and six per cent. interest, to furnish the city's part of the funds for the much-needed four-room wing to the Central School building.

Saskatchewan.—The following is a list of authorizations granted by the local government board from February to March 1st, 1918:—

School Districts.—*Boakview, $600 5-years not ex. 8 per cent. instalment; W. E. Martin, Saltcoats. *Poolcapelle, $1,200 10-years not ex. 8 per cent. annuity; Mike Filijsourch, Swan Lake. *Rippowan, $2,000 10-years not ex. 8 per cent. annuity; R. F. Campbell, Hawarden. *Arras, $2,000 10-years not ex. 8 per cent. annuity; J. Bonas, Muenster. *St. Quentin, $1,750 10-years not ex. 8 per cent. instalment; F. Hamm, Dana.

Rural Telephone Company.—Lanigan, $1,500 15-years not ex. 8 per cent. annuity; Robt. Hackwarl, Lanigan.

Town.—Govan, $3,000 15-years 7 per cent. annuity; A. Graham, Govan.

The following is a list of debentures reported sold from February 25th to March 1st, 1918:—

School Districts.—Moon Lake, $1,400, Riverhurst, $4,000; J. H. Kern, Moose Jaw. Cut Arm, $1,600. Chris. Thorvaldson, Bredenbury. Green Corn, $1,800; Nay & James, Regina.

Rural Telephone Companies.—Idaleen, $1,800, Scott, $10,900, Penzance, $7,000, Aneroid North, $1,500, East Margo, $4,000, Quill Plains, $2,800, Wheat Valley, $3,600, Yellow Lake, $5,800, Lloyd George, $5,400, North Ceylon, $1,300; W. L. McKinnon & Company, Regina. East Mount, $3,000; Nay & James, Regina. Mazenod, $1,250; F. Somerville, Regina. Eden Valley, $1,000; Bond & Debenture Corporation, Winnipeg. Lewiswyn, $3,800; J. A. Thompson, Winnipeg.

Village.—Prelate, $1,500, $7,500; Wm. J. Shaw, Prelate.

Rural Municipality.—Bitter Lake, $5,000; Kerr, Fleming & Company, Regina.

---

*Being sold by the local government board.

INDUSTRIAL BOND ISSUE

A block of $200,000 five-year bonds, issued by the Page Wire Fence Company of Canada, Limited, has been purchased by Credit Canadien Incorpore. The bonds are unconditionally guaranteed by the city of Three Rivers. The proceeds are intended for the establishment of a new plant for the company at Three Rivers, Que..

SHAWINIGAN NOTES TAKEN UP

As the market quotation of the rights indicated at the close of subscription on March 1st, the entire issue of Shawinigan Water and Power's $1,500,000 convertible notes, offered to shareholders, was taken up by either the shareholders or those who purchased subscription rights from them. There was no unsold balance left over for subsequent placing.

INTEREST RATES ON ALLIED LOANS INCREASED

Interest rate on loans by the United States to Allies has been raised from 4¼ to 5 per cent. as a result in the recent increase in the rates on certificates of indebtedness from 4 to 4½ per cent.

Since it now costs the United States government more to borrow money from the American people, Secretary McAdoo felt it necessary to charge more for the allied loans.

The interest rates on allied loans have risen gradually from 3 per cent. on the first credits last April.

Credits to the allies now amount to $4,734,400,000, and $4,386,400,000 has actually been paid. Of the $348,000,000 unpaid balance, $137,000,000 is still credited to the Russian government.

WESTERN ASSURANCE COMPANY

Including interest and rents, there was a total balance of $643,429 to the credit of the year's operations by the Western Assurance Company, Toronto. This is a very satisfactory record, the business of the company's marine department contributing largely to the result. The directors' report, presented at the company's annual meeting recently, showed that the premiums received by that department, less reinsurances for the year, amounted to $4,232,714, the very large increase being due to the continued demand for insurance covering the increased risks due to war. The losses (paid and outsanding) amount to $3,321,911, and after charging agents' commissions, taxes and expenses of all kinds, the credit balance in this department was $272,674.

In the fire department the premiums, less reinsurances. for the year, amounted to $2,907,772. The losses for the year (paid and outstanding), after deducting recoveries under reinsurances, were $1,572,995, and after charging agents' commissions, taxes and expenses of all kinds, this department gave a credit balance for the year of $236,765.

Out of the large credit balance of $643,429 the company used $21,566 to reduce the value of the head office buildings to $200,000, a figure which the directors are convinced is not too high for the two buildings the company has in a busy corner of Toronto, especially when it is borne in mind that in recent years considerable amounts have been expended on modernizing them, and that these amounts have been paid from time to time out of current revenue. The directors have struck out the item of $15,479, which appeared in last year's assets for insurance maps, although they have had these valued as being marketable for at least four times that sum. They think it better to charge any outlay for furniture or maps in future to general expenses. After providing for these writings-down, for dividends on preference stock up to 30th June last, for writing off the net decrease in the market value of securities, and for some small adjusting entries, the balance in hand has been increased by the sum of $488,948, making the balance now $1,920,011. An analysis of the company's balance sheet indicates the maintenance of a strong position.

The Western Assurance Company has an excellent reputation, and is one of the veterans in the Canadian underwriting field, having served the public for sixty-seven years. Mr. W. B. Meikle is president and general manager. He is a capable and conservative underwriter, and has an experienced assistant in Mr. John Sime. Mr. C. C. Foster is secretary, and Mr. C. C. Wainwright and Mr. A. R. Pringle are assistant secretaries of the company.

Exempt from Dominion Tax

It is good business to increase your holdings of **Victory Loan Bonds,** because the security is of the highest quality, the income return attractive, and you are not required to pay Dominion Income Tax.

LIMIT PROFITS OF PACKERS

Must Not Exceed Two Per Cent. on Gross Sales in Any Year,—Cannot Evade Tax

Regulations providing for the licensing of abattoir companies and meat packing companies whose annual sales exceed $750,000 and for limitation of their profits are set forth in an order-in-council just passed by the government and made public. The restrictions upon profits are the same which the Union government shortly after its organization announced it would impose, and they are to be effective as from January 1st last.

Licensed companies are required so to fix their selling prices that their profits will not exceed 2 per cent. of their gross sales in any one year. If a company makes a profit in excess of 7 per cent. upon the capital actually invested in its business, it may retain only one-half of such excess up to 15 per cent., in excess of 15 per cent. it may not retain any profits. In no cases, however, are the profits of a company to exceed 2 per cent. on its gross sales; that is to say, no packing concern will be permitted to earn profits in excess of 11 per cent. on its invested capital or 2 per cent. on its gross sales, whichever is the lesser amount. All additional profits will be taken by the government. Furthermore, meat packers will not be allowed to charge up taxes, paid under the business profits war tax act or the war income tax act, to expenses, or to deduct them from profits. Instead, such Federal taxes will be levied "only upon the profit properly retained" by such companies under the order-in-council.

Subject to Business Profits Tax.

Packing concerns are permitted to retain as much as 11 per cent. profit on their invested capital. The profit so retained would therefore be subject to taxation under the business profits tax to the extent of 25 per cent. of the amount whereby it exceeded 7 per cent. on capital or to the normal income tax of 4 per cent. upon income in excess of $3,000, whichever produced the greater sum.

The limitation of profits of packing houses, fixed by the Canadian government, is thus more onerous than that adopted in the United States. In the latter country packing concerns are divided into two classes. The first class, known as "The Big Five," comprises only five corporations, each of which boasts annual sales in excess of $100,000,000. The profits of those five companies are restricted to 2½ per cent. of their gross sales in any year or to 9 per cent. on their capital. The capital upon which the percentage is to be calculated is the average necessarily used by the packer in his business. In his capital, however, the United States packer is allowed to include borrowed capital, which the Canadian packer will not be allowed to do.

The second class of American packers, those whose sales amount to less than $100,000,000 a year, within which Canadian companies would come, is subject only to one restriction—namely, that profits must not exceed 2½ per cent. of the gross annual sales. Packers of that class in the United States are therefore allowed one-half of 1 per cent. on their annual turn-over in profits more than are the Canadian abattoir or meat packing companies.

Cannot Evade Tax.

Some features of the order-in-council are interesting. Licensees, in fixing prices and determining profits, are not to discriminate as between different kinds of livestock, classes of materals or products, plants, localities or persons, to the injury of any competitor, of any livestock producer, or of the public. Packers will not be permitted, for the purpose of evading the limitation of profits, to transfer stock of any subsidiary company or to divest themselves of ownership of such companies. They are warned against adopting any method of computing profits which will conceal or understate the full and true value thereof, or which will divert to any other person or business the profits which properly accrue to them. Capital, actually invested in the business of a packing company, is defined in the same manner as is capital for the purposes of the business profits tax act.

In view of the intention of the William Davies Company, recently advertised in the Canada Gazette, to increase its capital stock from $2,000,000 to $5,000,000 one clause of the order is worthy of attention. That section provides that "the minister of finance may determine the amount of the capital of any incorporated company issuing stock after January 1st, 1918, and if, after that date, the capital stock of a company is increased or additional stock is issued, or if the stock is, in any way, changed or reorganized in such manner as to increase the amount of the capital for the purposes of the regulations, the minister of finance may decide whether or not it is fair and proper to include such increases, or any part thereof, when determining the capital of such company for the purposes of the regulations; and the decision of the minister shall be final and conclusive."

Details in Regulation.

The regulations deal in detail with the status of subsidiary companies, methods of computing sales, businesses included in the operation of the order and businesses excluded from its operation, computation of profits and of capital, allowances for deterioration, repairs and maintenance, the right of the minister of finance to information as to licensed companies' businesses and of his representatives to access to the books of packing companies and their subsidiary corporations. Excluded from the computation of sales and profits of such companies are: "The slaughtering of livestock and the manufacture of any product of livestock in any foreign country, any business which has nothing to do with human food, livestock or products of slaughtered livestock, the raising, fattening or feeding of livestock, any business other than the slaughtering of livestock, the manufacture of products therefrom which may hereafter be excluded by authority of the minister of finance." The sale in any other country of products manufactured in Canada is not excluded from the operation of the order.

The regulations will remain in force during the continuance of the war, and any violation of them may be punished by a fine not exceeding $5,000, or imprisonment for not more than six months, or both fine and imprisonment.

SASKATCHEWAN MUNICIPAL HAIL LOSSES

The sixth annual convention of the Saskatchewan Hail Insurance Association was opened in the City Auditorium recently, with A. E. Wilson, of Indian Head, the president of the association, in the chair. The preliminary business was, however, commenced, and the minutes of the last convention, held in Regina, were adopted as read by the secretary, E. G. Hingley.

The president of the association read the directors' report for the period from March 1st, 1917, to February 28th, 1918, which reviewed the work done by the association, and the report was received by the delegates and laid on the table for discussion later. The report of the board of directors called particular attention to the auditors' report for the same period, which showed that a surplus of approximately $68,000 was brought forward to 1918. During the year 1917 the amount paid out in insurance claims amounted to $823,362.42, the claims numbering 4,978. The revenue received was 930,799.35, and the cost of administration amounted to $36,596.68. The hail losses in the province were comparatively small until August 21st, when a storm swept over the central portion of the province.

MARINE INSURANCE

Commenting upon the marine insurance business by companies in Canada, Mr. W. B. Meikle, president of the Western Assurance Company, Toronto, at the recent annual meeting said:—

"Submarines were exceedingly active in the spring and early summer, and the losses in the marine department poured in day after day during the first part of 1917. Fortunately, the latter part of the year gave better results. As the business in this branch is composed mainly of war risks and of cargoes on steamers, the duration of the risks is short, and so the outstanding liability at the end of any month is small compared to the total premiums for the year.

"The premiums in the marine department for 1917 reached a figure that will not likely be attained by us again for some years. As 90 per cent. of the cargo space on all steamers from this side is reserved for government shipments, and these government shipments are not insured, and as the number of vessels on the ocean has been gradually decreased by submarine warfare, it will be readily seen that for some time to come there cannot be the same volume of marine business as formerly. With a reduced business, competition between marine insurance companies will naturally be keener, and this will tend towards cheaper rates, and the time may soon come when it will be better judgment to stay out of the business altogether rather than to write it at what we may consider inadequate rates."

MONTREAL STOCK EXCHANGE

Every Investor

should send for this Book

¶ Every Victory Bond owner—every investor, large or small—anyone who is interested in the investment of money in securities, should send for this book. It is being distributed free of charge by the Montreal Stock Exchange for the purpose of assisting and protecting the public in the investment of their savings.

¶ This book clearly defines the different classes of securities, and shows how the payment of principal and interest is secured. It shows the broadness of the market and why securities can be converted into cash when required. It tells of the methods and advantages of listing securities. Explains the functions of speculation, pointing out its value and its abuses.

¶ It describes the functions of the Montreal Stock Exchange, the facilities it offers, and the service rendered to the public by its members.

¶ It details the methods of how business is done between client and broker.

¶ It is a book of inestimable value to every investor—to anyone who is desirous of investing savings, either large or small amounts, in securities.

The edition is limited, so write to-day to the Secretary of the Montreal Stock Exchange, Room 437, Stock Exchange Building, Montreal, to make sure of securing your copy.

Montreal Stock Exchange

STEEL RAILS FOR CANADIAN RAILWAYS

An order for 100,000 tons of steel rails, or enough to lay tracks on some 800 miles of railroad, has been placed by Hon. J. D. Reid, minister of railways, on behalf of the government, with the Dominion Iron and Steel Company. The rails are to be manufactured at the company's plant at Sydney, Cape Breton, and all are to be delivered by the end of July next. Rolling will begin on April 1st, and it is hoped that during April 10,000 tons can be ready for use in making replacements on Canadian railways. In May, June and July it is expected that the rail mill will be producing up to its full capacity, and that deliveries will reach 30,000 tons a month. The rails will be heavy ones, probably 85 pounds to the yard, and will be suitable for renewals on railway main lines.

QUARTERLY AUDIT IN BRITISH COLUMBIA

Many additional responsibilities fall upon the government of the province of British Columbia, as compared with those provinces which have no control over their natural resources, and emphasize the need for a comprehensive and thorough accounting and audit system, such as has been put in force by that government, in charge of Mr. A. N. Mouat, comptroller general.

At various points considered to be most advantageous to the public, government agencies have been established for the sale of lands, the recording of pre-emptions and mining claims, the registration of births, deaths and marriages. Applications for water rights and coal lands are also made through the district agent, who transmits them to Victoria. In addition to his duties as district commissioner of lands, mining recorder and registrar of births, deaths and marriages, a government agent is usually appointed a stipendiary magistrate (with no jurisdiction over city cases), official administrator, gold commissioner, registrar of voters, registrar of the supreme and county courts, and registrar under the marriage act for the performance of civil marriages. While in some instances a government agent holds the appointments of mining recorder and assessor, these offices are usually held by other officers attached to the agency.

To take a concrete instance, here are set out the various offices held by the government agent at Kamloops, together with the staff engaged in carrying on the work appertaining to these offices, also members of his staff holding specific appointments and their assistants:—

Government agent: district commissioner of lands; district registrar of the supreme court; registrar of the county court; registrar of voters; registrar under the marriage act; district registrar of births, deaths and marriages; stipendiary magistrate; recording officer, Kamloops cattle district; water recorder, Kamloops water district; collector of revenue; clerk of the peace. Staff for above duties: two male clerks, one female clerk, one female stenographer.

There is also at the agency an official who holds the combined offices of assessor and mining recorder, with a staff of two male clerks.

The government agent, in addition to being collector of revenue, is also disbursing officer, paying all official salaries, wages and accounts against the government in his district after proper certification, and within the sums voted by the legislature.

There are 37 government agents, located from the international boundary in the south to the Yukon territory in the north, and from the eastern boundary to Queen Charlotte Islands in the west. There are, in addition, a considerable number of collectorates throughout the province, and it is the government's endeavor to overtake the work ahead, so as to bring these, and all other outside offices, including registries and other legal offices, within a quarterly audit.

The fire department of Red Deer, Alta., consists of a paid chief, two teamsters, who sleep in the hall, and about twenty-four volunteers, six of whom sleep in the hall, the city furnishing rooms and bedding free. A combination chemical and hook and ladder truck and a separate hose wagon are used. A fire pressure of 120 pounds is provided. Fire losses for the past few years were: 1908, $1,175; 1909, $1,350; 1910, $1,415; 1911, $1,275; 1912, $1,307; 1913, $858; 1914, $2,330; 1915, $800; 1916, $520; 1917, $65. Red Deer has the lowest insurance rates of any city of similar size in Western Canada.

INSURANCE ON ORIENTAL RUGS

L. Babayan, dealer in Oriental antiques, receives $5,350 insurance for loss sustained in a fire at his premises, 77 Bay Street, Toronto, on March 27th, 1916, and not $47,500 as was claimed. Mr. Justice Kelly at Osgoode Hall recently rendered judgment in five actions instituted by Mr. Babayan against the following companies: Union Fire Insurance Company, Continental Insurance Company, Phœnix Assurance Company, of London, and the North British and Mercantile Insurance Company. The award of $5,350 is to be shared by the companies in proportion to the amount of insurance held in each by Babayan. This is fixed by his lordship as follows: Union Fire, 2-19ths; Law, Union and Rock, 4-19ths; Continental, 2-19ths; Phœnix, 4-19ths; North British and Mercantile, 7-19ths. In all cases the plaintiff is awarded interest from September 10th, 1916, and costs.

The trial of Babayan's action lasted for fourteen days. In his judgment Mr. Justice Kelly remarks that the over-valuation of stock in Babayan's store was largely due to the fact that the estimator considered the increased cost of such goods as Oriental rugs, embroideries, draperies, brassware and Oriental furniture, owing to the war. Justice Kelly also comments upon a code by which the plaintiff indicated the value of rugs, etc. "There is a great difference between the cost prices of rugs such as these," he says, "and the prices usually quoted to and frequently obtained from the customer."

At another point he says: "The plaintiff's books and records were in a chaotic condition, and had been so, extending back as far as the investigation of them went at the trial."

In connection with the over-valuation of the goods his lordship says that Babayan was not wholly blameless, but the adjuster was also to blame.

PULP AND PAPER INDUSTRY

The investigation into the pulp and paper industry by a Dominion government commission is a cause of uneasiness to the trade, and this has been increased by similar action in the United States, which is the chief market for a great part of the Canadian product. During the last decade there has been a very remarkable development in the volume of production and of exports, and this development under normal trade conditions would tend to continue, owing to the natural advantages possessed by Canada as regards raw materials and manufacturing facilities.

The effect of the investigation has been to check development very considerably. It cannot be expected that new capital will seek employment in an industry in which selling prices are arbitrarily fixed at a point which, in the opinion of practical men, does not provide a sufficient margin of profit and a reserve against the hazards of the times. If the extraordinary demand is to be met more plant will be essential, yet very little is being built. The cost of new plant would be now about double what it would have been in pre-war times, and prices for the chief paper products are regarded as inadequate to provide interest upon the necessary capital and a sufficient amount for depreciation so that the fixed charges may be normal after the war.

This industry and its development are of great national importance because of its present contribution to the value of our exports and of its great possibilities. Since 1912 the annual exports of the various classes of pulp and paper products have been as follows:—

Year ending March 31st.	Paper.	Chemical Pulp.	Mechanical Pulp.	Pulp Wood.	Total.
1912	$ 3,867,119	$ 1,587,535	$3,506,700	$5,697,901	$14,659,325
1913	6,324,810	2,100,842	3,408,702	6,806,445	17,640,781
1914	12,675,036	2,923,083	3,441,741	7,388,770	26,428,630
1915	15,478,338	4,806,622	4,459,539	6,817,311	31,561,810
1916	20,021,270	6,801,011	3,575,537	5,743,847	36,141,665
1917	26,072,646	14,032,920	6,371,133	6,448,189	52,924,888

The paper referred to in the above classification is largely newsprint. About the middle of January the minister of finance fixed the price in Canada at $57 per ton, effective for three months from February 1st. It is understood that the actual average cost of this class of paper is slightly above that figure, in view of which those mills which do not export are at a decided disadvantage, as they are not benefited by the higher price of $60 per ton fixed in the United States. The investigations being carried on are not yet completed and the restrictions as to price may, therefore, be only temporary. It is however, very important that the growth of an industry which is able to contribute so substantially to our export business should not be obstructed.—Canadian Bank of Commerce statement.

GRADUATED WAR TAX ON INCOMES

If the income war tax law, about to be applied, did nothing more than cause a national stock-taking, it would serve a most useful purpose.

The taking of an inventory of one's resources invariably induces a desire to save and a desire to save when translated, as it very frequently is, into a determination to save means getting on with the war, as well as happiness all around. This process, first an inventory of one's resources, then a desire to save, applied to every unmarried person, or widow and widower without dependent children, receiving an income of $1,500 and over, and to all other persons receiving an income of $3,000 and over, will unquestionably result in a large proportion of cases, in a determination to save. And that means more general prosperity and renewed national strength.

But a national stock-taking is only incidental, of course, to the chief purpose of the income war tax which is to provide revenue for the prosecution of the war in as equitable a manner as possible. The tax is to be graduated, according to one's ability to pay. Those who are in receipt of only a living wage or salary will not be called upon to pay; those enjoying the highest incomes will be called upon to pay the greatest amounts, and the great body of income receivers between, will be called upon to pay in their due proportion.

Moreover, the purpose of the act is to distribute the burden equitably among all classes. By way of illustration, the farmer will be required to add to the value of his actual income, the value of the home-grown products which his own family consumes. This places the farmer on a plane with the salaried man, the value of whose services is wholly represented in the income received and against which he must charge all his living expenses.

Canada has established a war record that is the envy of the world. It is certain that the Canadian people will run true to form in answer to this latest call of their war government.

PUBLICATIONS RECEIVED

Municipal Finance.—Auditors' Report, 1917, City of Red Deer, Alta.

Coal.—"Where it is and how to get it." Issued by the Coal Operators of Northern Alberta.

Mining.—Preliminary report of the mineral production of Ontario in 1917. Issued by the Bureau of Mines, Parliament Buildings, Toronto.

Empire Trade.—"Empire Building from Within," paper read at the Bristol Branch of the Royal Colonial Institute, by Mr. Henry L. Riseley.

Mining.—Preliminary report on the mineral production of Canada during calendar year, 1917. Prepared by Mr. John McLeish, B.A., Chief of the Division of Mineral Resources and Statistics, Ottawa.

Statistics.—Statistical Year Book of Quebec, 1917. Compiled by G. E. Marquis, head of Bureau of Statistics, Provincial Secretary's Department, Parliament Buildings, Quebec. A very useful volume of over 550 pages, well arranged and indexed.

Municipal Finance.—"Taxation in the Urban Municipalities of Saskatchewan," by Robert Murray Haig, Ph.D., Assistant Professor of Economics, Columbia University. Issued by the Department of Municipal Affairs, Parliament Buildings, Regina.

Banking.—Home Bank Monthly, February, 1918. Issued by The Home Bank of Canada, Toronto. Contents: Early Efforts to Secure Banks; Thrift in the Sixteenth Century; the Comic Movies; Savings Accounts; our Flueless Homes; Heard Across the Roll Top Desk; the Case of John Walrinson; the Big Problem of the U.S.; and the Chain Letter.

Tropics.—Bulletin of the Imperial Institute. A quarterly record of progress in tropical agriculture and industries and the commercial utilization of the natural resources of the Dominions, Colonies and India, edited by the director and prepared by the scientific and technical staff of the Imperial Institute and by other contributors. Published by John Murray, Albemarle Street, London, W., England.

Bank Map.—An excellent bank map of Ontario and Quebec has been issued by the Department of the Interior at Ottawa. The map is on a scale of 25 miles to the inch and embodies several important features. Every city or town in which a chartered bank branch is located is indicated by a circle. If more than one branch exists in said location, the exact number is shown in the circle. But what is almost of more importance is the railway feature of this map, under which all the railways, great and small, operating in the two provinces, are indicated by a color scheme. The four large systems—the Canadian Pacific, Grand Trunk, Canadian Northern and Canadian Government Railways—are represented by a different colored line, while the smaller roads are grouped under one color. The merchant or fish dealer of the Maritime Provinces as well as the farmer of Western Canada can each determine at a glance, the shortest and most convenient route by which manufactured goods may be shipped to him, and at the same time ascertain the most feasible method of routing his own products to the markets of Central Canada.

Statistics.—Now that improvement of the statistical records of Canada is in hand, a volume on statistical methods, just published, will prove of service to the Dominion and provincial government officials, who deal with Canadian statistics and to those who interpret statistics. It also makes a good textbook for college students, a manual for statisticians and business executives. The volume regards statistical methods as means rather than as ends, as constituting simply one phase of general methodology, and as including not only methods of analysing but also of collecting and assembling statistical data. The methods discussed are of general application although the illustrations, for the most part, are drawn from economic and business fields. The order of treatment is the same as that followed in the planning and analysis of a statistical problem. Statisticians, business executives and students of statistical methods generally will find the volume not only a compendium of statistical procedure but also a guide in the process of logical statistical analysis. Emphasis is given to the necessity of a clear formulation of the problem in mind, to the meaning, collecting and assembling of data, and to the necessity of a rigid interpretation and use of units of measurements. All of these steps are held to be preliminary but indispensable to the formulation of a statistical judgment, and to the employment of the refinements of mathematical analysis which alone are too generally associated with "statistical methods."

"An Introduction to Statistical Methods." By H. Secrist, Ph.D. Published by The Macmillian Company of Canada, St. Martin's House, Bond Street, Toronto. Price, $2.00.

National Prosperity.—The permanent causes of the wealth of nations is the subject discussed in a timely volume of studies in the conservation of permanent national resources. The work emphasizes the thought that conservation is to be regarded as a treatment of the foundations of national prosperity. The war makes it important to emphasize the fact that in the treatment of conservation we are dealing with national preparedness both for war and peace. "There is danger," as stated in the preface to the volume, "that in dealing with measures of preparedness we may direct our attention too exclusively to the needs of to-day and to-morrow, whereas nothing stands out more clearly as a result of our world war than the fact that preparedness must be a permanent, all-round condition; for otherwise our preparations may be in vain. While it is true that this book deals mainly with permanent conditions of prosperity and preparedness, it also has lessons for the immediate present." The book is written by Richard T. Ely, Professor of Political Economy in the University of Wisconsin, Ralph H. Hess, Associate Professor of Political Economy in the University of Wisconsin, Charles K. Leith, Professor of Geology in the University of Wisconsin, and Thomas Nixon Carver, David A. Wells Professor of Political Economy in Harvard University. It is an opportune work and will be read with great interest and benefit by the many Canadians who are interested in our national problems.

"The Foundations of National Prosperity." By Ely, Hess, Leith and Carver; price $2.00. Published by the Macmillan Company of Canada, St. Martin's House, Bond Street, Toronto.

INQUIRY INTO DOMINION PERMANENT SITUATION

Declaring that the estates of the late J. R. Stratton and the late D. W. Karn, former presidents of the Dominion Permanent Loan Company, should be compelled to repay any profits made from their association with the Dominion Permanent Loan Company, Mr. U. A. Buchner, a London lawyer, recently addressed a meeting of nearly a hundred London and Western Ontario debenture owners and stockholders in that city.

Mr. Buchner, who personally is in danger of a loss of between $4,000 and $5,000, told the meeting that years ago he was a legal adviser of the Dominion Permanent Loan Company. Thus, he said, he has learned a good deal which he could use in delving if he is made a member of an advisory committee which he hopes to see named to co-operate with Assignee Clarkson.

He claims that years ago he had attended a meeting of the company at Toronto and had asked for information concerning the assets of the corporation. He was told by officers to wait until after the directors' meeting for the information, but he says he is waiting yet.

VALUE OF WAR ORDERS IN CANADA IS LARGE

Orders for munitions, marine engines and other supplies for war purposes to an estimated value of $50,000,000 have been placed by the United States in Canada during the past five months. Of the total, orders to the amount of $35,000,000 have been placed by the Imperial Munitions Board. The latter mentioned orders include contracts for 7,000,000 shells, 2,000,000 cartridge cases and 10,000,000 forgings. Such orders from the United States have an important influence in redressing the balance of trade between Canada and equalizing exchange between the two countries.

British orders for munitions to the value of some $880,000 000 have been placed in Canada. In April, May, June and July last the amount of British orders ran as high as from $45,000,000 to $50 000.000 a month. Since then there has been a diminution of orders owing to the growth of the munition industry in Great Britain, and also in some measure to the shipping situation. Now, the Imperial Munitions Board is still expending about $25,000,000 a month in Canada on behalf of Great Britain. The largest type of shell now being produced is a 6-inch high-explosive howitzer shell, and the manufacture of fuses has to a great extent been discontinued.

DIVIDENDS AND NOTICES

PENMANS, LIMITED

DIVIDEND NOTICE

Notice is hereby given that a Dividend of one and one-half per cent. (1½%) has been declared on the Preferred Shares of the Capital Stock of this Company for the quarter ending 30th of April, 1918, payable May 1st, 1918, to Shareholders of record of 22nd day of April, 1918. Also a Dividend of one and one-half per cent. (1½%) on the Common Shares for the quarter ending 30th day of April, 1918, being at the rate of six per cent. per annum (6%), payable 15th of May, 1918, to Shareholders of record of the 6th of May, 1918.

By Order of the Board.
C. B. ROBINSON,
Secretary-Treasurer

Montreal, 4th March, 1918.

CHARTERED ACCOUNTANT, young, energetic, capable executive, specially experienced in trust and loan company work wishes to associate with progressive company. Box 159, *The Monetary Times*.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Algoma Steel Corporation.—An official of the company states that satisfactory progress is being made on the installation of the thirty coke ovens, which are expected to be completed by the end of June or early in July.

Goodwins, , Limited. — Goodwins, Limited, department store, of Montreal, earned a net profit of $150,985 in the year ended January 31st last after interest charges and increased allowances for reserves. As compared with 1916, net showed a gain of $25,331, and represented earnings at the rate of 8.6 per cent. on the company's $1,750,000 preferred stock. The total current assets are $1,439,135, as against current liabilities of $861,827.

Riordon Pulp and Paper Company.—The company reports earnings of $1,943,651, including income from its investments, for the year ended December 31st last, an increase of $417,036, or about 27 per cent., as compared with 1916. The figures are after the deduction of the 1916 war tax, but no provision has been made for the 1917 tax. An exceptionally large allowance for depreciation, which includes, this year, provision for exhaustion of timber areas, reduced the net balance after fixed charges and preferred stock dividend to $962,942, a decrease of $202,794, or about 21 per cent. Earnings on the ordinary capital, which were at the rate of 25.9 per cent. in 1916, appear as 21.4 per cent. for 1917. The depreciation allowance, which accounted for the reduction in net profits, was $766,055, against $149,480 the year before.

La Rose Consolidated Mines Company.—The company reports profits of $71,372 for 1917. The production for the year was 437,337 ounces, having a net value of $328,751. Against an average price of 64.89 cents an ounce for silver in 1916, the company last year received 82.94, but the increase was more than offset by higher costs of production, the average being 68.64 cents an ounce, against 46.39 in 1916. The company's surplus at the end of 1917 was $485,286, against $740,353 in 1916.

The report says that there is still a small amount of ore left in pillars and the backs and walls of old stopes, but no estimates as to the quantity or value can be made. The general manager states that options on two gold properties were dropped owing to unsatisfactory exploration results, and that while other properties were examined none was acquired.

Canada Cement Company.—Addressing the shareholders at the annual meeting of the company, held at Montreal on March 8th, the president, Senator W. C. Edwards, said that he had always looked forward to the time when he could make the statement that there was not a drop of water in the common stock. As a result of the excellent business of the past year, he was now in a position to make that statement.

Dealing with the facts presented in the annual report, the president emphasized the fact that the earnings from the cement business proper had been sufficient to take care of fixed charges, preferred dividends and ordinary dividends chargeable to the year's profits. The new business handled by the company had resulted most successfully.

F. P. Jones, vice-president and general manager, commenting upon the cement business proper of the company, remarked that it had never been a record one, especially in the country districts. The directors, however, expect that after the war there will be a greater demand for cement than at the present time. The company is in a position to take care of any extra business without further outlay of capital. The old board of directors was elected without change.

Dominion Canners, Limited.—The report presented by the directors at the recent annual meeting of the company on March 6th was termed satisfactory by President J. J. Nairn. It showed that the operating profits for the past year, after providing for the business profits war tax, but before deducting bond interest was $800,429. This, with the credit balance brought forward from 1916, made a total of $1,258,944. The balance carried forward this year is $990,338, after paying interest on bonds of $108,263 and dividends on preferred stock of $160,342. In addition to this reserve, the company has $150,000 as an insurance reservation.

The report also announced that the directors have declared a dividend of 1¾ per cent. on the preferred stock, payable on April 1st.

The following are extracts from the report presented by the president:—

"Our stocks of canned goods on hand are unusually light, and we will probably go into next season with little or nothing in the shape of canned goods. No one can forecast the future. There are so many uncertainties, and it seems necessary to protect ourselves against the unforeseen.

"Regarding export business. Last year we advised you that we were diligently working up our export trade, and this particularly has been of material assistance to us, but owing to transportation and foreign financial conditions, this trade is now practically cut off. Labor has advanced considerably, tins have also greatly advanced; in fact, all those materials that enter into the pack, such as fruits and vegetables, range from 50 up to 100 per cent. higher. Therefore, we cannot for the present expect to sell goods at normal prices."

Intercolonial Coal Company.—Profits for the year ended December 31st last totalled $183,419, compared with $122,734, an increase of $60,685, or 49.4 per cent. Deductions included sinking fund, $6,000; interest, $14,579; discount debentures, $2,102; depreciation, $35,970; war tax, $17,150; dividends, $7,626, totalling $83,427, and leaving a surplus for the year of $9,992, which, added to the previous surplus, made the profit and loss total $179,089.

Mr. Charles Fergie, president, stated at the annual meeting recently that the total quantity of coal raised was 170,700 tons, compared with 143,748 in 1916, an increase of 35,952 tons. A ready market was obtained for the output, the demand during the greater part of the year being much in excess of the supply.

The demand for fireclay products also continued extremely brisk, and the clay department experienced another very successful year. Outputs were at times, however, adversely affected owing to shortage of labor. There were during the year 5 per cent. debentures redeemed to the amount of $52,500, leaving of this issue now only $47,500 outstanding. Of the first mortgage issue, $6,000 of the 6 per cent. bonds were also redeemed, but no part of the 5 per cent. bonds, thus leaving still outstanding $177,500 of the 6 per cent. and $17,500 of the 5 per cent. bonds.

With prospects of an increased production and the continuance of an excellent market, the outlook for 1918 is very promising, and another year's satisfactory and successful operations may reasonably be looked forward to.

Current assets totalled $301,868, compared with current liabilities of $42,098, leaving the net working capital $259,770, compared with $164,307 a year ago.

Paton Manufacturing Company.—The statement of the company for 1917 shows that the profits did not come up to the record level of 1916, being $108,332, compared with $314,311 for the preceding period. After paying the preferred and common dividends, amounting to $72,000, there was a balance to profit and loss of $36,426.

The balance of profit and loss from the previous year amounted to $644,955, and from that was deducted war taxes for the accounting period from February 1st, 1915, to January 31st, 1916, amounting to $30,787, to which was added a $6,000 contribution to the Sherbrooke patriotic fund. This left the surplus slightly smaller than the preceding year, the amount carried forward being $644,594, against $644,955 at the end of the previous year.

The profit and loss account compares as follows:—

	1917.	1916.
Profit for year	$108,332	$314,311
Balance debt. recovered	94	479
	$108,426	$314,790
Dividends	72,000	78,000
Surplus for year	36,426	202,904
Total	$644,594	$644,055

The balance sheet shows that the current active assets were higher than a year ago. Total assets were $1,371,499, compared with $1,306,719 a year before.

The balance sheet compares as follows:—

	1917.	1916.
Current liabilities	$ 126,905	$ 61,763
Capital stock	644,955	600,000
Cash	1,903	162,672
Accounts receivable	172,671	134,855
Insurance	8,609	7,849
Stocks	563,924	494,135
Investment	185,410	24,525
Total active assets	932,518	824,037
Land, buildings, etc.	438,981	482,681
Total assets	1,371,499	1,306,719

LARGE EXPENDITURE ON RAILWAY EQUIPMENT

The Hon. Dr. Reid, minister of railways, is arranging for new rolling stock, locomotives and rails for Canadian railways this year aggregating a total cost of approximately forty million dollars. In addition to the 100,000 tons of steel rails to be rolled by the Dominion Iron and Steel Company and the rails secured in the United States, announced recently, the railway department is ordering 7,500 new freight cars, 150 locomotives and several hundred new colonist sleepers and other passenger cars. The colonist sleepers will be required to accommodate the big movement of troops to be expected when the influx of returning soldiers really starts in. The freight cars will include a large number of coal cars to relieve the scarcity evident this winter. All the new equipment will be ordered on government account, but deliveries will be allocated to all railways as needs require.

Prices submitted in the tenders received are very high as compared with pre-war prices. Box cars, for instance, now cost from $2,600 to $2,800 each, as compared with $1,400 each before the outbreak of the war. Locomotives have increased in cost by 150 per cent., and now run at about $60,000 each.

In an effort to reduce costs through pooling orders by the government, officials of the railway department are investigating costs of raw material and of manufacture, and arrangements may be made with the manufacturers for governmental purchase of iron and steel supplies at minimum cost, through co-operation with the United States government.

ALBERTA PREVENTS SALE OF SECURITIES

The results of legislation in Alberta are related in a report of the Public Utilities Board of that province. The Commissioners say that up to November 30th sales in Alberta of securities of approximately $3,500,000 have been prevented by the operation of the act. This estimate apparently is based not upon the capitalization of the companies refused certificates, but upon the stock for the issue of which in Alberta formal application was made. The Commissioners say:—"The prosperity prevailing, particularly amongst the agricultural population, has caused company promoters to turn their attention to the province as a likely field in which to sell shares in their speculative enterprises.

"That the act has prevented the offer to the public of much stock in companies doomed from the very outset to failure there can be no doubt. Generally speaking, the sale has been barred by the refusal of the board to grant the certificate, but in some few instances this has resulted from the board's action in attaching for the safeguarding of the purchasers conditions that the promoters, though acquiescing in, have failed to comply with."

The tax rate in St. Thomas, Ont., will be about 30 mills, owing to the increase of expenditures outlined for the coming year. This increase will amount to about $15,000, to cover special additional patriotic grants and increased wages of about $6,000 to city employees.

ORDERS FOR SHELLS FROM UNITED STATES

Imperial Munitions Board, asked as to the orders for n the United States, placed in Canadian factories, week that no large orders were received recently. months ago orders were received for the machining of 6,500,000 seventy-five millimetre shells, the manufacture of ten million seventy-five millimetre forgings from steel supplied by the United States, and the making of two million cartridge cases. In addition to these orders another has been received for 425,000 4.7 shells. This comprises the total of the orders received by the Imperial Munitions Board from the United States for Canadian factories.

For Ton Trucking Purposes

Ford
ONE-TON TRUCK
PRICE
$750
F. O. B.
FORD, ONT.

Supplied as chassis only

"Made in Canada."

BUSINESS men everywhere who have hauling or delivering problems to consider—whether operating a wholesale business, a retail store, or a farm—will welcome the arrival of the Ford One Ton Truck.

Heretofore, the Ford user who wanted to carry loads up to a ton found it necessary to get one of several special attachments or extensions which were on the market. Now the standard Ford truck is available—a car that can withstand the drudgeries of commercial use, and yet lacks superfluous weight, and is easily handled.

The truck differs from Ford passenger cars in that it is specially designed throughout in proper pattern and strength for heavy-duty service. It has a final drive of the worm gear type, so that all gears are enclosed. Rear wheels are equipped with solid tires. Front tires are pneumatic. Standard Ford motor, transmission and ignition.

The largest truck and automobile company in the British Empire, with an organization of more than 700 Canadian dealers stands back of every Ford truck purchased.

See any Ford Dealer in Canada, or write for a catalog

READJUSTMENT OF INDUSTRY

How to Secure Remunerative Trade Without Unrestricted Competition

How to secure remunerative trade without unrestricted competition; how to maintain efficient production with competitive co-operation. These two problems were discussed at length by Colonel David Carnegie, M.I.C.E., F.R.S., Edin., member and ordnance adviser, Imperial Munitions Board, Ottawa, at the annual meeting of the Canadian Mining Institute, Montreal, last week. In dealing with the first problem, Colonel Carnegie said:—

"I believe there is a place where each consumer, buyer, manufacturer and employee can do the most efficient service, and at the same time have his share in the responsibility and profits of the industry. By the union of these interests a social service would be developed and dissipate servile fear and eye service.

"By restricting competition in securing trade on the one hand, and inspiring competitive co-operation in production on the other, a combination of the complete forces in industry can be obtained. To secure these ends I suggest for your consideration the formation of two distinct organizations. The first, which might be named National and District Trade Boards, composed of representatives of buyers and manufacturers, possessing the sanction and authority of government to trade in the manner I am about to outline, with a view to the abolition of unrestricted competition between each manufacturer of the same industry in each district. The second, the formation of District Production Boards, composed of representatives of the employers and the employees, having government sanction and authority to deal with provisions for the maintenance of efficient labor, processes and plants for the production of the products of their industry. It may be found eventually that one organization for the control of buying and selling as well as production, instead of two organizations as I have suggested, will be more efficient, but it appears for the present that two boards would give fuller and freer opportunity for the exercise of the gifts of administration on the one hand and technical skill on the other if each board had independent control.

"Some may ask why should a body of manufacturers require government sanction and authority to direct their own industry? Is the industry not able to look after its own interests without having one of its representatives approved and secured by government to overlook its operations? Is not industry already sufficiently trammelled by officialism and government red tape?

Reasons for Government Connection.

"There would appear to be at least two reasons why it is advisable to have such government sanction and authority. First, because the chairman and vice-chairman of such boards in this country would have free access to the department of trade and commerce as officials of that department, and thus obtain more quickly information necessary to carry on the work of the board. Second, the general public would look upon any such combination of manufacturers, if they were not under government direction, as a monopoly for selfish gain and to raise prices of products. And that the interests of the community would not be sufficiently safeguarded.

"These national and district trade boards would be distinct from the district production boards in both the personnel and duties performed. The former board would have representatives of the manufacturers and buyers concerned in the commercial and financial administration in securing and distributing orders to the manufacturers, as well as seeing to the final delivery of the manufactured products. The latter board would have representatives of manufacturers and employees, and would be concerned in all matters relating to the technical and human problems in the production of the industry.

"On these boards the administrator, the buyer, the manufacturer and the worker are all represented, each in his own sphere where the maximum of service can be rendered by each in the most efficient and harmonious manner.

"The functions of production boards I will define more fully when dealing with the second problem.

"In describing these trade boards, I wish to avoid giving the slightest impression that the district and national boards have for their object private monopoly.

"1. I propose the formation of trade boards for each industry, in each district and nation, consisting of representatives of the buyers, merchants or consumers elected by them in sufficient number to represent their interests. The chairman to be nominated by the elected board from one of the manufacturers, and the vice-chairman from the buyers. Both these officers to have their nominations confirmed by government and their services secured by government for the period covered by their election. Both to have full administrative powers granted to them to act with the executive representatives of the manufacturers and buyers in carrying on the duties of their office.

"2. Each trade board to be incorporated as an association to carry on the business of the board on behalf of the industry represented and within a definite geographical area.

"3. The trade boards to be known as district and national boards, having a distinct number or geographical designation and bearing the nature of the industry. For instance, the steel and iron industry of Canada might have two district boards and one national board. The board in the one district might be called the eastern steel and iron trade board, the other the western steel and iron trade board, having the geographical boundaries fixed for each.

"The national board might be styled the Dominion steel and iron trade board.

Functions and Duties of Boards.

"4. The functions of the district trade board:—

"(a) To tabulate the rated capacities of all works in the specific industry of the district over which it presides. To receive from manufacturers monthly or periodically, rates of surplus capacities available at their works for production for definite periods.

"(b) To tabulate the domestic requirements of the district and submit to the national board schedules giving the surplus available capacity of factories in the district which could be used for foreign trade.

"(c) The district trade board would be the recognized medium approved by government through which all enquiries would be submitted for work usually offered to competition by buyers, users or consumers in the district over which the board presided. The government or board, however, would not prevent any user, consumer or buyer from sending similar enquiries to any foreign market or prevent them from purchasing the goods from a foreign market, if after receiving tenders from the board they were not so favorable as those received from foreign competitors.

"(d) The board, as a rule, would receive tenders from manufacturers to guide it in tendering and in negotiating contracts with buyers, or if it had sufficient information to enable them to prepare tenders for competitive work it would not be necessary to apply to the manufacturers in each case when the board was tendering for work.

"(c) No contracts for work to be concluded by the district trade board without the approval of the chairman, or in his absence the vice-chairman of the board.

"(f) The board to place orders with manufacturers at prices at which the contracts are negotiated with the buyers, prices for work for which tenders are not called to be fixed by the board. From time to time schedules of prices to be made by the board of different standard articles, based upon quotations from manufacturers and upon rates of raw materials, rates of labor and other conditions of local importance to guide the board in quoting buyers.

Responsible for Delivery.

"(g) The district trade board to be held responsible for the delivery of the work in accordance with the specifications, drawings and terms of contract, inasmuch as the board negotiates the contracts with the buyers.

"(h) The board to have full authority to allocate to the manufacturers orders for execution in accordance with the rated capacity and general ability of each manufacturer to fulfil the contracts.

"(i) The board to have authority to purchase any raw materials required in the fulfilment of contracts undertaken which it would be obviously more economical to purchase for all and distribute among the manufacturers rather than each manufacturer himself procuring the raw materials to be required

"(j) The district trade board to receive all payments for work placed with the individual manufacturers by the board and completed and delivered to the customers. Payments to be made by the board to the manufacturers for all products

"Representing The Mutual Life of Canada"

Efficient representatives of our Company will be found in every important centre in the Dominion and in the Island of Newfoundland. Their motto is "Service" and they will gladly furnish any needed information regarding Life Insurance in general and Mutual Life Insurance in particular. The Company issues policies on every approved plan—including Endowment Policies, Monthly Income Policies, and Policies designed for the protection of Business Enterprises. It has been the aim of the Mutual Life of Canada to introduce into its contracts every modern privilege that is compatible with safety, but the distinguishing feature of the Company is Mutuality. Under this system all profit from whatever source reverts to the Policyholders and so reduces the cost of protection. We furnish—
The largest amount of protection for the least possible outlay.

BANK AMALGAMATIONS IN ENGLAND

No Fusions of Such Importance for Two Decades—Causes and Consequences

Commenting on the number and nature of bank amalgamations in England, the London Financial Times says:—

"Amalgamation epidemics in the banking arena, like their counterparts in the pathological world, tend to recur in cycles, but their origin may be due both to local and national causes. A time of war one would hardly have predicted as a favorable period for fusions and absorptions, yet the past year was noted for the number of bank amalgamations and for the importance of the various institutions involved. No corresponding arrangements of such outstanding significance, indeed, had occurred since 1896, when by the merging of Gurney and Company, J. Backhouse and Company, and Barclay, Bevan, Tritton, Ransom, Bouverie and Company, and twelve other private firms, the present concern of Barclays was founded. In that year, too, there were seven other fusions, including the swallowing up of the Channel Islands Bank, the Carlisle City and District Banking Company, and the Huddersfield Banking Company by what is now the London City and Midland. Prior to that the most remarkable season was 1891. The absorption tendency first showed itself in 1878-79, and may be said to have been started by the failure of the City of Glasgow Bank and the West of England and South Wales District Bank.

Primary Cause of Mergers.

"The original incentive may therefore be described as the desire of individually small institutions to strengthen their position and to enlarge their scope for action by union on more or less mutual terms. This principle, no doubt, underlies to a considerable degree most amalgamations, but in later years there has also sprung up among the big banks a fierce spirit of emulation which at times has passed into such keen competition as to occasionally run dangerously near to hostility. Apart from factors appertaining specially to the banks themselves there have been external causes which have favored concentration and consolidation. The multiplicity of small institutions which served very well a quarter of a century or more ago would be useless to our modern commercial methods and to the extent that banks have adapted themselves to the bigger trading conceptions of to-day the amalgamation policy has been merely a phase of the general evolution of our mercantile system. The most important changes of the past year illustrate this argument. While offhand, as we have already remarked, a time of international crisis might be supposed to leave no room for attention to fusion questions, it has in reality forced them to the front. The chief deals—at all events the first—did not arise out of the recrudescence of a desire on the part of their participators to assume yet bigger dimensions, but solely out of the need to supplement their activities in directions the expansion of their business showed to be imperative.

Pressure of War Work.

"The war has thrown enormous additional work on the banks and has opened up to them spheres of usefulness they would have fought shy of not so very many years ago. It was often a case then of an institution threatening to become 'pot-bound'; its existing boundaries menaced the vitality of activities which had grown beyond them. Then the only alternatives were to launch out on a new programme involving the raising of fresh capital and challenging other banks or to seek alliance with another concern which could give ready-made what was wanted, and would find to hand in return something it needed itself. There were three characteristics of last year's mergers. There was an extension of local enterprise in the acquisition by the Union Bank of Manchester of the Halifax and District Permanent Banking Company; there was the invasion of Ireland by the big Metropolitan institutions exemplified in the passing of the control of the Belfast Banking Company to the London City and Midland and of the Ulster Bank to the London County and Westminster; and the reciprocal expansion of spheres of operation illustrated by the fusion of the London and Provincial and the London and South Western and the Union of London and Smiths and the National Provincial of England. Since the close of 1917 we have had the arrangement between the London County and Westminster and Parr's, which has introduced a new element into the movement and suggested rather a revival of the competitive spirit. The announcement of this fusion was only made known at the beginning of this month, but undoubtedly it is strictly a phase of last year's boom, and that boom cannot be properly renewed without taking it into consideration.

"Contrast these noteworthy deals with the relatively insignificant performances of 1916 and 1915. There was none actually in the former year, but only the completion of the arrangement between Barclays and the United Counties of Manchester, which was negotiated in 1915, but had been hung up through the delay of the New Issues Committee of the treasury in sanctioning the necessary creation of shares. The only other fusions in 1915 were the acquisition of the Bank of Whitehaven by the Manchester and Liverpool District Banking Company and the purchase of Thomas Barnard and Company by Parr's. Various methods of payment distinguished last year's deals. The Union of Manchester bought the Halifax and District outright for cash, the London City and Midland and Belfast deal was carried through by an exchange of shares, the London County and Westminster paid the Ulster shareholders partly in cash and partly in shares, and the London and Provincial and South Western, the National Provincial and Union, and the London County and Westminster and Parr's arrangements are to be entirely on a share basis. Though these movements among banking institutions indicate a general trend of development not confined to this country, it is not difficult to outline the objectives of the individual institutions.

Invasion of Ireland.

"The invasion of Ireland in more pronounced form by leading London houses was inevitable sooner or later if they were to hold their own there. The industrial expansion in the Emerald Isle of recent years has led to much increased activity on the part of the banks, and the growth of their deposits reflects the rapid expansion of internal trade. New branches are being opened up in all directions and assistance given with a good deal of foresight to new lines of industry. English banks naturally wish to share in the prosperity this means, and by far the easiest method of doing this was the course adopted—the taking over of an existing national institution and carrying it on in its native guise. The Union of Manchester's acquisition exemplifies the same principle in a qualified degree in the North of England. The trend of its business required better representation in the Yorkshire area, and the purchase of the Halifax and District gave it what it needed and widened still further the scope of its possibilities in the Northern area.

As to the London Fusions.

"The three big London fusions are all of a complementary and supplementary character. How necessary the London and Provincial and the South Western have always deemed themselves to each other is proved by the fact that they have flirted together for nearly half a century, though only now has the marriage been arranged. The South Western is mainly a metropolitan institution, with the addition of a strong foreign connection, but with only a weak hold on the industrial centres and the seaports. There, on the contrary, the London and Provincial is powerful, and it has a specially good business in South Wales, though it was comparatively limited in action in the metropolis and had no direct foreign feeders. The combination of the two produces an almost ideal undertaking, and its future development will be well worth watching. The case of the Union of London and the National Provincial is almost as convincing, and anyhow there are plenty of grounds to justify the deal. The Union's principal interests are in the metropolis, though from time to time it has materially expanded its connection in the provinces by judicious acquisitions. But these expansions have not carried it much into the ground covered by the National Provincial, so that it remains true that out of a combined total of 700 officers the two concerns outside of London meet in only about thirty-five places. The National Provincial, on the other hand, is notably a Midland and Northern undertaking, and its association with the metropolis is primarily for the convenience of its country connections, and it certainly does not clash there with the Union. The amalgamation of two such concerns should result in a highly useful institution and, anyhow, the fusion makes it the third biggest bank in the United Kingdom—no mean ideal to live up to.

"The main reason put forward for the London County and Westminster and Parr's merger is that the latter brings to the former a big and much needed northern connection, and that the former will give the latter a very convenient foreign outlet, principally in France and Spain. It is obvious, however, that this cause of amalgamation has not just sprung into being, but has existed for some time, and that the contagion

of the other deals must have acted as an incentive to bring it about at this particular moment. Nevertheless, there is good reason for believing that the closer association of interests will be mutually beneficial. Parr's is much more a provincial than a London house, and has built itself up by a very pronounced policy of absorption which it seems fitting should end by the self-denying ordinance which now causes it to coalesce with the London County and Westminster. The latter has probably the most extensive business abroad of all the metropolitan institutions, and besides its own branches oversea it is the agent here for numerous foreign banks. It has plenty of country branches, too, but they happen to lie in almost every direction but the north, so that the alliance with Parr's will certainly fill a gap in its sphere of operations in this respect. The arrangement makes the combination the second largest bank in the United Kingdom, judged by the list of deposits, and not very far either behind the first, which is still the London City and Midland."

READJUSTMENT OF INDUSTRY

(Continued from page 44.)

passed and shipped, less the amount required to pay for working expenses of the board. The amount deducted to be mutually arranged between manufacturers and board.

"(k) The board to be responsible for the transportation of the materials produced and to make such arrangements with railways and shipping boards as required for the most economical and rapid means of transportation.

"The district trade board would have authority to form committees from its members or co-opt members from the buyers' and sellers' representatives of the same industry, for directing, selling, distributing, financing and for the control of any other departments in aid of the full and proper conduct of the board's business.

Manufacturers and Board.

"5. Manufacturers associated with the district trade board would be required to enter into agreement with the board that they would abide by the conditions of the incorporation, which would have for its object the securing of remunerative trade without unrestricted competition.

"Manufacturers, however, would have the right to continue any arrangement they might have for the supply of customers with products for which orders may be received direct from time to time without competition.

"However, should enquiries for competitive work be sent to any manufacturer after buyers have been notified that the district trade board would handle competitive business, such enquiries would be forwarded to the board for its attention.

"6. Each manufacturer would be entirely free to organize and operate his works just in the manner he considered best to obtain the maximum output of the best quality.

"He would have the opportunity of being a member of the production board, and derive the benefits of such membership in helping him to maintain efficient production.

"7. Periodic meetings of the various district trade boards of the same industry to be held for conference, with a view to improving methods of operating boards.

"8. To avoid overlapping of services, all buyers would be kept supplied with list of products manufactured within the various districts, to help them in sending to the board of the district where the articles were being produced, and where freight charges would be less in delivering the goods.

Formation of Useless Companies.

"9. The district trade board would have the right to appeal against the formation of new companies within its district if in the opinion of the board there was insufficient trade to keep in operation any additional capacity without general loss to the community. Such appeals would be lodged with the provincial or Dominion governments and contain facts regarding the condition of the industry. These would be placed before the promoters for their information. In spite of any appeal, however, the board would have no right to interfere with the process of company formation, so long as the promoters were prepared to take the risks. If additional factories were required it would have the right to encourage the formation of new companies or the extension of existing factories.

"Other duties in regard to free inter-communication and harmonious efforts between the boards of different industries to facilitate the flow of products from all industries would naturally follow.

"I have gone into details more fully than was perhaps necessary to explain the functions of the board for securing trade without unfair competition, but I am sure I haven't, by any means, exhausted the uses of such boards in developing industry without all the hurtful influences which accompany fierce competition for trade, particularly when dull times come.

"I will now describe briefly the constitution and functions of the national trade board.

National Trade Boards.

"The constitution and functions of these boards would be similar to the district trade boards, excepting that they would be responsible for foreign trade only.

"1. The board would be a properly incorporated body composed of representatives of manufacturers, together with representatives of the buyers, just as in the case of the district boards. These would be elected by the votes of the various district boards in the same industry. Each district board would have the right to have a representative on the national board, not necessarily one of the members of the executive of the district board. The chairman would be nominated from the manufacturers and the vice-chairman from the buyers by the national board, and if government approved of their selection their services would be secured by the government for the period covered by the term of office for which they were elected.

"2. The functions of each national trade board would be as follows:—

"(a) To tabulate the markets of the world for the nation's surplus production in the industry it represented.

"(b) To tabulate the world's capacity to produce the articles made by manufacturers in the country represented by the board.

"(c) To secure through the industrial consular and diplomatic foreign services, outlets for the nation's surplus productive capacity. For instance, instead of trade commissioners' reports which are now published in journals by the department of trade and commerce, being searched by each manufacturer so that enquiries for work may be noted and tenders prepared and sent to the foreign government or buyers, by each individual manufacturer, such reports would be passed immediately by the department of trade and commerce to the national trade board, who would handle the matter for all the manufacturers.

"(d) To undertake the distribution of orders and payments for products through the district boards. All transportation of export goods to be undertaken by the national boards.

"(e) To promote international negotiation with all industrial countries who carry on an export trade, with the object of securing trade for each other without unrestricted competition, by the establishment of international boards.

"3. The national board to have full authority to requisition any information from the manufacturers of the industry represented, in regard to methods and costs of manufacture, wages and hours of labor, conditions of labor and other matters affecting production."

Colonel Carnegie's remarks on the second problem—namely, how to maintain efficient production with competitive co-operation, will be printed in *The Monetary Times* next week.,

How Germany Has Financed the War

All Paper Money Required Has Been Raised, Regardless of Inflation —Arrangements for Rectifying Finances Left Until After the War —Sir Edward H. Holden, Chairman of the London City and Midland Bank, Gives Details of the Methods by Which the Teutons Have Expanded Currency to Meet the Increasing Demands

WHAT is the financial position of Germany as the country enters on the second half of the fourth year of the world war? Whence come the funds for the war loans which have followed one another at half-yearly intervals, in March and September, ever since the fall of 1914? How, with little and decreasing assistance from outside, has the nation financed itself through the period that saw the Allies turn to the United States for replenishment of their money bags? And what is to be Germany's position when the war ends: Will the country be solvent or bankrupt?

Sir Edward H. Holden, chairman of the London City and Midland Bank, Limited, of England, has answered some of these questions in his report for the last year to the shareholders of his bank. From a comparison of the balance sheets of the Reichsbank for July 23, 1914, just before the start of war, and for December 31, 1917, Sir Edward shows that the ratio of gold held by the bank to notes issued fell in three years and a half from 71.7 per cent. to 20.9 per cent.; the ratio of gold to liabilities (notes issued and credit accounts) from 47.8 per cent. to 12.3 per cent.; the ratio of cash balance to notes from 95 per cent. to 34 per cent., and the ratio of cash balance to liabilities from 63.4 per cent. to 20 per cent.

Only by the device of creating banks privileged to make loans by issuing notes which the Reichsbank was empowered to include in its cash balance was this last item of relation of cash balance to liabilities kept from a worse showing. Without the addition of these so-called Darlehnskassen notes the ratio for December would have fallen to 13.3 per cent. The device was one of Germany's first provisions to adjust her banking facilities to the demands of the war and Sir Edward discusses this, and other preparations in detail. After stating that before the war began Germany had thoroughly prepared the financial lines on which to proceed, he continues:—

"Two decisions appear to have been reached: First—To raise all the paper money she required, regardless of inflation, through the Reichsbank, *i.e.*, the National Bank of Germany, and, in case this proved insufficient, through the loan banks. Second—To leave all arrangements for rectifying her finances until after the war. Let us see how she has manufactured her paper money through the Reichsbank, and in explaining this I repeat two principles which I laid down last year—(1) Every bank is a manufactory of credit, and (2) when a bank makes a loan or discounts bills it creates a credit account or issues notes. You will find the loan or bill on the asset side of the balance sheet and the credit account or notes issued on the liability side. Loans are made by the Reichsbank by discounting bills and to a small extent in other ways, but it is only against bills discounted and the cash balance as cover that notes can be issued, and, further, the amount of the notes issued must never exceed three times the cash balance. Thus, the law, by making these conditions, controls the issue of notes, but there is no legal control over the creation of credit balances, which may be increased to any extent.

"When the war broke out, the German banking law was that the cash balance of the Reichsbank must be equal to at least one-third of the notes issued and that the bank must hold bills of exchange equal to the remaining two-thirds; these bills of exchange were to fall due within three months and to bear three names, except in special cases, when only two names were required. The ordinary government treasury bill was not a bill of exchange within the meaning of the law, and was not regarded as 'bank cover' for notes issued. It was anticipated by the government that, as the war progressed, the inland bills would be diminished by reason of transactions being settled in cash, and the foreign bills would also be diminished by reason of the imports and exports being curtailed. The government also recognized that they would be compelled to obtain large supplies of notes from the Reichsbank, and that it would be necessary to provide large amounts of bills of exchange as 'bank cover' for these notes. They, therefore, obtained authority by a law of August 4, 1914, to raise the necessary funds by issuing bills of exchange of the empire or treasury bills, and it was further provided that these treasury bills bearing the signatures of two members of the National Debt Office should be regarded as bills of exchange within the meaning of Section 17 of the Act of 1875, provided they matured within three months; that is to say, after being discounted at the Reichsbank they were to be regarded as 'bank cover' for Reichsbank notes. We thus see how they overcame their first great difficulty of providing 'bank cover' for an increased note issue, because as the treasury bills discounted increased, so the power to issue the banknotes increased.

"Their second difficulty was the cash balance itself. They could not continue to issue notes unless they continued to increase the cash balance. This cash balance consisted of gold, silver, imperial treasury notes, and notes of other banks. They afterward adopted every measure possible to increase the gold, yet they could not obtain sufficient to continue issuing increasing amounts of notes. On August 4, 1914, they had passed a law establishing banks with power to make loans by issuing notes, technically named Darlehnskassenscheine. The Reichsbank was empowered to include these notes in its cash balance and to treat them in all respects as gold; that is, for every Darlehnskassen note held in the cash balance of the Reichsbank they could issue three Reichsbank notes. They thus got over the second difficulty of the cash balance.''

Sir Edward includes in his report the balance sheets of the Reichsbank for July 23, 1914, and December 31 last (printed elsewhere in this article) and asserts:—

"On comparing these balance sheets we see that, though they raised their gold from £67,845,000 in July, 1914, to £120,329,000 in December, 1917, they were still deficient in gold to the extent of £65,000,000, and that the Darlehnskassen notes were placed in the cash balance to that extent to act as gold. Further, we see that their loans have increased from £66,620,000 to £839,089,000, an increase of £772,469,000, which means that the credits and notes created by the loans have increased to a corresponding extent. These increased credits have been created largely by the bills of exchange or treasury bills. Our view, from this point, of the working of the Reichsbank is very interesting. The government comes down to the bank with a parcel of treasury bills, which are really undertakings that, if the bank will place to its credit the amount specified on each bill, less the discount, it will within three months repay the bills, though, of course, it may repay this parcel of. bills by borrowing on other parcels. The bank then issues its own notes in payment of the credit balances created, by the discount of these bills, and the notes are used to pay for commitments of the State. , These notes go out into the hands of the public, and, to a large extent, find themselves on deposit with the joint-stock banks, where they form the base for the extension of further credits by the joint-stock banks. Hence, the deposits of the banking institutions in Germany have increased to a very large extent, and it is estimated that the total increase since the beginning of the war amounts to the equivalent of about £1,000,000,000. We see the same thing happening in this country, in America, and in other countries.

"The following statement shows at the end of each month, from the commencement of the war to the present time: 1, the bills discounted; 2, the liabilities, consisting of notes and credit accounts; 3, the total cash balance; 4, the ratio of the cash balance to the liabilities, and 5, the ratio of the gold held to the notes:—

1914	Bills Discounted. £ Mills	Liabilities. £ Mills.	Total Cash £ Mills.	Ratio of Cash Balance to Liabil. P. C.	Ratio of Gold to Notes. P. C.

The percentages are calculated on the exact figures.

"To understand thoroughly the fluctuations in these figures, it is necessary that I should give some explanations, which I now furnish under headings:—

Bills Discounted and Liabilities.

"We must note in the first place that the German war loans have been issued at the end of every six months, the first being in September, 1914, and the others in each subsequent March and September. About three months before a loan is put out the government announces the date of the issue of the loan, and makes arrangements with joint-stock banks to allow 4½ per cent. on all deposits which are ear-marked for the loan, and in addition arrangements are made with the Reichsbank for the sale of special war loan treasury bills, which carry a preferential rate of discount on the condition that the proceeds are used to take up war loans. These special bills mature on the day when subscriptions for the loan may be paid in full, and the bills are then automatically converted into war loan. They must not be confused with the ordinary government treasury bill, which we have been discussing, and are not included in the Reichsbank statement under bills discounted. The fluctuations in this item at the end of March and September are caused by the ordinary treasury bill. As the date approached when payments on war loan might be made in full, bankers and others, who had to make provision for their own or their clients' applications, rediscounted their bills at the Reichsbank, thus increasing the bills discounted. We also note, at the same time, that the liabilities increase. This is caused by the proceeds of the bills being paid to the credit of the government on account of the war loan. Hence, we observe large increases in the bills discounted and in the liabilities at the end of every March and September, which we have indicated with an asterisk (*).

"I have pointed out already that the German law only takes cognizance of the ratio of the cash balance to the notes issued, but the real position of a bank is gauged by the ratio of the cash balance to the liabilities, consisting of the notes issued and the credit balances. In the case of the newly constituted Federal Reserve Banks of the United States, the legal ratio of gold to notes is 40 per cent., and the legal ratio of gold or lawful money to deposit liabilities is 35 per cent. On reviewing the ratio of the cash balance of liabilities of the Reichsbank, the lowest in 1914 was 27.2, in 1915, 30.6, in 1916, 21.3, and in 1917, 17.2, but we must remember that the cash balance has been assisted by the addition of large amounts of Darlehnskassen notes. For example, the balance sheet for December 31, 1917, includes £65,000,000 of these notes. Had these notes not been added to the cash balance, the ratio would have fallen to 13.3 per cent.

Darlehnskassen or Loan Banks.

"In addition to the notes issued by the Reichsbank we must further consider those issued by the above banks. This system is a resuscitation of a similar system which was established in 1848, and which existed during the war of 1870. The loan banks were designed for the purpose of making loans such as ought not to be made by the ordinary joint-stock or private banks, because they come under the class of 'dead loans.' They make their loans to individuals, firms, and municipalities, and the loans are made by the issue of government notes to the extent of from 40 to 85 per cent. of the value of the security offered. The real reason why these banks were established appears to have been to lighten the loans of the Reichsbank and of the joint-stock banks, thus preventing the latter from being locked up. As we have seen, the Reichsbank has been working at full stretch for the government, and could not itself make these advances and issue notes against them, because notes could only be issued by the Reichsbank against a cover of cash and bills, drawn for three months and bearing two or three names.

"Last year, with regard to our own country, we pointed out that when depositors of banks take up war loan, new credits are not created, but that when loans are made to take up war loan or when banks themselves take up war loan, new credits are created. The same principle, of course, applies in Germany, and the creation of all these notes by loans has created new deposits; consequently, the credit accounts of the joint-stock banks show large increments just as the English banks show them.

"The war loans of Germany have been as follow:—

1.	In September, 1914	£224,000,000
2.	In March, 1915	455,000,000
3.	In September, 1915	608,000,000
4.	In March, 1916	538,000,000
5.	In September, 1916	535,000,000
6.	In March, 1917	656,000,000
7.	In September, 1917	631,000,000
	Total	£3,647,000,000

"The amount of the floating debt, consisting for the most part of treasury bills, at the present time may be estimated at about £1,450,000,000, so that the total borrowings of Germany since the outbreak of war appear to be about £5,100,000,000, against total cash borrowings in the case of this country of about £4,900,000,000.

"Dr. Havenstein, the president of the Reichsbank, has recently made a speech from which it appears that the loan banks will be continued for four or five years after the war, and that they will be available for any sort of lending. They will make the terms easy for those who have borrowed from them for the purpose of taking up war loan; but even the extended lendings of those banks will not be sufficient to meet the conditions which are expected to arise after the war. When peace comes the holders of war loan will find themselves compelled to convert their holdings into hard cash for the purpose of investing in raw materials, new machinery, and new factories, the result of which will be to throw millions of pounds worth of war loan on the market."

GRAIN SITUATION IN WESTERN CANADA

The following is a report of the grain situation in Manitoba, Saskatchewan and Alberta, issued by the North-West Grain Dealers' Association on March 7th:—

	Bushels.	Feb. 14, 1917. Bushels.
Wheat inspected to March 7th....	128,426,000	112,500,000
Wheat in transit, not inspected..	2,300,000	2,000,000

" in farmers' hands to market	600,000	1,500.000
Rye inspected to March 7th......	480,000	

MEETING OF LAND MORTGAGE COMPANIES' ASSOCIATION

The annual meeting of the Land Mortgage Companies' Association of Ontario was held in Toronto last week. This association is composed of twenty-four of the leading companies established for the purpose of lending money on the security of real estate, some of which have been in existence for considerably more than half a century. The principal feature of the meeting was the reception and adoption of the annual report of the executive committee containing a relation of the various questions of interest to companies of this nature which had engaged the attention of the committee during the year. The address of the president, Mr. R. S. Hudson, contained an interesting reference to the recent failure of a loan company which had always had an unsavory reputation, and through mismanagement had finally come to grief. Gratification was expressed that it had never been permitted to become a member of the association, and Mr. Hudson pointed out the lesson which younger managers and companies should learn, that the only safe policy is a strict adherence both to the letter and spirit of the law and, in these times of uncertainty, to keep strong in cash resources.

The officers and executive committee were unanimously re-elected, namely:—R. S. Hudson, Toronto, president; C. W. Cartwright, Hamilton, first vice-president; Edward Saunders, Toronto, second vice-president; George H. Smith, Toronto, secretary-treasurer; and Messrs. V. B. Wadsworth, Walter Gillespie, and G. A. Morrow, Toronto; J. W. Stewart, St. Thomas; A. M. Smart and Hume Cronyn, London; E. F. Dwyer, St. Catharines; J. E. McElderry, Guelph; and J. H. Kittermaster, Sarnia. The latter filled the place vacated by the death of the late Mr. J. H. Helm, of Port Hope.

Bank of Montreal to Absorb Bank of British North America

Minister of Finance Has Approved Proposal — Merger Will Give Bank of Montreal a Total of $470,000,000 of Assets.

As *The Monetary Times* goes to press, it is announced that the minister of finance has approved a proposal for the purchase of the Bank of British North America by the Bank of Montreal. The final completion of the transaction apparently rests with the shareholders of the Bank of British North America, and it is understood that a special meeting of the shareholders will be called in London shortly. Four weeks will then elapse in due course before the decision as to the merits of the proposal could be made. The fact that negotiations are so far advanced that the consent of the finance minister has been obtained makes it evident, however, that there is every reason to expect that the shareholders of the Bank of British North America will give their assent to a proposal which has the approval of their directors.

Ottawa despatches state that in so far as the finance department is concerned, approval would seem to have been given on the ground that the transaction would be equitable to the shareholders of both institutions and in the best interests of the public. It may be further noted in connection with the department's probable attitude that an anomaly exists in the present position of the Bank of British North America as an institution operating in the Dominion under a British charter, with its board of directors sitting in London. If the absorption by the Bank of Montreal goes through, the remaining nineteen institutions—assuming the final ratification of the Royal-Northern Crown transaction—making up the chartered bank system of Canada would all be operating under the provisions of the Canadian Bank Act. There would be a uniform system, instead of one with an exception.

While official information is lacking, it is believed that the terms of the proposed purchase would provide for payment to British Bank of North America shareholders partly in cash and partly in stock of the Bank of Montreal.

GENERAL MANAGERS OF MERGED BANKS

Both Have Served Many Years in the Banking Profession and Are Capable Business Men

Sir Frederick Williams-Taylor, LL.D., the general manager of the Bank of Montreal, which proposes to take over the Bank of British North America, is one of the foremost bankers of the continent. He has been in the banking business during practically the whole of his business life, and prior to assuming his present responsible position, was manager of the London branch of the Bank of Montreal. While in London, he was the winner of the Society of Arts gold medal for a paper on the Canadian banking system, a paper which attracted widespread attention. Sir Frederick is a very capable and enterprising banker and a public spirited citizen, doing at present a great deal of patriotic work.

Sir Frederick Williams-Taylor, LL.D.

Mr. Hugh Blair Mackenzie, the general manager of the Bank of British North America, was born at Ingersoll, Ont., on December 14th, 1867. He is the son of Venerable Archdeacon G. C. Mackenzie, D.C.L., Rector of Grace Church, Brantford, Ontario, and Helen (Boomer) Mackenzie. After his education, at the public school, Kincardine, Ontario; the Collegiate Institute, Brantford, Ontario; and Trinity College School, Port Hope, Ontario, he entered the service of the Canadian Bank of Commerce at Brantford in 1884, where he remained until 1887. He then went to the Bank of British North America at Brantford, St. John and Montreal, serving there from 1887-1892. He became secretary to the general manager in 1893, and accountant at London, Ontario, in 1894, assistant inspector in 1895, chief inspector in 1903, manager of the Victoria branch in 1905, superintendent of central branches at Winnipeg in 1907, superintendent of branches at Montreal in 1909, and has been general manager of the bank since 1912. Like many other of the general managers of our banks, he has therefore given long service in the profession, rising from a junior position step by step to the general managership. Mr. Mackenzie is recognized as a cautious and able banker.

INFORMATION AND THE TARIFF

In their representations to the government last week the delegation of manufacturers asserted that various changes and restrictions imposed on industry had brought about considerable alarm among manufacturers, especially since it had been stated that what had already been done was nothing in comparison with what was in prospect. They asked the government to consider these matters "from a national rather than a sectional standpoint." Figures and facts were submitted to show the interest which Canada has in manufacturing industries and that had it not been for these industries Canada would have been practically bankrupt during the war. The delegation urged that unless industries were preserved in economic strength in the meantime they would not be able to take care of their enlisted employees with whom they had contracted obligations, on their return to civil life. This would mean, they urged, a large number of unemployed when peace was declared.

A particular point raised by the delegation was that of opposition to farm tractors being placed on the free list, unless at the same time raw materials used in the manufacture of tractors in Canada were admitted duty free. The manufacturers also asked that in case of any further suggested changes in the tariff, industries affected should first be consulted. That is a reasonable suggestion, and while more than the manufacturers' views are necessary, it is the keynote to the reform needed in our tariff making. Frequently we do not have sufficient data upon which to base our policies. As pointed out in these columns previously, we will never have a tariff, for example, which will be fair to the manufacturer, to the farmer, to the general consumer, to the countries to which we extend preferences, and so on, until we have a complete analysis of our national position in industry, agriculture, finance, marketing, etc., made by experts, for the benefit of our legislators. It will be a large task to obtain that information but in the meantime we are legislating with the help, comparatively speaking, of scraps of information gathered here and there, with little effort to discover the relation of one scrap to the other. As important measures appear to become necessary because of war conditions the necessity for intelligent consideration of national problems, based on adequate facts and figures, will become sharply defined.

RAILROAD RATES

The increase of 15 per cent. in railway rates authorized by the Railway Commission has been approved by the Governor-in-Council, and became operative from March 15th until one year after the end of the war. There was no other decision, consistent with the facts, open to the government. While the cost of all factors of railroad operation has rapidly increased, the companies were not allowed to charge any more for the commodity, transportation, they sell. The result has been clearly reflected in earnings in which the government is now vitally interested.

The Canadian Pacific Railway with the other roads, will charge the increased rates but it has to contribute to the public revenue one-half of its net earnings from railway operation in excess of 7 per cent. on its common stock. This is the present rate of dividend paid from this source. Upon the revenue derived other than from railway operations, such as lands, steamships, hotels, and telegraphs, the company must pay income tax, which under the legislation of last session of Parliament amounts to 25 per cent. on incomes over $100,000. The wording of the provisions of the order-in-council apparently means that the payment to be made by the company to the public revenue shall be up to $7,000,000 annually, and a larger sum if the increase in net earnings from the 15 per cent. higher transportation rates exceeds net earnings in 1917 by more than $7,000,000. Thus, whatever additional revenue the Canadian Pacific Railway derives from the new tariff of rates will accrue to the government. The special taxes imposed are obviously aimed at this company, which is tantamount to an admission that in the case of the other railways, such as the Canadian Northern, the Grand Trunk and the Grand Trunk Pacific, the higher rates will not produce net earnings in excess of charges on capital. The Canadian Pacific is actually to be penalized for its prosperity, built chiefly on efficiency and good management. A Montreal dispatch quotes a high official of the company to the effect that the corporation does not regard the new law as confiscatory. The dispatch concluded: "The Canadian Pacific Railway is not complaining." That has always been the spirit of this well-managed Canadian enterprise which has helped in innumerable ways and continues to do so to perfect the war organization of Canada and the British Empire.

Our railroad problem is not yet solved but the exigencies of war have brought a temporary measure. The outstanding features are the willing diversion of a large part of the company's profits to the conduct of the war, the maintenance of the company's and Canadian credit generally by the allowance of 10 per cent. dividends to the shareholders, and the recognition of the inadvisability of the nationalization of the Canadian Pacific Railway.

POST-BELLUM TRADE AND INDUSTRY

Discussing in a clear and able paper last summer, the industrial situation and outlook, Mr. G. Frank Beer, of Toronto, pointed out that Canadian factories were for the most part like young robins with open mouths into which the Munitions Board dropped orders averaging $1,000,000 a day. How can we prepare for the time when these activities cease? That question remains unanswered. There may be unforeseen factors, favorable and adverse, which will affect the situation after the war, but no good reason exists for postponing intelligent preparation for these post-bellum problems. Mr. Beer recalled that an organization of each separate American industry for export trade is the object of a trade commission now sitting permanently at Washington. "The form which such an organization should take," he said, "to meet Canadian requirements can not be decided upon without a most careful and thorough enquiry, and such an enquiry should be engaged in at once by the federal labor department, the department of trade and commerce, or other government authority in co-operation with a carefully selected committee of industrial leaders and labor representatives." He also referred to the important functions which a competent board of industry might exercise in connection with national production, adding: "Service of equal value should be provided for in connection with the problems of marketing. An effort has been made to show that only by the consideration of production and marketing, as constituting one problem, can the problems of each be adequately dealt with. The experience of the past two years has demonstrated the desirability, and indeed the necessity, of enlisting the services of successful and practical business men to control and administer work of this nature. A nucleus for the board of industry proposed lies within the personnel of the present Imperial Munitions Board. To a board of this character might with safety be assigned the task of co-ordinating and strengthening the work of all government departments now having to do with export trade."

Col. Carnegie, a member and ordnance advisor of the Imperial Munitions Board, apparently having read Mr. Beer's exposition of the subject, has now advanced a detailed scheme to solve two problems, namely, how to secure remunerative trade without unrestricted competition and how to maintain efficient production with competitive co-operation. His discussion of the first problem was printed in *The Monetary Times* last week and of the second, this week. His plan to combine the activities of our manufacturers would undoubtedly be opposed both by our industrial captains and by the public. It would probably discourage initiative and investment of capital, and what is most dangerous, it would tend to create large monopolies. Col. Carnegie's ideas with regard to organization for export trade are far more practical and should receive the consideration of the government and manufacturers. His plan, as a whole, however, looks impracticable, even in these days when we are bound to recognize the necessity of drastic changes in our conduct of affairs. That fact, however, does not remove the necessity for consideration of these important problems, and Col. Carnegie is to be commended for his investigation of them. As Mr. Beer has said, "whether by these or other means, the duty of the government of Canada clearly is to take the initiative, to call to their counsel representatives of the interests involved, and to plan now with definiteness and in detail for the period of readjustment and reconstruction of industry which inevitably must come soon. Preparedness for such a time is not the work of days or weeks, but will be the arduous and concentrated task of many months if it is to prove in any degree adequate. It is not the part of wise statesmanship, nor yet of shrewd business foresight, to trust to haphazard solutions for problems of such importance, or to plead the pressure of other problems as an excuse for inaction. The whole teaching of the war is to this end."

MANUFACTURERS FORM DEPUTATION

About thirty-five of the leading manufacturers of Eastern Canada and as far west as Winnipeg formed a deputation which waited on the government on March 14th. S. R. Parsons, Toronto, president of the Canadian Manufacturers' Association, was the chief spokesman. He was followed by R. Harmer, Hamilton; Stanley McLean, Toronto; T. R. Deacon, Winnipeg; J. N. Shenstone, Toronto; J. H. Sherrard, Montreal, and G. M. Murray, secretary to the Canadian Manufacturers' Association.

In their representations to the government the delegation asserted that various changes and restrictions imposed on industry had brought about considerable alarm among manufacturers, especially since it had been stated that what had already been done was nothing in comparison with what was in prospect.

They ask the government to consider these matters "from a national rather than a sectional standpoint." Figures and facts were submitted to show the interest which Canada has in manufacturing industries, and that had it not been for these industries Canada would have been practically bankrupt during the war. The delegation urged that unless industries were preserved in economic strength in the meantime they would not be able to take care of their enlisted employees, with whom they had contracted obligations, on their return to civil life. This would mean, they urged, a large number of unemployed when peace was declared.

Mr. John W. Ross has been appointed to the board of directors of the Sun Life Assurance Company. Mr. Ross is a member of the firm of P. S. Ross & Sons, chartered accountants, of Montreal, and takes the place of K. Hale, of Philadelphia.

HOW THE BANKS COMPARE

Bank of Montreal and Bank of British North America Accounts as Shown in January Statement

The following figures, taken from the January statement of the Canadian banks to the Department of Finance, compare the principal accounts of the Bank of Montreal and the Bank of British North America:—

ASSETS.

	Bank of Montreal.	Bank of British North America.
Current in Canada and elsewhere.	$ 20,668,406	$ 1,271,821
Dominion notes	57,253,492	7,052,850
Note circulation	790,000	245,822

Mr. H. B. Shaw, general manager of the Union Bank of Canada, who has been in Vancouver for several days, announced recently that Mr. J. G. Geddes, local manager for the bank, would assume the joint management of the London, England, office of the institution. He will remain in Vancouver for several months, acting in an advisory capacity as to the general conduct of the bank's British Columbia business. The successor of Mr. Geddes as manager of the Vancouver branch will be Mr. G. T. Bishop.

BRANCHES OF THE TWO BANKS

No Alteration of Relations Between Absorbed Bank and Its Customers

In the event of the purchase of the Bank of British North America by the Bank of Montreal it is understood that no changes in the management of the bank or its branches throughout the country are contemplated at present, but the Bank of British North America will continue its separate existence as heretofore as branches of the Bank of Montreal, this arrangement to be for an indefinite period. There would, therefore, be no alteration in the present relations existing between the bank and its depositors and customers.

Twenty-Nine Competing Points.

There are 29 towns and cities in which the Bank of Montreal and the Bank of British North America have had competing branches. They are as follows: Toronto, Ont.; Montreal, Que.; Winnipeg, Man.; Vancouver, B.C.; Quebec, Que.; St. John, N.B.; Halifax, N.S.; Fredericton, N.B.; Hamilton, Ont.; London, Ont.; Ottawa, Ont.; Calgary, Alta.; Edmonton, Alta.; Regina, Sask.; Saskatoon, Sask.; North Battleford, Sask.; Yorkton, Sask.; Brandon, Man.; Victoria, B.C.; Prince Rupert, B.C.; Rossland, B.C.; Trail, B.C.; North Vancouver, B.C.; Brantford, Ont.; Fenelon Falls, Ont.; Kingston, Ont.; St, Catharines, Ont.; London, England; and New York, N.Y.

Advantages to Bank.

Several advantages from the standpoint of the Bank of British North America suggest themselves. Important business between the bank and its customers, as matters stand now, naturally has to go to London for consideration by the board of directors, a procedure involving delays and other handicaps which would be removed with the control of the bank's affairs vested in the Bank of Montreal. Both depositors and customers of the bank, too, would benefit to an important extent by the fact that their affairs were being merged in the affairs of a bank of such large resources and commanding strength as the Bank of Montreal.

Situation of Branches.

The following table, compiled by *The Monetary Times*, shows the number of branches which the two banks had at the end of 1917 in the various provinces and abroad:—

	Bank of Montreal.	Bank of British North America.
Ontario	60	21
Quebec	37	7
Nova Scotia	13	1
New Brunswick	10	5
Prince Edward Island	1	..
British Columbia	26	16

Costa Rica	..	..
Venezuela	..	..
Totals	182	91

Mr. William Wilfred Tolley, deputy auditor of the city of Toronto, was appointed on March 18th by the Ottawa city council auditor at a salary of $5,000 a year. For the past four years Mr. Tolley has been in the employ of the city of Toronto. Prior to that he was a chartered accountant with a British firm in New York City. He occupied this position for 2¼ years after leaving his home in England. It will be at least a month before he will be able to leave the local department. He is a conscientious and capable officer, and his services will be greatly missed in Toronto.

The Bank of British North America

Incorporated by Royal Charter.

The Court of Directors hereby give notice that a dividend of Forty Shillings per share, less Income Tax, will be paid on the 5th April next to the Proprietors of shares registered in the Dominion of Canada, being at the rate of 8% per annum for the year ended 30th November last.

The dividend will be paid at the legal par of exchange on the 5th day of April next.

No transfers can be made between the 22nd inst. inclusive and the 4th prox. inclusive, as the books must be closed during that period.

JACKSON DODDS,
Secretary.

No. 5 Gracechurch Street,
London, E.C.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Brazilian Traction, Light and Power Company.—The January statement of the company shows a fairly substantial gain in gross revenue more than offset by a heavy increase in operating costs. The statement (in milreis) follows. Gross earnings, 7,837,000 milreis, increase 571,000 milreis; operating expenses, 4,141,000 milreis, increase, 877,000 milreis; net earnings, 3,699,000 milreis, decrease, 306,000 milreis.

Western Power Company of Canada.—The annual report of the company for the 12 months ended December 31 shows a decided improvement over 1916, net operating revenues showing an increase of 23.35 per cent. Operating revenues and expenses were: Operating revenue, $450,100; operating expenses, $130,559; ordinary operating expenses, $113,246; taxes, $17,312; net operating revenue, $319,601; non-operating revenue, $12,192; gross, $331,793.

Nipissing Mines Company, Limited.—The directors declared a regular 5 per cent. quarterly dividend on March 18, payable April 20 to shareholders of record March 30. The books close March 30, to reopen April 18. The financial statement of operating the company as of March 16 shows cash in bank, including Canadian and United States war bonds, $1,645,564.67; ore and bullion on hand at mine, $1,127,432.82; bullion in transit, $45,563.35.

Civic Investment and Industrial Company.—Although the effect of higher costs is quite evident in the company's expense account, the buoyancy of the company's gross business continues to make its net earning position an exception to the declining tendency of public utility enterprises. Civic's gross for February, $900,358, compared with $775,501 a year ago; expenses were $425,956, against $320,362; charges, $82,738, against $80,021, leaving a net surplus for the month of $391,613, against $375,112 a year ago. The ten months' surplus over all charges amounts to $3,801,712, equivalent to earnings at the rate of slightly better than 7 per cent. on the company's capital stock.

Consumers Gas Company.—The directors of the company, have, on March 18, adopted the suggestion of Mayor Church, Toronto, that the city auditor make a special audit of the books of the company to ascertain whether or not the 10 per cent. increase in the price of gas, which goes into effect on April 5, is justified. According to a statement by Mr. Arthur Hewitt, general manager of the company, the increase is due to the higher cost of coal, oil and labor. The expenditures of the company on these three items have advanced nearly $1,000,000 above the amounts spent in 1915. Mr. Hewitt said the directors welcomed enquiry and publicity, the increase was absolutely unavoidable and was far below the increases already made by other Ontario cities and towns.

Dominion Foundries and Steel Company, Limited.—Although no financial statement was issued after the annual meeting of the company held recently at Toronto, the company reported gross profits of $1,902,304 for 1917, net profits of $942,653, after depreciation, etc., carried forward a net surplus of $632,376. As the company has $3,000,000 common stock, on which it distributes an 8 per cent. dividend, earnings on the common stock were at the rate of about 29 per cent. The balance sheet showed current assets of about $2,400,000, made up principally of $1,188,000 in accounts and bills receivable, $446,596 cash, $629,864 inventories of raw material, and $157,000 investments, the last-named item including the company's initial deposit on a $400,000 Victory Loan subscription. On the liability side, current obligations foot up about $1,100,000, chiefly $589,511 accounts payable, $112,055 accrued wages, and $409,940 business profits tax for 1916-17.

Canadian Cottons, Limited.—A successful year for the company for the fiscal period which ends March 31 is indicated by the decision of the directors to-day to increase the dividend from 4 to 6 per cent. The common stock was placed on a dividend basis in June, 1916, as the result of the improved conditions in the cotton trade which developed soon after the war. The first quarterly distribution of 1½ per cent. and the usual 1½ per cent. on the preferred are payable April 4 to stockholders of record March 26. The increase revived interest in the stock, which sold up to 57 soon after the dividend announcement was made to the stock exchange on March 19. The stock has been quiet for some days past, the last board lot transactions being on March 12 at 49⅛, with a high price for the year to date of 50. Prior to the inauguration of dividends in 1916, the stock sold up from 36 to 52, but later on in the year, when there was an active and strong market, it touched a high level of 70. It afterwards weakened below 50, but has not gone far from that level.

Winnipeg Electric Railway Company.—The annual meeting of the shareholders of the company was held on March 18th in the board room of the company's offices. Sir William Mackenzie presided. The president's report and the annual statement were presented to the meeting and adopted. The board of directors was re-elected as follows: Sir William Mackenzie, Sir Donald Mann, Sir Augustus Nanton, R. J. Mackenzie, D. B. Hanna, G. V. Hastings, Hugh Sutherland, F. Morton Morse and J. D. McArthur. Sir William Mackenzie was re-elected president and Sir Augustus Nanton, vice-president.

The company's net surplus amounted to only $92,579, or slightly more than 1 per cent., on the $9,000,000 capital stock, which paid 12 per cent. dividends a few years ago. Gross earnings from operations showed a slight increase as compared with 1916, the gain amounting to $27,840. Miscellaneous income was also slightly higher. Increased costs, however, absorbed all the gain and something more, the gross corporate income available to meet fixed charges standing $154,764 lower than in 1916, a decrease of about 11 per cent. In the charges the city's share of earnings, etc., showed but slight variations from the previous year. There is deducted from 1917 earnings, however, a sum of $201,050 for depreciation, which has no corresponding item in recent statements. This deduction and the decrease of $154,764 in gross income, already referred to, account almost exactly for the difference between the final surplus of 1917, which was $92,579, and that for 1916, which was $445,251.

The 1917 form of statement makes the net income transferred to surplus $152,579, while the year's sinking fund requirements of $60,000 made a subsequent charge against total surplus. However, as the sinking fund deduction is properly chargeable to the year's income, it has been included in the following table in the list of general deductions:—

	1917.	1916.
Gross earnings	$3,339,009	$3,311,169
Operating expenses	2,143,512	1,939,041
Net operating revenue	$1,195,497	$1,372,128
Miscellaneous income	47,877	26.010
Gross income	$1,243,374	$1,398,138
Less:—		
Interest	649,050	643,991
City's percentage	105,777	110,227
Discount on securities	11,797	22,929
Taxes	103,286	91,569
Miscellaneous non-operating expenses	5,985	17.503
Other deductions	13,846	6,665
Sinking fund	60,000	60,000
Depreciation	201,050	......
Total deductions	$1,150,795	$ 952,887
Net income for year	92,579	445,251
Previous balance after adjustments	1,125,526	682,824
Total surplus	$1,218,106	$1,128,075

HOW LEADING BANKS COMPARE

Bank of Montreal, by Merger, is Placed Well in Front—Figures of Three Leading Banks

Taking the figures of the January bank statement, the proposed amalgamation of the Bank of Montreal and the Bank of British North America would give the Bank of Montreal assets of nearly $470,000,000 and place it well ahead in this respect of the Canadian Bank of Commerce and the Royal Bank.

Merged Banks' Figures.

The principal items of the Bank of Montreal statement will appear as follows if the merger is effected:—

(Three last figures omitted.)

	Montreal.	British N. America.	(Amal.)
Capital authorized	$ 25,000	$ 4,866	$ 29,866
Capital paid up	16,000	4,866	20,866
Reserve fund	16,000	3,017	19,017
Demand deposits	108,250	15,881	124,131
Notice deposits	143,559	29,743	173,302
Current coin	20,668	1,271	21,939
Dominion notes	57,253	7,052	64,305

Total assets	392,625	75,418	468,043

Three Leading Banks.

The figures of the amalgamated Bank of Montreal and Bank of British North America, from now on, will compare with those of the other two leading institutions, as follows:—

(Three last figures omitted.)

	Montreal.	Commerce.	Royal.
Capital authorized	$123,123	$123,123	$123,123
Capital paid up	20,866	15,000	14,340
Reserve fund	19,017	13,500	14,715
Demand deposits	124,131	95,324	80,090
Notice deposits	173,302	118,198	119,955
Current coin	21,939	19,045	15,203
Dominion notes	64,305	20,099	19,737
Canadian government securities	14,599	17,037	22,539
Municipal and foreign securities	49,134	25,195	25,684
Railway and other bonds	12,629	6,108	13,995
Call loans, Canada	2,694	14,767	12,135
Call loans, outside	82,450	19,314	8,574
Current loans	126,747	139,767	104,480
Total liabilities	422,363	303,022	317,614
Total assets	468,043	333,531	348,396

MONEY MARKETS

Messrs. Glazebrook & Cronyn, exchange and bond brokers, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.
N.Y. funds	1 17-32	1 19-32	
Mont. funds	Par	Par	⅛ to ¼
Sterling—			
Demand	4.8255	4.8280	4.85
Cable trans.	4.8375	4.84	4.86

Rate in New York for sterling demand, $4.7530.
Bank of England rate, 5 per cent.

Mr. W. M. Ramsay, manager of the New York agency of the Merchants Bank of Canada, has been elected a director of the Pan-American Debenture Corporation.

NINETEEN CHARTERED BANKS NOW

Thirty Years Ago, There Were 41 and Nine Years Ago, 29—Amalgamations Advantageous to Shareholders

Only three bank mergers have occurred in Canada since the war commenced. One was the absorption of the Quebec Bank by the Royal; the second was the purchase of the Northern Crown Bank by the Royal; and the third was announced yesterday, the merging of the Bank of British North America with the Bank of Montreal. A fourth might have been consummated had the department of finance approved, and that was the proposed amalgamation of the Bank of Hamilton with the Royal. The first banking amalgamtion in Canada since July, 1914, occurred in 1916, when the Royal Bank purchased the Quebec Bank. The other two amalgamations were arranged this month.

Tendency of Banking Business.

It is interesting to recall that the directors of the Quebec Bank informed their shareholders that "with the present condition of business in the west, your directors cannot hold out the hope that if the separate existence of the bank is maintained, the dividends would be continued. On the contrary, your directors feel that it is necessary for them, owing to severe competition, if the proposed amalgamation were not sanctioned by shareholders, to reduce the dividend for some years to come."

It was also pointed out that "the tendency of modern banking business has been towards the amalgamation of banks and the creation of financial institutions having large resources for the purpose of financing modern industries. It has happened that your directors have been obliged to refuse advances to some of the bank's best customers because, in their opinion, the amount asked for, though safe and profitable, bore an undue proportion to the resources of the bank."

Advantageous to Shareholders.

It was added that the experience of banks, both in Europe and in Canada, had shown that amalgamations such as that proposed were highly advantageous to the shareholders.

The bank amalgamation of 1916 reduced the number of chartered banks in Canada to 21, and the two mergers of the present year to 19. How this compares with the position in certain previous years is shown in the following table compiled by *The Monetary Times*:—

July.	No. of chartered banks in Canada.
1869	27
1879	40
1889	41
1899	38
1909	29
1912	26
1914	22
1916	21
*1918	19

---

*March.

AGRICULTURAL CENSUS TO BE TAKEN

Plans for the taking of an agricultural census, which the government contemplates in co-operation with the provincial departments of agriculture, apparently have ultimately in view some measure of direct taxation on the farming community.

To secure this, and as a basis on which to determine any further measure of direct taxation as suggested, the agricultural census is to be made. It will be in the form of questionnaires sent out to each farmer, asking for data as to his revenues and expenditures, the value of his land, stock, buildings, etc., the net return on his investment after allowing a reasonable amount for the labor of himself and family, and all other information tending to show as accurately as possible the financial status and yearly income of each farmer.

Mr. V. A. Lemieux, formerly inspector for the Imperial Life Assurance Company, at Quebec City, has been appointed branch manager for that company at Quebec.

ONTARIO'S COMPENSATION ACT

Awards to Workmen Last Year Totalled $2,913,085—Official Report

The following statement has been issued by the Ontario Workmen's Compensation Board as to the operation of the Workmen's Compensation Act last year:—

The third year of operation of the Ontario Workmen's Compensation Act closed December 31st, 1917. The number of accidents and the amount of compensation show a considerable increase over the prior year.

The total amount of compensation awarded during the year was $2,913,085.81, as against $2,011,468.94 during 1916; the total number of accidents of every kind reported during the year was 36,514, as against 26,092 during 1916.

The increase is partly the result of increased industrial activity and partly of increased rate of wages, which automatically increases the workmen's compensation. The most marked increases in compensation and accidents were in munition manufacturing in schedule 1 and in operation of railways in schedule 2.

The compensation in schedule 1 industries amounted to $2,289,529.44, and the accidents reported numbered 30,701; the compensation in schedule 2 amounted to $623,556.37, and the accidents reported numbered 5,813.

Of the total 36,514 accidents reported during the year 454 were fatal cases.

The average number of notices of accident received each working day during the year was 126, and the average amount of compensation awarded each day was $9,071.

The total average number of cheques for compensation and medical aid now being sent out by the board each day is 318, of which 106 are for medical aid, the latter amounting on an average each day to $1,036.

Increased Pay and Increased Assessments.

The amount of current year's assessments collected up to the end of the year was $2,392,340.42. This will be increased to the extent that the actual pay roll statements received from employers at the end of the year exceed the estimates given by them at the commencement of the year.

The rates of assessment for 1917 have proven generally sufficient, and, though some adjustments may be necessary, little if any general increase will be required in the rates for 1918. The rates on the average are still somewhat less than the rates originally fixed when the act was first being put into operation in 1915.

Under a system of merit rating to be applied pursuant to an amendment made at the last session of the legislature, employers whose accident experience is bad, will be required to pay a higher rate than those whose accident experience is good. The adjustment will be made after the final accident experience of each employer for the year has been ascertained.

The total expenditure of the board for administration expenses, including additional permanent equipment and other additional expenses rendered necessary by the new medical aid provisions of the act, amounted to $133,629.50. Toward this amount the government, in addition to paying the salaries of the board and furnishing office premises, contributed during the year $100,000 in cash. This leaves only the sum of $33,629.50 to be borne by the employers, representing a cost to the employers of less than one and one-sixth per cent. of the amount of compensation awarded during the year. This gives them insurance at a very small fraction above actual cost.

Similar Laws Elsewhere.

Intercourse with workmen and employers shows increased appreciation of the benefits of the present workmen's compensation law over the law previously existing. The workman obtains his compensation promptly and without expense for, generally speaking, every disability of not less than seven days arising from accident in his employment; the employer is immune from litigation and from what might be ruinous liability for damages; a prolific cause of friction between workman and employer is removed; practically everything that the employer now pays goes directly to the injured workman or his dependants or in payment of the expenses of medical aid; and as a result of the general provision for compensation and the mode of continuous or pension payment provided for by the act the community is saved from many cases of indigence which might otherwise exist. Since the adoption of the law in Ontario similar laws have been put into operation in Nova Scotia and British Columbia, and are being considered in other provinces.

With the better knowledge of the new law and of the existence of the amendment under which employers whose industries are not expressly covered, may be brought under its provisions, there has been a large increase in the number of applications by employers for this purpose.

CANADA'S NICKEL OUTPUT

Production and Price Were Higher Last Year—New Refinery at Port Colborne

The production of nickel in Canada last year was, as usual, derived from the ores of the Sudbury, Ontario, district supplemented by the recovery of a small quantity of metallic nickel, nickel oxide, and other nickel salts as by-products in the treatment of ores from the silver-cobalt-nickel ores of the Cobalt, Ontario, district.

The total production last year was 84,470,970 pounds, worth, at 40 cents per pound, $33,778,388, compared with 82,958,564 pounds valued at $29,035,497, or 35 cents per pound, in 1916. These figures are contained in the preliminary report of the mineral production of Canada, prepared by Mr. John McLeish, B.A., Chief of the Division of Mineral Resources and Statistics, Department of Mines, Ottawa. The total production of nickel-copper matte at the smelter of the Canadian Copper Company and the Mond Nickel Company in the Sudbury district was 78,897 tons, containing 83,773,319 pounds of nickel and 42,392,588 pounds of copper, the average percentage of the combined metals in the matte being about 80; the tonnage of ore smelted (part being previously roasted) was 1,453,661 tons, which as usual included a small tonnage from the Alexo mine in the Timiskaming district. The production in 1916 was 80,011 tons of matte derived from 1,521,689 tons of nickel-copper ores smelted, the matte containing 82,596,862 pounds of nickel and 44,859,321 pounds of copper.

New Refinery in Ontario.

The refinery under construction at Port Colborne, Ont., by the International Nickel Company, had not been completed at the close of the year. The British American Nickel Corporation continued the development of its nickel properties particularly at the Murray mine, and work was begun on the first unit of the smelter a mile distant from the Murray mine. It is expected that construction work on the refinery will begin early in 1918.

Nickel was recovered as a by-product in smelters at Deloro, Thorold, and Welland, from the silver-cobalt-nickel ores of the Cobalt district; complete returns have not yet been received, but the total nickel contents of nickel oxide, nickel sulphate, and metallic nickel produced have been estimated at about 697,000 pounds. The products recovered in 1916 included 79,360 pounds of metallic nickel; 323,418 pounds of nickel oxide, and 232,450 pounds of nickel sulphate, having a total reported value of $132,896 and containing 361,701 pounds of nickel metal.

Exports and Imports.

The exports of nickel in ore matte or other form are reported by the Customs Department as 81,272,400 pounds, valued at $8,708,650.

The imports of nickel into the United States during the eleven months ending November, 1917, which included small quantities from other sources as well as from Canada, are recorded as 69,265,880 pounds, containing in ore, matte, or other form valued at $8,869,824, or an average of 12.81 cents per pound. The exports of nickel and nickel oxide, etc., during the same period were 21,430,306 pounds, valued at $8,702,727, or an average of 40.61 cents per pound, of which about 66 per cent. were consigned to Great Britain and 30 per cent. to Italy and France.

The values per pound of these exports to different countries ranged from 38.5 cents to 48.6 cents per pound. The average value per pound of exports in 1916 was 38.775 cents, the range being from 37.13 cents to 45.21 cents. The average export value in 1914 was 34.26 cents.

The price of refined nickel in New York according to quotations published by the Engineering and Mining Journal continued at from 45 to 50 cents per pound for ordinary forms, with 5 cents more per pound asked for electrolytic nickel, until March 7th, from which date the quotation was from 50 to 55 cents.

BRITISH CATTLE AND SUPPLY IN LIQUIDATION

On behalf of the liquidator of the British Cattle Supply Company, E. W. Wright recently filed with the Master-in-Ordinary at Osgoode Hall a list of alleged contributories as shown by the books of the defunct concern. Accounts show that $1,891,159.96 is still unpaid on stock, and that in order to liquidate the liabilities of the company the sum of $595,430.50 must be provided. This sum may be secured by the payment up to 40 per cent. on the stock.

The Toronto General Trusts Company is listed among the alleged contributories for the sum of $391,958 in trust. This is said to be in respect of stock held for the British Dominions Land Corporation and given by the British Cattle Supply Company in Exchange for lands.

The following names make up the list as filed recently at Osgoode Hall. The sums following the names are the share required from each in order to liquidate the liabilities. Where no address is given, the stockholders are of Toronto:—

C. H. Maybee, $5,891.37; T. E. Goode, $21,009.25; Samuel Hisey, $5,611.40; S. and J. Hisey, $1,399.85; R. H. McElroy, $8,411.11; C. R. McKeown, Orangeville, $2,811.71; Hon. Nelson Monteith, Stratford, $4,211.56; H. Talbot, $14,010.51; J. H. Fussell, $4,199.55; T. Fussell, $1,399.85; W. G. Beamish, $2,799.70; Hon. Rufus Pope, Ottawa, $77,355.77; Hon. Peter Talbot, Lacombe, Alta., $2,799.70; E. Maybee, $559.95; Wilson Peterman, $279.97; R. W. Ferguson, $279.97; G. E. Coon, $279.97; T. W. Brennand, $279.97; Miss J. A. MacRae, $2,799.70; T. A. Neely, $2,799.70; R. H. McElroy (in trust), $55,994; Mrs. Emily C. Cairns, $279.97; F. W. D. Smith, $279.97; Russell Kinnear, $279.97; Dr. C. H. Hair, $559.94; John Kitts, $1,399.85; A. J. Bailey, $5,599.40; Mrs. Olive Neeley, $1,399.85; Edgar Neeley, $279.97; Jacob Neeley, $279.97; Mrs. Ellen Neeley, $139.99; Hon. Geo. McHugh, Lindsay, $279.97; A. W. MacRae, $419.96; Miss Elsie Baird, $28; Miss Margaret McDonald, $56; Miss Helen McDonald, $28; Geo. P. McHugh, $1,399.85; B. B. Cooke, $279.97; Miss Mabel C. Cairns, $84; Percy A. Vale, $1,399.85; Mrs. Sadie C. Goode, $2,799.70; Joseph Wilson, Jr., $400.

READJUSTMENT OF INDUSTRY

How to Maintain Efficient Production With Competitive Co-operation

How to maintain efficient production with competitive co-operation was the second problem discussed by Colonel David Carnegie, M.I.C.E., F.R.S., Edin., at the recent annual meeting of the Canadian Mining Institute, Montreal. Colonel Carnegie, who is a member and ordnance advisor of the Imperial Munitions Board, Ottawa, had first considered as to how to secure remunerative trade without unrestricted competition. His remarks on this phase of the readjustment of industry after the war were printed in *The Monetary Times* last week.

The problem of the maintenance of efficient production with competitive co-operation affected two classes of labor, said Colonel Carnegie, the employer and the employed. "The intelligent employee to-day not infrequently becomes the prosperous employer to-morrow." He continued. "Such boards of control as we are now considering (outlined in these columns last week), would encourage this tendency.

"While in considering the first problem the curse of unrestricted competition is revealed and condemned, I wish to emphasize just as strongly the true value of maintaining efficient production with competitive co-operation, and, further, that regulated competition in production is a healthy inspiring incentive, producing the best results without having any of the evils attending that unfair competition which secures trade. Competitive co-operation is indeed the life of industry when applied to efficient production. It inspires the best service in the individual worker while producing contentment.

Incentives to Production.

"If we carefully consider upon whom we depend for the products of industry and examine the incentives already offered to labor to maintain efficient production, we shall find that the great body of workers have not had the inducements placed before them in an attractive way. The feeling among the laboring classes is that any privileges, recognition and any better conditions of labor, wages, or hours of employment, have been wrung out of the employers only after serious conflict and where the forces of their might have prevailed. They, therefore, do not give a wholesome active service with any thrilling sense of delight, in which they regard the products of their hands as essential to national prosperity.

"This condition is not overdrawn, and I am sure that much unrest exists regarding the future relations of capital and labor. Since the war began commissions have been appointed to investigate the far-reaching problems of industry, and recommendations have been made concerning the relationship between capital and labor, the development of industrial research, the employment of the best kind of machinery, the best methods of manufacture, buying and selling products, transportation, facilities, domestic and foreign commercial relationship, together with a host of other subjects of vital importance to the industrial prosperity of the Empire.

"For years past there have been constant conflicts between capital and labor on one or other of the issues I have named. Prior to the war in the United Kingdom strikes were so common and so virulent that they threatened to menace the public safety.

Whitley Report.

"In March, 1917, the Whitley report of the Joint Standing Industrial Councils was presented to the British parliament. In that report recommendations were made for improving the relations between masters and men and for establishing joint standing industrial councils composed of employers and employees, to obtain harmony and better means of production. Ever since the war began committees and commissions have been at work to solve the problems. It is hoped that the work of these bodies will be of service to the reconstruction committee of the cabinet of the Dominion government.

"These investigations instituted by government indicate the need of changed conditions. It is unnecessary for me to go into details regarding the causes of mutual distrust and suspicion between employers and employed. I would rather, if time permitted, exalt the spirit which is changing daily, the relations of employer and employed, and making possible a speedier union of their efforts in the general harmony of their interests. I believe the way to secure that harmony is by recognizing organized labor and letting them share in a larger manner the responsibility of the output, quality and profits of industry. The following proposals for the formation of production boards are suggested with the hope that they may meet the need.

"1. That production boards be formed for each industry in the same number as the district trade boards, and be incorporated by law to deal with specific duties defined in the articles of association.

"2. The boards to be independent in their control and operation of all matters under their jurisdiction, but to work in direct and harmonious association with the industry trade boards.

"3. Each board to consist of elected representatives of the employers and employees of each industry from the same number of manufacturers and within the same geographical boundaries, as determined by the scope of the industry trade board.

Equal Numbers of Employers and Employees.

"4. Equal numbers of employers or their representatives, and employees or their representatives, to be elected by the district employers' association, and employees of the industry, whether the masters or men belong or do not belong to employers' associations or trade unions. The idea being to have full representation of each side belonging to the industry of the district in question. The method of election is a detail of organization.

"5. The chairman and vice-chairman to be nominated by the board as a whole. The chairman to be nominated from the elected representatives of the employers and the vice-chairman to be nominated from the elected representatives of the employees. Approval and election of both to be sanctioned by government and for the period of their election their services to be secured by the government.

Functions of Production Boards.

"1. The acceleration of output by the introduction of the most important processes and plant used in any part of the world in the same industry. The consideration of this phase of the board's work to be placed in the hands of a committee who would investigate all modern improvements, review current scientific journals and reports of investigations relating to the industry. The committee to report periodically to the board, making recommendations for improved production. The board would consider and submit such recommendations to manufacturers associated with the board, and leave it to them to make such improvements as they consider desirable. The board would not accept responsibility for the results.

Industrial and Commercial Training.

"2. To consider the provision of suitable industrial, technical and commercial training for boys, girls, men and women, with the object of improving the output and the quality of the product. A small committee of the board to investigate this subject, always with a view to training for the specific industry represented by the trade board. This section of the board's work would cover a very wide but necessary field of operation. It would embody:—

"(a) The vocational training of the child in preparation of his or her entry into the industry; (b) the education of the actual producers (principally manual); (c) the education of the directors of production (both manual and technical); (d) the education of the distributors of production (principally financial and commercial).

Classification and Valuation of Labor.

"3. To consider the classification, certification and valuation of labor. Another committee of the board could be formed for this definite object, having in view:—

"(a) The classifying of apprenticeship or in drafting boy and girl labor from vocational schools into those sections of industry best suited for their health, aptitude and age.

"(b) The certification of apprenticeship after probationary period in works, or office, to satisfy all concerned that the right employment has been selected for the child.

"(c) The classification of boys and girls after completion of apprenticeship for further training as draughtsmen, foremen, managers, salesmen, accountants, etc., according to the quality of the talent they had developed during their apprenticeship.

"(d) The classification of craftsmen of the same vocation, such as moulders, pattern makers, machinists, gauge makers, etc., into different skilled classes—say, 1st, 2nd and

We Serve Security Holders

Those who find that travel or absorption in other business makes proper attention to investments difficult, can rely with full confidence upon the experience and reliability of this Corporation. Our service includes collecting amounts due, paying obligations and in every way caring for the investments entrusted to us. We keep clients posted on matters of importance in connection with their affairs and render statements regularly.

$2.21 WHEAT AND CHEAP LAND

To those farmers and investors desirous of acquiring good land at low prices and on easy terms, convenient to railway and market, we offer certain assets belonging to Trust Estates under our care, and which must be realized on. Some of those parcels are improved, others raw prairie, comprising 160 acres and upwards to blocks of 10,000 acres or more. With the likelihood that wheat will go even higher than it is to-day, we believe the time to buy agricultural land is *now*, as prices of farm products will, we believe, remain high for an indefinite time to come.

DIVIDEND NOTICE.

Notice is hereby given that a dividend for the three months ending March 31st, at the rate of

TEN PER CENT. PER ANNUM.

has been declared upon the Capital Stock of the Company, and that same will be payable on and after April 1st.

The Transfer Books will be closed from the 21st to the 31st of March, both days inclusive.

By order of the Board.

W. E. RUNDLE,
Toronto, March 6th, 1918. General Manager

3rd class moulders. The classification would distinguish between the good and very skilled moulders. Such classification is common in the civil, military, naval and professional services, where each receives a diploma, certificate or badge, indicating his ability, class or rank in the services. Labor unions classified their trades but not the ability of one individual as compared with another, although there are widely marked differences between the skill of moulders for instance. This neglect of classification has been one of the greatest causes of friction between the employer and the employed. The complaint has been that the skilled worker has not done more work than the indifferent worker. To initiate this work by one of the committees of the board with proper means for the certification of all labor by examination (manual or oral), by craftsmen in the art, would be a great service. The board to issue certificates indicating to what trade and class they belong, just as 1st, 2nd and 3rd class certificates are issued to the marine and land stationary engineers, sailors, miners and to others in different vocations. Arrangements to be made for the periodic renewal and O.K.'s of certificates. Such certificates to carry the board's district rate of pay. Should the holder of the certificate wish to leave the district over which the board presides, the certificate to be presented to the board to be O.K'd, so that on presentation to a new employer in a different district his value would be known at once.

Valuation of Class of Labor.

"(e) The valuation of labor. The same committee to consider the valuation of each class of labor. That is for graduating the amount of remuneration necessary. For instance, in the difference between 'A,' 'B' and 'C.' Such valuation not to interfere with the present systems of individual, grouped, or other forms of piece work.

"There is no doubt that the proper regulation of pay on a thoroughly systematized basis of classification, certification and valuation by a competent body of men who were trained in the industry, would greatly stimulate whole-hearted acceleration of output instead of wilful retardation of production.

"(f) The consideration of systems of profit sharing and co-partnership, and the hours of labor for the workers.

"(g) To consider the value of materials used in production, their standardization, classification and methods of inspection.

Welfare Conditions for Workers.

"(h) To consider healthy conditions for the workers, and to suggest means for increasing their interests in the local surroundings, by providing amusements, instruction in gardening, music and other kinds of pleasurable employment after working hours.

"(i) The board to have authority to co-opt members, associate members and corresponding members, for any of the committees elected from its members, to investigate any of the many-sided problems.

"(j) A committee of the board to consider all workshop troubles, suggestions for improvements of conditions, accidents, fire arrangements, ambulance, etc.

"The district production board to supply any information within its power that would enable the national trade board to carry on its operations successfully.

"District production boards to send copies of minutes of their meetings to each in the same industry, and to confer as necessity arises with a view to a general increased maintenance of efficiency.

"I need hardly remind you," said Colonel Carnegie, "with what interest the various subjects would be taken up by the workers, both representing the employers and employees. The division of authority, responsibility and the social intercourse would produce a new outlook to labor."

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ending March 15th, 1918:—

Kerr Lake Mine, 39,074; Coniagas Mines, 87,000; Buffalo Mine, 285,736; Dominion Reduction Mine, 176,000; McKinley-Darragh Mine, 172,081. Total, 759,864 pounds, or 379 tons.

The total shipments since January 1st, 1918, now amount to 2,831,286.8 pounds, or 9,410 tons.

RAW SUGAR SUBJECT TO ORDER FOOD BOARD

The Canada Food Board, having authority to direct the distribution of foodstuffs, has ordered that importers of raw sugar consigned to Canada shall obtain a permit from the Canada Food Board, Ottawa, for allocation of the sugar for Canadian trade.

Every importer is, therefore, required to deliver to the collector of customs the said permit from the Canada Food Board, Ottawa (or from J. R. Bruce, sugar division of the board, at 68 William Street, New York), before release of the raw sugar by customs.

CANADIAN RAIL ORDERS IN UNITED STATES

New York dispatches state that the Canadian government railways are in the United States market for 5,000 box cars after placing an order for passenger equipment with the Pullman Company, and ten narrow-gauge engines with the Canadian Locomotive Company.

The Grand Trunk has recently ordered 25 switching engines from the same builders. The Pennsylvania Tank Car Company has taken orders for tank cars from steel companies and from oil refiners. Oil companies continue actively in the market for railroad equipment. Ten companies ask for 600 tank cars, which will require about 9,000 tons of steel.

INVESTMENT COMPANIES TO MEET IN TORONTO

A special report on Canadian municipal finances will be presented by a joint committee of the Dominion Mortgage and Investments Association and the Bond Dealers' Association, at the annual meeting of the former organization in Toronto on Monday. Mr. E. M. Saunders, treasurer of the Canada Life Assurance Company, is chairman of the joint committee, and will present their report. Other business to be taken up at the morning session include the reading of the minutes of the preceding annual meeting; the appointment of nomination committee; reading of correspondence; reports of the secretary-treasurer and auditor; reports of executive committee; notices of motion; resolutions and subject matter of which notice has been filed; unfinished business; general business and election of officers and executive committee. Mr. A. D. Langmuir, general manager of the Toronto General Trusts Corporation, who is president of the Dominion Mortgage & Investment Association, will also deliver his presidential address on Monday morning.

In the afternoon, several addresses will be given, including one by Mr. M. Chevalier, managing director of the Crédit Foncier Franco-Canadien, on "The Demand for and Supply of Funds"; by Mr. S. R. Tarr, editor of "Canadian Finance," on "Institutional Investments in Western Canada," and by Mr. Kingmann Nott Robins, Associated Mortgage Investors, Rochester, N.Y., on "The United States and Canadian Investments." There will also be a discussion on the Ontario Loan and Trust Corporations Act.

The following are the officers of the Dominion Mortgage and Investment Association:—President, A. D. Langmuir, general manager the Toronto General Trusts Corporation; first vice-president, Hume Cronyn, general manager the Huron and Erie Mortgage Corporation; second vice-president, E. M. Saunders, treasurer Canada Life Assurance Company.

Executive Committee:—Life insurance:—Mr. J. K. Macdonald, Confederation Life Assurance Company; Mr. J. F. Weston, Imperial Life Assurance Company; Mr. J. B. McKechnie, Manufacturers' Life Assurance Company.

Trust companies:—Mr. A. E. Holt, the Royal Trust Company; Mr. J. C. Breckenridge, the National Trust Company; Mr. J. M. McWhinney, the Union Trust Company.

Loan companies:—Colonel Edye, Trust and Loan Company of Canada; Mr. G. A. Morrow, Central Canada Loan and Savings Company; Mr. W. E. Long, Crédit Foncier Franco-Canadien.

Provincial associations' representatives:—Mr. John Paton, the Mortgage Loans Association of Manitoba; Mr. W. E. Mason, Land Mortgage Companies' Association of Saskatchewan; Mr. Wm. Toole, the Mortgage Loans Association of Alberta; Mr. G. L. Smellie, Mortgage and Trust Companies Association of British Columbia. The secretary-treasurer of the association is Mr. John Appleton.

7th March, 1918. WALTER GILLESPIE, Manager.

ASSESSMENT OF NEW C.P.R. TAX

Company Will Probably Be Able to Pay Dividend, Tax and Have Margin

The special tax on the income over 10 per cent. of the Canadian Pacific Railway, announced by the Dominion government last week, will be variously assessed. Half of the excess earnings on railroad account, after the 7 per cent. dividend has been paid, and the normal income tax of 4 per cent., which will be applied to the company's special income account, would give the following results on the basis of the company's earning statement for 1917 just made public:—

50 per cent. on $12,420,915	$6,210,457
4 per cent. on $10,713,299	428,532
Total	$6,638,989

Would Fall Short.

The $6,638,989 tax, however, would fall short of the $7,000,000 which is aimed at as a minimum. Under one of the alternatives designed to secure this minimum the company is allowed 10 per cent. for its common shareholders out of combined railroad and special income earnings and up to $7,000,000 can then be taken as a tax. So as applied to figures such as those for 1917 the tax apparently would be worked out as follows:—

Available for dividend (rail account) ...	$30,620,915
Special income	10,713,299
Total	$41,334,214
10 per cent. dividend	26,000,000
Balance	$15,334,214
Tax	7,000,000
Balance for company	$ 8,334,214

In the 1915-16 fiscal period of the company the application of the first plan of taxation would have yielded a larger tax. Half the surplus over the 7 per cent. on rail account would have amounted to $7,722,079, to which would be added the 4 per cent. income tax on special income, yielding $397,638, or making the total liability to taxation for such a year apparently $8,119,717. As that exceeded the minimum of $7,000,000, the alternative plan as shown in respect to 1917 earnings would not be used.

Where Pinch Would Come.

In both these years, says the Montreal Gazette, in presenting these figures, it is apparent that while the company would have had to pay over large sums, a fair surplus of profits would have remained, $8,334,214 in respect to a year like 1917 and $9,465,396 in respect to 1915-16. Where a pinch would come would be in a year like 1914-15, when the total surplus, railroad and special income left after 10 per cent. had been paid to shareholders was only $3,259,247. In that case the government would take the entire $3,259,247.

But the 1914-15 instance is extreme and as the company is to receive the benefit of higher rates, even if the tax is aimed to take away the benefit later, it is not easy to conceive of a condition of affairs which would not allow the company to pay the dividend and tax and have something to the good. On that reasoning the dividend outlook is entirely reassuring, and the Street took it that investors could afford to rest easy as to their income from Canadian Pacific Railway shares.

EASTERN TRUST COMPANY'S FINANCES

The twenty-fifth annual report of the Eastern Trust Company makes reference to the company's growth in the quarter of a century. The subscribed capital at the end of the first year was $110,000, now $1,000,000; paid-up, then $20,400, now $1,000,000; there was no reserve then, now it is $250,000; the net profits were $979, now $121,129, and the securities then held were $41,860, and now they are $19,499,033. Col. Weston is the company's managing director.

EASIER IN LONDON THAN NEW YORK

Money Market Rate Lower Overseas Than at Any Time in 1916 or 1917

Money is easier in London than in New York, and the market rate in London is now lower than at any time in 1916 or 1917, 4 per cent. being the present Bank of England rate to clearing house banks. The rate on treasury 3 and 6 months bills was reduced from 4¾ per cent. to 4 per cent. on December 27th. Three years ago, when the United States Federal Reserve Board inaugurated the campaign to create a discount market here for foreign trade acceptances, the New York rate on that class of paper was 2 to 2½ per cent., and the London rate was 5 per cent., but the New York rate has advanced to 4 to 4½ per cent. and the London quotation has fallen to 3 15-16 to 4 1-16.

Credit for Business Uses.

This seems to be an extraordinary situation, after England has been 3½ years at war, and has raised and spent about $24,000,000,000 of new money.

Discussing these facts in its February bulletin, the National City Bank of New York concludes that the demand for credit for business uses is lighter there than in the United States, doubtless because of more stringent control over industry. An individual cannot employ money or labor in England for any purpose he chooses and "it is time," says the bank, "to think about the same policy in the United States."

In this connection it is interesting to review the condition of the Bank of England as shown by the first statement in January for three years, and the figures are given below, together with the market rate for three months' bills, and amount of exchequer notes outstanding:—

	1916.	1917.	1918.
Circulation	£ 35,194,245	£ 39,895,160	£ 46,591,020
Public deposits	58,156,684	53,147,093	32,074,902
Other deposits	105,835,576	116,388,305	158,411,326
Government securities	32,840,016	62,187,545	70,833,770
Other securities	114,748,048	91,789,493	106,480,723
Reserve in banking dept.	34,358,315	33,572,304	31,057,820
Coin and bullion	51,102,580	54,957,464	59,198,840
Proportion of reserve to liabilities	21	19¾	16¼
Bank rate of discount	5 per cent.	6 per cent.	5 per cent.
Market rate 4 months' bills	5⅜	5¼	4
Exchequer currency notes in circulation	103,125,099	150,144,177	212,450,951

Small Increase in Loans.

The classifications, "government securities" and "other securities" describe collateral loans. It will be noted that the increase of all loans in three years is only about £54,000,000, or approximately $250,000,000, which is not large in view of the magnitude of financial operations, and the increase of deposits is less, but the financial critics are attacking the treasury management for using too much bank credit. The figures should interest Americans who contend that the banks must finance the war. The only sign which seems to tell of inflation in large degree is the increase of exchequer currency notes, of which about $1,000,000,000 are now outstanding. These notes have not been issued in payment of government expenses, but to the banks in exchange for gold and Bank of England notes, and it is claimed that they have been needed to take the place of gold in circulation and to provide the larger amount of currency required by the higher prices and intense industrial activity.

Coincident with the reduction of the rate of interest on British treasury bills interest rates on bank deposits in London were dropped to 3½ per cent., except to foreign depositors, who will continue to receive 4½ per cent. This is for the purpose of retaining foreign deposits.

Mr. Irving H. Todd, of St. Stephen, N.B., has been appointed to the Senate to succeed the late Senator Gilmour. Mr. Todd is a prominent lumberman and was chairman of the Provincial Unionist Committee.

CANADA

THE DOMINION INCOME WAR TAX

Its Meaning and Application

THE Dominion Income War Tax Act, passed at the last session of Parliament, is now in force, and all those liable to taxation under the provisions of the Act must file the required returns for the year 1917, on or before 31st March, 1918.

The Act provides that there shall be assessed, levied and paid upon the 1917 income of every person residing or ordinarily resident in Canada, a tax upon income exceeding $1500 in the case of unmarried persons and widows, or widowers without dependent children, and upon income exceeding $3000 in the case of all other persons.

Corporations and joint stock companies carrying on business in Canada, no matter how created or organized, shall pay the normal tax upon income over $3000. The fiscal year of corporations and joint stock companies may be adopted if desired.

Your Immediate Obligation.—You are now required by law to fill out in triplicate, one or more of the five special forms enumerated below. Read the particulars about the forms provided, then note the form or forms that fit your case. Don't forget to make three copies. You keep one copy, and in the case of Forms T1 and T2, deliver two to the Inspector of Taxation for your district. In the case of Forms T3, T4 and T5, two copies must be filed with the Commissioner of Taxation at Ottawa.

Penalties.—Default in filing returns renders the person or persons liable on summary conviction to a penalty of one hundred dollars for each day during which the default continues. Any person making a false statement in any return or in any information required by the Minister of Finance shall be liable on summary conviction to a penalty not exceeding ten thousand dollars or to six months' imprisonment, or to both fine and imprisonment.

FORMS TO BE FILLED IN AND FILED

Individuals—Form T1 is for all individuals having the requisite income. Fill in pages 1, 2 and 3, make no marks on page 4.

In giving particulars of dividends received, state amount received from each company, listing Canadian and Foreign Companies separately.

Partnerships as such need not file returns, but the individuals forming the partnerships must.

Corporations and Joint Stock Companies must fill in Form T2, showing total income. Amount paid during the year to Patriotic and Canadian Red Cross Funds, and other approved war funds, should be shown under Exemptions and Deductions. A financial statement should also be attached. In giving particulars of dividends received, state amount received from each Company, listing Canadian and Foreign Companies separately.

Trustees, Executors, Administrators of Estates and Assignees use Form T3, to state particulars of the distribution of income from estates they are handling. A separate form is required for each estate and total incomes must be given as well as distribution thereof.

Employers.—On Form T4 employers shall make a list of the names of employees and amounts paid to each in salaries, bonuses, commission, or other remuneration wherever the combined sum of such remuneration for the calendar year 1917 amounted to $1000 or more. This applies to all classes, regardless of number of such employees.

Corporations Listing Shareholders.—Corporations and Joint Stock Companies shall list on Form T5 Shareholders residing in Canada to whom Dividends were paid during the calendar year 1917, stating the amounts of dividends and bonuses paid to each.

Don't wait to the last minute. Get the necessary forms now, and make your information accurate and complete.

Forms may be obtained from the District Inspectors of Taxation and from the Postmasters at all leading centres.

Postage must be paid on all letters and documents forwarded by mail to Inspector of Taxation.

Department of Finance
Ottawa, Canada

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Acton, Ont.—Messrs. G. A. Stimson and Company, of Toronto, have purchased $25,000 worth of 6 per cent. debentures payable in 20 annual instalments with coupons attached. The proceeds will be used for hydro purposes.

York Township, Ont.—With the consent of the minister of finance the York township council has issued $7,000 6 per cent. debentures to Mr. T. C. McKay at the price of $6,800, to provide funds for the work of enlarging the school building at School Section No. 7, Todmorden.

Galt, Ont.—The city council has fixed the rate of taxation for 1918 at 33 mills on the dollar. The total sum to be raised is $243,000, of which $81,932 is for the purposes of education, an average of $6.50 per capita. The board of works receives $22,900 and the provincial war tax accounts for $7,632, in addition to which the city makes a grant of $400 per month to the Canadian Patriotic Fund.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from March 4th to 8th, 1918:—

School District.—Oak Hill, $900 5-years not ex. 8 per cent. annuity; M. E. Wassill, Otthon.

Rural Telephone Companies.—Strongfield, $2,100 13-years not ex. 8 per cent. annuity; R. Woodward, Strongfield. Rugg, $11,500 15-years not ex. 8 per cent. annuity; C. Stensrud, Estevan.

The following is a list of debentures reported sold from March 4th to 8th, 1918:—

School District.—Hazel Ridge, $1,300; W. L. McKinnon and Company, Regina.

Rural Telephone Companies.—Flaata, $3,000, Springside, $3,800, Tribune West, $4,200, Senlac, $8,000, Tribune, $3,100, Marine, $2,600; W. L. McKinnon and Company, Regina. Downing, $2,300, Eastern, $5,500, Wauchope, $3,000; Bond and Debenture Corporation, Winnipeg. Orononca, $1,500, Weyburn Plains, $2,000; H. O'Hara and Company, Toronto. Green Prairie, $5,900; Kerr, Fleming and Company, Regina. Manitou Lake, $24,700; Thos. P. Taylor, Regina.

Villages.—Eston, $2,800, La Fleche, $3,000, Herschel, $1,500; W. L. McKinnon and Company, Regina.

MUNICIPAL SINKING FUNDS: SHORT-TERM LOANS

Referring, in a recent address, to municipal sinking funds, Mr. R. Baird, inspector of municipalities of British Columbia, who contributed an interesting article to *The Monetary Times Annual*, said:—"I had been of the opinion that municipal councils and the public generally were by this time convinced that the protection of outstanding obligations is of the nature of a trust. I have, however, been surprised to hear expressions of opinion to the effect that municipal councils should be justified under the press of circumstances in taking liberties with their obligations. The sale of debentures involves a contract by the municipality to collect and to administer in a certain way the funds necessary for the protection of the obligation, and it is difficult to believe that any pressure of circumstances will justify a municipal council in stepping aside from a moral obligation. It is not a question of expediency. It is a question of business integrity, and I fail to see any reason why a municipality should be allowed greater liberty in a matter of business integrity than an individual."

Mr. Baird stated that short-term borrowing had been one of the most costly experiments tried by the British Columbia municipalities, having cost the municipalities at least $750,000—"and the air is not entirely cleared yet."

At the meeting of the Wentworth (Ontario) county council, the report of the special committee on overdraft and debentures was presented. This recommended that permission be asked to issue debentures for $150,000 to wipe out the indebtedness.

PRICES OF MUNICIPALS

Whereas the 6 per cent. dollar bonds of such important French industrial centres as Bordeaux, Marseilles and Lyons are quoted in New York at a yield of approximately 12 per cent., the internal loans of these particular cities are at this moment ruling at much higher prices and lower yields, or on about a 5½ per cent. basis. Attention to this fact is directed by the bond distributing house of Messrs. A. B. Leach and Company, New York, which advances the suggestion that a certain portion of this discrepancy in investment yields is due to a lack of knowledge of investment values, and expresses the belief that if it were possible to-day to effect a free international exchange of money and securities this discrepancy would not exist in the same measure. In other words, it is pointed out that war restrictions prevent the French and British investors from taking advantage of the unusually low prices prevailing on this side for their home securities. The statement regarding the French municipal issues applies, though to a lesser degree, to the British and French government securities listed on United States exchanges, and which are obtainable here on a 7½ to 8 per cent. basis, whereas in London and Paris the yield obtainable on similar securities is not more than 5 to 5½ per cent.

STEEL MERGER CONFERENCES

Conferences in regard to the Dominion Steel-Scotia Steel merger were resumed in Montreal last week, according to the Gazette, and in some quarters it is claimed that progress is being made towards a basis of understanding.

Mr. W. D. Ross, who is Scotia's chief financial adviser, was there during the week, and met President Workman, of the steel corporation. Later in the week Mr. N. B. McKelvie, who represents the United States interest on the Scotia board, also went to Montreal and met Mr. Workman.

There is nothing to indicate that the conversations have yet developed any concrete proposal that can be laid before the shareholders, and it is by no means sure that they will. It is held, however, that there are indications of both sides being more friendly to the idea of an amalgamation.

In a statement to *The Monetary Times*, Mr. Frank Crockard, president of the Nova Scotia Steel and Coal Company, asked for a statement regarding the suggested amalgamation following the recent directors' meeting at Montreal, said: "In view of the fact that the meeting was held for the purpose of presenting the annual statement, and the further fact that the question of amalgamation was not up for discussion, any statement at this time would be of little interest."

INCREASE IN CANADIAN TRADE

A total Canadian trade of $2,273,724,883 for the 11 months of the current fiscal year ending with February, is shown in the monthly trade statement for February, issued last week by the Department of Customs. This is a considerable increase over the similar period last year, when Canada's total trade aggregated $2,018,447,397. For the month of February alone, Canada's trade amounted to $143,231,807, as compared with $140,162,700 for February, 1917.

Exports of domestic goods for the eleventh months' period, inclusive of coin and bullion, were to the value of $1,440,459,944 for the eleven months, as against $1,029,046,435 for the corresponding eleven months of the previous fiscal year. Goods entered for consumption were valued at $886,942,750, on which customs duties to the amount of $145,789,221 were collected. For the eleven months period of the previous year imports were valued at $769,443,187, while customs collections aggregated $130,550,845, or approximately fifteen million dollars less.

For February alone, both imports and customs collections show a considerable falling off as compared with the same month in 1917. Goods imported were to the value of $53,108,214 and duties collected $9,449,747. For February, 1917, imports were worth $58,556,938 and $11,409,494 was the amount of customs revenue collected.

Exports of Canadian goods during February, on the other hand, were to the values of $86,361,617, an increase of about eighteen millions over February, 1917.

Exempt from Dominion Tax

It is good business to increase your holdings of **Victory Loan Bonds**, because the security is of the highest quality, the income return attractive, and you are not required to pay Dominion Income Tax.

ROYAL-NORTHERN CROWN MERGER

Precautions Taken to Prevent Speculators Acting on Price of Stock

Captain William Robinson, president of the Northern Crown Bank, Winnipeg, stated to The Montreal Star last week, after it became known that negotiations had been completed for the acquisition of the Northern Crown by the Royal Bank of Canada, that his chief anxiety throughout the negotiations had been to protect the shareholders from speculators who might have learned that something of the kind was in progress.

It is understood that the announcement of the sale would have gone forward to the shareholders in the more regular method of an official circular later on, had it not been feared that enough had been learned by some outsiders to enable them to take advantage of the ignorance of shareholders by bidding for their shares around the current quotations (87½ has been a recent nominal bid) and get 200 under the terms of the purchase.

Captain Robinson stated that he had been placed in a position to obtain a block of the shares but that both he and his directors had refrained from buying a share from any other holder, preferring to give them the full opportunity of the bargain which it had been possible to make with the Royal Bank in their behalf.

Note Issuing Powers.

Apparently the merger will not result in any shrinkage of the ordinary note issuing powers of the banks. As the Quebec Bank stock was taken over by the Royal Bank at the beginning of last year at a price about half the market value of Royal stock, that amalgamation caused a net decrease of capital stock, and thus reduced the normal issue power. In the case of the Northern Crown the reduced capital of that bank evidently goes into the merger at the same price as Royal stock is selling in the market; so the Northern Crown shareholders will get $1,429,447 of Royal stock; and the former bank's issue powers will be transferred in their entirety to the latter. The Northern Crown in 1916, however, when it reduced its capital 50 per cent., sacrificed half of its ordinary issue power, and this is not regained by means of the present transaction.

As to the Dividends.

The terms of the merger, as noted in *The Monetary Times* last week, mean that the Northern Crown shareholders virtually get par for their old stock (as existing prior to the reduction). On the new (reduced) stock they, in 1917, received dividends of $71,467, or at the rate of 5 per cent. per annum. On the new Royal Bank stock which they receive in exchange they will apparently get 12 per cent. dividends, or approximately $171,533 per year. Although this is $100,000 per year more than they received in 1917, it is practically the same amount as they got in 1913 and 1914. The dividends paid by Northern Crown in 1913 were $165,,563 and in 1914 $170,297.

The purchase of the Northern Crown by the Royal Bank will raise the paid-up capital of the latter institution to an even $14,000,000. When the announcement of the transaction was made last week it was stated that the shareholders of Northern Crown would receive approximately $200 a share, partly in Royal Bank stock and partly in cash. The agreement between the directors of the two banks provides for the issue of 10,883 shares of Royal Bank stock and the payment of $576,970 in cash to shareholders of Northern Crown.

For the purposes of the transaction Royal Bank stock is given a value of $210 a share, approximately its minimum quotation on the Canadian stock exchanges. The consideration in stock would, therefore, have a value of $2,285,430, and, with the cash to be paid, the total consideration would be $2,862,400, or $200 a share on Northern Crown's subscribed issue of 14,312 shares. Northern Crown shareholders will, therefore, receive about three shares of Royal stock for every four of Northern Crown, and a cash payment of about $40 on every share of their old stock.

Purchase Shares at $210.

As the Royal Bank has 129,117 shares outstanding, the issue of the 10,883 shares to the Northern Crown will bring the total up to an even 140,000 shares, out of the bank's authorized issue of 250,000 shares. As the exchange of shares will involve some awkward fractions the Royal has agreed to provide a purchaser at a price of $210 a share for the aggregate of all the fractions which may arise from a pro rata division of the Royal shares among Northern Crown stockholders. It has been further agreed that Northern Crown may pay out its usual half-yearly dividend at the rate of 5 per cent. for the six months ending May 31. As the exchange of shares will go into effect some time in midsummer it would seem probable that the Northern Crown stockholders will participate in the quarterly dividend to be distributed by the Royal on September 1, making their income continuous through the period of the completion of the transaction.

QUEENSLAND INSURANCE COMPANY IN CANADA

The Queensland Insurance Company of Sydney, N.S.W., has decided to write fire and marine business throughout Canada. This decision was communicated to *The Monetary Times* last week by Mr. Cuthbert Hawkes, the company's assistant manager and inspector of branches, who is now on his way back to head office after a visit to Canada. The Montreal Agencies, Limited, Montreal, have been appointed as general agents of the company for the Dominion. This agency has excellent connections throughout Canada. Mr. O. W. Pease, manager of the Montreal Agencies, Limited, is a well-known insurance man. Associated with him in the underwriting department will be Mr. James D. Cherry, who has been connected with the fire insurance business for 24 years. Mr. Cherry gained valuable experience during the seven years he served as inspector for the Springfield Fire & Marine, previous to which he was with the Royal for four years in the same capacity.

Messrs. C. Gardner Johnson & Company, Vancouver, has for some time past acted as the company's agents in Vancouver for marine business.

SECURITY LIFE INSURANCE COMPANY OF CANADA

During the past year the Security Life Insurance Company of Canada received 430 applications for life insurance, amounting, in all, to $543,740. Of this number, 402 were accepted for $474,240, and policies issued. The reinsurance and transfer of the with profit policies on the books of the company was completed during the year, and the insurances reported in force at December 31st are upon the "All Guaranteed" Plans. The amount in force at December 31st and the gain from year to year in this class of business is as follows: 1914, $794,500; 1915, $917,900; 1916, $1,155,100; 1917, $1,381,050.

While the net premium receipts increased in 1917, the actual expenses for all purposes were $8,325 less than in 1916 and $15,906 less than in 1915. A commendable feature. The total receipts from all sources during the year were (after deducting $7,834 paid for reinsurance) $58,251, and the total outgo $44,254.

As directed by the shareholders a year ago, special legislation was secured permitting by by-law the increase of the number of the company's directors from nine to fifteen. The by-law was ratified at the recent annual meeting. The company now has a strong directorate, headed by Brig.-Gen. Sir Henry M. Pellatt, C.V.O., as president, and including such well-known business men as Mr. Mark Workman, president of the Dominion Steel Corporation. The other directors and officers are: First vice-president and general manager, J. O. McCarthy, ex-controller city of Toronto; three other vice-presidents, Victor Morin, LL.D., notary public, Montreal; W. W. Hiltz, builder, Toronto, alderman city of Toronto; and W. O. McTaggart, Toronto, ex-chairman Board of Education; medical referee, Capt. R. J. Wilson, M.D.; secretary and actuary, John P. P. Oliver, A.A.S. Directors—Col. J. B. Miller, president and general manager Polson Iron Works, Limited, Toronto; T. J. Dillon, president and general manager Canada Forge Company, Welland, Ont.; H. C. Scholfield, president Page-Hersey Iron, Tube and Lead Company, Limited, Toronto; H. Waddington, managing director Standard Reliance Mortgage Corporation, Toronto; B. F. Ackerman, Peterboro', wholesale harness manufacturer; W. H. Elliott, B.A., Ph.B., Toronto, inspector public schools; J. P. Laporte, M.D., Joliette, Que.; J. F. Brown, president Brown's Copper and Brass Rolling Mills, Toronto; and John W. Russell, M.D., physician, Toronto.

The company is now well organized to commence an active campaign for the writing of new business. The agency organization is steadily improving. The new business in January, 1918, was double that of the same month last year.

MONTREAL STOCK EXCHANGE

Protecting The Interests of "Victory Bond" Holders

¶ To prevent a needless decline in the market value of Victory Bonds which probably would have happened without some organized method of handling the initial transactions, the Government has appointed the Victory Loan Special Committee. The members of the Montreal Stock Exchange are co-operating with this Committee, through whom all buying and selling orders must pass.

¶ The present market price for all issues of Victory Bonds is 97⅞ and interest to 98⅞ and interest, which is approximately equivalent to the price at which the Bonds originally sold.

¶ When you consider that prior to the war investors were glad to get Government Bonds that would yield 3% - 4% interest, you will realize the value of investing in a security of this nature which pays interest at the rate of 5½%. Many people realize this and are desirous of adding to their holdings of Victory Bonds.

¶ If you desire to purchase, or if you find, through force of circumstances, it is necessary to sell your Victory Bonds, any member of the Montreal Stock Exchange will conduct the transaction for you and you are assured of obtaining the true market value.

No matter in what part of the country you live your orders will receive prompt attention. Communicate by telephone, telegraph, or letter, with the Secretary of Montreal Stock Exchange. Room 438, Stock Exchange Building, Montreal, P.Q.

STEEL SHIPBUILDING PLANT IN NOVA SCOTIA

Provincial Government Says Matter is for Dominion Government—Rolling of Plates

The shipbuilding commission appointed in May, 1917, by the Nova Scotia government to investigate the possibilities for the shipbuilding industry in that province has made its report. The conclusion arrived at is that the encouragement of the steel shipbuilding industry and the measures to be taken for its development and growth is a matter primarily and essentially for the Dominion government. The report reads in part:—

"Reports received by the commission from the different shipbuilding districts indicated that the resources of the province, in suitable yards and labour, were pretty fully employed. Subsequent visits by the commission to several districts in various parts of Nova Scotia confirmed this information, and also afforded a first hand opportunity for observing the superior skill of the workmen, and for inspecting well designed vessels of different sizes and in all stages of completion. It is estimated that the vessels completed in Nova Scotia in 1917 reached 20,000 registered tons, at a cost of $2,500,000. This quite considerable production was carried out on the resources of the builders themselves, save where, in rare cases, banking accommodation was temporarily required; but, in no instance was it represented to the commission that any financial assistance was either desired or required from the province.

"On the date of this report, according to our best information, ship construction in Nova Scotia, exclusive of fishing schooners, amounted to 30,000 tons.

Steel Shipbuilding Outlook.

"The inquiries and efforts of the commission have been chiefly taken up with steel shipbuilding, and at the outset its members were in general agreement that the policy it should recommend was the establishment of one, large, well-equipped yard in preference to several small ones. The best advice obtainable was also in the same direction, and was, moreover, in full agreement with the commission's own views that every effort should be made to encourage the participation of established shipbuilding firms of undoubted standing in the province. This, in due time, led to negotiations with William Beardmore and Company, Limited, of Dalmuir, Scotland, which is one of the largest and most reputable firms on the Clyde. That company contemplated associating with it in the Nova Scotia enterprise, two other British shipbuilding firms, and one of the largest Canadian corporations. These negotiations were carried on until the end of August, when, on behalf of the syndicate T. S. N. Dickson, representing William Beardmore and Company, Limited, stated to the commission that the associated companies had arrived at an agreement, if the subsidies to be offered by the province and municipalities were satisfactory, to establish a steel shipbuilding plant in Halifax harbor at an initial cost of $4,000,000.

Negotiated With Big Concern.

"The time had thus arrived for the commission to decide on its financial policy, and, after full consideration of the measure of assistance which it could recommend for this proposal, or for any other bona fide proposition which might thereafter be made to it for building steel ships in any part of Nova Scotia, the commission, after consultation with the government, finally embodied its policy in the following telegram which was dispatched to Mr. Dickson on 3rd August, 1917:—

" 'On the understanding that the principals you represent will make an initial investment of $4,000,000 in a steel shipbuilding plant in this province, the Nova Scotia Shipbuilding Commission will recommend to the provincial government that a subsidy, at the rate of 10 per cent. of that investment, or $400,000, shall be offered to the Steel Shipbuilding Company which will be organized by your principals, the said subsidy to be paid to the company on completion of each vessel, at the rate of $5 per ton gross register until the total subsidy shall have been exhausted. It will, therefore, follow that if the initial investment falls short of $4,000,000, the subsidy which this commission will recommend that the provincial government shall then offer will continue to be at the rate of 10 per cent. on that actual investment. The object of this offer on the part of the commission is to promptly assist the prevailing acute situation in shipping, and it is understood that we will receive a reply from your principals within thirty days and that bona fide operations in the construction of the shipbuilding plant will commence promptly, with a view of producing tonnage within twelve months from this date.'

"The chairman of the commission, who was in England on private business, visited the works of William Beardmore and Company, Limited, in the end of August, when he learned that circumstances of pressing importance, then arising from war exigencies, rendered it impossible, for the time being at least, for that firm's British associates to complete the agreement to establish in Nova Scotia. This failure at the last moment was a great disappointment to the commission, as it was also to Sir William Beardmore, who throughout evinced a deep personal interest in the project. His company, however, stands ready to consider any fresh proposals which may hereafter be made to it, provided the restrictions imposed by the British government on operations or investments outside of the United Kingdom, on the part of British subjects, will not render this impossible.

Proposals from Many Points.

"During all this time numerous inquiries came to the commission from parties in Canada and the United States, but, as a general thing when traced back, these proposals were not of a character of which the commission would approve. Even in Nova Scotia itself we did not discover that there was any capital awaiting investment in this industry; and the outsiders who corresponded with us, or who visited Nova Scotia, with but only a few exceptions, were apparently only willing to embark on the enterprise if the province and municipalities furnished the capital.

Key to Situation.

"The key to the Canadian situation appeared to the commission to lie in providing in Canada itself for the rolling of our own ships' plates, and the very first act of the commission was to make such a representation to the Canadian prime minister, to the Dominion Iron and Steel Company, Limited, and to the several federal members from the province of Nova Scotia."

The report then gives the correspondence in this connection.

"Doubtless there were many and weighty reasons why no action was taken at the time, and for the commission's representations being unavailing, but in the light of events meanwhile, we cannot but think it would have been sound policy then to prepare to roll plates in Canada. The admiralty controller has advised: 'It would be of great service if arrangements could be made whereby ships' plates could be rolled in Canada,' and the British minister of shipping has expressed himself as wanting to arrange for the building and purchase of further ships in Canada in addition to those now under construction. We think we are warranted in saying that the industry in Canada, prior to the war, was very much neglected, but due credit must be given to the Imperial Munitions Board for its efforts in the past three years.

Dominion Programme Inadequate.

"The Dominion government, on its own account, has undertaken a fresh programme of building steel ships in the various existing yards. This, it is reported, will involve an expenditure of $40,000,000, but we are of opinion that this programme is inadequate, inasmuch as no provision is made for starting the industry on the Atlantic coast. It is there we submit that at all times, particularly while the war lasts, and during the period of demobilization, that the maritime interests of Canada will mainly centre, and we would therefore respectfully urge the claims of Nova Scotia in this regard upon the attention of the government at Ottawa.

Nova Scotia's Claims.

"Many obvious difficulties will surround a permanent steel shipbuilding industry, but these will be less on the Atlantic than in any other part of Canada. Nova Scotia is rich in raw materials, can easily be equipped to furnish fabricated parts and offers a choice of more than one excellent location for a shipyard. The workmen of the province, who have shown such well tested skill in building wooden ships, can, we are confident, also build ships of steel. This, if proof were needed, has been demonstrated at New Glasgow, where, under the direction of Colonel Thomas Cantley, the Nova Scotia Steel and Coal Company, Limited, has completed and placed in commission one fine vessel, will soon be ready to launch a second and larger one, and a third of the same class is well under way.

"We would observe in conclusion, that, while in our judgment, under present industrial and financial conditions, nothing less than co-operation on the part of the Dominion government will be adequate to establish a steel shipbuilding industry on a permanent basis in Nova Scotia, yet, the commission's firm conviction is that the action of the government of this province in setting on foot this enquiry cannot but result in much good."

SEVEN YEARS SENTENCE FOR ARSON

Ontario Fire Marshal's Investigation into Bowmanville Fire—Statement of Prisoner

The Ontario fire marshal, Mr E. P. Heaton, has furnished *The Monetary Times* with the following interesting particulars of a case of arson in that province:—

On Wednesday, February 13th, Deputy Fire Marshal George F. Lewis commenced an investigation into the cause, origin and circumstances of a fire which occurred in the premises of William Tordiff, Bowmanville, on the morning of Tuesday, February 5th, 1918.

Twenty-six witnesses, including Mr. and Mrs. Tordiff, appeared on subpoena and were examined by Mr. Lewis in the courthouse. As a result, information was laid against Tordiff and Chief Constable Jarvis placed him under arrest that evening on the charge of arson.

Tordiff is a man about 55 years of age and owns 12 dwellings in Bowmanville, a ten-roomed home on a half acre lot in Enniskillen and a farm in Darlington. In September, 1915, the dwelling barn, etc., at the farm were burnt. Tordiff collected the insurance at the time, amounting to $1,725. He did not replace the buildings.

On the night of November 28th, 1917, an unoccupied dwelling owned by Tordiff in the "Flats" in the town ot Bowmanville was burnt under mysterious circumstances. Numerous footprints were found in the snow and the marks of where a horse and rig had been tied to a fence some distance away were also noticeable, but it was impossible to trace the destination of the horse and rig. Tordiff collected the insurance money amounting to $950.

About seven years ago Tordiff bought the four southerly houses in a block of six known as "Rice's Terrace," on Brown Street, Bowmanville, for $2,500. These four houses have been vacant since last fall. Tordiff had been living with his family at their home in the village of Enniskillen up to January 16th, when he moved into the southerly house in the terrace on the corner of Brown and Queen Streets, where he occupied one room, although there was no coal stove or furnace heat in the house. He brought with him a small quantity of furniture, including bed and bedding, a coal oil cooking stove, a 5-gallon coal oil can, two chairs, etc.

On January 18th, he wrote the mayor offering to sell the property to the town. According to the evidence he made a statement that if he could not rent the houses they could burn, etc. On February 4th, Tordiff's letter was presented to the council, received and filed without action or recommendation. Early the following morning the fire occurred.

Smell of Coal Oil.

Entering the back room from a hallway, it was noticed by the investigators that a separate and distinct fire was set in this room and did not communicate or connect up with the more serious fire which completely destroyed the centre pair of houses in the block, separated from the two end pair by fire walls. It would appear that "plants" had been made and fires started in various parts of the houses destroyed. The smell of coal oil was distinctly noticed by the people in the house north of Tordiff's when the fire was discovered, and also by the firemen. One of the first to see the fire also stated that the flames on the ground floor where the fire was burning fiercest resembled those produced by wood saturated with coal oil.

Statement by Tordiff.

After spending the night in confinement Tordiff sent for the chief of police stating that he wanted to confess having set the fires, and after being duly cautioned by Chief Jarvis, he made the following signed statement:—

"Bowmanville, February 15th, 1918.—I, William Tordiff, of the Village of Enniskillen, County of Durham, hereby confess and admit that I burned the houses owned by me on Brown Street in the Town of Bowmanville. I also admit that I burned the house owned by me in the 'Hollow' in the said Town of Bowmanville on the 28th day of November, 1917. I did all this because I was pushed for money to pay taxes and other debts. When I burned the house known as the house in the 'Hollow,' I drove from Enniskillen in the night time by a back road and returned the same way after burning the house. (Sgd.) Wm. Tordiff. Witness: (Sgd.) Richard Jarvis, Chief Constable."

There was $2,800 insurance on the Brown Street buildings and only $900 blanket mortgage on all the property owned by Tordiff in the town of Bowmanville. Wm. Tordiff appeared before Magistrate Horsey in Bowmanville on February 15th, and pleaded guilty to the charge of arson and elected to be tried by the magistrate. He, however, was remanded for sentence until February 23rd, when he again was remanded for sentence until March 2nd.

Sentenced to Seven Years.

On Saturday, March 2nd, Tordiff was sentenced at Bowmanville by Police Magistrate W. M. Horsey to seven years in the provincial penitentiary at hard labor. Before being sentenced, Tordiff utterly repudiated his signed statement and flatly denied his guilt.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railroads for the first two weeks in March:—

Canadian Pacific Railway.

March 7	$2,617,000	$2,422,000	+ $175,000
March 14	2,496,000	2,670,000	— 174,000

Grand Trunk Railway.

March 7	$1,122,582	$1,063,190	+ $ 59,392
March 14	1,135,553	1,068,837	+ 66,716

Canadian Northern Railway.

March 7	$ 666,400	$ 669,100	— $ 2,700
March 14	733,000	738,200	— 5,200

Results of operations of the Canadian Pacific Railway Company for the year ended December 31st last were:—

Gross earnings from railway and lake and coastal steamers, $152,389,334.

Working expenses, $105,843,316.

Net earnings from railway and lake and coastal steamers, $46,546,018. Deduct fixed charges, $10,229,143.

Surplus, $36,316,873.

Deduct contribution to pension fund, $500,000.

Deduct net earnings of coastal steamers, commercial telegraph and news department, transferred to special income account, $1,968,683.

Net revenue from earnings of railway and lake steamers available for dividends, $33,848,192.

After payment of all dividends declared for year, the surplus from earnings of railway and lake steamers is $12,420,915.

Specal income for year, after making allowances for contingent reserves, $10,713,299.

Both the gross and the net earnings of the Canadian Northern Railway System showed a decline in the month of January. The gross earnings were $2,715,300, a decrease of $117,300. The operating expenses, which were increased by $939,800, aggregated $3,290,300, thus indicating a deficit of $575,000. The earnings for the month of January compare as follows:—

	1918.	1917.	Decrease.
Total gross earnings..	$ 2,715,300	$ 2,832,600	$ 117,300
Operating expenses ..	3,290,300	2,350,500	*939,800
Net earnings	....	482,100	....
Deficit	575,000	....	1,057,100
Aggregate gross earnings from July 1st..	24,572,100	24,464,100	*108,000
Aggregate net earnings from July 1st..	2,760,100	6,778,200	4,018,100

*Increase.

The New York office of Wood, Gundy and Company, bond brokers, Toronto, has been closed temporarily. In advising their United States' clients of this, the company says: "Having regard to the heavy financing which the government of the United States has to face, and their consequent wish that the United States market be left as free as possible for this war financing, we have decided to temporarily discontinue the use of our New York office. Not only do we feel that it would scarcely be in keeping with the wishes of your government for us to press the sale of Canadian investments as we have heretofore done, but the numerous enlistments which are taking place from our Canadian staffs make it difficult to adequately maintain some of our offices. It is our purpose, just as soon as conditions permit, to reopen our New York office."

DIVIDENDS AND NOTICES

THE MONTREAL CITY AND DISTRICT SAVINGS BANK

Notice is hereby given that a Dividend of two dollars and thirty cents per share on the Capital Stock of this Institution (65% paid up) has been declared and will be payable at its Head Office, in this city, on and after Tuesday, the second day of April next, to Shareholders of record on the 15th day of March next, at three o'clock p.m.

By order of the Board.
A. P. LESPERANCE,
Manager.

Montreal, February 25th, 1918.

Nanaimo, B.C.—March 6—Building and contents of the Pioneer Bottling Works Company on Wallace Street were damaged. Estimated loss, $500.

Newcastle, N.B.—March 11—House on Mitchell Street, owned by the Canadian Gear Works Company and occupied by Walter Delano was destroyed. Estimated loss, $800.

New Liskeard, Ont.—March 14—Home of Mrs. Hamilton was destroyed.

North Saanich, B.C.—March 12—Farm building and implements of Capt. A. D. Macdonald were damaged. Estimated loss, $3,000.

Penhold, Man.—March 12—Residence of W. Grier and hotel, owned by J. Conroy, were damaged. Estimated loss, $6,200.

Ridgetown, Ont.—March 9—Building on M. J. H. Wilson's farm was destroyed.

Sandwich, Ont.—March 14—Barn on the farm owned by William Harding was destroyed. Caused by bolt of lightning. Estimated loss, $1,000.

Terris, Ont.—March 10—Home of Alex. Rankin was destroyed.

Toronto, Ont.—March 14—The warehouse of B. M. and T. Jenkins Antique Furniture Company was destroyed. The building is owned by John Turner and Sons, and the loss is estimated at $4,000. Insurance on stock is carried to the amount of $50,000.

March 19—Breen's drug store at 216 Queen Street East was damaged. Estimated damage to contents, $1,700; to building, $300. Premises of the Kew Printing Company, 58 Colborne Street, were damaged. Estimated loss, $400. The Hotel Krausmann, at the corner of King and Church Streets, was damaged. Estimated damage to building, $3,000; to contents, $1,000.

Treherne, Man.—March 13—Building of the Winnipeg Oil Company was destroyed. The cause reported is incendiarism.

Vancouver, B.C.—March 14—Home of J. Bevins, Fourteenth Avenue West and Trimble Street, was damaged. Estimated loss, $15,000.

Winnipeg, Man.—March 16—The Alhambra Auditorium on Fort Street was damaged. Estimated loss, $5,000. Insurance carried was $30,000.

LARGE RAILWAY EQUIPMENT ORDERS

The Canadian Car and Foundry Company will participate to the extent of about $16,000,000 in new orders for railroad equipment placed by the Dominion government on Monday. The orders amount in all to about $22,500,000, the bulk of the equipment, particularly box and ballast cars, to be for the Canadian Northern Railway. The allotment of this large order made is on the following basis:—

Canadian Car and Foundry Company—5,000 forty-ton steel-frame box cars, 450 forty-ton wood ballast cars and 300 thirty-ton stock cars, making a total of about $16,000,000.

Eastern Car Company, Trenton, N.S.—750 forty-ton steel flat cars and 650 fifty-ton steel coal cars, making a total of $3,750,000.

National Car Company, Hamilton—1,000 forty-ton steel-frame box cars, amounting to about $2,750,000.

Other cars, including refrigerator, tank and passenger cars, are not yet awarded. There is in contemplation also the awarding of 150 locomotives, and will possibly be awarded as follows: One hundred to the Montreal Locomootive Works and fifty to the Canadian Locomotive Company.

SOO RAILWAY ISSUES BONDS

William A. Read and Company and Tilney, Ladd and Company are offering $840,000 of Minneapolis, St. Paul and Sault Ste. Marie Railway Company's first consolidated 5 per cent. gold bonds, due July 1st, 1938, at 96¾, and interest, to yield about 5¼ per cent. These bonds are legal investments for savings banks in New York, Massachusetts and Connecticut. They are secured under the same mortgage as the "Soo" consolidated 4 per cents., which are selling at a price to yield about 5.17 per cent.

This is one of the first, if not the first, railroad bond issue to be put out since the United States took over the control of the railroads. Bankers offering the bonds have consulted with William G. McAdoo, the director-general of railroads, and he has stated that he saw no objection to the sale of the bonds at this time.

The Canadian Pacific Railway owns the majority stock of the company.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4 c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent extra if charged.

MOOSE JAW RENTAL AGENTS.—The Ralph Manley Agency, Limited, Walter Scott Block, Moose Jaw, handle the renting of Moose Jaw Improved City Property. Their facilities permit them to rent and re-rent property as well as looking after collections and any necessary repairs. Established 1908. Correspondence solicited.

BOOKKEEPER, ACCOUNTANT, BANKER, OFFICE MAN.—Become an expert in your chosen profession. The demand for high-grade trained men is keen. The trained man is not only able to respond and make good when opportunity presents itself, but has the power within him to create opportunity. Mail instruction in Higher Accounting, Chartered Accountancy (C.A. Degree of every province), Banking (Degree of Canadian Bankers' Association), Auditing, Business Law, Cost Accounting and Bookkeeping. Satisfaction assured—highest endorsements of successful students. We also teach—Commercial Art—Advertising—Show Card Writing—Salesmanship—Story Writing and Journalism—Civil Service and all Commercial Subjects. Write us for particulars (Department M.T.) Shaw Correspondence School, Toronto.

The Security Life Insurance Company of Canada

At the recent Annual General Meeting of the Security Life Insurance Company, much satisfaction was expressed with the Statement of the Company's business for 1917. Substantial gains in Income, Insurance in Force and Assets were reported.

While the Net Premium Income and Interest Income increased in 1917, the actual expenses for all purposes were $8,325 less than in 1916, and $15,906.23 less than in 1915.

Of the Invested Assets of the Company, 94% is held in Dominion of Canada War Loan and Municipal Bonds and Debentures.

The agency organization of the Company is steadily improving. The new business to date for 1918 is very substantially ahead of the same period of 1917.

The Security Life Insurance Company is the only Canadian Company, under Dominion License, confining its business to Non-participating or entirely Guaranteed Policy contracts. These definite policy contracts with Guaranteed Values and Guaranteed Results are in keeping with the preference of the most careful insurers, and leave no room for disappointment to the Policyholder or fault finding with the faithful Agent.

By Special Act of Parliament in 1917, the Company was permitted by By-law to increase the number of Directors from nine to fifteen. The By-law was ratified at the Annual Meeting. As a result, a number of gentlemen, prominent in the financial and business affairs of the country, were added, and the Company now has a strong Board of Directors much interested in building a company along the lines being followed.

Full particulars as to rates and guarantees for "ALL GUARANTEED POLICIES" will be furnished.

CANADA HAS SHIPBUILDING ORDERS OF $64,500,000 IN HAND

Details of the Canadian government's plan for assisting in meeting the need of the Allies for merchant ships were given by Sir Robert Borden in the course of his speech in the Commons on Tuesday. Already much has been done in the Dominion by the Imperial government through the Imperial Munitions Board Orders have been placed by the Imperial Munitions Board for forty-three steel ships, with an aggregate tonnage of 211,300 tons, and forty-six wooden vessels, with a total tonnage of 128,400 tons. The total value of these vessels is $64,500,000. Twelve shipyards are now working on orders from the Imperial Munitions Board, and their capacity is being brought up to approximately 250,000 tons a year.

Berths vacated by the completion of ships ordered by the Munitions Board will be utilized at once by the Dominion government. Four cargo steamers with a total tonnage of 23,500 tons are to be completed and placed in commission this year. Next year, however, fifty steel ships are to be constructed. For the present year, the government has authorized by order-in-council an expenditure of $25,000,000 on shipbuilding. During his speech the prime minister expressed his thanks to the United States government for its action in providing that the Canadian government might obtain in that country 80,000 tons of ship plates and angles to meet shipbuilding requirements for this year. These materials are to be supplied at the same prices at which they are supplied to the United States government. The prime minister also told of the efforts being made by the government to bring about the establishment of a mill for the rolling of steel ship plates and angles in Canada in order to supply requirements in 1919 and in succeeding years.

In a communication to Hon. George P. Graham, as a member of the Brockville, Ont., board of trade council, Hon. C. C. Ballantyne states that the government does not intend establishing any shipyards. The present programme of construction contemplates awarding contracts to yards that are at the present time engaged in construction of steel ships for the Imperial Munitions Board. No assistance of any kind is being given towards establishment of new yards, nor does the programme include the construction of any wooden vessels. As the vessels are completed and the berths become vacant, contracts will be placed by the government for a certain type of ship of either three, five or approximately eight thousand tons.

AMERICAN INSURANCE COMPANY

The American Insurance Company, of Newark, N.J., was chartered in 1846, and its latest annual statement indicates that a strong financial position has been built up during its long and honorable career of seventy-two years. The company is represented in Canada by its general agents for this country, the Insurance General Agency Company, Limited, Winnipeg, of which Mr. C. S. Riley is manager and Mr. W. J. Snaddon is assistant manager. The company's balance sheet, just issued, shows the following figures:—

Capital stock, $2,000,000; liabilities, $6,966,335; special reserve fund, $300,000 and net surplus, $2,836,003.

Assets.—Railway and other bonds and stocks (excluding excess of special deposits), $7,382,452 bonds and mortgages, $1,825,731; real estate, $497,900; cash in banks and office, $941,761; interest and rents due and accrued, $95,958; and premiums and reinsurance in course of collection, $1,358,534. Total, $12,102,338.

Liabilities.—Unearned premiums, $6,246,164; unadjusted losses, $489,507; and other liabilities, $230,663. Total, $6,966,335.

AUTOMOBILE INSURANCE

A valuable paper on automobile insurance was read by Mr. Virgil M. Kime, A.B., F.A.S., actuary, casualty department of the Travelers Insurance Company, Hartford, Conn. Mr. Kime is a prominent actuary, for several years connected with the life insurance business. His presentation of this comparatively new and important subject, both from a statistical and practical standpoint, was both interesting and instructive.

INCOME TAX COLLECTION

The following letter has been addressed to the finance minister by Mr. H. Williams, mayor, Fort Frances, Ont. :—

"I take the liberty of offering a few suggestions that may simplify the practical working of the above act.

"1. That the ordinary municipal organization for the collection of taxes should be used for the distribution of the forms for information required for individuals under the act. The town clerk who prepares the tax collectors' rolls is officially in possession of the necessary information in regard to those who are liable for this income tax. The postmasters through whom the forms are at present distributed has not this information and would have to make a search through the whole assessment roll to obtain it. He is, as a rule, quite busy with his own duties, and the larger the town the less likely he is to be in touch with the financial standing of ratepayers.

"2. I think a small fee should be paid the clerk for the extra work entailed, as no doubt, in many instances, he will have to explain and fill in the forms as to the ordinary ratepayer, the filling in of any forms is confusing.

"3. A copy of this act 7-8, Geo. V., Chap. 28, should be furnished each person subject to this act, as very few will have available the necessary information referred to in the forms on page 4, nor does it state on these forms to whom they are to be returned.

"4. I think the forms should be returned free of postage.

"I am informed that the United States Federal authorities send instructors to the different towns, and in conjunction with the municipalities hold public meetings and explain the proper methods of making out income returns. This on its face is a good method, but no doubt entails considerable expense. Perhaps equal results at less expense could be obtained by issuing a typical sample form already filled in, as a guide to the person making the return."

CANADIAN PACIFIC RAILWAY MUST PAY HEAVY TAX

The granting by the government of the 15 per cent. increase on all freight and passenger traffic in Canada, effective at once, as a temporary measure of relief to the railways, pending "further study" of the permanent solution of the "huge and complex" railway problem, was officially announced on March 14th.

Coupled with the granting of the increase as ordered by the Railway Commissioners last January, and held up until now pending the appeal of the westerners to the cabinet, there is a special tax imposed on the Canadian Pacific Railway Company, which provides that all the increased net revenue which accrues to the company through the increase in rates, over the revenue of 1917, shall be returned by the company in the form of taxation to the Federal Treasury. The amount of this special tax on the Canadian Pacific Railway shall in no case be less than seven million dollars per year, unless as is very unlikely, the total net revenue of the company from all sources is not sufficient to pay the normal dividend of 10 per cent. Just what the total amount of the taxation will be is, of course, dependent on the uncertain traffic volume from now on, the greatly increased costs of operation, equipment and maintenance, etc., all of which make it difficult to estimate even approximately the net revenues of the company for the next two or three years. But, in any event, the provision that the government shall take, in addition, 50 per cent. of all net earnings on the transportation system over and above the amount required to pay the normal 7 per cent. on common stock alone, makes it pretty certain that the Canadian Pacific Railway will have to draw fairly largely on its income, apart from operating revenue, to keep up the full 10 per cent. dividend.

Moreover, in addition to this, the company is still subject to the provisions of the Income War Tax of 1917 in regard to all earnings from "special income."

The Interstate Commerce Commission tentatively approved on Wednesday the application of Canadian carriers for increased class rates on hauls from eastern points in the United States to the western part of the Dominion. The advance reflects increases granted the carriers by the Canadian Commission.

Canada's War Bonds

Toronto is by far the largest bond market in Canada and trading in the different issues of war bonds centres here.

The Canadian Government makes a practice of listing its war bonds on the Toronto Stock Exchange and recently warned Victory Bond holders that many were selling their bonds to irresponsible dealers at below the market price.

By dealing with a member of the Toronto Stock Exchange the price, either buying or selling, will be the best market price.

Any Member of the Toronto Stock Exchange can buy or sell any security for which there is a market anywhere in the world.

PERSONAL NOTES

MR. G. J. A. LANSKAIL, of the Canada Life's Regina office, was lately elected secretary-treasurer of the Underwriters' Association there.

MR. D. MACKENZIE McCLELLAND, resident partner of Price, Waterhouse and Company, Toronto, left Toronto on Monday, to join the staff of overseas minister of militia in London, England. During his absence the Toronto business of the company will be in charge of G. G. Rowbotham, C.A., formerly manager of the company's Winnipeg office.

MR. W. R. FLEMING, who has recently been on the staff of Brent, Tovell and Company, stockbrokers, Toronto, has been appointed permanent secretary of the Bond Dealers' Association of Canada. Mr. Fleming obtained his knowledge of the bond business in the office of G. A. Stimson and Company. He has had also general business experience and is well qualified for his new position.

MR. W. P. HINTON, vice-president and general manager of the Grand Trunk Pacific Railway, has been appointed general manager of the Grand Trunk Pacific Development Company, at Winnipeg. This company is an integral feature of the Grand Trunk Pacific proper, and has under its purview the sale and development of town sites along the line, the building of hotels, wharves, steamships and so forth. It is unique in the history of modern railways in this respect, that the company operates wholly for the benefit of the Grand Trunk Pacific, and not for the profit of any individual.

MR. FRANK A. ROLPH (Toronto), Mr. Ross H. McMaster (Montreal) and Mr. A. H. Scott (Montreal), have been appointed by an order-in-council members of the Canadian War Mission in Washington. Mr. Rolph is managing director of the lithographing firm of Rolph, Clark, Stone, Limited, Toronto, and is a well-known business man of Toronto. For the past two months he has been associated with Mr. Lloyd Harris in the Canadian War Mission at Washington. Messrs. Rolph, McMaster and Scott are to deal with all United States munition contracts to be awarded to Canada. Mr. Lloyd Harris, already chairman of the War Mission, will be chairman of this special board, and Mr. Rolph vice-chairman. Mr. Scott has been handling transportation matters at Washington for the War Mission.

MR. J. E. ALDRED, president of the Shawinigan Water and Power Company and the Laurentide Power Company, which are co-operating forces in the hydro-electric field, along with the Montreal Light, Heat and Power Company as a distributing factor, has been an outstanding figure in hydro development in Canada, and more particularly the province of Quebec, for a number of years. The enterprises with which he is so prominently associated have made such progress that he was able to make the proud boast at the recent annual meeting that the Shawinigan-Quebec power field has wrested the premier place from the Niagara development and made the group which he heads the biggest and best in Canada. Besides a number of other Canadian connections in an industrial and financial way Mr. Aldred is associated with a number of American public utilities with which his New York banking house has been associated in financing.

PUBLICATIONS RECEIVED

Insurance.—Abstract report of the superintendent of insurance, Ontario, being a tabulated summary of the statements made by insurance companies for 1917. Issued by the Superintendent of Insurance, Parliament Buildings, Toronto.

British Columbia.—The new directory, "The Industries of British Columbia," just off the press, is a valuable work of reference. It shows that the province of British Columbia has made remarkable strides in manufacturing, and that our Pacific Coast country is enjoying a very fair measure of prosperity. The directory is edited by J. H. Hamilton, and is published for the Manufacturers' Association of British Columbia. A supplement will be issued every six months, bringing the list of manufacturers up to date, a very useful feature.

"The Industries of British Columbia." Issued by J. Reginald Davison, industrial commissioner, Vancouver. Price, $1.

CANADA'S FOREIGN TRADE

February Returns Reflect Expansion—Necessity for United States Credits

Commenting upon the trade returns for February, printed on another page of *The Monetary Times*, the Montreal Gazette says:—As anticipated, the foreign trade of Canada expanded in value in February. In the preceding month there had been a decline of nearly $15,000,000 owing principally to transportation difficulties occasioned by adverse climatic conditions, the foreign trade of the United States also appreciably falling off from a like cause, but with the advent of better weather traffic has moved more freely. Imports, however, are still on the down grade, imports into Canada for consumption having been in the last three months:—

	1917.	1918.
December	$67,900,500	$61,634,600
January	72,323,000	60,677,400
February	68,030,400	52,206,400
Totals	$208,253,900	$174,518,400

This is a sharp recession in imports, 15 per cent., following many months of continuous increase, and is attributable not to decline in prices of commodities, but to the difficulty of obtaining goods and transportation.' About one-half of the three months' decrease occurred in February, and was presumably caused by interrupted railway carriage from the United States whence the great part of Canadian imports is derived. This drop is reflected in customs revenue which was reduced last month by $2,000,000 from the like period a year ago.

Export Side of Account.

The export side of the account is more satisfactory, the value of domestic products shipped abroad having mounted up from $68,224,000 in February, 1917, to $86,361,000 last month, or by upwards of 26 per cent. In January there had been a falling off of $3,000,000 in domestic exports. The gain last month was principally in agricultural exports, presumaby wheat and flour, the value of these having been $28,089,000, or $16,640,000 in excess of shipments in the like month a year ago. The export of produce of the fisheries was $2,680,000 more, and of animals and produce $3,266,000 more than last year. On the other hand, the export of manufactures was $5,158,000 less than in February, 1917. This is a smaller decline than was recorded in the two preceding months, the export of manufactures dropping $20,600,000 in December, and $9,400,000 in January from the figures of the preceding year. The inference appears to be that the output of munitions is slowing down from the termination of contracts, and the absence of renewals, a conclusion foreshadowed by a great increase in munition production in Great Britain. The receipt of orders from the United States has probably prevented an even larger decrease in export of manufactures than has occurred.

Ahead of Last Year.

The foreign trade of Canada in the eleven months of the current fiscal year is still well in excess of the preceding year in point of value, the aggregate having been, apart from coin and bullion, $2,315,439,000 as against $1,771,955,000, showing a gain of no less than $543,500, and reaching figures far in excess of any previous record. Of this increase $132,271,000 was in imports, and $411,312,000 in domestic exports, agricultural products contributing $178,366,500, and manufactures $190,400,000, to the total expansion.

Need for Credits.

The balance of trade in favor of Canada in February, 1917, was nil, imports for consumption having equalled in value domestic exports, but last month there was an excess of exports of $33,000,000. The favorable balance in the eleven months is very large, much beyond any precedent, imports having aggregated $875,266,000 as compared with exports of $1,440,172,000, leaving a balance due Canada of nearly $565,000,000, as against $285,965,000 in the corresponding period of the preceding year. As the vast proportion of exports was to Great Britain, and of imports from the United States, the exchange market for New York funds has been seriously disturbed, the premium having risen as high as 1⅝ per cent., and no immediate restoration of normal rates seems probable unless the Canadian government succeeds in establishing a substantial credit in New York. Until this is done Canadian importers of American products must sustain an appreciable loss in making payments for merchandise.

HEAD OFFICE - TORONTO, CANADA

"Representing The Mutual Life of Canada"

Efficient representatives of our Company will be found in every important centre in the Dominion and in the Island of Newfoundland. Their motto is "Service" and they will gladly furnish any needed information regarding Life Insurance in general and Mutual Life Insurance in particular. The Company issues policies on every approved plan—including Endowment Policies, Monthly Income Policies, and Policies designed for the protection of Business Enterprises. It has been the aim of the Mutual Life of Canada to introduce into its contracts every modern privilege that is compatible with safety, but the distinguishing feature of the Company is Mutuality. Under this system all profit from whatever source reverts to the Policyholders and so reduces the cost of protection. We furnish—
The largest amount of protection for the least possible outlay.

UNLESS
The Great-West Life Assurance Company were providing particularly attractive policies it would not—for eleven successive years, have led all Canadian Companies in the amount of business written in Canada.

UNLESS the funds were invested at an exceptionally favorable rate it would be impossible to pay the unequalled profits that are being paid to Policyholders.

UNLESS strict economy prevailed, the advantage of these high earnings would be lost.

These and many other points of vital interest to those looking for the best in Life Insurance, are referred to in the Twenty-fifth Annual Report of

The Great-West Life Assurance Co.

NEW INCORPORATIONS

Two Large Mining Companies Receive Charters, One in Ontario and One in British Columbia

The largest companies incorporated during the past two weeks were: Montreal-Kirkland Gold Mines, Limited (no personal liability), Kirkland Lake, Ontario, $1,000,000; Glen Mountain Mines, Limited (no personal liability), Vancouver, B.C., $1,000,000; International Cordage Company, Limited, Vancouver, B.C., $1,000,000.

The following is a partial list of charters granted during the past two weeks in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The amount noted is the authorized capital and the persons named are provisional directors:—

Merritt, B.C.—Armstrong's Departmental Store, Limited, $100,000.

Vegreville, Alta.—The Ukrainian Farmers' Company, Limited, $50,000.

Fanny Bay, Vancouver Island, B.C.—McDonnell and Burke, Limited, $30,000.

Midland, Ont.—Craig-Stell, Limited, $10,000; J. S. Wilton, J. Dougherty, G. S. Dudley.

Hanna, Alta.—Fletcher Lumber Company, Limited, $50,000. Hanna Farms, Limited, $20,000.

Winnipeg, Man.—Tax Investment Corporation, Limited, $25,000; E. J. McMurray, J. F. Davidson, W. McMurray.

Oshawa, Ont.—The Dillon Manufacturing Company, Limited, $75,000; R. B. Dillon, G. R. Dillon, W. G. Henderson.

Blenheim, Ont.—The Shillington Company, Limited, $75,000; T. B. Shillington, J. W. Shillington, A. G. Shillington.

Saint-Jerome, District of Roberval, Que.—Perron and Compagnie, Limitée, $49,000; G. Perron, J. E. Perron, C. Gagnon.

Rydal Bank, District of Algoma, Ont.—The Northern Co-Operative Company, Limited, $50,000; T. Inch, W. W. Somers, J. Keast.

Kirkland Lake, Ont.—Montreal-Kirkland Gold Mines, Limited (no personal liability), $1,000,000; G. V. Cousins, S. Vineberg, R. Stuart.

Victoria, B.C.—Vancouver Island Marine Plumbing and Heating Company, Limited, $10,000. British Colonial Marine Paint Company, Limited, $25,000.

Edmonton, Alta.—Glenbrook Farm, Limited, $20,000. City and Farm Development Company, Limited, $20,000. Independent Fish Company, Limited, $20,000.

Montreal, Que.—Sophia Millenery, Limited, $20,000; Ben Capper, M. Rosen, B. Gilbert. The L'Ephiphanie Farm Company, Limited, $20,000; L. D. Levine, M. B. Levitt, L. Weiner. La Compagnie des Debentures de la Province de Quebec, $49,000; H. S. Ross, L. J. Beique, E. R. Angers. The Screen Club of Canada, Limited, $20,000; R. S. Bell, T. Byerle, E. English. High Wah Club, Limited, $5,000; L. Y. Lim, C. Bock, L. H. Yee. Metcalfe Realty Company, $45,000; G. A. Coughlin, F. G. Bush, G. R. Drennan. Travellers' Club Incorporated, $10,000; L. Fitch, I. Friedman, F. Varney. Louis, Limited, $20,000; M. Rosen, F. Perron, B. Gilbert.

Vancouver, B.C.—The Bendickson Logging Company, Limited, $25,000. Welfare Club, Limited, $10,000. Central Athletic Club, Limited, $10,000. International Cordage Company, Limited, $1,000,000. British Columbia Export Company, Limited, $24,000. Glen Mountain Mines, Limited (non-personal liability), $1,000,000. Port Edward Fisheries, Limited, $40,000. Mackenzie and Matatall, Limited, $10,000. Dempsey Logging Company, Limited, $50,000. Western Dental Manufacturing Company, Limited, $200,000. The Malaspino Fuel Company, Limited, $10,000. Western Toy Manufacturing Company, Limited, $150,000. Sayward Trading and Ranching Company, Limited, $10,000. Crowley Logging Company, Limited, $10,000.

Toronto, Ont.—Aberdeen Realty Company, Limited, $100,000; J. S. Lovell, W. Bain, R. Gowans. Auto Oil Company, Limited (no personal liability), $250,000; B. T. McAvoy, E. Barry, L. Sleeth. Bisco Doll, Limited, $40,000; M. Magi, M. Hands, J. W. Potter. Buckels, Limited, $40,000; E. J. Buckel, H. Buckel, E. W. Buckel. Consolidated Lumber Company, Limited, $500,000; E. E. Earle, J. W. McFadden, C. B. Nasmith. Dominion Knitting Mills, Limited, $36,000; L. Liss, J. Y. Seltzer, M. Liss. Henderson Farmers' Lime, Limited, $40,000; C. P. Henderson, G. E. Ball, G. Armstrong. Nepigon Reserve Iron Company, Limited (no personal liability), $375,000; J. W. Newcombe, F. E. Abbott, J. R. Starr. United Inspection and Testing Laboratories, Limited, $40,000; N. H. Manning, R. J. Marshall, L. J. Rogers.

TWO MORE PROVINCIAL ISSUES

British Columbia and Nova Scotia in the Market With Bonds

Another provincial government bond issue is being offered to Canadian investors, one of $1,000,000 5 per cent. 10-year bonds of British Columbia. The interest and principal are payable in gold in Victoria, Winnipeg, Toronto, Montreal and New York. The bonds have been purchased and the offer is being made jointly by Messrs. W. A. Mackenzie & Company, and Messrs. Brent, Noxon & Company, Toronto. An outstanding feature of the issue is the fact that the province is providing out of general revenue a sinking fund which will retire the issue at maturity. The provincial government has no intention of refunding the issue at maturity, as has been the case with many of the previous issues of similar character. In view of the fact that this is a short-term issue, the present financing on the part of the province may properly be considered as very conservative financing. The bonds are being offered at 89.10, yielding 6½ per cent. to the investor. It is not unlikely that this will be the last provincial government offering sold at these rates during the current year.

Nova Scotia Issue.

Tenders for a new issue of province of Nova Scotia bonds have several alternatives. The circular calling for bids states that offers may be made for either ten or fifteen-year bonds and for either $1,000,000 or $1,500,000 of them. The interest rate is placed at 6 per cent., which is the standard for practically all provincial and city issues to-day. The bonds are exempt from all taxes levied by Nova Scotia, including succession duties. The date on which tenders will be considered is March 25th. Nova Scotia's finances are in good condition.

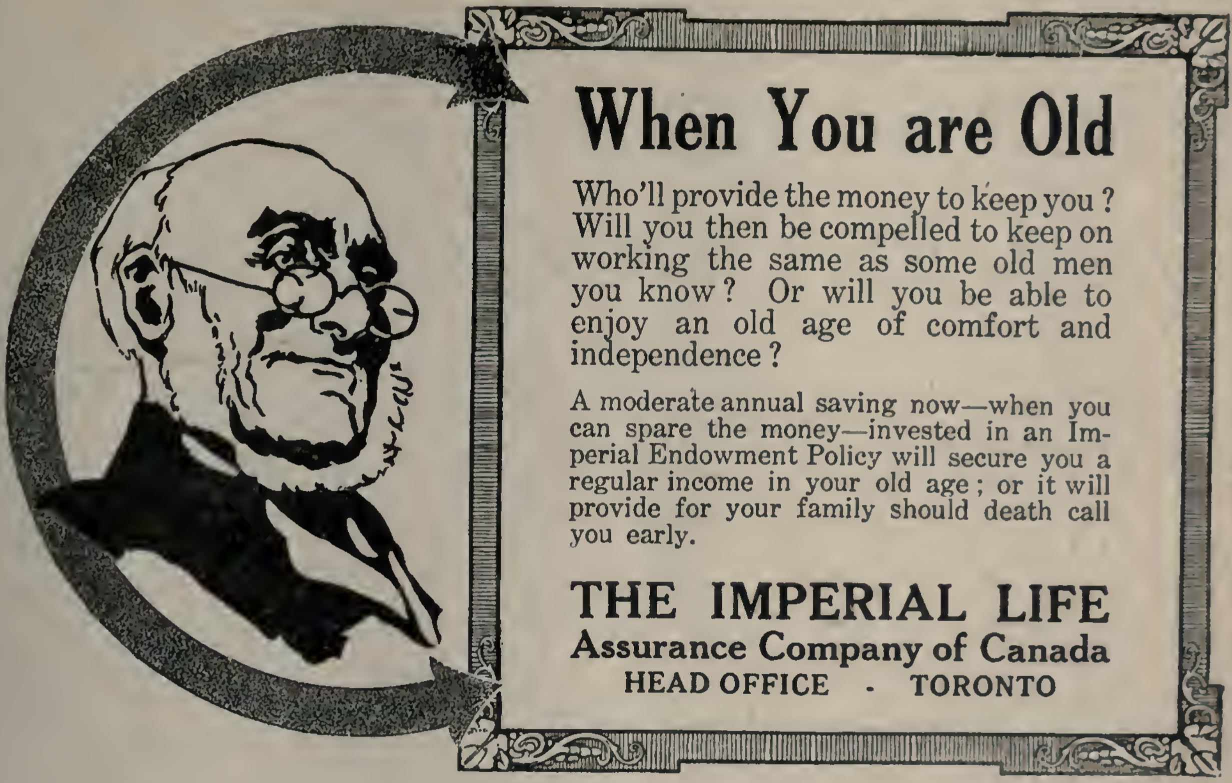
Sales This Year.

With the disposition of these two issues, six of our provinces will have marketed securities this year. The first provincial borrower was Saskatchewan, which sold $630,000 5 per cent. 15-year bonds with little publicity. The six provincial government issues to date are as follow:—

1918	Government	Amount	Securities	Rate %	Term years	Offered to Yield Investors %
Jan.	Saskatchewan	$ 630,000	Gold bonds	5	15	6½
Jan.	Manitoba	1,000,000	Gold bonds	5	2	6¼
Jan.	Manitoba	1 000,000	Gold bonds	6	10	6¼
Feb.	New Brunswick	1,000,000	Coupon gold bonds	6	10	6¼
Feb.	Ontario	3,000,000	Coupon gold bonds	6	10	6
Mar.	Brit. Columbia	1,000,000	Gold bonds	5	10	6½
Mar.	Nova Scotia	1,500,000	Gold bonds	6	10 or 15	—
		$9,130,000				

In all cases, the issues were approved by the Priority Board of the Department of Finance, Ottawa. The Saskatchewan issue was offered privately by a syndicate of bond houses and was taken in a few hours. The Manitoba issue quickly followed. The 2-year bonds were offered at 96.97 and the 10-year bonds at 98.16, both "and interest." The New Brunswick issue was made at 99.08 and accrued interest, while the Ontario bonds were offered at par. The six provincial government issues this year to date total $9,130,000, compared with $6,382,500 for the entire twelve months of 1917.

The directors of the London and Lake Erie Transportation Company, otherwise known as the Traction Company, have offered to sell to the people of London at fifty cents on the dollar. This would mean a consideration of $420,000, payable, according to the company's proposal, in city of London bonds. The rate of interest has not been stipulated.



When You are Old

Who'll provide the money to keep you? Will you then be compelled to keep on working the same as some old men you know? Or will you be able to enjoy an old age of comfort and independence?

A moderate annual saving now—when you can spare the money—invested in an Imperial Endowment Policy will secure you a regular income in your old age; or it will provide for your family should death call you early.

ONTARIO FARMERS AND BANKS

To further the Ontario government's effort to increase
oduction of food in the province of Ontario, Hon. T. W.
cGarry, provincial treasurer, on behalf of the government,
s signed an agreement with the Canadian Bankers' Asso-
ation by the terms of which farmers may secure money by
ay of loan to buy seed through all branches of banks com-
ising the association. Loans to the maximum of $200 to any one applicant may be obtained on application to branch managers up to and including July 1st, 1918, the time of repayment being set sufficiently far ahead, to November 1st, 1918, to enable the farmers to garner their crops and dispose of them to advantage. Security in the form of a promissory note will be accepted and interest at the rate of 6 per cent. will be charged. The only persons restricted from participating are those who have already received loans from the settlers' loan commissioner for the purchase of seed.

BANK CLEARINGS

The following are the bank clearings for the weeks ending March 15th, 1917, and March 16th, 1918, respectively, with changes.

	Week ending Mar. 16, '18.	Week ending Mar. 15, '17.	Changes.
Montreal	$ 70,642,097	$ 70,775,566	—$ 133,469

Mr. William McMaster, the well-known Montreal capitalist and financier, has been elected vice-president of the Asbestos Corporation of Canada, in succession to Mr. H. E. Mitchell, of Philadelphia, who remains on the board of directors.

CONDUCT OF TRUST COMPANIES

Some suggestions as to the investments of trust companies were made at the annual meeting of the London and Western Trusts Company, Limited, last month by Sir George Gibbons, president of the company. He first quoted the definition of a trust company under the act as follows:—"Trust company shall mean a company constituted or operated for the purpose of acting as trustee, agent, executor, administrator, receiver, liquidator, assignee, guardian of a minor's estate, or committee of a lunatic's estate." Section 17 of the Loan and Trust Corporations Act provides:—

"A trust company incorporated under the law of Ontario shall not borrow money by taking deposits or by issuing debentures or debenture stock, and letters patent, incorporating any such company, shall expressly prohibit it from so doing." Sir George continued:—

"The purpose of a trust company is thus clearly stated, and it also was the manifest intention of the legislature that its trusts should not include the investment of borrowed moneys. A practice has grown up, however, by which such companies take moneys and issue what are known as guaranteed receipts, in which they agree to repay the principal at fixed dates, together with interest at fixed rates. The profit which the company makes on each transaction is just the profit it would make if it were borrowing the money upon debenture at the rate of interest mentioned in the guaranteed receipt. It incurs a liability for every dollar advanced to it in this way as fully as if it were advanced upon debenture. The distinction, and, therefore, justification, for a trust company (which cannot issue debentures) issuing guaranteed receipts is that the latter are secured by the earmarking of certain investments to protect their payment. This distinction, while probably justified, is not desirable in a company whose sole operation should be confined to the purpose of acting as trustee, executor, administrator, etc.

"Some trust companies have what they call trust deposit accounts, on which cheques are issued in the ordinary way as if on savings bank accounts. This is contrary to the spirit if not the letter of the act. Our company has never taken deposits, but it has still a few outstanding guaranteed receipts, amounting in all to about $135,000, which should be retired as they mature, and no others issued. While it was desirable to limit the borrowing powers of trust companies, and while these limitations should not be evaded, it was still more important that their lending powers should be restricted to investments of undoubted stability and security.

"Sub-section 2, Section 18, provides as follows: 'A trust company may invest any money held by it, other than trust money, in any of the securities authorized in the case of a loan corporation or loaning land corporation by Section 27.' Loan societies are permitted, under Section 27 of the act, to lend money on:—

(a) "Mortgages upon real estate and upon life insurance policies.

(b) "Debentures, bonds, paid-up stock and other securities, except bills of exchange and promissory notes, of or guaranteed by any government, or of any municipal corporation or school corporation, or of any chartered bank or incorporated company, if such bank or company is incorporated by Canada, or by any province of Canada, or by any former province now forming part of Canada.

"It will be noticed that power is given to loan societies to lend their own moneys and the moneys of their depositors and debenture holders upon the debentures, bonds and paid-up stock of any incorporated company operating either under Dominion or provincial charter, and trust companies are permitted also to invest their capital and surplus in a like manner. This provision leaves the door wide open, with the inevitable result that we have failures, such as the Dominion Permanent in Toronto.

"Why should the board of directors—trustees of other people's moneys—have a right to lend upon the security of stock or debentures of a railway in British Columbia? It is doubtful whether general legislation would be passed to protect the public. Those who want a 'free hand' are strong in influence both at Toronto and Ottawa. After all the experience (which has been plentiful), this wild class of investment is still authorized by statute."

Mr. William Mulock has been elected a director of the Canadian Salt Company, Windsor, Ont.

Should Canada Have State Merchant Marine?

Basis of Support for Dominion Government's Project of a State-Owned Merchant Fleet—Our Trade after the War and the Relation of Ocean Transportation—Opportunities for Canadian Manufacturers and Agricultural Producers—Which Will be Our Best Markets?

By GEORGE W. AUSTEN

THE widespread support in Canada for the Dominion government's project of a State-owned merchant fleet is based on several convictions, chief of which are: (1) That the acute scarcity of tonnage after the war will put Canadian overseas export trade at much disadvantage unless we command a considerable marine ourselves; (2) fear that the immense new United States merchant fleet, backed by the new trade and financial position of the United States, may divert overseas trade, that ought to be ours, to United States channels and sources; (3) need of effective control of rates out of Canadian ports, to ensure no discrimination against us.

These are sound enough reasons. Certainly, when peace comes, there will be a wild scramble on the seas for foodstuffs and raw materials for industry, by those nations starving and crippled for lack of them, and also by the industrial nations to get first to the rich markets created by the shortages induced by war conditions. The shortage of tonnage in the outer seas, the curtailing of manufacture of peace commodities in Europe, financial disabilities, and "peak" prices, are combining to deprive the consuming peoples of Africa, Asia, Australasia and South America of accustomed supplies. They will be heavy buyers of manufactures when better trading conditions are restored. The question Canada has to consider is how its special trade interests will be affected, and how we may best profit out of the merry maze. A State-owned merchant fleet is likely to be one of our best insurances against being left in the lurch. We may be sure that, no matter what part Canada has played in the war, when it is over and trade considerations are uppermost, it will be a case of each nation for itself commercially.

No doubt the governments of Britain and the dominions will take prompt steps to join the Empire together economically, promoting special trade between its parts, but such arrangements will take time, perhaps several years. In the meantime, the rush will be on for new connections. Moreover, the British marine will, for a time at least, be a much smaller part of the world's tonnage than before the war. Then it had 55 per cent. of the carrying trade of the world. It carried about 70 per cent. of the United States overseas exports. Besides being forced by economic conditions to use its remaining merchant fleet to best advantage for itself, Britain will have many other calls for tonnage from around the world. In time, it is likely to reacquire its paramount shipping position, by out-competing with new possessors of large marines, but in the meantime, we should be protecting our own special interests by being somewhat independently well fixed for tonnage under our own control.

There are, however, some illusions respecting the uses and opportunities of a Canadian State merchant fleet. It is important that a true perspective be obtained regarding the part of a State merchant fleet in developing our overseas trade. The government has, on account of domestic political conditions, been able to do little yet in planning to develop new markets abroad. It is possible that the State marine might be so employed that it would be worthless for the real purpose in view. It will not do to drive away other ocean carriers. They ought to be attracted as usual, if possible, and the State ships put upon the task of creating new business for this country.

If the war goes on, until the United States mobilizes sufficient power in Europe to smash Germany into humility, we shall probably have the Canadian State fleet pretty well in commission before the end. What then? The first task will be bringing back the troops. All Canadian vessels suitable for the purpose will doubtless be so employed, along with British and American vessels in their respective spheres. But our construction programme is to be largely of cargo vessels. These will be in commercial service alone. It is a popular idea that these vessels will help us keep our war-market for manufactures. In the year before the war, our exports of manufactures amounted to $43,000,000; last year they were $475,000,000. But the increase is almost exclusively in munitions and other war supplies. It is largely financed by Canada. The stopping of this is certain, and our overseas trade in manufactures must, therefore, be almost entirely reconstructed. It is not practical for Canadian manufacturers to calculate on selling fabricated products to industrial Europe, except, perhaps, in a few exceptional lines. The burden of debt upon Europe will lead it to buy nothing abroad that it can furnish for itself. The United States may sell steel and other basic commodities of which it has an enormous production, but Europe has always had cheaper labor, cheaper money, and far more extensive industrial facilities than non-European nations have had. The general principle of not sending coals to Newcastle remains good.

It is true, of course, that Britain calculates upon having to build 300,000 houses. These will require billions of brick, millions of doors, fittings, etc. In France and Belgium, replacements are estimated at $6,000,000,000. But the need of furnishing employment for the millions of demobilized soldiers, and reconstructing industry, will turn orders for such things into home channels. In Russia, of course—if financial stability is restored in that swirling mass of chaos—there will be immense markets for manufactures. Siberia will be good, so far as this continent is concerned. Germany may get most of the Russian market, or it may not, according as the war ends. Outside of agricultural machinery, Canada perhaps will not have much show in Muscovy. On the whole, Canadian manufacturers have far more to fear from European industrial competition than to hope for in the continuance of markets in manufactures to the Allies there.

Foreign Markets Will Be Needed.

But Canadian business men will look for, and will need foreign markets. It is true that the development of the home market, by the growth of our agricultural output is of main concern to them. The war has developed Canada industrially in most unexpected directions. What are the logical markets? The West Indies, South America, South Africa, Australia, New Zealand, China and Japan, Siberia, India, etc. Britain has had a dominating part in the manufactures market in most of these, and is likely to retain it, because of superior shipping and credit accommodation. The United States has obtained, during the war, some of the British trade and much of the German, but it also is finding the need of ships for war purposes forcing it to curtail the exploiting of such markets. Its plans for export finance give plenty of assurance, however, that it is going to make a big fight to increase its hold upon these markets.

Canadian exporters have already had considerable trade connection with parts of the Empire such as South Africa, the British West Indies, Australia and New Zealand, India, etc. In the year ending March 31st, 1917, our exports to other parts of the Empire totalled $789,000,000, out of a grand aggregate of $1,179,000,000. Of this, $756,000,000 went to Britain alone. Since late last year, the destination of Canadian exports is not published. The abnormal traffic conditions caused by the intensified submarine warfare make 1917 and 1918 ocean traffic unreliable as a fair basis for calculating peace-time changes. The figures for 1915-1916 are much better for that purpose. The following table of exports in that period, to British possessions, through our own and United States ports, shows how relatively small is our trade with the more distant British countries:—

Country.	Total.	Through United States ports
United Kingdom	$463,081,000	$160,343,000
Australia	7,773,000	3,005,000
British Africa	5,714,000	1,043,000
British West Indies	4,134,000	1,076,000
British Guiana	1,211,000	152,000
Straits Settlements	281,000	160,000
India	916,000	879,000
New Zealand	3,361,000	726,000
	$486,471,000	$167,384,000
Non-British countries, excluding United States	$ 68,084,000	$ 27,720,000

It will be noticed from this that about 40 per cent. of our exports went out via United States ports. Most of this was, of course, agricultural products, particularly grain. The grain route down the Great Lakes virtually ends at Buffalo, and New York thereby becomes the "spout" for it. This is a serious matter which Eastern Canada ought to correct. Below is another table that tells the kind of ocean service given our exports. It is for the same year, 1915-1916—for reasons connected with the comparative freedom of tonnage then—and excludes all United States coasting trade, all government services, trade with Newfoundland, St. Pierre, etc. The compilation is the number, nationality and destination of the ocean carriers taking Canadian exports:—

To	British.	Canadian.	Foreign.
Britain	708	198	538
Australia	59	..	7
British Oceania	3	..	2
South Africa	26	..	6
West Indies	11	33	22
British Guiana	27	1	..
Other British possessions.	9	..	1
Argentina	1	..	17
Brazil	5	1	5
China	26	..	5
Cuba	10	9	18
France	187	16	53
Italy	22	..	6
Japan	2	..	53
Porto Rico	..	21	..
Russia	12	3	50
Other countries	28	6	11
	1,136	288	819

	British.	Canadian.	Foreign.
Tons register	3,712,565	88,788	1,100,106

It is apparent that a very negligible fraction of our exports is carried overseas in Canadian bottoms. We depend on others for ocean service.

Cargo Liners on New Routes.

The ocean-going tonnage of Canadian registry is given as 290,000 tons gross for the Atlantic and 128,000 tons for the Pacific. This consists almost exclusively of liners, such as the Canadian Pacific, Allan and other high-class vessels. The total tonnage of the Canadian marine is listed at 929,000 tons, but less than half really counts for ocean service. "Tramps," or the pick-up freighters, are as numerous in Canadian registry as German warships are in mid-Atlantic.

Before the war, there were 23,500 tramp steamers on the high seas. They formed from 90 to 95 per cent. of ocean tonnage. British "tramps" served Canada well. But, after all, the builder of new trade connections is the cargo-liner—the freight vessel that plies on schedule between certain ports. The Canadian State vessels will be cargo-liners, and will, presumably, be used as such. The export of manufactures is principally a package business requiring such miscellaneous accommodation.

Ocean traffic is a peculiar business. Before the war there were no government-operated ships, and there was no government control of rates. There were forty regular trans-Atlantic lines that were parties to twenty pooling or combine agreements, fixing rates, profits, etc. Except for the tramps, the whole Atlantic trade was sewn up by conferences. Some of the pooling agreements provided for certain schedules of sailings for lines party to them, these to be divided upon an agreed basis, according to the value and size of the ship. In the Australian-United States trade, three lines took the traffic, and divided net earnings on a 42½, 35, and 22½ per cent. basis. There was competition, of course, by the tramps, which charged such rates as the traffic would bear, but on the whole the rates were regulated by agreement, with scant regard for outsiders.

In the House of Commons in 1913 Hon. Arthur Meighen exposed some of the workings of the North Atlantic Freight Conference. He charged that in the first years of its existence, about 1903 or 1904, it had wiped out non-conference competition, and then had started in to hoist rates. He quoted average rates on flour and grain to Liverpool and London as an example of its handiwork:—

	Liverpool		London	
	Flour.	Grain.	Flour.	Grain.
1907	8.37	6.08	10.15	7.7
1908	7.8	5.46	8.34	6.93
1909	7.20	5.63	8.08	5.35
1910	8	5.06	8.33	5.48
1911	9.08	6.99	9.08	6.94
1912	16	12.75	16.82	14.95

Mr. Meighen's case attracted much attention. He showed a most extraordinary sudden rise in rates, eastward and westward, and proved the need of some method of government regulation.

Changes Forced by the War.

Now, the war and government control of Allied shipping have pretty well broken up old pooling and conference arrangements. The British government has announced that it will keep control of British shipping for perhaps two years after the war—during the readjustment period—and the United States will have an immense fleet of State-owned freight vessels. We shall enter a new era in ocean transportation. In any case, shipping men say we shall have high rates for about three years, until tonnage supply, and extraordinary demand for tonnage have been adjusted. Neutral shipping interests have been making a golden haul out of present conditions. One estimate puts the enrichment of Northern European neutral lines at $500,000,000. The British ships have been mostly on blue-book rates, under charter to the British government. But even these, comparatively low as they are, are high enough to allow for a big reaction, and still leave rates far above the pre-war level. What the United States government may do, in respect of rates on its ten or twelve million tons of State freighters, is hard to say, but probably there will be no cutting of rates below a level on which privately owned vessels can be operated with a reasonable return.

The high cost of vessels built now has to be considered. Before the war, freight vessels were worth from $40 to $50 a ton. The United States government contracts for steel ships have been placed at an average of $160 a ton. The Canadian freighters may cost $200 a ton, even if the steel plates are bought at $65 or $70 a ton, the price paid by the United States Emergency Fleet Corporation. A big British transaction in ships occurred recently at $80 a ton. These high initial costs will compel fairly high rates, or the writing off of part of the cost. The enriched neutral lines may be able to do business to better advantage than the high-cost government ships, if the latter are operated on a business basis.

However, it seems certain that for a long time rates will be high enough to allow Canadian State freighters to engage in special route traffic with fair financial showings. Even if there were deficits, the building-up of trade would repay the loss. To build regular traffic between countries, there must be regular service, even if occasionally there be loss. Private lines often agree to start such a new service, to split business and divide losses until such time as a profitable trade can be built up. The Canadian freighters ought, for instance, to promote special trade with Australia and New Zealand, with Yokohama and Hong Kong, with Singapore and Bombay, with Jamaica and the West Indies, with South Africa and India. We shall, of course, have shipping accommodation via New York, Boston, Frisco and Seattle, if we wish it, but we want our own carrying trade. Mr. Hughes, the Australian Prime Minister, lit a beacon light of progress in this direction when he bought, in 1916, fifteen vessels for $10,000,000. Within eighteen months, their earnings had paid for the whole original cost.

Helping the Big Home Market.

A very considerable part of our exports to the other parts of the Empire, outside of Britain, consists of foodstuffs or manufactured food products. Now, the Canadian manufacturer is glad, and should be glad, to see the market for Canadian agricultural products expanding. It means a better home market to him—and it is the home market he has been almost entirely depending on. The manufacturer must, in his own interest, be concerned that good ocean freight service be provided for grain, dairy products, meats and fruits. If markets for these are continuously good and profitable, Canada will have a large land settlement, adding to the profitable home market. In the ten years following the war, our population should reach at least the 12,000,000 mark. There is no doubt of the demand for foodstuffs long after the cannon are silent. We can depend on pretty fair rates and sufficient tonnage to Britain, because the British government will be concerned in providing them. The chief handicap lies in the large stores of Australian, Argentine and Indian grain, cut off from Europe by the shipping shortage. Australia has an export surplus of 150,000,000 bushels. But the world scarcity will absorb this without much of a setback, though present abnormal prices cannot continue after the war.

Our State merchant fleet can be used to promote our trade in agricultural products, as well as in manufactures. Indeed, one is complementary to the other. If the Hudson Bay route is practicable, ships can be put on that, leaving the St. Lawrence largely for the regular private lines. The government ownership of large railway systems in Canada is going to help the State merchant fleet idea—for ocean service is a natural extension of transcontinental railway operating. There is sure to be exceptional development in the Pacific after the war, and the Canadian Northern and Grand Trunk Pacific are natural feeders to Burrard Inlet. In fact, there is going to be a splendid opportunity for using a State marine for the general commercial welfare of Canadians, without coming into collision with the regular private services upon which the world will continue so much to depend. If, by means of the special development work of the State fleet, we can build up two or three hundred million dollars of new export trade, the incurring of a deficit of two or three millions, in operating the ships in the first year or two, will not count for much.

We need to understand the tremendous preparations being made in the United States, Britain, and other great manufacturing countries, to push out for world trade. If we would avoid becoming a backyard to American ports, we shall shove forward vigorously also. Small haggling has seen its day. The issues are too great for pettifogging. The handicaps are many, but the opportunities are just as inviting.

NOVA SCOTIA SELLS BONDS

Halifax Relief Committee Buys $750,000 and $250,000 is Publicly Offered

Halifax, N.S., March 26th.

(Staff Correspondence.)

The following tenders were received on Monday, March 25th, for the bonds of the province of Nova Scotia:—

(1) Wood, Gundy and Company, Mackintosh and Company, Eastern Securities Company and Dominion Securities Corporation jointly tendered 97.33 for $750,000, with 60-day option on another similar amount at same price.

(2) A. E. Ames and Company tendered 97.299 for $150,000, with 30-day option on balance of $1,500,000 at 97.499.

First Refused to Sell.

The premier of Nova Scotia refused to sell the bonds at these prices yesterday, taking time for consideration to-day.

In the meantime, the syndicate noted above in paragraph (1) withdrew their offer and the premier then sold $750,000 to a local syndicate, composed of the Maritime Trust Company and others, at 98, with option on another $250,000 at the same price.

The premier really needed, it is understood, $1,051,000 for his estimates and has therefore obtained that amount within $51,000.

Halifax Relief Commission Buys.

Halifax, March 26th. (Later.)

(Staff Correspondence.)

The purchasers of the Nova Scotia bonds (referred to above) were actually, it is understood, the Halifax Relief Commission, who took $750,000 at 98, the balance of $250,000 being offered to the public at par by the Standard Bond Corporation, which is associated with the Maritime Trust Corporation. The province netted 98 for the $1,000,000, and has also placed an additional $250,000 at the same price with the Workmen's Compensation Board of Nova Scotia.

Offering to Public.

The offering of the sinking gold bonds of Nova Scotia to the public is a very attractive one. The bonds are dated April 1st, 1918, and the issue is for ten years. The rate of interest is 6 per cent., and the bonds are being offered at par and accrued interest by the Standard Bond Corporation, Maritime Trust Building, Halifax. There is little doubt that this issue will be quickly absorbed.

WILL SELL PRINCE EDWARD ISLAND TELEPHONE CO

(Staff Correspondence.)

New Glasgow, N.S., March 26th, 1918.

The shareholders of the Maritime Telegraph and Telephone Company have authorized the directors to sell the Prince Edward Island Telephone Company. The vote in favor of this action was 89,000 shares; 33,000 voted against the proposal. The directors state that no deal will be made at this time, the offer previously made having been withdrawn.

GOES TO GRAIN GROWERS' GUIDE

Mr. Norman Lambert assumed the editorship of the Grain Growers' Guide, Winnipeg, this week. He has acted as western Canada correspondent for the Toronto Globe for many years and has an intimate knowledge of the western country, a valuable asset to an easterner. He is reported as saying that his mission will be to interpret the east to the west, and the west to the east. The opportunity is an excellent one. Mr. Lambert has the experience, the breadth of mind and the character which will enable him to use it to good advantage, helping to harmonize the interests and ideals of the two broad sections of the Dominion.

REDUCTION IN LIFE INSURANCE DIVIDENDS

Possibility is Discussed by Dominion Insurance Superintendent Finlayson

That there may be a general reduction in rate of dividends paid by the life insurance companies, and that the move, if taken, would be justified as maintaining the solid position of the institution, is a question upon which the superintendent of insurance, Mr. G. D. Finlayson, spoke at a recent meeting of the Ottawa Association of Life Underwriters.

From an agent's standpoint, it is one thing for the companies to reduce their rate of dividends, but quite another thing to "sell" it to the insuring public. Mr. Finlayson's desire to help the underwriters has led him to accede to their request for a statement. It is quite true that the people who buy life insurance want stability. The following letter will be most valuable, showing as it does so clearly the reasons for the reduction and safeguarding the agents from having to engage in argumentation, making the policyholder at the same time feel perfectly satisfied. It is addressed by the Department of Insurance, Ottawa, to Mr. J. H. Castle Graham, general secretary and treasurer of the Life Underwriters' Association of Canada:—

Reducing and Safeguarding.

"With reference to the possibility of reduced dividends during the current year and for the duration of the war, to which I referred briefly at the meeting of the association, it appears to me that if the war mortality which has been experienced during the last two years continues for another two years, or even for another year, it would be unreasonable to expect a continuance of the present rate of dividends.

First Three Years of War.

"The life insurance companies in Canada paid during the first three years of the war approximately $7,000,000 in war claims, the amount of such claims incurred in 1916 being over $5,000,000. In 1917 the war claims incurred exceeded the 1916 claims, and, while the 1918 figures are, of course, unknown, it would, I think, be unwise to anticipate a reduction in the amount of war claims as compared with the figures of last year.

"At the same time, the volume of new business being transacted is increasing, and this means an increasing strain on the companies' surplus. There is also a tendency towards a reduction in the rate of interest earned on the companies' funds, while at the same time expenses continue high. With this combination of factors, a reduction in the rate of dividends would appear to be inevitable unless the margin of surplus over dividend declarations is to be very materially reduced.

"Such action as indicated above if taken by the companies during the present year should cause no surprise. It has, indeed, been a matter of surprise to those unfamiliar with the exceedingly sound position occupied by the life insurance companies in Canada that the strain of war has continued so long without reducing the dividends declared to policyholders. A reduction in the rate of dividends will not indicate an impairment in the stability of the insurance companies, but rather a determination on the part of life insurance executives to maintain the life insurance business on the solid basis on which it has been gradually built up."

OFFICERS OF LENDING COMPANIES MEET

A dinner on Monday evening concluded the annual meeting of the Dominion Mortgage and Investments Association. After the toast of "The King," Mr. A. E. Holt, of the Royal Trust Company, proposed the health of the Canadian Forces, Major Hume Cronyn, of the Huron and Erie Mortgage Corporation, responding. Responding to the toast of "Our Kindred Organizations," Mr. C. P. Smith spoke for the insurance companies, Mr. C. A. Bogert, general manager of the Dominion Bank, for the Toronto Board of Trade, of which he is president, Mr. J. M. Mackie, of C. Meredith and Company, Montreal, for the Bond Dealers' Association of Canada, and Mr. Thom, of Regina, for the Saskatchewan Mortgage Loan Association.

Mr. John Appleton, the secretary of the association, has proved an exceptionally courteous and capable officer.

FAILURES IN CANADA

In Canada, as in the United States, business failures last year were on a descending scale, the only difference being that the descent was more rapid and the decline from the high level of 1914 was much more abrupt than in the United States. There were only 1,110 failures in the Dominion in 1917, a decrease of 37.3 per cent., this following a drop in 1916 from 1915 of 32.5 per cent., and the latter in turn decreasing 9 per cent. from 1914. From the high point of 1914 to the low of 1917, the decrease was 61 per cent., and the year just closed, in fact, saw the smallest total recorded in over a decade. Liabilities in 1917, which were $13,661,301, marked a drop of 13 per cent. from 1916, were less than half those of 1915, and the smallest, in fact, since 1912. Personal causes were responsible for 73.5 per cent. of the 1917 failures, as against 69.2 per cent. in 1916, 64.7 per cent. in 1915 and 73.4 per cent. in 1914, which percentages, it might be noted, are considerably lower than in the United States. Lack of capital, always first as a cause of Canadian failure, except in 1915, when war influences ruled, claimed 37.5 per cent. in 1917, against 38.9 per cent. in 1916 and 30.3 per cent. in 1915. Specific conditions, a non-personal cause, come next with 25.4 per cent. in 1917, 30.1 per cent. in 1916 and 35.9 per cent. in 1915, the latter a record percentage due to this cause. Incompetence, the third most fruitful cause, claimed 16.3 per cent. in 1917, 13.4 per cent. in 1916 and 17.9 per cent. in 1915. Neglect and speculation claimed more victims than in 1916, but fraud less, inexperience taking fourth position from fraud, which held this place in 1916. As regards liabilities, it is found that lack of capital claimed 47.7 per cent. in 1917, against 39 per cent. in 1916 and 31.3 per cent. in 1915. Specific conditions with 15.5 per cent. of all damage loss was the second most hurtful cause. Speculation with 12.9 per cent. was third, and incompetence with 9.4 per cent. was fourth.

SEED GRAIN AND FODDER LIENS

The Monetary Times has frequently referred to the necessity of parliament giving legislative effect to the intention of the federal and provincial governments at the time the seed grain legislation was enacted so that relief liens shall not have any priority to existing encumbrances. This matter has been brought to the attention of the authorities at Ottawa on several occasions by the lending companies but their efforts and claims have not met with the success they deserve. Under Privy Council Order No. 460, dated February 20th last, the minister of the interior in case of loss when lands are sold may wholly discharge the relief liens and in the case of seed grain and fodder, partial discharge covering the amount of the advances which were applied on the lands in question.

The Privy Council order of February 23rd issued shortly after a visit to Ottawa of a deputation of the Dominion Mortgage and Investments Association. The minister forwarded a copy of it with his acknowledgment of a memorandum addressed to him by the executive of the association on February 27th. He then intimated that he would take an early opportunity of looking further into their representations.

Continuous efforts have been made to hasten the settlement of difficulties arising from these liens by (*a*) urging more vigorous collections, and (*b*) taking up individual cases with the department. As to the former, the Dominion Mortgage and Investments Association have secured monthly statements as to actual amounts collected. These are disappointingly low, in view of the prosperous conditions existing on the prairies, especially in those districts where advances for seed grain were most liberal.

In dealing with a large number of specific cases a measure of success was obtained and the experience of the association indicated departmental willingness (*a*) to apportion, when the Crown had remaining security on other patented, and in some cases, on unpatented lands; (*b*) to discharge liens improperly registered; (*c*) to discharge liens registered against city property when the Crown had additional security on other lands; (*d*) to discharge liens registered against land without consent of owner; (*e*) to discharge liens against land abandoned by owners prior to distribution of the seed grain.

The above indicate the character of the decisions of the department, obtaining which occupied much time, fully bearing out the general complaints of companies comprising the membership of the association that great inconvenience and loss results from delay where cases are taken up with the department. A satisfactory arrangement was made with the department in respect to the purchase of lands by lienors subsequent to the date of the liens registered against them.

These are important matters and an unbiased examination of the claims of the lending companies indicates that they deserve the greatest sympathy and consideration on the part of the government authorities.

ONTARIO'S MINERAL PRODUCTION

The statistics in the preliminary statement of the mineral production of Ontario for 1917, cover the output of metallic and non-metallic mines, quarries and other excavations, and also the primary products of works and plants treating materials of provincial origin. The figures are subject to revision, and are issued as soon after the completion of the year as possible, for the information of the mining community and the public generally. Mr. T. W. Gibson, deputy minister of mines, Ontario, and his staff are to be commended for the rapid and careful collection and prompt publication of their statistics. Such action materially enhances the value of the figures. The total production last year, having a value of $71,060,942, shows an increase of $5,757,120 compared with that of 1916, and marks a new high point in the record of Ontario's mining industry. As Mr. Gibson says, "an expression of satisfaction may be permitted in this successful effort to bring the minerals of the province to bear with added weight in the great struggle of Britain and her Allies for justice and freedom."

Details of the production were printed in *The Monetary Times* last week. Some interesting particulars are given in the preliminary statement regarding nickel and copper. The output of nickel-copper matte in 1917 was 78,897 tons as compared with 80,010 tons in 1916. The nickel content, 41,887 tons, was greater, but the copper content, 21,997 tons, less than in that year, which may be explained by the fact that the bulk of the Canadian Copper Company's production was from the Creighton mine, the ore of which is well known to contain much more nickel than copper. During the year, 1,453,661 tons of ore were smelted at the Copper Cliff and Coniston smelters.

The Royal Ontario Nickel Commission in its report on the nickel industry, issued early last year, estimated the known reserves of nickel ore as 70 million tons, but it is believed that the results of diamond drilling since the issue of the report have added nearly 100 per cent. to the quantity. Explorations at the Levack, Frood Extension, Murray and Falconbridge deposits has much extended the limits of the ore bodies. The refinery of the International Nickel Company of Canada at Port Colborne is well on the way to completion. It will have a capacity of about 10,000 tons of nickel per annum, and a relative quantity of copper.

Although the nickel-copper mines of Sudbury are the chief source of copper in Ontario, there are other deposits of non-nickeliferous copper ore from which shipments of ore and concentrates were made in 1917 to the extent of 4,173 tons, containing 431,402 pounds of copper, valued at $89,380. In addition, 110,476 pounds were recovered from silver ore and gold slag treated in United States refineries. On the Hudson Copper Company's property in Galbraith township a handsome showing of copper glance has been uncovered. The average price of copper in 1917 was 27.18 cents as compared with 27.20 cents in 1916. Since September 21st the price has been, as fixed by the United States government, 23½ cents per pound f.o.b. New York. Ontario's mineral production, large as it is, will increase rapidly as the undeveloped resources are harnessed with capital and labor.

OLD TIES AND NEW

After eleven years as editor of *The Monetary Times*, the writer leaves this week to take up duties for His Majesty's government as British Trade Commissioner in Ontario. In this, the last issue under the present editorial régime, it is a pleasure to express appreciation of the cordial assistance of both readers of and advertisers in the paper. They have materially helped to maintain the standing and reputation of *The Monetary Times*, founded over fifty years ago, assisting also in making the reading and editorial columns of interest and service.

It has been a pleasing task to edit a paper in the direction of which the best interests and welfare of Canada and the Empire have been the first consideration. When plain speaking was desirable or necessary in these columns, in regard to financial or business matters, no restrictions were imposed by the proprietors of the journal. This has been the policy of the paper for half a century and it continues to dominate. The severance of connections with this journal, its directors, staff, and readers at home and abroad is in many ways a matter of regret. This, however, is modified to some extent, by the knowledge that the writer carries with him the friendship and goodwill of so many men of business, trade, and finance, ties which will be retained in the new sphere of labor. To my successor goes every good wish.

My future work is linked with the movement, which has been given a notable impetus by the war, for closer commercial relations between the various parts of the British Empire. As was stated in a recent issue of the official Board of Trade Journal of the United Kingdom, "war, instead of exercising a disruptive influence on the British Empire, as predicted and hoped by the enemy, has led to a keener realization of the strength of the ties, both moral and material, which bind the various portions of the Empire together. Out of this realization has sprung a growing consciousness of the need for a closer co-operation in all things that matter between the States of which the Empire is composed. It is appropriate that at such a time comprehensive action should be taken with the direct object of fostering and developing an inter-Imperial trade." As a comment on the Trade Commissioner Service, attention may be called to the following resolution passed unanimously on the motion of General Smuts at the Imperial War Conference in April last: "The Imperial War Conference welcomes the proposed increase of the Board of Trade service of Trade Commissioners and its extension throughout the British Empire in accordance with the recommendations of the Dominions Royal Commission, and recommends that the governments concerned should co-operate so as to make that service as useful as possible to the Empire as a whole especially for the promotion of inter-Imperial trade."

APPOINTED ASSISTANT GENERAL MANAGER

Mr. George H. Smith has been appointed assistant general manager of the Canada Permanent Mortgage Corporation. Mr. Smith entered the service of the Canada Permanent Loan and Savings Company in February, 1882. He was appointed secretary in 1888 and in 1900, when that company and other companies were amalgamated, he was made secretary of the new corporation. Five years ago he also assumed the duties of superintendent of branches, in the discharge of which duties he has been a frequent visitor of the various sections of the Dominion throughout which the corporation has extensive business interests. It was fitting, therefore, that with his long and efficient service with the corporation he should be promoted to be assistant general manager of the Canada Permanent Mortgage Corporation, which was done a few weeks ago. Mr. Smith is properly regarded as one of the leading authorities in the mortgage loan field and has the confidence, not only of his colleagues, the company's directors and clientele, but also of the financial and business community at large. He has an exceptionally pleasing personality. His tact and courtesy are unfailing and his many friends wish him every success in his new and important duties for which he is so well fitted.

G. H. SMITH.

MONEY MARKETS

Messrs. Glazebrook & Cronyn, exchange and bond brokers, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.
N.Y. funds	17-32	1 9-16	....
Mont. funds	Par	Par	⅛ to ¼
Sterling—			
Demand	$4.82.60	$4.82.80	$4.85
Cable transfers	$4.83.80	$4.84	$4.86

Sterling demand in New York, $4.75 5-16.
Bank of England rate, 5 per cent.

There is an increase of 35 per cent. in the hog production of Alberta, Hon. Duncan Marshall declared at a meeting of Alberta stock breeders.

The estimated net income of the International Mercantile Marine Company for 1917 was $11,500,000, as compared with $20,169,615 in 1916, according to an announcement made by P. A. S. Franklin, president of the company. The incomes for both years include dividends from British and American subsidiary companies, it was explained.

Mineral Production of Ontario, 1917.

CANADA AND UNITED STATES

Factors Which Control Movement of Exchange Between the Two Countries

Every importer and exporter in Canada, no matter what commodity he deals in, is interested in the rates of exchange with foreign countries, and, while for this reason the subject is one of considerable interest to a large part of the business community, at the same time the conditions governing the fluctuations in exchange, and especially in exchange between Canada and the United States, are often not clearly comprehended. To many people not fully conversant with this subject it is difficult to understand why the money of two countries bordering on each other, and having the same monetary unit of equal weight and fineness, should not always be quoted at par. A man who will accept $475 for a £100 cheque on London, representing a discount of over 2 per cent. on the par of exchange between Canada and Great Britain, will demur at receiving $99 for a $100 cheque on New York when United States exchange in Canada happens to be at a discount of 1 per cent.

There are indications that in some quarters the distinct impression exists that the premium charged for United States funds remitted in settlement of Canadian collections, when exchange is against Canada, merely constitutes an extra profit which goes to the Canadian banks, and that the exchange market for United States funds in Canada is manipulated by the banks in the latter country in such a way as artificially to maintain a situation by which they are supposed to benefit heavily. In order to dispel this quite erroneous idea it will be the aim of this article to set out the factors which control the movement of the exchanges between Canada and the United States.

Economic Principles.

Like any other exchange, it is governed by economic principles, and the value of the United States dollar in Canada rises and falls with the volume offered and the amount required. This demand and supply in the broader sense is regulated by such concrete items as the volume of imports and exports, the payment of the amount due for interest on loans, and other factors which affect what is known as the trade balance.

In addition to these broader influences, which cause the seasonal movements of United States exchange, there is a narrower factor, namely, the daily demand for and supply of United States funds in the Toronto and Montreal markets, which accounts for the violent fluctuations in such months as February and July, 1917. In normal times gold can be shipped from New York to Montreal, and vice versa, at a cost of about 70 cents per $1,000, and the "gold points" (viz., the points at which gold will be shipped) for United States exchange, are, therefore, approximately 5/64 per cent. pre-

COURSE OF UNITED STATES EXCHANGE IN CANADA

BRANCHES AND CONNECTIONS THROUGHOUT CANADA

mium and 5/64 per cent. discount; but, owing to the abnormal conditions resulting from the war, gold cannot now be shipped freely between the two countries, and the actual fluctuations in the exchange between the two countries are much wider than the margin of 5/32 per cent. between the "gold points."

Effects of Wheat Crop.

When the wheat crop begins to go forward in September the premium on United States funds in Canada is gradually reduced, and when the movement is at its height in October and November it is converted into a discount. United States funds in Canada have during the last three years usually been quoted at a premium, and the discount to which they fall in the autumn months is not as a rule a heavy one. The extremely low quotations for the month of October, 1917, were due to unusual circumstances. The Canadian banks at all times carry a part of their surplus funds in New York by way of call loans on stock exchange collateral. The amounts so loaned, of which the New York money market has the benefit, are usually largest during the summer months, and are withdrawn in part in the autumn to the extent of the sums required for the moving of the great field crops of the Canadian West. In September, 1917, the United States treasury placed an embargo on the export of gold, and thereafter a Canadian bank could not withdraw its balances from New York except by selling them to another bank. When, therefore, in October the usual need arose in Canada for money to move the crops, the offerings of New York exchange in the Toronto and Montreal markets far exceeded the demand, and, owing to the embargo placed on gold by the treasury, bankers were unwilling to increase their balances in New York by the purchase of United States funds, even at an appreciable discount, as they could not be certain of beng able to withdraw them as required except at a still heavier discount. As a result, the rate fell as low as 15/16 per cent. discount. Representations were made by the Canadian bankers to Washington which resulted in the treasury agreeing to a partial lifting of the embargo. Permission was given to ship $25,000,000 in gold from the United States to Canada, and the announcement of this arrangement was so reassuring that the rate for United States funds rapidly improved, even before the actual shipment of any part of the gold. The movement thus set in continued steadily throughout December and January. They receded somewhat in February, but at the time of writing a new high level of 1¾ per cent. has been reached.

The Premium.

The premium which prevails usually in the early part of the year is seasonal, but the appreciation in the rate for United States funds has been accentuated during the past two months by the operation of several abnormal factors, such as the disorganization of transportation and the consequent check on exports from Canada, the enormous increase in imports from the United States, due to heavy purchases of coal, iron, steel and other raw materials, and the effect of the credits which Canada is granting Great Britain to assist in procuring supplies for the prosecution of the war. Canada's favorable trade balance for the year 1917 amounted to over $588,000,000, which, in the ordinary course of events, should have resulted in the exchanges being favorable, but her purchases from the United States were some $400,000,000 in excess of her sales to the latter country, and Canada, having given credit for a large proportion of her sales to Great Britain, is experiencing difficulty in settling her debt to the United States. This can be accomplished by adopting one, or, better still, all of the following plans:—

1. By increasing her exports to the United States.
2. By curtailing her imports of non-essentials.
3. By Great Britain arranging a credit in the United States for such portion of her purchases in Canada as are essential for the maintenance of Canadian industries and the successful prosecution of the war.
4. By the United States giving Canada the privilege of renewing certain of her obligations which mature during the coming year.

Natural Wealth.

Canada abounds in natural wealth. She has tremendous assets in her crops, in her lumber and in her products of the mine and fisheries, the value of which has been increasing from year to year, and the exportable surplus of these products, as well as of her manufactures, constitutes the chief medium of payment for her imports. She has always been a good customer of the United States, and at the present time her imports from that country are larger than ever before. Owing to the stress of financing the war it is becoming difficult for Canada to pay cash for all her necessary imports from the United States, and, in order to foster this important trade, it is suggested that the United States may find it expedient to finance for the time being a part of her sales to Canada by giving credit either to Great Britain or to Canada.

As long as Canada's trade balance with the United States remains substantially in favor of the latter, United States funds will continue to be quoted here on the average at a premium, and the rise and fall of the rate of exchange for United States funds may in a measure be looked upon as a barometer, indicating from time to time Canada's financial condition.—Monthly Letter of the Canadian Bank of Commerce.

FEBRUARY BANK STATEMENT

The following statement shows the principal items of the February bank statement and the changes which occurred during the month:—

	Feb., 1918.		Changes during Feb., 1918.
Reserve fund	$ 114,163,198	+	$ 1,975

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

The annual report of the Canadian Pacific Railway, which has been issued to the shareholders in anticipation of the annual meeting, presents a number of interesting features, not least of which is evidence of the support to Dominion and Imperial government war financing, made possible by the company's financial strength.

At the end of 1916 the company reported "government and other securities," valued at $11,266,784, to which would be added "temporarily invested in war loans," $5,979,274, a total of $17,246,058. So far as comparisons may be made—for there are some changes in the form of statement—the corresponding item in 1917 is "Imperial and Dominion government securities," $33,366,508, with an additional item of $2,031,721, "provincial and municipal securities," for which there was no corresponding item in last year's balance sheet. Roughly, there would appear to be an increase of about $18,000,000 in the company's investments of this description.

In addition to the foregoing, under the arrangement referred to by Lord Shaughnessy at the last annual meeting, the company issued $40,000,000 new debenture stock and loaned it to the Imperial government. As the issue was not for the company's purposes, and plays no part in the company's own financial affairs, it is merely a bookkeeping entry in the balance sheet, the total debenture issue being $40,000,000 higher, while on the assets side the $40,000,000 is entered among the company's available resources. The company receives ½ of 1 per cent. annually for the use of the issue by the Imperial government, but this revenue, it is stated, has not been included in the year's accounts, but has been written off against the face value of the security. In a realignment of some items of the balance sheet, the company groups as "investments and available resources" a number of accounts footing up to a total of no less than $279,650,538.

Adding in $63,229,149 "working assets," the total of what might be called the company's liquid and semi-liquid assets, would be in excess of $342,000,000. In the list there is, of course, $40,000,000 debenture stock, which has an offset on the liability side of the balance sheet, and there is also $57,147,628, representing the amount held in trust against the company's $52,000,000 note certificates. If these two were deducted there would remain liquid and semi-liquid assets totalling about $245,000,000 against less than $20,000,000 current and accrued liabilities on the other side of the balance sheet.

The amount of cash in hand in the statement of working assets amounts to $31,424,893 against $57,076,018 a year ago, the decrease being readily explainable in such increased items as government securities. The amount held, however, remains large, and, as the company has little in the way of capital expenditure in view this year, its cash position will continue extremely strong.

With regard to property investment, one of the interesting features of the account is a note accompanying the entry of "ocean and coastal steamships." These are taken in the balance sheet at $26,810,547, representing vessels to a gross tonnage of 368,566 tons. A footnote gives the present estimated value of these vessels as no less than $65,000,000, or about two and a half times the value at which they are entered as assets.

The total assets of the company for the first time cross the billion dollar mark, appearing as $1,038,074,983, and with allowance for the offsetting item of $40,000,000 debenture stock, loaned to the Imperial government, total assets in property, investments and working balances just approximate the billion dollar mark.

Dominion Coal Company.—The views of the Hon. Mr. Armstrong, minister of mines of Nova Scotia, regarding the future prospects of the company in the St. Lawrence market are not shared by Mr. Mark Workman, president of the company. Mr. Armstrong is quoted as stating that: "This market for our coal, had been built up at great cost and its loss may not be restored after the war. It was secured, developed and maintained in the face of much opposition. The imports from the United States are assuming large proportions and I see no possibility of a decrease until the price is made prohibitive." Mr. Workman in discussing the outlook for their coal business in the future said that the company would have little difficulty in starting where they left off in the St. Lawrence market just as soon as tonnage was available to bring the coal here. He said that it was true that the business had disappeared for the present, but the quality of the Dominion coal made it popular here, and always brought a better price here than American coal.

Mr. Workman went even further by expressing the belief that the business of the Cape Breton mines in relation to the St. Lawrence trade would grow to greater proportions than ever after the war. He based this assertion on the claim that their coal is so much better for steam purposes that manufacturers are willing to pay more for it than American coal. American coal coming to Canada now, or at any rate much of it, is of an inferior quality and the Dominion coal output will be welcomed when tonnage is available to transport it. He looked to the company's coal business to be a big feature after the war.

Grand Trunk Railway Company.—The Grand Trunk Railway Company has issued a statement in London deeply regretting the inability to pay dividends on guaranteed or preference stocks, owing to the exceedingly unfavorable results of the company's operations in the past year, arising out of circumstances entirely beyond the control of the management. Notwithstanding the company carried by far the largest traffic in its history, the enormous increase in wages, fuel and all materials, due to war conditions, caused an immense increase in working expenses. Every effort was continuously made throughout the year to obtain an increase in rates to meet, in some measure, these serious conditions.

Although these efforts were unsuccessful the board is hopeful that, looking to the precedent established by Great Britain at the commencement of war for the protection of British railway interests, and the proposed legislation now under consideration by Congress in regard to American railways, the Canadian government will, in the near future, take such action as will enable the company to meet the present unparalleled war conditions.

Last October, when the directors met to discuss dividends for the first half of the year, it was announced that it was deemed "inadvisable to declare any interim dividend on the 4 per cent. guaranteed stock or the preference stocks." With the exception of 1914, for which year 3½ per cent. was paid to the holders of the guaranteed stock, the 4 per cent. rate had been maintained for every year since 1898. For 1898 the company paid 2 per cent. The full 4 per cent. was paid in respect to both 1915 and 1916. The present is believed to be the first instance of no payment being made to holders of its share capital.

International Nickel Company.—Within the next few months the company will have ready for operation the new refinery now building in Canada. It will add materially to the company's productive capacity, having the necessary equipment to produce about 20,000,000 pounds of nickel annually. Preliminary estimates placed the probable cost of this unit of the company's plant at approximately $5,000,000, but this amount will have been exceeded to some extent owing to the higher prices which had to be paid for labor and material. The entire cost will have been met from the company's treasury. The Canadian Copper Company, the operating subsidiary in Canada, which owns and runs the mines of the International Company, has been mining about 1,000,000 tons of ore per annum to supply the Perth Amboy refinery in New Jersey with ample raw material. To keep this plant in full running order and to meet the excess demands of the new refinery, it will be necessary to increase mining activities.

At the outbreak of the war the International had a surplus stock of close to 15,000,000 pounds of nickel on hand. Such an amount was always maintained. To-day the company ships its produce hot from the vats and has no sur-

plus. In anticipation of the inauguration of operations at the Canadian plant, the shipments of matte in that direction have already been started. The demand for nickel continues at an unprecedented rate, and the International's shipments have been averaging about 6,000,000 pounds monthly, or over 70,000,000 pounds a year. Should conditions warrant and the two refineries can run full tilt, an output of at least 100,000,000 pounds of nickel per annum will be available. It is understood that the company's earnings for the past fiscal year will approximate $12,000,000, of which about one-half will have to be paid out in taxes both in the United States and Canada. Dual taxation becomes necessary because the operating concern—Canadian Copper Company—has a Canadian charter, while the International Nickel Company was formed in New Jersey. Of the company's property but little over 10 per cent. is in the United States, yet to this country will be paid over 60 per cent. of the taxes.

F. N. Burt Company.—The company, the Canadian subsidiary of which is the Dominion Paper Box Company, tells the shareholders in the annual report just issued that both the Canadian and American factories in volume of business and profits had the best year in history. As much of the larger part of the business is in the United States, the percentage of the earnings from the other side of the line was proportionately large. The company experienced a dull period in the early part of 1916, but since then the plants, it is understood, have been operating close to capacity. Last years profits were $369,999, which compare with $329,000 in 1916, $222,000 in 1915, $212,000 in 1914, and $217,000 in 1913. The profits exceeded those of the previous year by $40,083, and those of 1915 by $147,732. As compared with the previous year's writing-off the amounts transferred to reserve are considerably larger. Out of the year's profits $25,000 was written off patent account, and $26,000 transferred to a reserve for various government taxes. No such allowance as the latter was made in the previous year's accounts. The amount provided for plant and realty reserve was $94,000, as against $75,000 last year, leaving the amount in this account at $225,000. The report states that the book values of the properties are considerably less than the appraised values. Comparisons with the previous year's accounts are rendered slightly difficult by the altered form of the balance sheet, but the profit and loss account compares as follows:—

	1917.	1916.
Balance forward	$232,517	$161,266
Profits	369,999	329,515
Totals	$602,516	$490,781
Dividend on preferred	138,264	138,264
Dividend on common	45,000	45,000
To realty and plant reserve	94,710	75,000
To tax reserve	26,000	......
Written off patents	25,678	......
Totals	$329,653	$258,264
	602,516	490,781
	329,653	258,264
Balance forward	$272,863	$232,517

American Sales Book Company.—The statement of the company for the year ending December 31, like that of other companies of the same group, reveals very conservative treatment of assets, together with somewhat unusual increases in earnings. The company in the previous year surmounted a good deal of competition which had hitherto interfered with its profits and an increase in earnings of $70,516 to $412,461 in 1916 was probably partially the result of this. Last year's earnings compare with $341,945 in 1916 and $180,816 in 1915. Good business in the latter part of 1916 permitted the resumption of dividends on the preferred stock, and these quarterly disbursements at the rate of 7 per cent. began on February 1, 1917, and have been continued since. With the balance of $342,115 brought forward from 1916 and $412,461 of profits last year the directors had $754,576 for distribution. After paying bond interest of $38,430 and transferring $75,000 to the reserve for depreciations, and after payment of 7 per cent. dividends on the preference stock, totalling $215,131, there was left of the year's profits $83,899. This amount has been used as follows: Reserved for the various government taxes to be assessed against these profits, $25,000; in reduction of patents account, $50,000; added to the profit and loss surplus, $8,899. The common stock issue of $614,660 as yet carries no dividends. The profit and loss account compares as follows:—

	1917.	1916.
From previous year	$342,115	$102,753
Profits	412,461	341,945
Bond interest	38,430	31,183
Preferred dividend	215,131	......
Depreciation	75,000	71,400
Reserve for taxes	25,000	......
Patents account	50,000	......
Carried forward	351,015	342,115

The following is a comparison of the balance sheets for the past two years:—

Assets:—

	1917.	1916.
Realty, etc.	$4,289,058	$4,263,820
Stock	658,015	522,325
Receivable	438,719	418,262
Investments	50,000	......
Cash	40,688	27,577
Liabilities:—		
Preferred stock	$3,073,300	$3,073,300
Common stock	614,660	614,660
Bonds	645,382	611,169
Payable	392,123	290,742
Taxes reserve	25,000	......
Depreciation reserve	375,000	300,000
Profit and loss	351,015	342,115

The annual meeting will be held on March 26.

QUEENSLAND INSURANCE COMPANY

The Queensland Insurance Company, Limited, with headquarters at Sydney, N.S.W., which, as stated in *The Monetary Times* last week, will shortly write fire and marine business throughout Canada, has branches throughout Australasia and an office in London, England. In addition there are agencies in India, Ceylon, Burmah, French Indo-China, Dutch East Indies, Straits Settlements and Federated Malay States, China, Mauritius, Samoa and Fiji. The company has also marine claim settling agencies in Africa, Japan, the Philippine Islands and the United States.

Mr. C. Hawkes, the company's assistant manager and branch inspector, has just completed a business trip in Canada, and is now on his way back home across the Pacific Ocean. He has arranged for the Montreal Agencies, Limited, to act as the company's general managers for Canada. Messrs. C. Gardner, Johnson and Company, Vancouver, has acted for some years as the company's agent in Vancouver, for marine business.

In presenting the report of the year's business last fall, Colonel Sir James Burns, chairman of the directors, stated that the company had had a fairly good year, notwithstanding the many disabilities created in all business concerns, through the long continuance of the war.

"Scarcity of tonnage," he said, "has curtailed marine business, whilst the action of the Queensland, New Zealand and other state governments, in competing for insurance risks, and, at the same time, largely increasing taxation upon local insurance institutions, cannot but have a detrimental effect. By expansion of business, however, away from Australasian influences, the company has been able to strengthen its position, while continuing to pay the usual dividend."

The net premium income for the year, after providing for unearned premiums, amounted to £252,665, and the returns from rent and interest were £25,624. After deducting losses, charges, etc., the amount at credit of revenue account was £57,578, to which was added the balance from the previous year of £140, making a total of £57,718, which the directors recommended should be appropriated as follows: To payment of the usual dividend of 10 per cent. on the capital of the company, together with a bonus of 2½ per cent., £31,250. It was further recommended to place £25,000 to reserve, making £75,000 in that account, and to carry forward £1.468 to next year. The company's total assets are now £637,121 in comparison with £554,752 in the previous year.

The directors of the company are Colonel Sir James Burns (chairman), Messrs. A. Forsyth, A. R. Troup, W. T. Macpherson and Hon. T. Waddell, M.L.C. The general manager is Mr. A. McVernon.

WE ACT AS AGENTS FOR INDIVIDUAL EXECUTORS

Individuals appointed as Executors of Estates frequently find they have not the time or the experience necessary to properly administer the Trust. We act as agent for such Executors, managing the estate, investing the funds, collecting the revenue, and remitting it to the beneficiaries, keeping and rendering proper and systematic accounts. Write for particulars.

THE
TORONTO GENERAL TRUSTS CORPORATION
Established 1882
Head Office TORONTO

Will Making

THE average human being is very much averse to making a Will; and yet it is absolutely necessary that it be done, if we would dispose of our Estate as we would wish, instead of leaving it to the disposition of the Law.

The making of a Will TODAY will not accelerate death a single instant, but rather tend to make us satisfied with an act timely and properly done.

The Corporate Executor is the only ideal Executor. Consult with us as to the making of your Will. Will Forms Free.

The Standard Trusts Company
Standard Trusts Bldg., 346 Main St. WINNIPEG

Our Valuators' Position

Moneys received from clients on our Guaranteed Trust Investment plan are placed in first mortgages on improved realty.

The security for these mortgages in each case is inspected by the Company's valuator.

"The valuator does not receive any commission upon the loans made, but is paid a regular salary; he has therefore no interest in approving the security proposed unless in his judgment it is satisfactory. His sole aim and duty is to give expert, conservative, unbiassed advice for the guidance of the Management and the Board of Directors."

—From the Company's Booklet, "Guaranteed Trust Investments"

In addition to the precautions taken in the selection of security is the fact that the Company guarantees directly the payment of income at 5 per cent. per annum and the return of principal as agreed. Write for booklet.

BANK CLERKS AND MILITARY SERVICE

Official Report of Remarks of Central Appeal Judge—Military Need Inexorable

The following is a copy of the official report of the bank officers' case under the Military Service Act, decided by the Central Appeal Judge on March 5th. The Central Appeal Judge said:—

A number of claims for exemption of bank employees were filed by the various banks, and were sent in the usual way to local tribunals. These claims were made on the ground that, "it was expedient in the national interest that the man should, instead of being employed in military service, be engaged in other work in which he is habitualy engaged."

In the great majority, if not in all of these cases, the claim was based, not on the special qualifications of the individual as such, but rather on the view that the individual was one of a group engaged in an occupation of national importance whose membership could not safely be reduced below a certain point, and for whose members efficient substitutes could not readily be found.

Widely Divergent Views.

Widely divergent views on this question were taken by the numerous local tribunals who were called upon to consider it, with the result that it appeared probable that nearly all of these cases would ultimately be brought before the Central Appeal Judge at the instance, either of the bank involved, or of the public representative.

In order to avoid the confusion and delay likely to result from dealing with these cases individually as they might be brought forward from time to time, an arrangement was made with the approval of the Central Appeal Judge, between the Military Service Council and the Bankers' Association for the banks, for the purpose of enabling the Central Appeal Judge to deal with the whole situation immediately and in a comprehensive manner.

In pursuance of this arrangement each bank was called upon to furnish the Central Appeal Judge full particulars as to the members of its staff in Class I. and as to its staff generally with other evidence deemed material, and to submit for consideration its views as to how members of Class I. should, in the national interest, be dealt with, and an investigation extending over a number of weeks was thereupon had.

Are to be Called.

After a careful examination of the facts thus disclosed and after hearing the views of the representatives of the various banks, the conclusion reached is that, with the exception of those who may secure exemption on grounds personal to themselves and subject to the result of any special applications which may be entertained by the Central Appeal Judge in regard to a small number of individuals holding positions of exceptional responsibility and requiring exceptional qualifications, all members of Class I. in Canada who are now in medical category "A," or not yet examined (approximately 2,390) are to be called.

As returned by the banks on January 25th, 1918, the total number of male employees of all the banks was 11,072 and the total number of female employees was 6,775. Of the former, 4,721 were in Class I. and 2,390 were in medical category "A," or not yet examined. Of these 370 had claimed exemption on personal grounds.

From the beginning of the war down to January 15th, 1918, bank employees to the number of 7,742 have enlisted for military service.

Number to be Furnished.

In determining the number of men to be furnished immediately by the banks, the Central Appeal Judge has reviewed carefully the position of each bank and has taken into account several considerations, amongst others the number of male employees in the bank, the proportion of these to the total staff of the bank, the extent to which the staff has been depleted in the past by voluntary enlistment and the special situation of each bank in regard to the distribution of its staff amongst its branches.

The total number to be furnished by March 15th by all the banks is 834, distributed as follows: The Bank of British North America, 25; the Canadian Bank of Commerce, 112; the Dominion Bank of Canada, 28; the Bank of Hamilton, 34; La Banque d'Hochelaga, 60; the Home Bank of Canada, 1; the Imperial Bank of Canada, 34; the Merchants Bank of Canada, 60; the Molsons Bank, 24; the Bank of Montreal, 52; the Northern Crown Bank, 8; the Bank of Nova Scotia, 46; La Banque Nationale, 39; the Bank of Ottawa, 13; the Provincial Bank of Canada, 40; the Royal Bank of Canada, 120; the Standard Bank of Canada, 35; the Sterling Bank of Canada, 7; the Bank of Toronto, 37; the Union Bank of Canada, 57; Weyburn Security Bank, 2.

First and Second Classes.

As to the residue of the 2,390 men above mentioned they fall into two classes, the first comprising all those claiming exemption on personal grounds and in respect of whom exemption is not claimed by the banks. The second comprising the residue of those in respect of whom the banks now claim exemption.

As to the first class, they are or will be in each case, dealt with as directed in the judgment disposing of the individual claims for exemption.

As to the second, they will, subject to the exceptional cases above mentioned, be called within six months from March 15th, in three drafts approximately equal, on May 15th, July 15th and September 15th, respectively.

The particulars as to the manner of selecting the men to be furnished by March 15th, also as to the selecting of men comprised in the subsequent drafts are set forth in a series of judgments which deal with the banks individually.

Military Need Inexorable.

The immediate withdrawal of men from their staffs for the military forces of the nation which some of the banks are thus called upon to meet is larger than their officials who appeared before the Central Appeal Judge conceded to be reasonably feasible. As a result of the full investigation of the general situation above referred to and of a thorough canvass of the special circumstances of each bank, it is considered that the contribution each is called upon to make is not unreasonable and that it will neither in the whole prejudice the economic interests of the country nor seriously affect the strength of any individual bank.

It is undeniable that for the officials who remain this draft will necessarily mean largely increased inconvenience as well as exceptional effort.

The military need, however, is inexorable. The bank officials who will have to meet the strain resulting from this new demand have, on the whole, already given proof of their patriotism and the country will look with confidence to them for the ability and resolution that may be required to cope with the situation resulting from the military necessities of the nation.

PUBLICATIONS RECEIVED

Germany.—A new book entitled "Germany at Bay," by Major Haldane Macfall, with an introduction by Field-Marshal Viscount French, is now ready. It gives a clear and logical exposition of the origin of the Great War and the causes which led up to it. The book contains maps, diagrams and portraits, adding to the interest of the volume.

Field Marshal French states that, unlike many other books on the same subject, it is written by a soldier, a deep student of the war, and every man and woman should study it before they give a thought to a peace into which the guile of the German may delude us all to our undoing. This is a book which everyone should read.

"Germany at Bay." Published by Cassell and Company, Limited, of Toronto. Price, $1.75.

Agriculture.—Monthly bulletin of Agricultural Statistics, February, 1918. Issued by the Census and Statistics Office, Ottawa.

Advertising.—By E. H. Kastor (H. W. Kastor and Sons' Advertising Company, Chicago). Published by La Salle Extension University, Chicago. First edition. 317 pages, 5½ x 8 inches, limp black leather.

This work is intended primarily for the busy man who wants to know more about the various phases of advertising. It does not go very deeply into any technical points, nor does it exhaust the psychology of advertising so well, perhaps, as some other works, but it is not intended to do so. It is a rapid survey of a big subject,, designed to give the man who knows little or nothing about advertising matters a working knowledge of a few of the points with which he will be brought into contact most frequently.

Lack of Food—threatens the Battle Line

ONTARIO

"The food wanted by mankind does not exist.
The word 'shortage' is not strong enough.
The whole world is up against a nasty thing, familiar to the people of India, called 'famine.'"

—Lord Rhondda,
Britain's Food Controller.

One year ago, only the enemy was on rations.

To-day, Great Britain, France and Italy are on rations.

To-day, Germany controls the wheat lands of Roumania, Russia, Poland and Ukrania.

To-day, the shadows of hunger, famine, disease and death hang over the Allies.

Upon the 1918 crop from Canada and the United States depends the fate of the democratic peoples of the world.

If that crop is sufficient the Allies can be fed.

If that crop is not sufficient the Allies may have to accept a German peace.

That Battle-Line in France and Flanders Must Not Want

Do you realize what a German peace would mean to Canada?

Germany covets our natural resources—our agricultural and mineral wealth, our forests, our fisheries, everything that is Canada's.

Germany won't be satisfied with European territory, with teeming masses, wrangling factions and depleted natural resources. She wants colonies—big, thinly-populated countries in temperate zones for her sons and daughters to go to and propagate their kind.

The Kaiser would sacrifice millions of Germans to-morrow if he thought that by so doing he could set foot on Canada's shores as Conqueror.

And what's more, the Germans would offer themselves for the sacrifice, so great is their subjection to the military ideal.

The only thing that balks German ambition is that battle line from the North Sea to Switzerland—and the British Navy.

The Only Thing That Sustains Our Men on Land and Sea—is Food

What are we, each one of us, prepared to do to insure that Food supply?

Germany, by her submarine campaign, has seen that great Armada, the British Mercantile Marine, shrink in volume.

Germany has seen South America, Australia, New Zealand, India and far away outposts of the Empire practically cut off from supplying food to the Motherland because of the lack of ships.

Forty million Allied men and women having been put on war-work, food production has dangerously decreased in Europe.

These forty million consume more food than when they were in ordinary occupations, and there are fewer men for farming. Hence an increased demand and decreased supplies.

The harvest of France was one-third less in 1917 than in 1916, and this year must be smaller still, owing to lack of fertilizers, which cannot be supplied through shortage of shipping.

The world's decrease in live stock, as compared to 1913, is approximately 115,000,000 head.

The heart of this problem is labour.

Without more farm labour more food cannot be produced.

If you really want to serve your Country in a big, practical way, register now for farm labour, or urge and assist your male employees to do so.

Herbert Hoover Says:

"Our European Allies are dependent upon us for greater quantities of food than we have ever before exported. They are the first line of our defence. Our money, our ships, our life blood, and not least of all, OUR FOOD supply, must be of a common stock.

"In pre-war times, Britain, France, Italy and Belgium yearly imported more than 750,000,000 bushels of grain, plus vast quantities of meats and fats.

"The submarine destruction of shipping has made it necessary to abandon the hope of bringing food from South America, Australasia and India.

"Food must, therefore, be shipped from Canada and the United States—the nearest and safest route.

"Canadian and United States supplies are normally 350,000,000 bushels short of the Allied needs. By greater production and conservation Canada and the United States must combine to increase the export of grain by 150,000,000 bushels.

"The remaining shortage of 200,000,000 bushels must be overcome by greater reduction in consumption in the allied countries. And this is being done by Britain, France and Italy rationing their people.

"From two and a half years of contact with the German Army I have come out of the horror with the complete conviction that autocracy is a political faith and a system that directly endangers and jeopardizes the future of our race—that threatens our very independence. It has, however, been able to command complete inspiration of devotion and self-sacrifice in its people to the interest of their nation. The German farmer, in the name of the Fatherland, supports a nation two-thirds as large as the United States and threatens to subject the world from an area one-half the size of Ontario.

"My vision of War is not of an academic problem to be solved by discussion. To me it is a vision of brave, dying men and suffering women and children, for service on whose behalf the greater exertion of the Allies' farmers comes in a direct necessity and a direct plea. The Canadian and the United States citizen who sees war as I see it, needs no inducement and no inspiration but the thought that every spade full of earth turned and every animal reared is lessening human suffering and guaranteeing the liberty of the world."

Lloyd George's Warning

"I fear the disciplined people behind the German Army, the rationed family and the determination of wife and sister and daughter and mother to stand and starve—so that their fighting men may be fed—I fear it more than the Imperial German Army itself."

Britain is now on Food Rations.

France is now on Food Rations.

Italy is on the verge of starvation. Only continuous support from us can enable us to hold out.

Only with a disciplined people behind can we hope to win. The rationed British Nation, blood of our blood, bone of our bone, are proudly paying the price and sharing with France and Italy their limited stock of food. For in this there is mighty pride, a conscious measuring of their glory with the best traditions of ancient Sparta, and of Imperial Rome, for Britons know that upon them rests the burden of saving humanity. The story of their service shall ring and echo forever along the hill tops of history.

To Send More Food to Our Allies is Not Charity

It is war. The Allies have a right to demand it. They have a right to resent the offer of only what is "left over." Those who are fighting the common battle for civilization and for our protection have a higher claim than had Lazarus, to only the "crumbs that fall from the rich man's table."

The Canadian people must recognize that our Allies have the first claim on our food supplies.

As the shipping situation makes the Allies dependent upon the North American continent for food, it is vitally necessary that Canada should increase her production of food in order to take a larger part in providing for the Allies' requirements. This is especially urgent as the maintenance of a large United States Army in the European field will cause a very heavy drain on that country's resources.

There must be no peace without victory.

For nearly four years Germany has been struggling against the powers of law and order. She has failed so far to make good her escape with her booty by superior strength and skill. And now she is attempting by intrigue, suggestion, device and propaganda to divert the attention of her antagonists from the struggle itself, and thus to gain her ends by relaxing the strength and skill of her antagonists.

What she can gain from these tactics is plain to all the world in the sorrowful experience of Russia.

Germany's most dangerous weapon is not her Zeppelin—that is obsolete. Not her submarine—that can be overcome. Not her machine-like army—that has been repeatedly hurled back by the living armies of freemen. Her most dangerous weapon is her propaganda of peace.

While with her hands she murders and despoils, with her voice she invites to parleys.

When Liberty is in Peril There is Threat of Lasting Disaster in the Very Word "Peace"

Lord Leverhulme, long known in Canada as Sir William Lever, who knows well the German mind, in a recent interview stated:

"You will never be able to dictate terms to Germany till she is beaten. The argument you mention is founded on the dangerous fallacy that because Germany is sick of this war she is sick of war in general. She isn't. I doubt if her Government is even sick of this war. You've read the speech of that old brigand, Hertling. Is there any sign of repentance in that speech? Is it a chastened speech? Is it the speech of a statesman who wants disarmament and a league of nations? No! Germany is back in her mood of 1914. She believes she is winning the war. She believes she has won now. And if we talk of peace to her she HAS won it. Why, it would be better a thousand times that every man in England should be dead than that Germany should issue from this war with the feeling of a conqueror. You hear people use the phrase, 'to the last man, and the last shilling,' and you think it is only a bit of rhetoric, but to my mind it's the most solemn and absolute truth. I mean when I say it that it would in very truth be a million times better for the people of these islands to be dead, every one of them, rather than live on as the serfs of a triumphant Prussia."

How can any lover of liberty remain insensible to this peril? Food means Victory and the world made safe for democracy—Lack of food means disaster and subjugation to Germany.

The Citizens of Ontario Must Lead This Mighty Crusade for Greater Food Production

They did it last year and will do it again.

As the greatest food-producing Province, Ontario must maintain her leadership in America. Great are our opportunities—our responsibility is tremendous.

Upon every man and woman, boy and girl, rests a personal obligation to serve. Every pound of food produced, in whatever form, is a contribution to the Cause of Freedom.

Ontario farmers should sow 500,000 acres of spring wheat.

Every Ontario farmer whose land is at all suitable should put an extra five acres into wheat, even at the expense of another crop.

What YOU Can Do To Help

At all costs production must be maintained.

That's why farmers and farmers' sons are being exempted from military service. Working on a farm is equivalent to service in the Second Line Trenches.

To enable the farm to do the work two factors are essential. The first is Time. Whatever we are to do must be done at once. Nature waits for no man. The second is Labor. Many farmers cannot plant the acres they would because they cannot get the necessary help. Many are afraid to increase their acreage because they fear they would not be able to cultivate and harvest an unusual crop after they had raised it.

The burden is not one to be placed solely upon the farmer. Neither can it be placed upon the townsman. It is a personal obligation upon every man, woman, boy and girl, in every farm, town and city home in the Province of Ontario.

AWAY WITH CRITICISM—CO-OPERATE! Mr. City Man, don't say that the farmer should do so-and-so, and thus allow criticism in this hour of our Nation's peril to cripple your effort.

Mr. Farmer, don't hastily underestimate the value the city man can be to you.

GET TOGETHER IN THE FIGHT FOR LIBERTY

Let us not lament what MIGHT be, but earnestly face what MUST be.

Fifteen thousand boys between the ages of fifteen and nineteen must be organized as "Soldiers of the Soil" to work on Ontario farms this season.

Farmers can get one or more of these boys by applying to their District Representatives or to the Public Employment Bureaux at Toronto, Ottawa, Hamilton or London.

Unmarried men, exempted from military service, are urged to take up farm work. Married men who have had previous experience on a farm are urged to resume farm work for a season. Employers of labor are asked to assist men to take up farm work.

We urge the farmers and the townsmen to get together for greater production in the interests of a free people and democracy.

Let the Organization of Resources Committee, your District Representatives, or the Public Employment Bureaux act as your intermediaries.

When we have done our best, the cry for food cannot be wholly met.

For the rest—our Allies are tightening their belts.

Organization of Resources Committee

Parliament Buildings, Toronto, Ont.

CHAIRMAN: His Honor Sir John S. Hendrie, K.C.M.G., C.V.O., Lieutenant-Governor of Ontario. VICE-CHAIRMEN: Honorable Sir William H. Hearst, K.C.M.G., Prime Minister of Ontario; William Proudfoot, Esq., K.C., Leader of the Opposition. SECRETARY Albert H. Abbott, Esq., Ph.D.

The only thing that balks German ambition is the Battle Line in France and—the British Navy. The only thing that sustains our men on land and sea is Food

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Parry Sound, Ont.—Messrs. C. H. Burgess and Company, of Toronto, have purchased a block of $15,000 6 per cent. bonds payable in 30 annual instalments. These were issued for school purposes.

Three Rivers, Que.—The city has sold to the Provincial Securities, Limited, of Quebec, between $900,000 and $1,000,000 of 6 per cent. five-year bonds at 95 flat, or equal to a price of 92.50 and interest.

Sherbrooke, Que.—The city has received two offers of 95.90 and 97 for its issue of $150,000 6 per cent. five-year bonds, but has declned to sell at present.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from March 11th to 15th, 1918:—

School Districts.—Gold Bank, $120 10-years not ex. 8 per cent. annuitv; B. Sawyer, Stenen. *Battrum, $450 5-years not ex. 8 per cent. instalment; Robt. Allen, Battrum. *Edenview, $2,000 10-years not ex. 8 per cent. annuity; W. Bens, Primate. *Madison, 2,500 10-years not ex. 8 per cent. annuity; W. E. Finlay, Noremac.

---

*Being sold by the Local Government Board.

Rural Telehone Companies.—Radford Lodge, $6,200 15-years not ex. 8 per cent. annuity; A. Alvis, Dumterline. Naseby, $11,000 15-years not ex. 8 per cent. annuity. W. Affleck, Naseby.

The following is a list of debentures reported sold from March 11th to 15th, 1918:—

School Districts.—Atkins, $1,800, Pinto Head, $2,000, Bryn Mawr, $2,000, Montro, $2,000; Waterman, Waterbury Manufacturing Company, Regina. Gramlich, $2,000; Kerr, Fleming and Company, Regina.

Rural Telephone Companies.—Haultain, $4,000; George Foley and Sons, Saskatoon. North Webb, $2,100; Nay and James, Regina. Dilke, $600, Brickleigh, $9,000, Greenwood, $9,600; W. L. McKinnon and Company, Regina. Shamrock, $22,800, Baljennie, $9,200, Colonsay, $12,000; Goldman and Company, Regina. Currie, $4,700; Houston, Tallman and Company, Regina. South Marengo, $11,000; J. A. Thompson, Winnipeg. Lynne, $5,600, Bridgeford, $5,800; Kerr, Fleming and Company, Regina. Bangor, $5,500; Bond and Debenture Corporation, Winnipeg.

Villages.—Hawarden, $3,000, Bromhead, $1,000, Lancer, $2,700, Dunblane, $1,500; W. L. McKinnon and Company, Regina.

LIBERTY LOAN THREE BILLIONS

Secretary McAdoo announced on March 25th, that the amount of the third Liberty Loan would be three billion dollars, at 4¼ per cent., and that all over-subscriptions would be accepted.

The new bonds will be non-convertible, but bonds of the first and second Liberty Loans may be converted into the new 4¼ per cent. securities. Authority to issue $4,500,000,000 in bonds in addition to the $3,666,000,000 already authorized and unissued is proposed in new loan legislation prepared for submission to congress, so that the total amount which may be issued is $8,166,000,000.

Congress will be asked for authority to make additional loans to the allies during the coming summer. The decision to make the new bonds unconvertible, the secretary announced, was reached in order to put an end to the expectation of higher interest rates. Mr. McAdoo said expenditures of the United States and the allied governments had been much below estimates, and that, consequently, it was not necessary to make the loan larger than three billion dollars.

The annual meeting of the American Sales Book Company was held on Tuesday, and was attended by the American directors of the company.

VIEW OF HOLLAND INVESTORS

Many of Our Mortgage Debentures Sold in That Country —Points for Share and Debenture Holders

During 1916 and the early part of 1917 an important amount of debentures was sold by the different Canadian mortgage companes in Holland, which proved again that the Dutch public considered that the debentures of mortgage companies operating in Canada had attractive features from an investment standpoint. Commenting upon this matter at the annual meeting of the Dominion Mortgage and Investments Association at Toronto this week, Mr. J. G. Coster, general manager of the Holland-Canada Mortgage Company, said:—

"The great development of national industry during 1917 has, however, made it more difficult to sell debentures in foreign mortgage companies. A strong feeling has risen on behalf of national industry, which, during the present period, is very easy to understand.

Other Demands for Capital.

"After the war is over there will be other demands for capital. There is no doubt in our minds that England, France and Belgium will try to place their securities in countries which did not suffer financially as much as they did, and, as the rate of interest on investments to be made in this way, no doubt, will be attractive (say, 4½ per cent. to 5 per cent.) and the investment itself a safe one, we expect that an important part of the Dutch capital will be invested in this way, with the result that our 5 per cent. debentures will not have the same attractions as they have had before.

"However, though the above-mentioned circumstances may affect our business somewhat, at the same time we feel that there is no reason at all to feel anxious for the near future. Our head office in Holland undoubtedly will find the necessary means to overcome the difficulties, and, although they will, perhaps, not be able to remit as large amounts as they were able to send us before the war, there is no doubt in our minds that considerable business will be done by them.

"About the middle of the month we received a letter from our partner in Holland, stating that the present circumstances were not very favorable for the sale of debentures, but that at the same time he had no doubt that a revival might be expected in due course.

Two Points Hamper Business.

"As far as the investors in Holland can see, there are only two circumstances which might hamper our business considerably. The first one concerns the shareholders, and the second one holders of debentures.

"If the government is actually going to increase the present taxes levied on mortgage companies, which are already considerable, we feel that our shareholders will rather liquidate the business than to hand over the profits in the form of taxes. Our net profits at the present time amount to decidedly less than 1 per cent. of the amount invested, and if, for one reason or another, even this profit is taken away to an increasing extent, we feel that there is no reason to continue our business.

Interested in Legislation.

"The holders of debentures are greatly interested in the present legislation. The Dutch financial papers being very well posted with regard to this, and being fully aware of the fact that a considerable amount of Dutch capital is invested in Canada, make it a point to keep their readers informed about all that concerns financial conditions in this country.

"Before the war, when so much money was being obtained from Europe, Canada was favored by investors largly because of the high character of her legislation, but the steps taken by one or two of the western provinces after that time have been severely criticized, with the result that holders of debentures are feeling less safe than they did before. At the same time, however, it is generally understood that these times cannot be considered normal, and we always express as our opinion that, immediately after the war is over, the legislation in question will be removed. We sincerely trust that the future will show that our view was a right one."

The N. S. McGloan Company, dealers in investment securities, have opened offices at 46 Princess Street, St. John, N.B.

Exempt from Dominion Tax

It is good business to increase your holdings of Victory Loan Bonds, because the security is of the highest quality, the income return attractive, and you are not required to pay Dominion Income Tax.

CANADA'S CAPACITY TO PRODUCE STEEL

Manufacturers May Be Faced With Necessity of Closing Inefficient Plants, Running Others at Full Capacity

In the two previous issues of *The Monetary Times* were printed the views of Colonel Carnegie as to the readjustment of industry after the war. Colonel Carnegie is a member and ordnance advisor of the Imperial Munitions Board, Ottawa. He discussed at the annual meeting of the Canadian Mining Institute, and at other meetings subsequently, two problems—namely, how to secure remunerative trade without unrestricted competition and how to maintain efficient production with competitive co-operation. In making an appeal for immediate action, he admitted that his proposals might be regarded by some as revolutionary, but he claimed to have incorporated in his scheme some of the good features of the German Kartells, which have contributed so largely to the success of German trade, while discarding the private monopoly characteristics in them. Colonel Carnegie continued:—

"Further, those of you who have followed the work of the ministry of munitions in the United Kingdom, and the work of the shell committee, and subsequently the Imperial Munitions Board in Canada, will, I hope, see the possibilities of success in the operation of trade boards, or some other similar organizations having the same objects. The functions of the production boards, which I have outlined, are simply an elaboration of the proposals I made in my paper entitled 'A Plea for the Union of Capital and Labor,' and correspond very closely to those of the joint standing industrial councils proposed by the Whitley commission and formally adopted by the British government.

Industries of Canada.

"If we consider for a moment the principal industries of the Dominion of Canada over which these boards could preside, we will find that there are approximately 16, including: (1) The iron and steel products; (2) the metal and metal products, other than steel; (3) timber and lumber, and their manufactures; (4) chemicals and their allied products; (5) textiles; (6) paper and printing; (7) leather and its finished products; (8) clay, glass and stone products; (9) refractories for furnaces; (10) fuels, oils and paints; (11) vehicles, locomotives and engines; (12) ships; (13) aeroplanes; (14) food products; (15) agricultural products; (16) fertilizers as distinct from chemical production.

"All these industries, with the exception of aeroplanes, brought about $1,100,000,000 worth of export and import trade to the Dominion of Canada in 1914.

"From the fifth census of Canada, 1910, there were 471,126 employees on wages, and 44,077 on salaries, engaged in manufacturing, making just over half a million producers in Canada.

"The value of the products during that year amounted to $1,165,075,639 and during 1916 the total value of the import and export products amounted to $1,424,916,065. It is doubtful if more than 500,000 were employed during 1916, in spite of the increased value of the trade, as the wages were very much higher than in 1914.

"If this is a fair estimate of the labor now employed in manufacturing, and if, when the war ends, one-third of the value of the whole products are cut off, there would be approximately 150,000 thrown idle to mix with the returned soldiers, who would ultimately number about 300,000. These figures are sufficiently startling to call for earnest and urgent action.

Business through Imperial Munitions Board.

"Since the war began over $1,000,000,000 worth of trade has been handled by the shell committee and the Imperial Munitions Board. At one period in the operations of the Imperial Munitions Board it was handling at the rate of over $600,000,000 of business per year.

"I mention this simply to show that if the Imperial Munitions Board could control such a volume of work, distributing orders among hundreds of Canadian manufacturers, orders which involved the recasting of their methods of manufacture, plunging most of them into new forms of industry, calling for rigid inspection and much greater care in manufacture than ever practised in Canada before, is it at all likely that the manufacturers of each industry in Canada would be unable to form themselves into properly constituted boards and obtain government support, to secure what trade their companies could undertake, and distribute to each factory a full share of the work they were able to secure, follow the production of the work and control the delivery of the product?

"The marvellous growth of the munitions business during the past 3½ years in Canada encourages me to believe that Canada's opportunity is great for remodelling her methods of obtaining trade and maintaining efficient production.

"You will no doubt reflect that the finances and markets of the British government have been behind the Imperial Munitions Board, and that, in consequence, such financial backing with demands for munitions have made favorable opportunities for an economic central agency of control for the supply of munitions. These facts cannot be denied; both finance and markets are essential in industry. It is because the finances of Canadian industry were never more favorable for the organization of properly constituted buying and selling trade boards to explore the markets of the world and inspire Canadian enterprise, that I believe no time should be lost in their formation.

"If we review the world's trade, and examine the mineral resources scattered over the world's surface, we shall find that there are sufficient materials to supply the needs of the people. The human resources provided in different parts of the world are plentiful for turning the mineral resources into products for the use and convenience of man. The markets of the world for Canada's natural products will increase in number just as Canada recognizes the value of her own human resources in changing dead minerals into vital uses; without exercising that cruel, unrestricted and degrading competition which modern civilization without applied Christianity has allowed to fix its octopus grip around industry.

Steel Trade and Production Boards.

"In concluding my remarks I should like to urge the necessity for immediate action in the formation of trade and production boards, beginning, for instance, with one or two of the principal industries. If we consider their application to the steel industry we shall find a large field of useful activity.

"Before the war Canada's capacity to produce steel was approximately 1,000,000 tons per year, or about 1/80th of the world's steel producing capacity. To-day, its capacity is approximately 2¼ million tons per year, or nearly 1/40th of the world's present estimated capacity. Canada has reason to be proud of the increase. No other steel producing country has advanced in this respect more than 25 per cent. during the war. Canada's increase has been over 100 per cent. From 60 to 70 per cent. of Canada's steel production is at present used for munitions purposes. When peace is declared, that capacity should be turned to domestic uses.

"Immediately prior to the war the steel industry was in a deplorable condition for want of trade. After the war it may be worse, although the finances of the companies, as a whole, will be better than at any previous time.

Not Ignorant of Demands.

"The steel manufacturers are not ignorant of the demands which are likely to be made in Canada for ships' plates, rails, materials for rolling stock, structural steel, steel for agricultural purposes, automobiles, tractors, general and machinery castings, but I know of no definite attempt which has been made by them collectively to line up matters. The steel manufacturers are conscious that the sudden stoppage of the supplies of munitions steel in all the belligerent industrial countries will set free capacities for other steel production on such a huge scale that the small manufacturers may be crushed out by the greater, particularly if the old systems of unregulated competition and dumping are allowed to continue unchecked.

"These reasons alone should be sufficient to warrant organizing boards for securing trade and maintaining efficient production. It would appear imperative that investigations should be made immediately regarding requirements, and in the preparation of plans for securing trade in volume and character, which will keep all factories fully employed. Every avenue of trade which Canada is capable of following economically should be explored now. It is folly to wait until the war is over to make arrangements to secure orders to fill the gaps which will be made when the manufacture of munitions ceases.

"It is not only necessary to plan for, and actually secure orders before peace comes, but to study the most efficient means of production. This can be done by organizing production boards capable of throwing their whole energy into each line of study which will make the workers, processes and machinery capable of the highest output of the best quality.

"It is only by exercising the greatest care and devoting earnest attention to the conservation of energy and materials in the employments most natural to Canada, that manufacturers may hope to survive the pressure of low prices from foreign sources after the war.

"Steel manufacturers may be faced with the necessity of closing down some of the less efficient plants and running others at full capacity, or it may be considered wise to keep all factories going, giving employment to all, rather than throwing the workers out of employment, with the necessity of feeding them through charitable organizations from dwindling stores which only can be replenished from the profits of production. If labor is suddenly thrown out of employment, with their sources of food supplies gradually drying up, while many empty chairs in the homes remind them of their sacrifices and losses, it will make a very serious situation in the country for manufacturers and government. This phase of the problem cannot be overlooked; now is the time to consider the necessary steps to prevent such eventualities.

Domestic or Foreign Trade.

"If steel trade and production boards were formed now, and manufacturers prepared plans to meet conditions after the war, they might find it would be impossible to arrange for sufficient domestic or foreign trade to keep more than a moderate percentage of their employees engaged. Under such conditions it might be considered advisable to approach the government with a view to urging it to place additional orders for steel materials required in public works construction, railways, etc., which would help to fill the surplus capacities in the factories.

"Whether the government, however, considered such help advisable or not, would not, in my opinion, lessen the necessity for seriously planning now for trade rather than waiting until peace is declared, when excited conditions might force the manufacturers and government into a policy which maturer judgment would deprecate.

"It seems to me that any policy framed now whereby the workers could be kept fully employed after the war instead of being thrown out of employment, would repay both the manufacturers and government for any serious expenditure of time and thought given to the subject.

"The unemployed will have to be fed, and fed at the expense of the government. It would, therefore, appear wisdom to let them feed themselves by keeping them fully employed and happy. From an economic point of view the government may consider it policy to place orders for materials in the manner suggested, up to the measure of necessity, rather than undertake the responsibility of a large amount of unemployment in the country.

Money for Reconstruction.

"If we consider the daily war expenditure from Canada alone; an expenditure involving the destruction of life and materials, is it unreasonable to suggest that a small fraction of this expenditure be usefully employed in providing stocks of material for useful construction work, which will enable the country's industry to be carried over a period of reorganization which will come immediately after the war. Surely it must appeal to business men that the people's money, which has been so lavishly spent during this war in destruction, might be at least wisely spent in reconstruction, particularly when we are sure that that period of readjustment immediately after the war will involve approximately 150,000 workers at present engaged in munitions, and subsequently approximately 300,000 soldiers who will return to Canada, all of whom must be fed, as the result of their own employment or kept at the government's expense if employment cannot be found for them.

"The British government, through its ministry of reconstruction, has put in motion the forces of industry to grapple with and solve the problems which before the war hindered efficient production and the means of securing remunerative trade. Already the stupendous work organized by Dr. Addison, the minister of reconstruction, has given a new outlook to British industry.

"I believe that manufacturers and industrial workers of Canada who have shown to the Empire a genius and enterprise in the manufacture of munitions which have been the admiration of all, will not fail to recognize the urgent necessity of organizing the industrial forces of the Dominion to secure remunerative trade without unrestricted competition, and maintain efficient production with competitive co-operation."

SUCCESSFUL SEARCH FOR SUBSTITUTE

Southern Pine Oil and Ore Flotation Process—Work of Forest Products Laboratories

German efficiency has been the theme of many articles in the last three years. All that is said about German efficiency may or may not be true, but one thing is certain, that Canadians ought at the earliest moment to make themselves masters of their own house, so that never again will they be dependent for chemicals, dyes and other necessities upon people who may declare war upon them. Canada is a great forest country. If we are going to get the most out of our forests and not be mere hewers of wood for other nations, then we must know about the growth and reproduction of trees, the best methods of harvesting our timber crop, and the best methods of utilizing each particular kind of tree to the highest advantage. Since the discovery that paper could be made from wood our opinions as to forest values have undergone complete change, and in many ways we are using wood much more efficiently than a few years ago.

It was with the view of conserving Canada's timber resources that the Forestry Branch of the Department of the Interior was established about fifteen years ago to take up fire protection, forest reproduction, tree planting, etc., and a later development of three or four years ago was the establishment of the Forest Products Laboratories as part of the Forestry Branch. This organization found a number of problems awaiting it, such as the strength of timbers, methods of preventing decay, how to secure the best pulp out of certain woods, etc., and since it has been working, many fresh problems have been presented.

Substitute for Pine Oil.

Among these was the problem of finding a substitute for the pine oil of the Southern States, which is an essential factor in the "flotation" process of extracting metals. Pine oil, a comparatively insignificant product of the turpentine business of the Southern States, by the discovery of the fact that it would collect the metal particles from the rock in this process, became at once one of the most important articles of commerce. United States mining men contracted for supplies ahead, the price went bounding up, and it looked as if Canadian mine operators would be shut out of the market altogether by the simple fact that all the supplies would be absorbed by those on the ground. In these circumstances the mining men, through the minister of the interior, got their problem taken up by the Forest Products Laboratories.

From Eastern Red Pine.

The chemists went to work, and in eight months produced a pine oil from the stumps of eastern Canadian red pine and western Canadian yellow pine, but, like the southern pine oil, it was not a cheap product. That discovery in itself would have been a great gain, for it would have assured Canadian mining plants of a supply of the necessary material. But the investigation went further and discovered a substitute in an oil now being made cheaply and in large quantities in Canada, which substitute, it was found by test in the mines branch and in reduction plants at Cobalt, would do the work just as well as the almost unobtainable pine oil. This substitute is hardwood creosote oil, a by-product of the wood distillation industry, the business which furnishes wood alcohol and allied products. This discovery is clear gain, because it makes a cheap material, almost a waste by-product, take the place of a scarce and dear imported article. The large quantity of creosote oil daily manufactured banishes any fear of famine, and both the mining men and the wood distillation men are delighted with the result of this application of science to the problems of their respective industries.

MERCHANTS BANK LENDS MONEY TO STOCK MEN

In the Alberta Provincial Legislature on March 21st, Hon. Duncan Marshall, minister of agriculture, announced that the Merchants Bank of Canada had agreed to loan $1,000,000 to the province at 6 per cent. toward the encouragement of the livestock industry, under the act passed last year known as the "Cow Bill." During the first year of the operation of the act, the minister informed the house, the bank had loaned $500,000 for this purpose, and it had all, with $300,000 in addition, been taken up by the Alberta farmers.

TRADE BALANCES AND CREDITS

Interview in New York Sets Out International Position—Maintenance of Canadian Market

"Americans do not appear to be very well posted as to the way Canada has always managed so promptly to retire her trade indebtedness," says a prominent Canadian to the Wall Street Journal. "For one thing, the fact is overlooked that for a long time past Canadian exports to the United Kingdom have by far exceeded the sum of imports and of all interest payments there. In the fiscal year 1916 Canada sold to Great Britain goods worth $463,000,000 and bought commodities valued at $80,075,000. In the year ended March, 1917, the figures were: Imports, $107,000,000; exports, $742,000,000. For the current year, the trade balance in Canada's favor will be even larger. It will probably run over $800,000,000. To this must be added balance of trade with countries other than the United States, making up another $100,000,000. Ater all allowances for interest payments and maturities and after deducting trade balance of over $400,000,000 in favor of the United States, there will be a net credit to Canada as against the entire world of $400,000,000.

Arrange Relationship.

"With such intimate financial and purchasing co-ordination between the British government and Washington, there should be little trouble in providing, when and if necessary, a credit here in favor of Canada.

"In a sense, Great Britain has maintained the Canadian market. She has for years furnished a large part of the funds which have enabled United States merchants to make their Canadian collections. It is quite likely that prices of farm products will stay at a high level for some years to come. If they do, whatever problems we may now have will easily and speedily resolve themselves in favor of the Canadian export position. In the meantime, it would seem but fair return that the United States should now enter into all necessary mutual arrangements with Great Britain and Canada to sustain trade between the latter two during the temporary period in which Great Britain, buying on credit in the United States, cannot very well pay cash in Canada."

ROYAL BANK'S RETURN

The condensed statement of the Royal Bank of Canada for February suggests that the combined statement of all the banks for the month, due shortly, should show favorable changes. The January bank statement reported a heavy drop in deposits due to payments on the Victory Loan. The Royal's February figures, with a gain of nearly 8 millions in total deposits, suggests recovery, although the lumping of all deposits in the condensed statement leaves it uncertain as to how much of the gain was in the bank's domestic and how much in its foreign business.

Royal added substantially to assets, the total being 8½ millions up for the month, with all this gain and something more appearing in liquid assets

MORTGAGE & INVESTMENTS ASSOCIATION

The following officers of the Dominion Mortgage and Investments Association have been elected for the current year: President, Major Hume Cronyn, Huron and Erie Mortgage Corporation; 1st vice-president, E. M. Saunders, Canada Life Assurance Company; 2nd vice-president, A. E. Holt, Royal Trust Company.

Executive Committee.—Life insurance, Mr. J. K. MacDonald, Confederation Life Assurance Company; Mr. J. F. Weston, Imperial Life Assurance Company; Mr. J. B. McKechnie, Manufacturers Life Insurance Company; Mr. Geo. Wegenast, Mutual Life Assurance Company of Canada.

Trust Companies.—Mr. A. D. Langmuir, Toronto General Trusts Company; Mr. J. C. Breckenridge, National Trust Company; Mr. J. M. McWhinney, Union Trust Company; Mr. S. C. McDonald, Mercantile Trust Company of Canada.

Loan Companies.—Mr. Jos. Campbell, Trust and Loan Company of Canada, Winnipeg; Mr. Alfred Whitman, Mortgage Corporation of Nova Scotia; Mr. W. E. Long, Credit Foncier Franco-Canadien; and Mr. W. G. Morrow, Toronto Loan and Savings Company, Peterboro, Ont. Secretary-treasurer, Mr. John Appleton.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

PROPOSED FEDERAL RESERVE SUBSIDIARY

An article on the suggested subsidiary of the Federal Reserve banks of the United States to handle foreign business, which was reprinted in *The Monetary Times* last week, was credited to a banking journal of the United States, but not correctly. The article was originally published in The Financier, of New York, known as the leading banking publication of America.

BANK OF HAMILTON

The fiscal year of the Bank of Hamilton has been changed to end on February 28. Formerly, the bank year ended on November 29, so that the statement for the last period, which has just appeared, covers an interval of 15 months. Comparisons are thus less interesting, but the figures for the 15 months ended February 28, bear upon the face of them abundant evidence of banking prosperity.

The profits for that period were $508,522, which represents 19.25 on the capital stock of $3,000,000. These earnings reported, however, do not include war taxes on circulation, patriotic contributions and pension fund assessments. Including most of these charges, the bank in the 1916 year earned 13.12 per cent., and in 1915 12.62 per cent., and in 1914 14.70 per cent. On the basis of 12 months the bank in the last period earned at the rate of 15.96 per cent. before charges mentioned above.

In the past 15 months the bank has manifested undoubted evidence of its strength. Its deposits increased to $53,359,000, from $50,563,000 at the end of the year 1916, and $41,688,000 at the end of 1915. The quick assets, which include $6,024,000 of Dominion notes, $901,000 of current coin, and $2,500,000 in the central gold reserves, amounted to $29,616,000. The total assets at the end of last month were $66,541,000.

PIG IRON AND STEEL

Some Interesting Figures of Production and Exports Last Year

The production of pig iron in blast furnaces during 1917 was supplemented by a small production of high grade low phosphorus pig iron in electric furnaces made from shell turnings and other steel scrap, according to preliminary returns of Mr. John McLeish, B.A., Chief of Division of Mineral Resources and Statistics, Ottawa. The total production from both sources (not including the output of spiegeleisen, or other ferro-alloys) was approximately 1,171,789 short tons (1,046,240 gross), final returns not yet having been received from all manufacturers of electric pig iron. Of the total, 1,156,789 tons were produced in blast furnaces and the balance in electric furnaces. In 1916 the production all made in blast furnaces was 1,169,257 short tons (1,043,979 long tons).

The small increase in pig iron production in 1917 was therefore due entirely to the electric furnace production, there having been an actual falling off in the blast furnace output.

The production in Nova Scotia in 1917 was 472,147 tons as against 470,055 tons in 1916. InOntario the production by blast furnaces in 1917 was 691,632 tons as against 699,202 tons in 1916.

Production by Grades.

By grades the 1917 production included: Basic, 14,092 tons; Bessemer, 961,656 tons; foundry and malleable, etc., 181,041 tons; electric furnace pig (subject to revision), 15,000 tons. The 1916 production included: Basic, 953,627 tons; Bessemer, 31,388 tons; foundry and malleable, etc., 184,242 tons.

The blast furnace plants operated were the same as in the previous year—viz., the Dominion Iron and Steel Company at Sydney, N.S., the Nova Scotia Steel and Coal Company, at North Sydney; the Standard Iron Company at Deseronto, Ont., the Steel Company of Canada, at Hamilton, Ont., the Canadian Furnace Company, at Port Colborne, Ont., and the Algoma Steel Corporation at Sault Ste. Marie, Ont.

Pig iron was made in electric furnaces by: The Canada Cement Company, Ltd., Montreal; Frazer, Brace and Company, Ltd., Shawinigan Falls, Que.; British Forgings, Limited, Toronto, Ont.; Electro Foundries, Limited, Orillia, Ont.; and Turnbull Electro Metals, Limited, St. Catharines, Ont.

The total production in electric furnaces of pig iron ferro-alloys and steel ingots and castings was in 1917 about 99,000 short tons.

The production of ferro-alloys in Canada in 1917, chiefly ferro-silicon but including also spiegeleisen, ferro-molybdenum and ferro-phosphorus, all with the exception of the spiegeleisen being made in electric furnaces, reached a total of 40,329 tons valued at $3,471,934, as against a total in 1916 of 28,628 tons valued at $1,777,615.

Exports of Pig Iron.

The exports during 1917 of pig iron were 12,081 tons, valued at $423,814 or an average of $35.08 per ton and of ferro-alloys 33,212 tons, valued at $2,616,924, or an average of $78.79 per ton.

The imports during 1917 included 82,758 tons of pig iron, valued at $2,744,055, or an average of $33.16 per ton; 632 tons of charcoal pig iron, valued at $19,447, or an average of $30.77 per ton; and 12,828 tons of ferro-alloys, valued at $2,029,990, or an average of $158.25 per ton, making a total import of pig iron and ferro-alloys of 96,218 tons, valued at $4,793,492. The United States trade records show exports to Canada during the 11 months ended November, 1917, of pig iron and ferro-alloys amounting to 130,087 gross tons (145,697 short tons), valued at $5,170,005, a figure considerably higher than the Canadian record.

Production of Steel.

The estimated production of steel ingots and direct steel castings in 1917, final returns for all operations not yet having been received, was 1,736,514 short tons (1,550,459 gross tons) of which 1,690,170 tons were ingots and 46,344 tons direct steel castings.

The total production in 1916 was 1,428,249 tons, compared with which the 1917 production shows an increase of 308,265 tons, or 21.6 per cent.

The total production of electric steel in 1917 was probably not less than 50,000 tons, as against 19,639 tons in 1916 and 5,625 tons in 1915.

The exports of steel ingots, or billets, ingots and blooms, during the nine months ended December (such exports not being separately classified previous to April, 1917) were 41,558 tons, valued at $1,831,917. The recorded imports of iron and steel ingots and billets during the year was 20,429 tons, valued at $1,378,576. This item is also much lower than the United States trade record which shows exports to Canada during 11 months ended December, of 143,209 gross tons (160,394 short tons), of billets, ingots and blooms of steel, valued at $11,418,033.

MERGERS ARE STRENGTHENING BANK SYSTEM

Commenting upon the absorption of the Bank of British North America by the Bank of Montreal, the Montreal Gazette says:—

"It may not be more than a coincidence but the fact that in a short space of time Ottawa has given its consent to two banking absorptions can hardly fail to suggest that the finance department is viewing the banking system from the large demands to be placed upon it, through the rest of the war, and in the adjustment period to follow. With the country being thrown more and more on its own resources, banking strength has assumed increasing importance, and in both the transactions approved by Ottawa it is clear enough that the banking system as a whole will be the stronger.

"The Royal Bank can assist the territory served by the Northern Crown to more rapid development than could be looked for from the efforts of Northern Crown by itself. Similarly in the case of the Bank of British North America, the transfer of control from London to Montreal would, in the natural course of events, promote more rapid expansion from within the Bank of North America system. There are points of difference in the two transactions. The Northern Crown had been through a trying period, which made co-operation with the larger institution desirable on special grounds. The Bank of British North America, on the other hand, has had a uniform record of success under highly efficient management, but a success perhaps less pronounced than it might have been if the directors and proprietors had been Canadians, here on the ground themselves to stimulate its growth, rather than watching it from across the seas.

"In both instances it is amply clear that the absorptions will tend to the advantage of the Canadian banking system as a whole, and to the public served by the institutions concerned."

UNITED STATES LOANS TO ALLIES

The grand total of United States loans to Allies is $4,960,600,000 to date, including $11,200,000 which was extended to Belgium. England has received the largest amount, $2,520,000,000, France is second with $1,440,000,000, while Russia received $325,000,000.

The national debt of the United States now stands in the neighborhood of $9,500,000,000, which means that every man, woman and child in the United States has lent his government approximately $95. At the beginning of the war the United States national debt stood at only $1,000,000,000, or $10 per capita. The following table shows in detail the monthly advances made to the allies (last six ciphers omitted):—

Date.	England.	France.	Italy.	Russia.	Belgium.	Serbia.
April ...	$ 200	...	...	...	...	..
May	200	$ 100	$100	$100	$ 45	..
June ...	160	110	...	...	...	$3
July ...	*395	320	60	75	...	..
August .	50	...	40	100	8	..
September	235	160	55	...	...	..
October .	185	130	230	50	5	..
November	435	310	...	...	7	..
December	158	155	...	...	11	1
January .	275	...	...	...	12	2
February	...	155	50	..	3	..
March ..	200	...	...	...	11	..
	$2,520	$1,440	$550	$325	$104	$6

---

*Private bank loan of $100,000,000 to Canada given official sanction.

The grand total of all loans to the allies is $4,960,600,000, including $15,000,000 loan to Cuba, but not including the $100,000,000 private loan to Canada

DIVIDENDS AND NOTICES

THE STEEL COMPANY OF CANADA, LIMITED

ORDINARY DIVIDEND No. 5

Notice is hereby given that a dividend of one and one-half per cent. on the issued and fully-paid Ordinary shares of the Company has been declared for the quarter ending March 31st, 1918.

PREFERENCE DIVIDEND No. 27

Notice is also given that a dividend of one and three-quarters per cent. on the issued and fully-paid Preference shares of the Company has been declared for the quarter ending March 31st, 1918.

The above dividends are payable May 1st, 1918, to shareholders of record at the close of business, April 10th, 1918.

By order of the Board.
H. H. CHAMP,
Treasurer.

Hamilton, Ontario, March 15th, 1918.

PROVINCIAL PAPER MILLS CO., LIMITED

Head Office, Toronto.

Notice is hereby given that dividends of One and Three Quarters (1¾%) per Cent. on Preferred Stock and One (1%) per Cent. on Common Stock of this Company have been declared for the current quarter, both payable April 1st, 1918, to shareholders of record at the close of business, March 15th, 1918.

By Order of the Board.
S. F. DUNCAN,
Secretary-Treasurer.

Dated Toronto, March 7th, 1918.

DOMINION TEXTILE COMPANY, LIMITED

NOTICE OF DIVIDEND

A dividend of one and three-quarter per cent. (1¾%) on the Common Stock of the **Dominion Textile Company, Limited**, has been declared for the quarter ending 31st March, 1918, payable April 1st to shareholders of record March 15th, 1918.

By Order of the Board.
JAS. H. WEBB,
Secretary-Treasurer.

Montreal, 4th March, 1918.

THE CANADIAN CROCKER-WHEELER COMPANY, LIMITED

SIR RODOLPHE FORGET.
SIR WILLIAM MACKENZIE.
SIR HERBERT HOLT.
F. GORDON OSLER.
W. G. ROSS.

ANNUAL REPORT OF THE DIRECTORS

Submitted to the Shareholders at the Annual General Meeting of the Company in Toronto, on Monday, March 25th, 1918.

Your Directors submit herewith the Balance Sheet of the Company as upon the 31st day of December, 1917, also Statement of Profit and Loss for the year, and Certificate of Messrs. Price, Waterhouse & Company, Auditors.

It will be noticed that the Gross Profit earned is somewhat less than during the preceding year, and this is accounted for by higher cost of labor and the lesser price received from munitions contracts. From the Gross Profit of $2,051,609.21 the sum of $524,317.97 has been reserved for depreciation of buildings, machinery and patterns, and the sum of $393,694.33 has been reserved for the amortization of munitions plants and equipment, leaving a Net Profit of $1,133,596.91. Deducting the sum of $780,000.00 for Dividends paid, a Surplus for the year of $353,596.91 has been brought forward. This surplus added to last year's balance at the credit of Profit and Loss account made a total at the credit of that account of $966,293.00, from which the sum of $500,000.00 has been transferred to Reserve, bringing the amount to the credit of Reserve account to $4,000,000.00 and leaving a balance of $466,293.00 at the credit of Profit and Loss.

Mortgage obligations on properties purchased have been reduced to the nominal sum of $24,000.00 and our Investments have increased from $165,277.24 to $703,172.01. Our Cash Surplus has been invested mostly in Victory War Loan Bonds and on March 1st, 1918, our holding of Victory War Loan Bonds amounted to $1,378,500.00. Our Reserve for Depreciation of buildings, plant and equipment now amounts to $3,810,313.88 and our Surplus to $4,466,293.00.

While contracts for munitions have fallen off very materially, our sales of standard machinery and supplies continue to improve, and in addition our Davenport Works have received contracts for a number of marine engines and boilers for ships that are being built in various parts of the country. Our Structural Steel Works at Bridgeburg, which were purchased from the Canadian Shipbuilding Company some years ago, have been re-converted into a modern shipbuilding plant, and the Company is at present engaged on a contract for building four steel cargo ships complete, of 3,500 tons each.

Following the usual policy of the Company our Inventory has been taken at or below cost, and sufficient allowance has been made in respect to any goods considered to be either obsolete or not readily saleable.

The detachment of twenty-five electrical and mechanical engineers contributed by the Company for service during the continuance of the war has been, and will be, continuously maintained, and in addition thereto generous contributions have been made to the Canadian Patriotic Fund, Red Cross Society, and other deserving war-time Funds, and the Company has been allotted the sum of $2,297,500.00 of Canada's Victory War Loan.

Your Directors desire to express their great regret at the death of the late Mr. W. R. Brock, Honorary President and Chairman of the Board, and of the late Sir William Mortimer Clark, LL.D., K.C. Mr. Brock was an original member of the Syndicate of ten who, thirty years ago, organized the first electrical undertaking in Canada from which our present Company grew, and during this term rendered valuable service to the Company. Mr. W. D. Matthews and myself are the only remaining members of the original Board of Directors, each of the other members, however, having continuously served as a Director of the Company until the time of his death. The late Sir Mortimer Clark had been a Director of the Company for over seven years, and had always taken the greatest interest in the affairs of the Company. Mr. W. D Matthews was elected Chairman of the Board to fill the vacancy created by the death of Mr. Brock. Mr. W. G. Ross of Montreal and Mr. George W. Beardmore of Toronto have been elected Directors since the last Annual Meeting.

FREDERIC NICHOLLS,
President.

CANADIAN GENERAL ELECTRIC COMPANY, LIMITED

AND SUBSIDIARY COMPANIES

CONSOLIDATED BALANCE SHEET, 31st DECEMBER, 1917

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ending March 23rd, 1918:—

O'Brien Mine, 64,460; Buffalo Mine, 88,000; La Rose Mine, 65,968; Aladdin Cobalt, 65,500; Beaver Mine, 65,730; Coniagas Mines, 154,000; Dominion Reduction Company, 128,000; McKinley-Darragh-Savage Mines, 172,114; total, 803,772 pounds, or 401 tons.

The total shipments since January 1st, 1918, now amount to 3,635,058.8 pounds, or 18,175 tons.

BANK BRANCHES OPENED AND CLOSED

The following is a list of bank branches opened and closed during the month of March:—

Branches Opened—2.

Banes, Cuba	Royal Bank of Canada
*Dafoe, Sask.	Imperial Bank of Canada

Branches Closed—2.

*East Broughton, Que.	Banque d'Hochelaga
Quebec, Que., Upper Town	Bank of Nova Scotia

*Sub-branches.

CANADA TO MAKE STEEL SHIP PLATES

Canada is arranging to manufacture her own supply of plates for steel shipbuilding. The government has just completed arrangements with the Dominion Iron and Steel Company, of Sydney, to begin immediate construction of a steel plate rolling plant with an output of 150,000 tons per year, or sufficient for the national shipbuilding requirements for some years to come. The cost of a new plant will be from three to five million dollars. It is expected to be in operation by the autumn of next year. The government is giving no direct financial aid to the company, but is guaranteeing sufficient government orders to insure a return on the investment.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4 c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent extra if charged.

BOOKKEEPER, ACCOUNTANT, BANKER, OFFICE MAN.—Become an expert in your chosen profession. The demand for high-grade trained men is keen. The trained man is not only able to respond and make good when opportunity presents itself, but has the power within him to create opportunity. Mail instruction in Higher Accounting, Chartered Accountancy (C.A. Degree of every province), Banking (Degree of Canadian Bankers' Association), Auditing, Business Law, Cost Accounting and Bookkeeping. Satisfaction assured—highest endorsements of successful students. We also teach—Commercial Art—Advertising—Show Card Writing—Salesmanship—Story Writing and Journalism—Civil Service and all Commercial Subjects. Write us for particulars (Department M.T.) Shaw Correspondence School, Toronto.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railroads for the first three weeks in March:—

Canadian Pacific Railway.

	1918.	1917.	Inc. or dec.
March 7	$2,617,000	$2,422,000	+ $175,000
March 14	2,496,000	2,670,000	— 174,000
March 21	2,846,000	2,648,000	+ 198,000

Grand Trunk Railway.

March 7	$1,122,582	$1,063,190	+ $ 59,392
March 14	1,135,553	1,068,837	+ 66,716
March 21	1,204,467	1,054,639	+ 149,828

Canadian Northern Railway.

March 7	$ 666,400	$ 669,100	— $ 2,700
March 14	733,000	738,200	— 5,200
March 21	788,200	719,100	+ 69,100

ONTARIO'S JANUARY FIRE LOSS

Analysis of Causes of Fire—Classification of Properties Destroyed or Damaged

The following is an analysis of the causes of fire in Ontario during January, 1918, prepared by the office of the provincial fire marshal, Mr. E. P. Heaton:—

Cause.	No. of fires.	Amount of loss. $	Insurance loss. $	Loss not covered by insurance. $
Chimneys, flues, cupolas, and stacks, overheated or defective	36	52,069	35,393	16,676
Conflagration	4	462,232	385,459	76,773
Electricity	32	91,413	86,959	4,454
Explosions	34	6,188	5,488	700
Exposure	52	56,194	50,155	6,039
Fireworks, fire-crackers, balloons, etc.	..	......	......	.....
Friction	6	4,940	3,925	1,015
Gas—natural and artificial	14	4,332	3,283	1,049
Hot ashes and coals	21	2,187	2,182	5
Hot grease, oil, tar, wax, asphalt, ignition of	5	14,229	12,629	1,600
Hot or molten metal	3	2,506	2,506	.....
Incendiarism	2	1,015	765	250
Lightning—buildings rodded	..	.....	......	.....
Lightning—buildings not rodded	..	.....	......	.....
Matches	94	10,336	9,866	470
Miscellaneous—cause known but not classified	7	101	101	.....
Open fires	16	2,397	2,347	50
Open lights	70	37,768	28,555	9,213
Petroleum and its products	35	6,750	6,503	247
Rubbish and litter	2	2,305	2,305	.....
Smoking (cigars, cigarettes, pipes, etc.)	20	45,683	45,683	.....
Sparks, arising from combustion (excluding No. 23)	18	2,531	2,476	55
Sparks on roofs, from whatever source (excluding No. 22)	19	16,561	11,061	5,500
Spontaneous combustion	6	46,710	46,450	260
Steam and hot water pipes	9	2,820	2,720	100
Stoves, furnaces, boilers and their pipes	174	218,768	159,360	59,408
Unknown	65	124,016	80,235	43,781
Unclassified (temporarily)	146	172,233	160,223	12,010
Total	890	1,386,284	1,146,629	239,655

Destroyed or Damaged.

The following is the classification of properties destroyed or damaged by fire during January:—

Class of property.	No. of fires.	Amount of loss. $	Insurance loss. $	Loss not covered by insurance. $
Apartment houses, rooming houses, flats	6	205	155	50
Barns (farm only)	11	15,895	13,993	1,902
Buildings in course of construction	1	2,000	2,000	.....
Churches	6	3,599	3,549	50
Club houses	1	5,000	3,900	1,100
Coal, coal and wood yards, trestles	..	......	......	.....
Cordwood, logs, lumber, bark in woods	..	......	......	.....
Dwellings	589	167,059	125,091	41,968
Elevators and grain warehouses	..	......	......	.....
Exhibition buildings, rinks, amusement parks, racetracks	..	......	......	.....
Garages	9	12,020	11,970	50
Automobiles, motor cars, motor trucks	5	557	545	12
Halls, lodge rooms, assembly halls, fire halls	6	23,507	14,392	9,115
Hotels and boarding houses.	14	22,809	21,134	1,675
Hotels and boarding houses (summer only)	1	34,500	25,500	9,000
Lumber in mill yards and wholesale and retail yards.	..	......	......	.....
Mercantile stores	140	681,479	558,995	122,484
Office and bank buildings	7	10,753	7,657	3,096
Manufacturing and special hazards	44	301,252	258,969	42,283
Prisons, reformatories, gaols, asylums	..	......	......	.....
Railway risks—steam and electric	8	2,892	2,792	100
Schools, colleges, hospitals, libraries	13	40,631	39,381	1,250
Steamers, tugs, vessels, dredges, yachts	1	250	......	250
Stables, sheds, outhouses (not farm risks)	19	11,989	7,734	4,255
Theatres, moving picture houses	3	9,842	9,842	.....
Miscellaneous—such as bridges, threshing outfits, stone crushers, icehouses, evaporators, mining risks.	6	40,045	39,030	1,015
Total	890	1,386,284	1,146,629	239,655

Canada's war appropriation to be voted this session will be for an amount not exceeding $500,000,000. Sir Robert Borden has given notice of a resolution asking parliament to authorize this expenditure.

"Representing The Mutual Life of Canada"

Efficient representatives of our Company will be found in every important centre in the Dominion and in the Island of Newfoundland. Their motto is "Service" and they will gladly furnish any needed information regarding Life Insurance in general and Mutual Life Insurance in particular. The Company issues policies on every approved plan—including Endowment Policies, Monthly Income Policies, and Policies designed for the protection of Business Enterprises. It has been the aim of the Mutual Life of Canada to introduce into its contracts every modern privilege that is compatible with safety, but the distinguishing feature of the Company is Mutuality. Under this system all profit from whatever source reverts to the Policyholders and so reduces the cost of protection. We furnish—
The largest amount of protection for the least possible outlay.

The Mutual Life Assurance Co. of Canada
Waterloo Ontario

UNLESS

The Great-West Life Assurance Company were providing particularly attractive policies it would not—for eleven successive years, have led all Canadian Companies in the amount of business written in Canada.

UNLESS the funds were invested at an exceptionally favorable rate it would be impossible to pay the unequalled profits that are being paid to Policyholders.

UNLESS strict economy prevailed, the advantage of these high earnings would be lost.

These and many other points of vital interest to those looking for the best in Life Insurance, are referred to in the Twenty-fifth Annual Report of

The Great-West Life Assurance Co.

CANADIAN GENERAL ELECTRIC COMPANY

A very satisfactory financial statement was presented at the annual meeting of the Canadian General Electric Company on Monday. The following statement shows the profit and loss account, with the last three figures omitted:—

	1917.	1916.	1915.
Gross profits	$2,051	$2,225	$1,219
Depreciation	524	408	416
Amortization	393	631	...
Net profit	$1,133	$1,185	$ 803
Dividends	780	779	698
Balance	$ 353	$ 405	$ 66
Previous balance	612	707	940
Total profit and loss	$ 966	$1,112	$1,007
To reserve	500	500	300
Balance	$ 466	$ 612	$ 707
Reserve	4,000	3,500	3,000
Surplus	$4,466	$4,112	$3,707

The gross profits were smaller, owing to the higher cost of labor and the reduction in profits received from munition contracts. Despite somewhat lessened actual profits, the company wrote off heavily for depreciation of plant, and also for the amortization of equipment for munitions. The net profit was $1,133,569. Dividends during the year required $780,000, and a surplus of $353,579 has been brought forward.

The surplus added to last year's balance at the credit of profit and loss account made a total at the credit of that account of $966,293, from which the sum of $500,000 was transferred to reserve, bringing the amount to the credit of reserve account to $4,000,000, and leaving a balance of $466,293 at the credit of profit and loss.

The following statement shows the balance sheet, with the last three figures omitted:—

Assets.

	1917.	1916.	1915.
Real estate	$6,455	$6,372	$6,252
Machinery	4,324	4,168	3,598
Patterns	757	733	713
Inventories	4,395	4,079	3,880
Accounts receivable	2,990	3,487	2,595
Bills receivable	....	....	418
Investments	703	165	150
Cash	407	549	477
Deferred charges	61	58	61

Liabilities.

	1917.	1916.	1915.
Common stock	$8,000	$8,000	$8,000
Preferred stock	2,000	2,000	2,000
Mortgage obligations	24	413	467
Bonded indebtedness on purchased properties	....	....	500
Current accounts payable	1,198	1,467	778
War tax, etc.	436	....	....
Dividend on common stock	160	220	130
Reserve for depreciation	3,810	2,920	1,912
Reserve	4,000	....	3,000
Profit and loss balance	466	612	707

Mortgage obligations on properties purchased have been reduced to the nominal sum of $24,000, and investments were increased from $165,277 to $703,172. The cash surplus was invested mostly in Victory war loan bonds, and on March 1, 1918, holding of Victory war loan bonds amounted to $1,378,500. The reserve for depreciation of buildings, plant and equipment now amounts to $3,810,313.88, and the surplus to $4,466,293.

The company has the benefit of the experience and foresight of Lieut.-Colonel the Hon. Frederic Nicholls, president and general manager, in the conduct of its affairs. Mr. J. J. Ashworth is the capable assistant general manager and secretary.

FISHING AND PACKING CO. INCREASES DIVIDEND

The common stock dividend of the British Columbia Fishing & Packing Company, Vancouver, was placed on a 5 per cent. per annum basis this week, as against 4 per cent. last year.

WAR LOANS & GOVERNMENT'S PRIORITY ORDER

The action of the Dominion government in forbidding provincial and municipal governments to enter the money market in Canada for loans without the approval of the minister of finance was the main theme of debate in the Commons at Ottawa on Monday. The question was raised by Hon. Rodolphe Lemieux, who characterized the order-in-council by which the Federal government sought to control the financial market as illegal and unconstitutional, and an invasion of provincial rights. The motives which actuated the government to pass the order were explained by Hon. C. J. Doherty, minister of justice, and Hon. A. K. MacLean, acting minister of finance. The latter in a lucid and tactful speech explained that the Canadian government was compelled to raise large sums of money which could not be secured by the imposition of taxes. It would, he announced, be obliged to float another war loan toward the close of the present year. For these reasons it was desirable that the financial market should not be glutted by unnecessary flotations of bonds. Mr. MacLean assured the House that the power to authorize or prohibit issues of debentures would be used with discretion. Already, he pointed out, two provinces had been assisted to raise funds, and none had been refused authority to enter the money market. At the same time, the acting minister of finance was convinced that the order-in-council had led some parties to refrain from placing upon the market securities for objects which might not at the present time be regarded as of prime importance.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Edmonton, Alta.—March 16—Grain elevator owned by the Western Canada Flour and Milling Company was slightly damaged. The Carpenter Block and millinery store of Mrs. C. Charlebois were damaged. Estimated loss, $7,000. The Penitentiary on Government Avenue was damaged. Estimated loss, $8,000.

March 17—Storehouse on the premises of the Inglewood Lumber Company, 127th Street, was damaged. Estimated loss, $500.

Hamilton, Ont.—March 25—Store house and 1.200 bales of cotton owned by the Hamilton Cotton Company were damaged. Estimated loss, $100,000.

Lamont, Alta.—March 20—The Windsor Hotel and contents were destroyed. Estimated loss, $10,000.

Lethbridge, Alta.—March 20—The Acadia Block was destroyed. Estimated loss, $100,000.

Moncton, N.B.—March 21—Cellar in the Albion Block was damaged.

Magrath, Alta.—March 18—Home of R. W. Bradshaw was damaged.

N. Toronto, Ont.—March 26—Four houses and a shack, situated in a block on Silverthorn Avenue, north of the city limits, were damaged to the extent of $3,000. The contents of Seymour's grocery store were damaged, the loss being $800.

North Sydney, N.S.—March 18—Home of Neil A. Macmillan on Archibald Avenue was destroyed. Estimated loss, $3,000.

Welland, Ont.—March 19—The Cutler Lumber and Planing Mills on North Main and Mill Streets were damaged. Estimated loss, $10,000. The Hilden Furnishing Company, who occupied one floor of the building, had their stock damaged to the extent of $600.

STEEL COMPANY OF CANADA

The company in the year ended December 31st last experienced net profits of $6,040,318.83, after deducting charges for repairs, maintenance and improvements and providing for war tax. This was $1,018,927 in excess of the previous year. Out of the sum mentioned $515,203.40 was consumed in paying interest on bonds, while $1,144,741 went in dividends, $454,741 for the preferred and $690,000 for the common. The company set aside $177,531.07 reserve for bond sinking fund, $806,000 reserve for depreciation and $40,000 reserve for fire insurance. For special depreciation for furnace A $400,000 was appropriated. There was transferred to betterment and replacement reserve $1,406,486.38 and $1,550,356.83 was carried to the credit of the profit and loss account.

Mr. Robert Hobson, the president of the company, reports that satisfactory progress is being made with the by-product coke oven plant which is being installed at Hamilton, and through the medium of which, when completed in November next, it is hoped to ensure an ample supply of coke of uniform quality for the company's blast furnaces.

"During the year," says Mr. Hobson, "together with other steel companies of the highest standing, we secured two valuable ore properties, one on the Mesaba Range and the other on the Gogebic Range. The proportion of the ore which we are entitled to receive from these two properties will be sufficient to meet over half of our total ore requirements each year for a considerable number of years. The ore taken out each year is paid for on a royalty basis, so that, beyond paying for our share of stripping and equipping the mines, no large expenditure of capital was necessary. During the season of 1918 we will receive our quota of ore from the mine on the Gogebic Range, and shipments from the Mesaba Range mine are expected to commence late in the season of 1919.

"Since the date of our last report we have installed a mill for the making of steel sheets, for which there is a large demand in Canada. This mill is now in operation.

"All our plants were fully occupied throughout the year, but the output was interfered with from time to time by transportation difficulties and the severity of the weather conditions during the past winter.

"In conclusion, we should like to particularly draw your attention to the fact that the Steel Company of Canada is a valuable asset to the Dominion of Canada. We have done our share in providing large quantities of steel for munition, agricultural, railway and shipbuilding purposes and in meeting the demands for other commercial and domestic needs. We have also contributed in the last three years, in the shape of war taxes, a very large sum of money, the war taxes for 1917 exceeding the total amount of dividends distributed to the preferred and ordinary shareholders during that year.

"In addition, we have paid in the last three years over three millions of dollars of duties on the various articles and raw materials which we have to import."

The February statement of Southern Canada Power Company, Limited. gives gross of $39,326, an increase of $6,368, and net of $18,235, an increase of $3.382. For the month of the current fiscal year gross earnings at $191.860 are $41.518 higher than in the previous year, and net at $88,103 are $11,284 higher

Mr. A. F. Brigham has been appointed general manager of the Hollinger Consolidated Gold Mines, Limited. He has just arrived from South Africa to take up his appointment. Since the election of Mr. P. A. Robbins to the directorate of the company at the beginning of 1917 the position of general manager has not been filled. Mr. Brigham is a graduate of Lehigh University, and after filling various positions upon the engineering staff of the Lehigh and Wilkesbarre Coal Company he went to South Africa in 1901 to join the staff of the De Beers Consolidated Diamond Mines. Mr. Robbins was at that time consulting engineer of the De Beers Company, and for several years he and Mr. Brigham were colleagues and close friends. Mr. Brigham served as chief surveyor, manager of Dutoitspan Mine and manager of Wesselten Mine. these companies being two of the important holdings of the De Beers Company. Nine years ago Mr. Brigham was appointed assistant general manager of Jagersfontein Diamond Mines in the Orange River Colony, and four years later he succeeded to the position of general manager of that company.

February Bank Statement is a Healthy One

Recovery in Savings Deposits is Notable—Bulk of Victory Loan is Paid Up—Total Deposits Exceed $1,468,000,000—Call Loans Abroad Show a Sharp Increase—Substantial Gain in Loans to Municipalities.

	February, 1917.	January, 1918.	February, 1918.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	**$430,331,801**	**$559,777,237**	**$569,266,642**	**+32.3**	**+ 1.7**
Deposits after notice	**880,456,637**	**900,314,256**	**908,822,988**	**+ 3.1**	**+ .11**
Current loans in Canada	**813,302,717**	**855,506,506**	**859,363,147**	**+ 5.8**	**+ .46**
Current loans elsewhere	**86,944,450**	**116,220,343**	**109,678,140**	**+26.7**	**— 6.0**
Loans to municipalities	**26,121,324**	**40,015,466**	**43,535,628**	**+65.4**	**+ 7.5**
Call loans in Canada	**78,786,535**	**76,239,201**	**76,722,163**	**— 2.6**	**+ .006**
Call loans elsewhere	**162,344,556**	**132,687,066**	**160,239,494**	**— 1.2**	**+21.2**
Circulation	**138,257,295**	**193,567,911**	**181,695,542**	**+31.2**	**— 6.2**

The above are the changes in the principal accounts of the February bank statement. One of the most gratifying features is the recovery in savings deposits. There was also a gain in demand deposits. Loans to municipalities were again substantially increased and call loans abroad. Circulation showed a decline but was still over 31 per cent. ahead of a year ago.

The following table gives record of deposits for the past thirteen months:—

	Deposits payable on demand.	Deposits payable after notice.
1917—February	$430,331,801	$880,456,637
March	448,151,528	888,765,698
April	471,312,285	874,948,724
May	443,839,847	892,562,657
June	449,689,670	900,510,552
July	450,849,356	929,442,340
August	443,317,275	806,774,687
September	451,749,532	965,393,541
October	495,058,449	985,790,850
November	538,869,362	1,008,657,874
December	569,441,871	995,978,013
1918—January	559,777,237	900,314,256
February	569,266,642	908,822,988

Following a decline of $12,500,000 in savings deposits in December and another of $95,500,000 in January, the February statement shows a gain of $8,500,000 for that month. Between the end of November and the end of January there was a decline of $108,000,000 in savings deposits, now reduced to about $100,000,000 by the February statement. The figures confirm deductions from the January statement that a large proportion of the Victory Loan subscribers paid in full on the January instalment date. The net gain in savings deposits until the final instalment is paid in May may not be large, but that March, April and May withdrawals for the loan are likely to be less than the new deposits is reasonably certain, judging by the February figures.

Deposits classed as "demand" are $30,000,000 higher than at the end of November last. Current loans, whose movements frequently coincide with those of demand deposits, have declined in the interval. The unusually high figures for demand deposits seem to indicate that funds are being carried in that account which would ordinarily go to savings account.

Taking total Canadian deposits, savings and demand, the net change from November, when the Victory Loan was issued, is only $70,000,000, a small change when compared with the fact that the greater part of the $400,000,000 issue is paid up.

The following table shows a record of deposits for the past six years:—

Feb.	On demand.	After notice.	Total.
1913	$349,661,830	$630,467,518	$ 980,129,348
1914	337,516,595	640,927,130	978,443,725
1915	331,415,179	671,088,613	1,002,503,792
1916	389,825,667	827,242,609	1,118,068,276
1917	430,331,801	880,456,637	1,310,788,438
1918	569,266,642	908,822,988	1,478,089,630

Deposits stood at the end of February at the high total of $1,478,000,000. Demand deposits were 32 per cent. greater than a year ago and after notice deposits 3 per cent. greater. This is a very satisfactory record in view of the Victory Loan financing.

The trend of the Canadian loans account for the past thirteen months is shown in the following table:—

Loans.	Current in Canada.	Call in Canada.
1917—February	$813,302,717	$78,686,535
March	843,054,466	76,478,708
April	880,523,897	82,737,417
May	844,890,589	78,514,798
June	839,355,782	76,085,220
July	829,560,700	71,376,788
August	836,429,670	71,204,351
September	855,306,953	72,421,187
October	883,986,860	71,653,719
November	868,973,714	72,178,345
December	858,533,298	71,779,020
1918—January	855,506,506	76,239,201
February	859,363,147	76,722,163

Current loans in Canada increased in February about $4,000,000 and were nearly 6 per cent. higher than a year

Of the deposit in Central Gold Reserves $18,210,000 is in gold coin: the balance is in Dominion Notes.

ago. Call loans were slightly higher than in January and about $2,000,000 less than a year ago.

The following table shows the course of principal loan accounts during recent years:—

Feb.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1913 ..	$882,112,726	$ 37,673,798	$71,286,799	$ 95,229,407
1914 ..	811,711,219	56,052,837	71,374,602	141,143,442
1915 ..	771,635,208	43,661,379	67,591,769	89,890,982
1916 ..	760,873,181	56,099,719	81,949,125	139,138,651
1917 ..	813,302,717	86,944,450	78,786,535	162,344,556
1918 ..	859,363,147	109,678,140	76,722,163	160,239,494

Current loans in Canada were higher in February than in any of the past five. In February, 1913, however, they stood at $882,000,000 as compared with $859,000,000 in February last. Current loans elsewhere, according to the latest returns, are higher than any similar period during the past six years. Call loans in Canada do not fluctuate considerably.

The following table shows the call loans abroad in February as compared with previous returns:—

	1915.	1916.	1917.	1918.
January .	$ 85,796,641	$134,248,552	$155,747,476	$132,687,066
February	89,890,982	139,138,651	162,344,556	160,239,494
March ..	101,938,685	141,889,989	161,616,735	....
April ...	121,522,971	147,146,443	159,156,054	....
May	136,098,835	163,400,659	168,692,675	....
June ...	124,604,875	182,757,015	159,309,133	....
July	117,821,174	177,121,733	151,875,676	....

Dominion Government---Feb., 1918

LIABILITIES

Loans from other banks in Canada secured, including bills re-discounted	Deposits made by and balances due to otherhanks in Canada	Due to banks and banking correspondents in the United Kingdom	Due to banks and banking correspondents elsewhere than in Canada or the U.K.	Bills payable	Acceptances under letters of credit	Liabilities not included under foregoing heads	Balances due to the Imperial Government	Total Liabilities	Aggregate amount of loans to directors, and firms of which they are partners	Average amount of current gold and subsidiary coin held during the month	Average amount of Dominion Notes held during the month	Greatest amount of notes in circulation at any time during the month

There was an increase of $27,500,000 in call loans abroad in February. This is an indication that the banks have begun to rebuild the external reserve drawn on to finance the crop movement of last autumn.

Prices on ore, coke, steel and steel products, recommended previously by the price-fixing committee of the war industrial board, subject to revision on April 1st, were ordered by President Wilson to be continued in effect until July 1st.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended March 29th, 1918:—

Buffalo Mine, 110,000; Coniagas Mine, 88,000; O'Brien Mine, 64,900; McKinley-Darragh-Savage Mine, 236,289; La Rose Mines, 181,657; total, 630,846.

The total shipments since January 1st, 1918, now amount to 4,265,904.8 pounds, or 2,132.5 tons.

World's available supply of wheat decreased 7,781,000 bushels in February, compared with 15,126,000 bushels in January, and 20,397,000 bushels last year. The reduction in North America was offset to some extent by an estimated increase in the amount in store and afloat for the United Kingdom.

TORONTO'S FINANCIAL POSITION

Draft Estimates of the City's Expenditure and Debt—Will Take Up $2,740,864 Maturing Debentures

The following extracts are taken from a report prepared by Finance Commissioner Bradshaw, and submitted by the Board of Control to the city council, April 4th.

The gross funded debt of Toronto on December 31st, 1917, amounted to $100,323,433. After, however, deducting the sinking fund accumulated for its redemption—$24,427,757—it left the net funded debt at $75,895,676, or $1,227,102 more than it was at the close of 1916.

While the debt is large, there must not be overlooked the value in service or use of public buildings, parks, schools, fire halls, highways, drainage and sanitation facilities, national exhibition buildings, waterworks and hydro-electric systems, civic car lines, etc. These permanent assets are valued and carried in the city's balance sheet at $100,042,539.

Unnegotiated Debentures.

While it has been stated that the existing gross funded debt is $100,323,433, it is borne in mind that this amount does not include the $6,893,103 of unnegotiated debentures. When these have been sold the figures will have reached the amount of $107,216,536.

The last public offering of the city's debentures was made in November, 1916, when $2,594,000 were sold at such a price that the money only cost the city 5.09 per cent. Since that time, there has been no favorable opportunity to effect sales. The several provincial governments and municipalities which have recently obtained loans, have to pay rates of interest varying from 6 1-10 per cent. to 7½ per cent. Rather than sacrifice the city's debentures by selling them on such terms, and obligating the taxpayers in heavy interest charges for many years in the future, it has been deemed desirable to carry them and await a more favorable time for negotiation.

Debentures Maturing.

This year the city will be called upon to take up and redeem $2,740,864 of maturing debentures. Due provision has been made to retire these.

During the period 1918-1929, the aggregate of the city's debentures falling due amounts to practically 45 millions, and it must be reassuring to know that if the same principles which are now in operation are continued, moneys will be automatically available for the orderly and prompt retirement of these debts, as well as for the balance of the city's debt.

The amounts to be retired yearly between now and 1929 are as follows:—

1918	$2,740,683.65	1924	$3,348,634.79
1919	3,154,938.25	1925	6,206,021.94
1920	3,619,652.67	1926	5,979,028.95
1921	4,213,930.03	1927	858,807.51
1922	2,293,395.93	1928	998,586.27
1923	2,252,197.68	1929	9,292,036.75
Total			$44,957,914.42

Debt Charges.

The total debt charges for the year 1918 amount to $8,898,976, of which $4,577,107 is for interest, and $4,321,869 for repayment of principal. The following are wholly provided for, and therefore are not a charge upon the civic revenue:—

Toronto hydro-electric system—debt charges	$ 513,022.43
Ratepayers' share of local improvement debt charges which are paid by those whose properties are specially benefited by the local improvements	1,905.999.09
Total	$2,419,021.52

Deducting these two amounts, there is left $6,479.954, to be provided out of current revenue. This requires 26.94 per cent. of the whole. The corresponding debt charges for 1917, and which were a charge upon the revenue of that year, amounted to $6,704,766. The reduction this year is due to the elimination of debt charges on debentures which have matured, and to adjustments made in debt charges on unnegotiated securities.

The burden entailed by these charges cannot be lightly regarded. They are responsible for a substantial portion of the tax rate. As the years proceed, and if there is a steadfast resolve not to incur fresh debts, gradual relief will be obtained through the retirement of maturing debts.

Estimated Expenditures.

The total expenditures to be provided by taxation and other revenue, amount to $24,046,653.09, compared with actual expenditure of $18,627,740.95 in 1917, an increase of $5,418,912.14, or 29 per cent. War expenditure is accountable for a substantial portion of this increase.

It has been customary to divide expenditures into two broad groups, those which are controllable by council, and those which are uncontrollable. It is not always possible to determine with exactness the division which each expenditure or group of expenditures should be placed in, but the following statement substantially exhibits the correct classification. It will be noticed that war expenditure is classified by itself. It also gives a comparison of the actual expenditures of 1917, with those estimated for 1918.

The following is a comparison of estimated expenditure, 1918, with actual expenditure, 1917:—

Department or Service	1918		1917		Increase	Decrease
	Estimated Expenditure	Per cent. of whole	Actual Expenditure	Per cent. of whole

Administration of Justice	1,151,499 00	4 78	1,087,313 00	5.84	64.186 00	....
*Board of Education	3,226,103 00	13.42	2,919,302 00	15 67	306,801 00	....
Debt Charges	6,479,954 00	26 94	6,704,766 00	36	....	224,812 00
Totl Uncontrollable	**$13,604,815 00**	56 74	**$13,568,195 00**	67.47	**$1,264,543 00**	**$227,923 00**
*War Expenditure	$3.769,952 00	15.60	....	...	$3,769,952 00	....
Grand Total	**$24,046.655 00**	100	**$18,624,657 00**	100.	**$5,754.833 00**	**$332,833 00**

From the foregoing it will be observed that controllable expenditure amounts to $6,671,888, or 27.06 per cent. of the whole, uncontrollable expenditure amounts to $13,604,815, or 56.74 per cent. of the whole, and war expenditure (exclusive of debt charges on war debt) amounts to $3,769,952, or 15.60 per cent. of the whole.

The increase in the "controllable" expenditure for 1918, compared with the actual expenditure in 1917, is $615.426, or 11 per cent. The increase in the "uncontrollable" expenditure for 1918, compared with the actual expenditure in 1917, is $1,036,620, or 8.2 per cent.

The main increases in expenditure are board of education, $306,801; public hospitals, $237,369; provincial war tax, $16,560; war expenditure, $3.769,952; works department, $359,054; miscellaneous, $66,584. The principal decreases are debt charges, $224,812; special grants, $38,508; property department, $32,855; parks department, $21,128; and street cleaning department, $11,917.

Mr. Henry J. Fuller, vice-president of Fairbanks, Morse and Company, and president of the Canadian Fairbanks-Morse Company, Limited, has been elected a director of the Liberty National Bank of New York City.

FINANCING THE SMALL FARMER

Attention for some weeks past has been centered upon the problem of greater production in Canada. The war has reached the stage wherein victory appears to rest as much upon economic power as upon actual fighting, since our armies in the field have proved their ability to hold the enemy. There are those who scoff at the so-called outworn theory of economic reserves determining the fate of Europe and the whole world; but it is sufficiently evident that reserves of men, money and materials will decide the issues upon which hangs the fate of the Allies and the value and future development of western civilization.

Canada has done magnificently in an economic way since the outbreak of hostilities in August, 1914. At the outset, reeling under the shock of war, the economic activities of the nation were thrown into confusion; but with astonishing rapidity, all facts in the situation considered, the industrial strength of the country gathered headway and put the economic life of Canada on a firm foundation. The Dominion has never before in its history experienced such feverish activity in manufacturing, agriculture, trade and commerce. Notwithstanding the wastes of war, much has been accomplished, substantial progress made, and our economic life rehabilitated. It remains to preserve the fruits of this enterprise in the days of readjustment that are sure to come.

In no particular, and in no direction, is this so important as in agriculture. It must never be forgotten that basically the prosperity and well-being of the Dominion depend upon agriculture, and the success with which our farmers meet in the production of the staple crops. It is doubly essential, then, that the importance of the work being undertaken under the direction of the Hon. Charles Dunning and those associated with him in the campaign for greater agricultural output, shall not be overlooked. Last year it is estimated that the agricultural products of Canada amounted, in sum total, to the astonishing figure of $1,000,000,000—a truly remarkable achievement in view of the difficulties under which the agricultural community has labored with respect to labor supply and the material means of equipment for carrying on its work.

After the conclusion of hostilities it will be almost as essential as it is at the present time to increase the country's agricultural output. It will be mainly through the exportable surplus of foodstuffs and animal products that our favorable balance of trade will be maintained. The great cash crop of the prairie provinces, wheat, will thereupon take on a new significance. It will be recalled that only a decade ago certain eastern investigators placed a low limit upon the amount of wheat that could be economically produced in the West, and upon the limits of the European consuming market as well. The question was raised as to where the market could be found in the world for the wheat output that westerners confidently predicted would materialize in the immediate future. We were told there were definite limits to the United Kingdom's consumption of our wheat; that although there was a growing market in Germany and Holland and the Scandinavian countries, the output of Hungary, the Ukraine and Siberia would gradually occupy the whole field, because of lower labor costs, proximity to the market, and other reasons. We now know that there will be actual world hunger after the signing of peace and for several years thereafter; that it will be necessary to apportion supplies of foodstuffs among the European nations; and that co-operation must, perforce, be the order of the day, if western civilization is not to go down in irretrievable ruin. This will be Canada's opportunity. Not only has it been established that wheat can be successfully grown far north of Prince Albert, in Saskatchewan, and well to the north of Edmonton in the Peace River District, but that the available acreage in that vast, fertile belt in the southern sections of the prairie provinces has been hardly scratched. Canada's soldiers have made the name "Canadian" honored throughout the whole world, and have added to it imperishable glory. It is high time that the pessimists ceased their lugubrious plaints of what is to occur to this nation, in the way of economic collapse, after the war.

Optimism, nevertheless, gives no excuse for lack of thorough preparation to develop our economic and agricultural resources here and now. Public-spirited citizens, men of wealth in the State of New York, have within the last year given us a lesson of what may be accomplished, by thorough organization, in protecting and developing the interests of the farmer. The facts in this interesting story are presented in the February 28th issue of "Printer's Ink." An agricultural society was formed to conduct a great drive for greater production, and to assist farmers in the State to purchase the necessary equipment, both of machinery and seeds and livestock, to achieve better results. During 1917 a publicity campaign was carried through to impress upon farmers the vital importance of increasing their crop acreage as well as their holdings of sheep and swine. Mr. H. H. Charles had charge of the publicity end of the campaign, and covered the State with a shower of bulletins on "A Million Bushels of Wheat," "Save the Barnyard Manure—$28,000,000 Annually Wasted in New York State Alone," "Raise the Heifers," and so forth. The results achieved, and the interest aroused, were astonishing.

It was realized full well that many tenants and hundreds of small farmers were powerless to increase their output of foodstuffs and animals without the help of credit facilities. A number of wealthy men combined to furnish the capital, raising up to date a sum of $250,000. This fund was made available to the farming community through the co-operation of 255 banks, which acted as general agents. The most vital factor in the success of the whole scheme was the acceptance of character, and proved capacity for hard work on the part of applicants for a loan, in lieu of the usual collateral. Applications were received through local committees—500 in number—composed of two local representatives of farmers' organizations, and the local banker. The prospective borrower made out his application in duplicate, stating in detail the exact object for which he desired the loan. On receiving the approval of the local committee, the borrower thereupon presented his note with attached application blank at the local bank, which advanced the face of the note, and protected itself by drawing upon the fund for an equal amount. No endorsement whatever was demanded for the note.

During 1917, more than 4,000 such loans were negotiated; and it is conservatively estimated that an increased acreage of about 40,000 acres was secured. It is interesting to learn that when the bulk of the loans matured on December 1st, 1917, 80 per cent. of them were paid promptly, 15 per cent. renewed, and 5 per cent. carried over until the crops were marketed. For the present year, 1918, attention is centered to a greater degree on an increased production of swine and sheep—$100 being lent to any one applicant for the purchase of swine, and $300 for sheep. The loans are made payable six months from date, with the privilege of one renewal for a like period; and the interest rate is 6 per cent. per annum. On making application, the farmer must give a complete account of his economic status; the kind of farming carried on; the amount of insurance carried; the number of head of stock of various kinds owned; the number of head to be purchased, and so forth. It is confidently expected that even greater results from this patriotic effort to increase production will be secured this year.

In Canada, aside from the chartered banks, little or nothing has been attempted in this direction. True, the prairie provinces have in the last year or two enacted legislation providing for cheaper money for the agricultural community, but no great progress has as yet been made, owing to the condition of the money markets. Mr. Vere-Brown, manager of the Canadian Bank of Commerce, Winnipeg, has done exceptional work in aiding boys' and girls' clubs in Manitoba in the greater production of livestock. Under certain conditions, simple and easy in nature, the boy or girl can obtain funds for the purchase of young livestock to be marketed within a definite period. This kind of work should be pushed by the banks, and public-spirited citizens, everywhere among the agricultural community in the whole of Canada.

VICTORY BONDS

On June 1st the first half-yearly instalment of interest on about $500,000,000 Victory Bonds of Canada will become due. The amount will be approximately $13,750,000, being $2.75 interest on every one hundred dollars of bonds. Holders of coupon bonds obtain their interest money from any bank in the country simply by presenting their coupons. Holders of registered bonds are sent cheques for their interest by the department of finance, Ottawa.

Thereafter every six months over 820,000 Canadian citizens will receive interest money on their Victory Loan bonds from the Dominion government. This will create a closer and more direct association of these citizens with their government, and the effect of this association will be of great value to these citizens and of great value to the nation in making them more personally interested in their government and more active and alert in the exercise of their duties and rights as citizens. Every Victory bondholder will be an active champion of wise and economic legislation and administration.

The Victory Loan is not only a great financial transaction, it is a great national force, a great national bond between the bondholders and their country, a great influence for better government and better citizenship. There are still a few Victory bonds available for those who did not purchase last fall and for those who desire to increase their holdings.

THE ECONOMIC FUTURE OF JAPAN

The Allies, as despatches from Washington and London indicate, do not appear over enthusiastic upon the proposed occupation of Vladivostok and its adjacent territory by the Japanese army. In fact, ultra-radical journals, such as the London "Nation" and the New York "New Republic," are quite frank in declaring that Japan is utterly selfish and indulging in schemes of national aggrandizement in the projected expedition to Russian Asia.

The "New Republic" goes farther, and charges Japan with imperialistic designs the full realization of which would demand the occupation of Vladivostok, the Ussuri region as a hinterland, and the northern half of the Island of Saghalien. The Ussuri region is bounded on the north by the Amur River, on the south by Korea and on the west by Manchuria. It was to tap this district and find easy access to Vladivostok that Russia was compelled to build a railway through Manchuria; thus coming into contact with Japan, which had marked out not only Korea but Manchuria as well, ultimately, as possessions of her own.

As the "New Republic" observes, the Ussuri region contains 25,000,000 acres of fertile land, while the Russian half of Saghalien contains 5,000,000. The country tributary to Vladivostok grows no rice, but raises almost all the other crops produced in the temperate zone. It was settled by Cossacks in the early seventies of the last century, and has a population of some 200,000 souls. Both Ussuri and Saghalien—the Russian half—are immensely rich in mineral resources; the island producing coal of the Cardiff type, within easy access of the sea. It is said that no better coal can be found elsewhere on the Pacific Ocean. The Australian grade is of good quality but lies far inland, while the Vancouver and Alaskan deposits are inferior. Of the coal produced in Japan, 40 per cent. is volatile. Besides, Japan has little or no iron ore, while Saghalien and the Ussuri region are very rich in lead, zinc, low-grade oils and natural gas, as well as iron ores. The possession of these two districts would give Japan the key to industrial supremacy on the Pacific.

It appears to us that nothing in Japan's actions during the course of the war lends the slightest color to the charges made. Political possession of the districts mentioned does not by any means carry with it economic monopoly. Whether Japan seizes this territory or not, it is perfectly obvious that she will, in the future, make good her claim to its peaceful penetration. The day has gone by when any nation can follow a discredited colonial system, under which unsettled territory or undeveloped races can be regarded as private possessions to be exploited for selfish advantage. If Japan remains faithful to her Allies, the United Kingdom and the United States will take care that she shall have the fullest opportunity for complete economic development in her own special sphere of influence. Whether under the direction of Russia, or the driving power of the alert Japanese, this wonderful treasure-house of natural resources must be opened up and developed for the economic welfare of humanity.

NOVA SCOTIA STEEL & COAL COMPANY, LIMITED

The seventeenth annual meeting of the Nova Scotia Steel and Coal Company, Limited, was held last week at New Glasgow, N.S., with the following shareholders present: Colonel Thomas Cantley, Frank H. Crockard, N. B. McKelvie, J. C. McGregor, J. W. Allison, F. Stanfield, J. H. McGregor, Archibald McColl, Captain Colin Fraser, Donald C. St. Clair, R. E. Chambers, W. D. Ross, J. K. Stewart, P. A. McGregor, John W. Fraser, S. T. McCurdy, George Mackay, John A. Gray and C. L. Rood.

Colonel Thomas Cantley, chairman of the board of directors, referred to Hon. James D. McGregor's death and related the many valuable and loyal services which the late Mr. McGregor had rendered the company, particularly in its earlier and less prosperous days. Colonel Cantley suggested that Hon. R. M. McGregor, a son of the late director and member of the government of the province of Nova Scotia, be elected to succeed his father as a member of the board.

Colonel Cantley also requested the election of D. C. Jackling, vice-president and general manager of the Utah Copper Company, to fill the other vacancy on the board. Mr. Jackling is one of the best known mining engineers in the United States, being connected with a great many successful enterprises and at present interested in the management of a group of copper companies said to be producing one-quarter of the American output of copper.

Colonel Cantley proposed that the number of directors be increased from 15 to 16 and that W. Hinckle Smith be elected to the board. Mr. Smith is engaged in mining and is an influential director of William Cramp & Sons, the well-known shipbuilding firm.

These proposals were favorably received by the shareholders and the following board was elected: President, Frank H. Crockard; chairman, Colonel Thomas Cantley; vice-president, W. D. Ross; J. W. Allison, G. S. Campbell, R. E. Chambers, W. H. Chase, D. C. Jackling, J. C. McGregor, R. M. McGregor, N. B. McKelvie, T. S. Rogers, F. W. Ross, W. Hinckle Smith, F. Stanfield and L. C. Webster.

The annual report was presented by the president, Frank H. Crockard, and met with the approval of the shareholders. The financial position of the company was reviewed in *The Monetary Times* for March 8th, 1918.

The character of the products was very substantially changed during the last half of the year 1917. The ordinary commercial products constituted nearly 50 per cent. of the market value, compared with 15 per cent. during the preceding year. This was due to cancellation of contracts covering shell forgings. The company was compelled to adjust itself as quickly as possible to this radically altered condition, and in so doing, found it expedient to intensify the plate mill production. Owing to the large reserves on hand and due to unsatisfactory market and shipping conditions prevailing in 1917, it was found necessary to mine only about one-third of the furnace requirements during the year. In 1915, there were mined 136,731 tons of ore; in 1916, 224,787 tons; and in 1917, 60,375 tons.

President Crockard quoted from a report received from mining engineer Edwin C. Eckel, in which Mr. Eckel refers to the Nova Scotia Steel and Coal Company's ore properties as representing perhaps the most important single iron ore holding in the world, in which, Mr. Eckel says, the coal properties are second only to the ore holdings in tonnage and value. "At the present rate of use," says Mr. Eckel, "the ore and coal would each last for over a thousand years, and at any probable future rate of use they will probably last for several hundred years. Putting the matter on a competitive basis, the Nova Scotia Steel and Coal Company will in all probability be mining iron ore at Wabana for a hundred years after the Lake Superior ore beds have been exhausted, and it may be shipping coal from Sydney mines at a time when Wales and Westphalia alike have become unworkable."

Presenting the report, Mr. Crockard said: "The results obtained at the blast furnace, open hearth furnace and rolling mill have amply demonstrated that the material possessed by the company can be satisfactorily converted into steel products of a superior grade. The manufacture of steel in Cape Breton has virtually just emerged from the pioneer period and compared with other important iron and steel centres, it may be truly said to be in its infancy.

"As in all pioneer work, there were many problems which had to be satisfactorily solved and to-day it may be stated that as a result of these efforts there are no fundamentally serious metallurgical features which will interfere with quantity production. The development of wider markets will come with further diversification of the finished products, which necessarily must be produced by plants possessing all of the economic features characterizing modern mills. In forwarding such plans it would seem desirable to await the re-establishment of normal conditions."

WEEKLY FIRE RECORD

Owing to pressure on our space this week it has been found necessary to defer publication of the Weekly Fire Record until next week.

As a result of the decision of Herman H. Pitts, of Ottawa, not to withhold the 18,300 Toronto Railway proxies in his possession it has been made possible for the directors to pass the by-law increasing the number of directors from seven to nine.

Mr. A. R. Tomlinson, who, since the organization of the Manitoba Farm Loans Association, has been secretary and office superintendent, has resigned, and will take a position in the treasury department of the provincial government. The first ten months' operation of the Manitoba Farm Loans Association show a very satisfactory condition. Loans to over $1,000,000 have been paid out, and there are on hand loans which have been passed by the board amounting to three-quarters of a million.

NEW BRUNSWICK'S FUEL POSSIBILITIES

Extensive Peat Bogs — Natural Gas, Crude Oil and Hardwood Areas Add to Resources

BY R. E. ARMSTRONG.

The war has awakened the world from many of its fool dreams. Canada has shared in this rude awakening. It has jarred her complacency not a little to learn that there is a limit to the supply of United States anthracite coal that she can obtain and that, if she would keep from heatless days hereafter, she must depend to a greater extent upon her own fuel resources. The Dominion is not without an abundance of such resources, but, like the man power of the country, they require to be enlisted and mobilized and made available for use; and this will take time.

For example, New Brunswick has quite large deposits of bituminous coal and there is a considerable portion of the carboniferous region of the province that is yet unexplored. This coal field has not been developed to the extent it might because householders preferred to use the American anthracite, but with that source of supply shut off they would be compelled to give consideration to the native article. New Brunswick, it is estimated, has about 151,000,000 metric tons of coal in her known fields. In 1916, the coal output of New Brunswick was placed at 137,058 tons, valued at $367,041. With the preparations for increased production that are being made in the Minto and Salmon River coal fields it is likely that the output will be more than doubled this year. The Minto coal has been largely used by the Canadian Pacific Railway Company on their locomotives, and it has also been utilized for steam furnaces,

Hardwood and Natural Gas.

Hardwood offers another source of fuel supply. There are extensive stands of hardwood throughout this province that can be drawn upon. Of late years these hardwood areas have been little used for fuel, their owners finding it more remunerative to cut pulp wood for the United States market and to heat their homes with United States hard coal. If the fuel controller had got busy in time he might have secured quite a large cutting of hardwood fuel this winter by insisting that pulp wood cutters should get out an equal quantity of hardwood with the raw pulp material.

Natural gas and crude oil open up great fuel possibilities. There has been an extensive development in this respect in Albert and Westmoreland counties, but there are many parts of these counties that have not been prospected and that are believed to possess oil shales. In 1916, New Brunswick produced 610,118 thousand cubic feet of gas, valued at $79,628. Its production of crude oil in the same year was 1,345 barrels. Moncton and the territory adjoining are extensive users of this natural gas and oil. Their use could doubtless be extended.

Peat Prospective Fuel.

Peat is another prospective fuel that New Brunswick possesses. Not much study has been given to its possibilities hitherto, about the only development that has taken place being the manufacture of the moss for bedding, upholstering and packing purposes. Even in these respects the development, so far as this province is concerned, did not get beyond the experimental stage.

The late Prof. L. W. Bailey, to whom New Brunswick is indebted for a great deal of information bearing upon its natural resources of mine and forest, in a report published in 1899, says that peat bogs are of common occurrence in New Brunswick and in several places cover large areas. The regions in which they are especially noticeable are the southern portion of Charlotte County, the adjoining portions of St. John County and the district bordering the Gulf of St. Lawrence. They have been made a subject of survey and study by Mr. R. Chalmers and Prof. W. F. Ganong.

A resource map in the Bailey report fixes the location of peat at Musquash, Lepreaux, Pennfield. Richibucto, Tabusintac, Tracadie, Kingston (Kent County), Loggieville, Escuminac, Miscou Island and other North Shore points.

Professor Ganong remarks that there are some 24 peat bogs of fair size scattered from Beaver Harbor to Spruce Lake. The area of the Spruce Lake bog, says the Bailey report, is from 350 to 400 acres, while the depth is sometimes more than 24 feet. The peat moss from these bogs is said to be germicidal and may be used in hospitals. It is also adaptable for packing and bedding materials. The true peat at Spruce Lake forms a layer on the bottom two or three feet thick. The area of the Lepreaux bog is from 300 to 350 acres; of the Seely Cove bog, 250 acres.

Notes Concerning Bogs.

From Mr. Chalmers' report the following notes are taken concerning other bogs in New Brunswick:—

A large peat bog occurs on Miscou Island, covering fully half the entire island. A peat bog, about three miles long and a mile and a half wide, was seen on the east side of Shippegan Island. In the bank the peat is ten feet thick. The neck of land between St. Simon Inlet and Pokemouche Harbor is formed of peat. South of Tracadie River, near Point Barreau, a peat bog borders a lake. An extensive bog occurs on the west side of the mouth of the Tabusintac River, length about three miles, width two miles. On the east side of Point Cheval a bog was seen. A large and interesting peat bog was observed at Point Escuminac, covering an area of six or seven square miles. An extensive peat bog lies on the north side of Kouchibouguac Harbor. Another occurs on the coast about a mile south of the mouth of Kouchibouguacis River, facing the sea. A third occupies part of the peninsula between the estuary of Aldouane and the coast of Northumberland Strait. This bog is large. Two large bogs occur along the Kent Northern Railway, from one to five miles above Kingston.

Mr. Chalmers adds that should peat ever be required for fuel or for any other purpose, there is an almost inexhaustible supply.

Large Amount of Fuel.

It is quite apparent from the above that if the anthracite coal fields of the United States should be closed against New Brunswick she could find a way of supplying herself with a fair measure of heat from within herself, though the home fuel might not be so comfortable or so easily manipulated as the foreign article. The situation, however, emphasizes the necessity for a careful and comprehensive study of our natural resources at the hands of competent investigators. This should be proceeded with at once.

PROPOSED BANKRUPTCY ACT

A special meeting of the Canadian Credit Men's Association was held in the Board of Trade club rooms on March 28th for the purpose of discussing a bankruptcy measure, which it is anticipated will be introduced at the present session of parliament.

The meeting was addressed by the general manager, Mr. Henry Detchon, and Mr. H. P. Grundy, K.C., of Winnipeg, who drafted the act, and submitted it to the Credit Men's Association.

The question of this act came up when the association was first formed and constantly discussed until in 1915 Sir Thomas White was approached in the matter.

In 1917 the Canadian Bar Association drafted an act which was not satisfactory. Mr. Grundy was then asked to draft an act. In September, 1917, the Credit Men's Association asked parliament to introduce the act at the session then being held, but it was held over to come up at the next session which is now being held, and it is anticipated, will go through.

Mr. Grundy based the act upon the English form, the object being to replace in one act the nine assignment acts in Canada. It is needed very much by the business men of Canada, and when passed will aid better than anything else, to build up the business morals of the country.

The customs revenue collected at the port of Montreal in the month of March, 1918, fell $424,266.27 short of the collections in March, 1917, the figures being $3,079,437.67, as against $3,503,703.94. The receipts during the fiscal year 1917-1918, which ended on March 31st, show an increase of $1,574,570.07 over the year 1916-17, totalling $36,492,578.64 and establishing a new port record.

Halifax, Canada

MUNICIPAL FINANCING

New Conditions Call for New Methods—Regulation of Expenditures is Necessary

During the recent meeting of the Dominion Mortgage and Investment Association held in Toronto and following the presentation of the report of the investments committee, Mr. E. A. Saunders, treasurer of the Canada Life Assurance Company, made the following observations:—

"With the subject fresh in my mind I picked up on my desk a few days ago a poem entitled 'The Calf Path,' by Sam Walter Foss. This poem, I think, is a very appropriate simile for the few remarks I wish to make on this subject." (Mr. Saunders here recited the well-known poem, seven stanzas only of which are here printed).

The trail was taken up next day,
By a lone dog that passed that way,

But still they followed—do not laugh—
The first migrations of that calf,

And through this winding wood-way stalked
Because he wobbled when he walked.

And thus a century and a half
They trod the footsteps of that calf.

And men two centuries and a half
Trod in the footsteps of that calf.

A hundred thousand men were led
By one calf near three centuries dead.

They followed still his crooked way,
And lost one hundred years a day.

"I think it is quite safe to state that the troubles we encounter in our municipal financing arise almost wholly from faulty administration, which I take the liberty of terming 'Calf Path' administration. Our villages and towns have many of them grown into large cities, but we still follow the same form of government that may have proved fairly satisfactory for the smaller places, but is not adaptable to larger centres. Unconsciously in our municipal financing we have followed the migrations of 'the calf, the dog, and the bellwether sheep,' neglecting to straighten out the path as we followed it to meet the requirements of the increased population. Too much is expected of the mayors and aldermen of our many municipalities throughout this great Dominion. They are selected in a haphazard way without any consideration as to their qualifications for the duties that they are called upon to perform. Their term of office may be very short and there is no doubt that many municipalities have lost the services of capable men through the whims of the ratepayers and often political influence. Another serious mistake that has been made is that our government and municipal officers are many of them not sufficiently remunerated for the responsibilities they are called upon to carry, with the result that it is difficult, in fact almost impossible, to secure competent and trained men for these positions. We know from experience what follows recklessness in expenditures in municipal financing, bringing with it large debts for many of our cities and excessive taxation and threatening defaults in meeting maturing obligations, and we might here truly state, quoting again from the 'Calf Path,' 'They followed still his crooked way and lost one hundred years a day.'

"The question arises, what is the remedy? There is no doubt that some drastic action is necessary in order to cope with the situation. The province of Quebec has already set a good example by bringing in legislation which prohibits municipalities from committing acts which affect them adversely in the money market, and the taking over by the province of the management of the sinking funds of municipalities. By those who have made a study of the issuing of municipal debentures it is generally conceded that it is much safer to float debentures in serial issues so that interest and principal payments are met each year, thus relieving municipalities of the necessity of seeking investments for their sinking funds and also removing the temptation of diverting these funds to purposes for which they were not intended. All the larger municipalities should have a permanent, well-paid and trained official who would have general supervision over all matters financial, and also power to direct and regulate expenditures in connection with all public works and utilities. This official should not be elected by the ratepayers, but should be chosen by a competent board and should hold office until it might become necessary to remove him for incompetency or misdemeanor. If this policy were generally followed throughout the Dominion, it would not, I think, be an extravagant statement to make that the results from such administration would have a tendency to considerably lighten the additional burden of taxation which we shall be called upon to carry in connection with war expenditures.

"It is not, Mr. Chairman, I think, out of place in this connection to refer to the good work which is being done by Toronto's financial commissioner, Thos. A. Bradshaw. It is without fear of contradiction I make the statement that Mr. Bradshaw has during his short term of office shown good results in his administration of the financial affairs of the city of Toronto.

"Dalhousie University of Halifax has recently announced that a chair of government and political science has been endowed by Senator and Mrs. Dennis, in memory of their son, Lieut. Eric Reginald Dennis, who fell fighting for the Empire at Vimy Ridge. This, we understand, is the first chair devoted especially to the science of government to be established in any university in Canada. We think this example that has been set by our Nova Scotian friends might well be copied by other Canadian universities, for we must all admit that our experience has taught us the necessity of paying more attention to the education of the younger generation in the science of government.

"Let us have the courage to straighten out our 'Calf Path' and make the much-needed changes in the administration of the finances of our municipalities."

The third Liberty Loan campaign opens in the United States to-morrow. The loan will be for $3,000,000,000, though over subscriptions will be accepted. The rate of interest will be 4¼ per cent., not 4½ per cent., as had been expected earlier.

MORTGAGE LOANING SITUATION

Outlook in the Prairie Provinces—Government Lending Will Meet Only Fraction of Demand

Under the nom de plume of "Veritas," a correspondent recently wrote to the Manitoba Free Press: "The day of the loan company has gone; the handwriting is on the wall; loans are not needed; the West is reeking in wealth." Reference is then made to the fact that financial statements of lending companies for 1917 show a shrinkage in actual mortgage investments and an increase in cash balances in hand. Commenting upon this statement, in an address to the annual meeting of the Dominion Mortgage and Investments Association at Toronto this week, Mr. S. R. Tarr, editor of Canadian Finance, Winnipeg, said: "While true enough as a temporary condition, this surely is no reason for assuming that the prairie west (which as yet is cropping scarcely more than one-tenth of its arable lands) will never again require to borrow money on a large scale for agricultural development.

"But 'Veritas' is apparently of the view that any recurrence of borrowing demand can be adequately met by government lending; and at rates below those on which loan companies could continue to do business. 'The dawn of the day of cheap money is upon the West,' he says, 'and the full day will soon be at hand.' The proof? 'In Manitoba, already, applications for some $2,000,000 of loans have been received; and in Saskatchewan applications for $7,000,000.' Proof this may be 'of the favor in which the actions of the two governments have been received by the farming community' (or a fraction of it), but not of the ability of provincial governments to meet even this present demand. As to the future's vastly greater needs, it should be kept in mind that, with the country only one-tenth settled, mortgage investments (urban and farm) in the prairie provinces run to $300,000,000. What likelihood is there that provincial government lending (even supplemented by Dominion loans to soldier settlers) can meet all the development needs of the decade following the war?

Fraction of Demand.

"The provincial treasurer of Manitoba has all along stated that he does not expect government-backed lending to meet more than a fraction of the total demand. What he contends it will do is to keep corporations' loan rates at a reduced level, and without reducing their supply. But 'Veritas' is at least clear-sighted enough to see that government lending at below-cost rates must tend to drive the loan companies out of the field. Whereat, nothing daunted, he shouts the louder that: 'The community at large may be congratulated; the loan company will be the only sufferer.' Manitoba's provincial treasurer and 'Veritas,' equally insistent in their advocacy of below-cost government lending, pretty well nullify each other's arguments.

"It is actually happening to-day that loan companies are buying Manitoba provincial bonds with funds repaid to them by farmers who are displacing former loans by new borrowings from the government. The net effect is this: Instead of lending such funds direct to the farmers, the loan companies are themselves lending them to the government through purchase of bonds; the government then turns round and lends money at 6 per cent. to the farmers, although the recent bonds which such loan companies have purchased, average an interest cost of 7½ per cent. to the province. This is surely a roundabout and expensive way of getting loan company funds to the farmer.

Pre-War Mortgage Investments.

"Pre-war mortgage loans (urban and farm) in the three prairie provinces probably amounted to nearly $300,000,000, quite apart from farmers' debts to implement and supply houses secured by mortgage liens. At the close of 1914, mortgage investments on the books of well on to 400 loan, trust and insurance companies alone, aggregated over $275,000,000—and these figures took no account of a very considerable volume of loans held through private financial offices, legal firms, land companies and so forth. In the five years ending with 1914, it is not too much to say that the volume of such loans in the prairie provinces practically doubled, so rapid was the development which passed its most active stage a year or two before the war. The year 1914 (even before there was any hint of a world war), brought a decided lessening in the rapidity of capital inflow from abroad. World-wide and local investment conditions both contributed to the lessening; ill-advised legislation being no insignificant additional factor. In 1914 the increase in mortgage investment in the Middle West was $15,000,000 or under, compared with about $50,000,000 in 1912.

"With the outbreak of war came practically a complete temporary cessation of mortgage loaning. With recovery of confidence in financial circles after the first shock, it was found that loan companies' maturing debentures were being in part satisfactorily renewed, though at increasing rates. Withdrawals of deposits and life companies' outgoings on policy loans did not assume quite the proportions feared. Despite bad crops in some sections, interest payments on the whole bulked up satisfactorily toward the year-end of 1914. So that, as months went on, there was partial resumption of loaning. There was, however, a decidedly lessened demand for new money; at first because of wartime uncertainty and checked immigration, but lately because also of phenomenal financial returns to farmers, which have contributed to repayments in large volume.

As to Legislative Interference.

"On the other hand, moratorial enactments, soldiers' relief measures (good in intent but faulty in detail), and other legislative disabilities, together with high interest rates obtainable both at home and overseas on government and municipal bonds, worked sharply towards restriction of the supply for mortgage lending.

City and Farm Loan Rates.

"While these seemed a tendency toward increased rates in the months following the beginning of war, this did not very generally materialize with regard to first-class mortgage loans based on one-third to two-fifths of conservative valuation on well cultivated farms; and later there has come a tendency to easier rates, notwithstanding increased cost of money to loan companies. City loans generally—and any country loans outside the strictly gilt-edged class—experienced more change in rate. With cessation of building, what may be termed the 'acceptable demand' for city loans fell off sharply. Some slight—but very slight—resumption has taken place for occasional home or business buildings. For these, after careful inspection, funds are now again available at rates ranging but little higher than before the war. Seven to 8 per cent. for residential loans now rules in Winnipeg, and from as low as 6 per cent. up for such few loans as are being made on first-class revenue-bearing business properties. In other western cities the rates tend to run somewhat higher, and in some smaller urban centres with problematical futures, the rate paid to private lenders (for regular loan companies are chary of such) includes a pretty high margin for risk. A similar condition holds, of course, as regards anything approaching the speculative, in Winnipeg itself.

"The somewhat widespread impression that materially higher farm loan rates ruled for a time was partly due to the fact that renewals were made at 8 per cent. of some formerly 7 per cent. Manitoba farm loans. But the 8 per cent. farm loan rate was already coming into effect to a considerable extent in Manitoba before the war, as a result of the 1914 lessening of outside money's inflow, and of a strong sustained demand for loans farther west. Also, the increasing return obtainable from municipal and school debentures helped to stiffen the mortgage rate in 1914 before there was any thought of war. Undoubtedly, the enforcing of Manitoba's moratorium tended to making the higher 8 per cent. rate more general on farm loans in the province, bringing it practically up to what had come to be considered the normal Saskatchewan interest level. Any advance in Saskatchewan rates was to be accounted for solely by the reluctance of conservatively managed institutions to make investments there after the passing of the Dower Act—since amended of its worst features. In Alberta, rates remained at from 8 per cent. up to 9 per cent. in newer or less favored districts.

"During 1916 and 1917 there was a trend to lower rates, farm loans being made at 7½ and 7 per cent. in Manitoba. Since 1915, too there has been an easing off of rates on city loans to the rates already indicated. At the present, further reduction rather than stiffening of rates would certainly be the tendency but for ill-advised legislative and administrative burdens, which add to investment risks and to costs of doing business. Government entrance into the loaning field on a below-cost basis is also tending to the withdrawal of mortgage repayments from the western field altogether, instead of their reinvestment at lower rates. Government action might more effectively, as was lately pointed out by the secretary of the Dominion Mortgage and Investment Association, have helped the farmers generally—now and in years to come—by removing 'the taxes,' confiscatory priorities, and bur-

densome charges which the legislatures have imposed upon that class of borrower, through the agencies which cater to his credit requirements. The development of the West is being seriously retarded by legislation which obstructs the full flow of credit to its settlers, and which finds its expression in the relatively high prevailing rates of interest. It is noteworthy that farmers have joined with loan companies (through the Joint Committee of Commerce and Agriculture which again met in Regina this month), in urging improved legislative conditions."

Lending Institutions' Mid-West Mortgage Investments.

Year 1914.	Trust companies.	Loan companies.	Life insurance companies.	Other insurance companies.	Total, 1914.

Real estate held by companies is doubtless included in the above to some extent. On the other hand, mortgage holdings of land companies are not included. For Manitoba alone, they amount to something over $3,000,000. Clients' funds are included in figures of trust company investments.

CANADA AND BRITISH WEST INDIES

Increase in Trade Between the Two Countries—Closer Commercial Relations

Closer commercial relations when the war is over between Canada, the British West Indies and contiguous British territory is a subject that is receiving some attention at the present time among upper Canadian manufacturers and shippers, says the bulletin of the St. John Board of Trade.

It is one that has a deep interest for the maritime provinces, as any development in the direction referred to must inevitably lead to increased shipments through the maritime ports of St. John and Halifax, and must also tend to stimulate the manufacturing industries of these lower provinces.

As a result of the operation of the preferential tariff, there has been a slight increase in the trade between Canada and the British West Indies. In the last fiscal year the imports from the West Indies reached a total of $14,239,595, as against $6,354,991 in 1916. Exports from Canada did not show the same ratio of increase, the figures for 1917 being $5,179,083 and for 1916, $4,134,901. It is quite apparent from the above that the manufacturers and shippers of Canada are not getting all out of the trade that they should get, or that they might obtain under improved transportation conditions.

Further Development Ahead.

The Barbados Advocate, in a recent article on the subject, remarked:—

"It cannot be too strongly pointed out that this one market, that of the British West Indies, is comparatively close at hand, is waiting for further development, and possesses these direct advantages that the merchants there are strongly desirous of having more extensive and closer trade relations with us, and that, already, throughout these colonies there are active branches of two leading Canadian banks, ready to assist with information and banking facilities in developing our trade."

These advantages would be futile if they were not linked with such transportation conditions as more frequent and quick steamship services between near Canadian ports and the British West Indies, fast through freight services with Canadian business centres timed to meet the arrival and departure of the steamships, and through freight rates and charges between the West Indies and Montreal and Toronto via a Canadian port and not exceeding those via New York and Boston. There must also be cold storage facilities; cool, ventilated accommodation, especially for fruits, in both steamships and cars, rapid sailings and prompt handling of cargoes.

These results can be obtained by the utilization of the advantages possessed by the Canadian ports of Halifax and St. John. Both possess peculiar advantages. St. John has western connection by two transcontinental lines, the Canadian Pacific Railway and the Canadian Government Railway, Halifax has the latter line of railway. There is practically little difference in the ocean distance between the two maritime ports and the West India Islands. The advantage in this respect is with Halifax, but there is only a difference of twenty-one miles. Against this short ocean advantage, St. John has the advantage of a very much shorter land haul by both transcontinental lines. By the Canadian Pacific Railway the combined rail and ocean mileage from Montreal to Bermuda via St. John is 1,254 miles, while via Halifax and the Canadian Government Railway it is 1,588 miles. In the shipments north of the molasses crop of 1917 a much larger proportion came via St. John, illustrating the advantage that the shorter rail haul to the interior gives to St. John.

Clearly, the two ports must work together in this as well as in other national enterprises involving the use of lower province ports. Concentration of the business thought of Canada upon the whole question is very much needed at the present time, so that when the war is over no time may be lost in putting plans into effect.

LARGE AUTO IMPORTATIONS

According to the department of customs report for the fiscal year 1917, which has been tabled in the Commons at Ottawa, the total importations of automobiles for the fiscal year included 12,037 cars, valued at nearly $8,000,000, or $1 per head for the population of Canada. There was almost as large a sum spent in the importation of parts, but these were largely for the manufacture of new automobiles in Canada—a Canadian industry. If the importation of entire passenger automobiles were prohibited outright, Canada would lose nearly $3,000,000 in duty. The figures for 1917 follow:—

	Value.	Duty.
Passenger automobiles	$7,981,177	$2,790,256
Freight automobiles	423,824	148,338
Motorcycles, etc.	177,621	62,071
Motor vehicles, parts	7,200,017	2,171,723

Jewelry, which is another form of merchandise, whose importation may fall under the ban, paid $326,984 in duty, this being the levy on $966.605 of dutiable goods. Unset diamonds, which are on the free list, accounted for $1,492,418 of importations, as compared with $795,299 in 1916.

Investment of Life Insurance Money

The weakness in the plan of providing for one's family by life insurance is that the policies are frequently made payable to widows or others, who have had little or no experience in the investment of funds, and are often influenced to make investments of a hazardous character. The appointment of this Corporation as Trustee ensures that the capital will not shrink and that the largest income consistent with the safety of the capital will be produced.

LENDERS AND BORROWERS

Mr. A. D. Langmuir Discusses Their Relations—Comments Upon Legislation Affecting Loaning

After outlining the organization and the work of the Dominion Mortgage and Investments Association at the annual meeting of the association held in Toronto, Mr. A. D. Langmuir, president, discussed the relations between lenders and borrowers. In his instructive and fair remarks, he stated that as between the lender in mortgage security and the borrower there ought to be established in those provinces where ordinary has been displaced by special legislation, some rule to be followed by our courts and our legislatures under which the borrower should be given consideration and at the same time required to meet his obligations to the extent he is reasonably able to do so. Mr. Langmuir drew attention to an English practice as illustrated by a case recently decided, and which, in a High Court of Justice, the Judge laid down the following rules:—

(a) If the security is sufficient, and if the covenants and conditions of the mortgage deed, other than the covenant to repay the principal moneys have been performed and observed, the mortgagor ought to be given a reasonable time within which to find the money wherewith to pay the debt.

(b) The reasonable time so given may be extended, if, in cases where the interest received is less than 5 per cent., the mortgagor is willing to pay interest at the rate of 5 per cent., and still further extended if, in addition, he is willing to pay over to the mortgagee on account of principal the difference between the net rents received from the mortgaged property and the interest at 5 per cent.

If Security Is Insufficient.

(c) In a like case, if the mortgagor, is in occupation, and the proper occupation rent is in excess of 5 per cent. interest on the debt, he ought to attorn tenant to the mortgagee at the proper occupation rent, and pay to the mortgagee interest at 5 per cent., and the excess of such rent over the 5 per cent. interest on account of capital.

(d) If the security is insufficient, but interest has been paid up to date and the other covenants and conditions in the mortgage deed have been performed and observed, the mortgagee should not be exposed to further loss, and time should be given to the mortgagor on the terms that interest at 5 per cent. is paid, and that the mortgagee may renew the application, if and when further depreciation in the security takes place.

Arrears of Interest.

(e) If the security is insufficient, and there are arrears of interest, but not to a serious amount, the mortgagor should be required to clear off such arrears in addition to complying with the terms set out in (d).

(f) If, in either of the last two cases, the rents of the mortgaged property, or a proper occupation rent therefor, exceed the interest, the mortgagee should be allowed, if he so desire, to appoint a receiver, but in the event of his so doing, in a case falling under (e), the stipulation requiring the mortgagee to pay off the arrears of interest may have to be modified by giving him a reasonable time within which to clear them off.

(g) In cases where there are substantial arrears of interest (say for 12 months or over), or where the covenants to keep down ground rents and other outgoings, or to keep in repair, or insure, have been broken, the mortgagee should not be restrained from exercising his powers in the absence of very special circumstances, unless the mortgagor is prepared to make good all such breaches forthwith, and to continue under conditions similar to those enumerated under (d), (e) and (f).

Are Eminently Fair.

"These rules," said Mr. Langmuir, "are eminently fair and form a guide for practice which the law and our courts should facilitate. I would urge that every effort be made to amend our special legislation in those provinces which have resorted to it so that the principles underlying the rules I have quoted would be given full effect. Under our moratoria, advantage is taken of the private and institutional lender to an outrageous extent, and which involves unnecessary loss. and unnecessary suffering on the part of embarrassed investors.

"Numbers of borrowers have not had the least possible claim for immunity, nor was there any possible advantage to be obtained in delaying the creditors' action by reason of any lapse of time which might result; in fact, the only possible effect has been to increase the claim of the mortgagor, and still further depreciate his security. Relief through the courts has not been obtainable by reason of the construction placed on the wording of these acts, and consequently, there has been no alternative but to possess our souls in patience and await the time when the legislatures should meet again, and try for relief in that direction. All this has caused delay of a most vexatious character. Your committee have given this matter their most careful attention, and have succeeded in obtaining a measure of relief."

Rural Credits.

Mr. Langmuir then referred to the seed grain legislation, stating that complicated as this matter is, no stone is being left unturned to bring about a proper and reasonable adjustment. Referring to rural credits, Mr. Langmuir said:—

"We have a new competitor in the western field of investment in the form of provincial mortgage loans associations. Under reasonable and proper conditions, no objection could be taken to the provincial governments' action in their endeavor to provide cheap money for the farming community. But what do we find to be the facts governing the administration of these credits? That part of our community, who, as a result of war conditions are perhaps to-day the most prosperous in the country, exempt from conscription, exempt from direct war taxation, enjoying returns from the sale of their produce as great as obtained by any other class of business in the country, is constituted a privileged class.

"We find the commission lending them money raised on the general credit of the province, or in the case of Manitoba from funds taken from sources which are entitled to receive higher rates of interest than is being allowed, and loaned to the farmer at 6 per cent.—this at a time when it is well known that the provinces themselves cannot possibly raise money at a cost approximately as low as that rate. There can be no other results but that other classes of people and interests in the province must bear the loss being made in the form of additional taxes and the impairment of the credit of their province.

Loans to Returning Soldiers.

"There is one form of government loan made on terms not fixed in accordance with the existing price of funds, which terms will result in loss to which no serious objection can be taken. I have reference to the Dominion government's proposed plans for the settlement of returned soldiers on land. Loss accruing through this class of loan will be borne by the public at large and will be borne, I trust, ungrudgingly. The men who offered their lives in defence of our liberty are entitled to special treatment. Their service to the country was exceptional and has no equivalent in terms of money. There is no such justification for loans to civilians at the cost of the state. I fear that when such are made, at a time when there is no demand for them either from farmers or other civilians, political favors are suborned at the expense of public credit."

Ontario Legislation.

Mr. Langmuir also commented upon certain legislation of the Ontario government, saying:—

"At the session of the Ontario legislature, just closed, important enactments which affect our institutions, were passed, at the last moment, without your representatives being given an opportunity to consider them. Let me instance the passing in that 'general omnibus,' the statute law amendments act, of a provision giving power to the city of Toronto to impose additional burdens on the backs of borrowers. When the registry act was amended so as to provide additional fees, no objection was offered, as it was quite obvious that growing expenditures necessitated some change, but the city of Toronto has now power to not only collect from mortgage borrowers these additional charges, but a super-tax of one-tenth of 1 per cent. of sums borrowed. It is becoming more and more evident that charges determined by statute which the borrower has to pay, tend to increase. This additional one upon current borrowers is to maintain a building which houses and protects the title of all property owners. Unless the civic authorities can be persuaded of the injustice of this imposition, upon a limited number of the citizens for money that benefits the entire community, this measure will, no doubt. be enforced."

NEW INCORPORATIONS

Another Large Gold Mining Company Incorporated With Headquarters in Toronto

The largest company incorporated during the past week was: Aetna Gold Mines, Limited (no personal liability), $1,000,000, Toronto, Ontario.

The following is a partial list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The amount noted is the authorized capital, and the persons named are provisional directors:—

Vernon, B.C.—Mutual Fruit Company, Limited, $50,000.

Hamilton, Ont.—J. F. Mitchell, Limited, $40,000; J. F. Mitchell, H. D. Petrie, H. G. Ogg.

Ottawa, Ont.—T. C. Larose Company, Limited, $40,000; T. C. Larose, M. Carriere, P. A. Carriere.

Sarnia, Ont.—Carter Decorating Company, Limited, $40,000; W. Carter, R. Simpson, M. L. Maxwell.

Trenton, Ont.—Trenton Cooperage Mills, Limited, $100,000; J. M. Bullen, H. Learoyd Steele, A. P. Trail.

Sherbrooke, Que.—The Peerless Jewelry Company, Limited, $100,000; L. A. David, L. P. Crepeau, S. H. Bush.

St. Catharines, Ont.—St. Catharines Taxicabs, Limited, $40,000; F. J. Murphy, F. F. Summers, M. M. Murphy.

Saint Boniface, Man.—Wood, Weiller and McCarthy, Limited, $50,000; G. A. Wood, H. Weiller, L. F. McCarthy.

Marmora, Ont.—Marmora Cheese & Butter Manufacturing Company, Limited, $2,500; J. Hughes, J. I. Wiley, W. K. Long.

Vancouver, B.C.—The Empress Stock Company, Limited, $10,000. Mountain Lumber Company, Limited, $10,000. Sayward Trading and Ranching Company, Limited, $10,000. Kingsley Navigation Company, Limited, $100,000. Trifolium Oleomargarine, Limited, $100,000. Emigrant Mines, Limited (no personal liability), $250,000. Rainier Hotel, Limited, $10,000. Vancouver Handle Company, Limited, $15,000. The Mutual (Vancouver), Limited, $25,000.

Winnipeg, Man.—Manitoba Transport Company, Limited, $100,000; F. G. Warburton, F. Croydon, K. C. Murray. J. L. Elvin, Limited, $20,000; J. L. Elvin, M. P. Elvin, M. Heron. Manitoba Gay Double Tread Tire Company, Limited, $25,000; P. H. Neville, A. H. Gregory, C. G. Locke. North-West Adjustment and Inspection Company, Limited, $30,000; W. J. Wilcox, A. C. Baillie, A. L. Denison. Leitch-Anderson Grain Company, Limited, $200,000; G. C. Leitch, J. G. McKay, E. F. Haffner. Great West Electric Company, Limited, $300,000; S. T. Smith, W. R. Ingram, J. N. Hutchison.

Montreal, Que.—Robinson's Clothes Shops, Limited, $150,000; M. C. Robinson, L. H. Rosenberg, D. G. Dumaresq. Chontales Mines, Limited, $700,000; J. J. Meagher, H. N. Chauvin, J. E. Coulin. J. W. Jacobs, Limited, $100,000; L. Fitch, A. S. Cohen, J. P. Beaupre. Waltham Watch Company, Limited, $500,000; L. A. David, L. P. Crepeau, S. H. Bush. Pulp and Paper Securities, Limited, $50,000; G. W. MacDougall, L. Macfarlane, W. B. Scott. J. M. Fortier, Limited, $400,000; L. A. David, L. P. Crepeau, S. H. Bush. Hall, Dent, Canada, Limited, $250,000; L. A. David, L. P. Crepeau, S. H. Bush. The Consolidated Equipment Company, Limited, $25,000; H. Ewan, J. H. Dunlop, H. B. Laduke. Dominion Lamp Company, Limited, $100,000; P. H. Klein, J. E. Klein, H. B. Irving. John Price, Limited, $200,000; G. P. Price, C. H. Price, S. J. Price.

NOVA SCOTIA STEEL BONDS

The Nova Scotia Steel and Coal Company has succeeded in placing through the provincial government $750,000 of its bonds with the Maritime Trust Company. The price was 98, with an option on $250,000 at the same figure. It is the opinion that the trust company will be able to offer them to the public at 6 per cent. Although several other bond houses had originally submitted offers, all but two had subsequently withdrawn. The province had originally asked for bids for either $1,000,000 or $1,500,000 in either 10 or 15-year maturities.

PUBLISH PAYMENTS TO POLICYHOLDERS WEEKLY

Mr. W. J. Packham, the secretary of the Hamilton Life Underwriters' Association, has recently issued the following circular to members of that association:—

"A motion was passed at our last regular meeting to adopt a scheme to ascertain the amount of death claims and maturities paid to the residents of Hamilton weekly. The object is to create a strong selling argument in favor of life insurance, it being the opinion of the association that the prospect, as a rule, thinks too much of the amount he is asked to pay out each year and not enough of the benefits from insurance accruing to others, and which might come to his own family.

"With this end in view, you are asked to communicate with the general manager of your company, with the purpose of securing his co-operation in the matter. The idea is for the general manager to communicate with some one, possibly the president of the local association, who, in turn, will see that the results are published weekly.

"The local managers who were present at our last meeting were unanimous in their support of the scheme. May we look for your hearty co-operation in the matter."

We do not know whether it is the intention of the various local bodies of the Underwriters' Association to adopt a similar practice, but in our opinion they will be well advised, indeed, in doing so. The method is an ingenious one for drawing the attention of the public to the great merits of life insurance, and it is rather strange that it has not been adopted before this. The individual is too apt to regard his insurance payments as an expense, and not be duly appreciative of the protection his dependents are receiving, as well as of the steadily growing investment reserve values of his policies. When he sees the large payments that are being made weekly to beneficiaries in his community, the relative importance of the company's obligation in the contract of insurance will slowly dawn upon him, and the certainty that he or his will one day be among the recipients in those benefits. True, a study of the Government Blue Book will give him even more amassed proof of the benefits conferred upon the whole community by the life insurance companies, but this huge, statistical volume is not one usually read by the policyholder along with his morning paper. The method followed by the Hamilton Association will give him the facts week by week in a form which he will appreciate and in a form moreover which will make him think.

Seventy-five Ford tractors are to be delivered in the province soon. This is the first shipment of tractors under the arrangements made with the Canada Food Board.

MARCH FIRE LOSSES

Two Large Business Blocks Destroyed Last Month—Many Large Fires Reported

The Monetary Times' estimate of Canada's fire loss during March, 1918, is $1,682,286, compared with the February loss of $2,243,762, and $2,050,650 for March, 1917. The following is the estimate of the March losses:—

Fires exceeding $10,000	$1,400,000
Small fires reported	108,510
Estimate for unreported fires	173,776
Total	$1,682,286

The Monetary Times' record of the past three years and this year to date, shows the following monthly losses:—

	1915.	1916.	1917.	1918.
January	$ 1,249,886	$ 1,649,217	$ 1,918,660	$ 2,688,556
February ...	1,019,556	3,275,600	2,009,953	2,243,762
March	1,632,696	1,406,501	2,050,650	1,682,286
April	1,463,747	1,460,437	1,317,714	....
May	881,855	1,850,205	1,163,110	....
June	1,157,156	494,557	1,184,627	....
July	773,269	3,039,634	1,101,734	....
August	403,693	1,057,109	1,230,183	....
September ..	1,116,109	981,703	1,301,700	....
October	1,290,325	1,077,815	704,605	....
November ...	1,087,980	923,235	959,049	....
December ...	1,595,255	3,271,496	5,144,100	....
Totals ..	$13,671,527	$20,487,509	$20,086,085	$ 6,614,604

The fires reported in March, at which the losses amounted to $10,000 and over, were:—

Kitchener, Ont., March 2, departmental store of Weseloh, Gouldie, Limited, $41,000.

Tillsonburg, Ont., March 6, Huntley Machinery Manufacturing Company's plant, $75,000.

Sydney Mines, N.S., March 7, McRae block, $75,000.

Saskatoon, Sask., March 10, J. H. Ashdown's wholesale hardware store, $600,000.

Georgetown, Ont., March 11, woolen mills of H. Corke and Company, $50,000.

Kingston, Ont., March 14, grocery of Fenwick and Hendry, $100,000.

Toronto, Ont., March 14, warehouse of B. M. Jenkins, antiques, $54,000.

Vancouver, B.C., March 14, residence of J. Bevins, $15,000.

Welland, Ont., March 19, Cutler lumber and planing mills, $10,000.

Lamont, Alta., March 20, Windser Hotel, $10,000.

Lethbridge, Alta., March 20, Acadia block, $100,000.

Hamilton, Ont., March 25, Hamilton Cotton Company's storehouse, $100,000.

St. John, N.B., March 26, W. Thorne's munition plant, $40,000.

Halifax, N.S., March 31, King Edward Hotel, $30,000.

Toronto, Ont., March 31, Jefferson glass plant, $50,000.

Rawden, Que., March 31, Miner lumber mills, $50,000.

Destroyed or Damaged.

Among the structures damaged or destroyed last month were: Salvation barracks, 1; freight car, 1; residences, 24; departmental store, 1; boat house, 1; manufacturing building, 1; plants, 3; business buildings, 6; garages, 3; army building, 1; school, 1; office, 1; office building, 1; stores, 6; business blocks, 3; ferry boats, 2; vacant house, 1; brick block, 1; lumber camp, 1; steamboat, 1; woolen mill, 1; officers' messroom, 1; soldiers' home, 1; farm buildings, 2; barns, 2; warehouse, 1; auditorium, 1; grain elevator, 1; storehouses, 2; hotels, 3; lumber mills, 2; oil house, 1; express car, 1; manufacturing buildings, 2.

Among the causes of fires reported last month were: Defective stove pipe, 1; defective wiring, 1; overheated stove, 1; defective flues, 3; rats nibbling matches, 1; defective furnace 1; struck by bolt of lightning, 1; incendiarism, 1.

Many Fatalities.

The following is a list of fires at which fatalities occurred last month:—

Chatham, Ont., March 8	Burning house	2
Terris, Ont., March 10	Burning house	2
North Toronto, Ont., March 12	Burning house	1
Theodore, Sask., March 12 ...	Burning house	1
Ferry Point, Alta., March 12 ..	Burning house	2
New Liskeard, Ont., March 14	Burning house	1
Alvin Siding, N.S., March 15 ..	Burning lumber camp .	20
Owen Sound, Ont., March 26 ..	Upsetting of oil lamp ..	1
Swift Current, Sask., March 26	Burning house	1
Cooksville, Ont., March 27 ...	Burning house	1
Windsor, Ont., March 28	Burning house	1
Halifax, N.S., March 31	Burning house	1
	Total	34

The following table compiled by *The Monetary Times*, shows deaths caused by fire during March, 1918, as compared with previous returns:—

F. N. BURT COMPANY'S REPORT

A very satisfactory report was presented to the shareholders of the F. N. Burt Company, Limited, at the annual meeting last week by Mr. S. J. Moore, the president. Last year's profits were $369,999, which compare with $329,000 in 1916, $222,000 in 1915, $212,000 in 1914, and $217,000 in 1913. The profits exceeded those of the previous year by $40,083, and those of 1915 by $147,732. As compared with the previous year's writing-off the amounts transferred to reserve are considerably larger. Out of the year's profits $25,000 was written off patent account, and $26,000 transferred to a reserve for various government taxes. No such allowance as the latter was made in the previous year's accounts.

The amount provided for plant and realty reserve was $94,000, as against $75,000 last year, leaving the amount in this account at $225,000. The report states that the book values of the properties are considerably less than the appraised values.

At both the Canadian and American factories the volume of business and profits were the largest in the history of the company. The company is well managed and directed, and is making excellent progress.

TORONTO'S WAR EXPENDITURE

In his budget for 1918, Finance Commissioner Bradshaw summarizes the total war expenditures of Toronto since the war began, making the total $11,944,988. All of this except the provincial war tax is voluntary. The details are as follow:—

Patriotic relief and other grants	$ 2,262,232.06
Military hospitals	29,296.67
Ammunition, horses, air-planes	73,788.95
Life insurance, enlisted citizens	4,166,938.83
Wages of enlisted civic employees	1,561,233.44
Fitting up and maintenance of temporary barracks	13,522.19
Recruiting purposes	68,179.68
Protection of city property	439,035.73
Miscellaneous grants	19,168.58
Debt charges on war debenture debt	969,360.24
Provincial war tax, 1915, 1916, 1917, and 1918..	2,342,231.80
Total	$11,944,988.17

MARCH MUNICIPAL BOND SALES

Montreal Issue Responsible for Large Total Last Month—Another Winnipeg Water District Issue

The municipal bond sales in Canada during March totalled $9,191,643, compared with $5,243,279 in February and $229,013 in March a year ago. The March records of municipal bond sales at home for the past nine years are as follows:—

March.	Municipal bond sales in Canada.
1910	$1,169,730
1911	6,271,925
1912	1,926,716
1913	335,492
1914	5,123,176
1915	2,572,357
1916	2,027,741
1917	229,013
1918	9,191,643

In addition to the Greater Winnipeg Water District $2,000,000 issue in February, another block of $1,000,000 bonds was disposed of, bringing the balance of that municipality up to $3,000,000.

Details of March Sales.

The following are the details of March sales:—

Municipality.	Rate %.	Term (years).	Amount.
Saskatchewan.			
Scott	.	..	$ 6,000
Eston Village	.	..	2,800
La Fleche	.	..	4,100
Herschel	.	..	1,500
Prelate	.	..	9,000
Bitter Lake	.	..	5,000
Plato	.	..	2,600
Drake	.	..	1,000
School Districts	.	..	34,600
			$ 66,600
Alberta.			
Lethbridge	6	..	$ 66,000
Manitoba.			
Greater Winnipeg Water District	.	..	$1,000,000
Quebec.			
Three Rivers	6	5	$1,000,000
Montreal	6	5	6,900,000
			$7,900,000
Ontario.			
Smith Falls	6	20	$ 21,120
Raleigh	6	10	29,923
Halton	6	20	40,000
Etobicoke	6	40	36,000
Acton	6	20	25,000
York Township	.	..	7,000
			$ 159,043

The following table summarizes the above details:—

Province.	Municipal bond sales, March, 1918.
Saskatchewan	$ 66,600
Alberta	66,000
Manitoba	1,000,000
Quebec	7,900,000
Ontario	159,043
	$9,191,643

Sales for Three Years.

The following table shows the sales of municipal bonds, in Canada only, during the past three years and this year to date:—

	1915.	1916.	1917.	1918.
January	$ 1,784,947	$ 1,909,441	$ 1,969,256	$ 561,000
February	3,047,011	1,419,909	458,874	5,243,279
March	2,572,357	2,027,741	229,013	9,217,795

October	1,589,000	Nil	Nil	......
November	4,000,000	7,894,000	Nil	......
December	450,000	3,065,000	Nil	......
	$35,483,114	$32,335,764	$6,233,365	$310,000

GREAT WEST PERMANENT LOAN COMPANY

The report of the directors of the Great West Permanent Loan Company, Winnipeg, for the past year shows a contingent reserve fund of $150,000, which is a new feature in the financial statement. In view of disturbed business conditions, which might result in a depreciation of some of the company's securities, the directors considered it would be consistent with good business to exercise more than the usual precaution, and accordingly decided to create a contingent reserve, and for this especial purpose set aside the sum of $150,000. This sum, added to the amount now standing at the credit of the general reserve, i.e., $606,580.13, makes a total of $756,580.13 or 31.36 per cent. of the company's paid-up capital.

The statement indicates that debentures increased in volume during the year, and the renewals were regarded as satisfactory, more especially when the several issues of government war bonds were taken into consideration.

Payments of both interest and principal, considering general conditions, were reported satisfactory. It is felt that with the apparent improvement in practically all lines of business, mortgagors will gradually become in a better position to meet their payments promptly. The company does not expect that any losses will occur in connection with any foreclosed properties.

The company purchased, during the year, $250,000 of Victory war bonds, the instalments being paid as they fall due. The head office building is now fully occupied. The directors have deemed it advisable to maintain large cash reserves, the amount of which at the end of the year was $301,983.87.

The net profits for the year were $206,388 as against $200,254 in 1916. Instead of paying the dividend of 8 and 9 per cent., which has been the custom for a number of years past, the directors decided to reduce the dividend rate to 5 per cent., a suggestion made by *The Monetary Times* a year ago. The company was thus enabled to carry over a larger amount than usual to surplus profits.

The chief item among the assets is that of mortgages on real estate and properties acquired by foreclosure amounting to $5,956,549. This item, we think, should be divided, in the balance sheet, as in previous years, the mortgages on real estate and the properties acquired by foreclosure being shown separately.

The Monetary Times commented very fully last year upon the standing and position of the Great West Permanent Loan Company and its subsidiaries. It is fair to say at this time that the company's financial statement reflects more conservative management, although the management and directorate will probably admit there is still room for improvement in that direction.

SEVENTH ANNUAL STATEMENT

The Weyburn Security Bank

Statement of the Result of the Business of the Bank For the Year Ended December 31, 1917.

The balance at credit of Profit and Loss account on December 30, 1916, was	$ 9,412.45	
Net Profits for the year ended December 31, 1917, after deducting expenses of management, payment of taxes, and making necessary provision for interest due to Depositors, and bad and doubtful debts	74,274.86	
		$ 83,717.31
Appropriated as follows:		
Dividend No. 12 at 5 per cent per annum, payable September 21, 1917	9,633.00	
Dividend No. 13 at 5 per cent. per annum, payable February 21, 1918	9,633.00	
Written off Bonds	20,712.50	
Written off Fixtures	3,336.66	
War Tax on Circulation	3,597.43	
Business Profits Tax	7,582.72	
Transferred to Reserve Fund	25,000.00	
		79,495.31
Balance carried forward at credit of Profit and Loss Account		$ 4,222.00

AUDITOR'S CERTIFICATE

In accordance with the provisions of sub-sections 19 and 20 of Section 56 of The Bank Act, I report as follows:

I have audited the Balance Sheet with the books at the Head Office and the certified returns from the Branches.

I have obtained all the information and explanations that I have required and am of the opinion that the transactions of the Bank which have come under my notice, have been within the powers of the Bank.

I have checked the cash and verified the securities representing the investments of the Bank at the chief office at a date other than and in addition to the verification of December 30, and find that they are in agreement with the entries in regard thereto in the books of the Bank.

In my opinion, the Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs, according to the best of my information and the explanations given to me, and as shown by the books of the Bank.

Weyburn,
March 14, 1918.

A. A. BENTON, Auditor,
(of the firm of Marwick, Mitchell, Peat & Co.)
Chartered Accountants.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

The general results of the year's operations of the Standard Chemical, Iron and Lumber Company were slightly better than in 1916, but on account of the manner in which costs have increased it has been deemed advisable to set up reserves against a possible drop in the value of inventories.

The special reserve fund referred to in the last annual report, amounting to $600,000, has been completed. A reserve for federal income tax, amounting to $11,983.05, has also been set up, leaving a surplus of $154,402.70 to be carried forward.

During the year a substantial sum has been spent on replacements and renewals with a view to increasing the operating efficiency of the plants. The benefit from this expenditure should commence to be reflected in the earnings of the current year.

The sales for 1917 amounted to $4,327,056.80, about $800,000 more than in the previous year. The number of cords carbonized was 126,195, being the greatest number carbonized in one year in the history of the company.

Capital additions during the year amounted to $350,455, the greater part of which was expended in acquiring additional timber limits, and in the construction and equipment of eight miles of railway to establish access to large timber holdings which have been owned by the company for a great many years. About $70,000 was spent on plants for the manufacture of sodium acetate, methyl acetate and acetic anhydride. These new plants, besides increasing the earning power of the company, will provide an important outlet for acetate of lime, should the demand for that commodity subside after the war. The funded and mortgage debt of the company has been reduced by the retirement of $204,400 of second mortgage notes.

Now that the physical and quick assets of the company have been placed upon a sound basis, the net earnings will be available to reduce current indebtedness, the increase in which is attributable to the necessity of carrying heavier stocks at increased costs and to our inability to get enough cars to move our products. The prospects are that a considerable reduction in current liabilities will be effected within the next few months, as the transportation situation has already commenced to improve.

International Mercantile Marine Company.—The estimated net income of the company for 1917 was $11,500,000 as compared with $20,160,615 in 1916, according to an announcement made recently by P. A. S. Franklin, president of the company. The net income was from ships directly owned and operated by the company, together with dividends from British and United States subsidiary companies. This quite plainly suggests that there may have also been profits of subsidiaries that were not received by the company in dividends. The official report for 1916, last July, showed net profits of the company from its own shps, and profits of subsidiaries entirely owned, of $26,000,000, of which only $20,000,000 actually came into control of the Mercantile Marine Company in the fiscal period.

F. N. Burt Company.—The ninth annual report was presented to shareholders of the company recently. Profits for the year ended December 31st last amounted to $369,999, which, with the sum of $232,517 at the credit of profit and loss at the end of the previous year, made a total of $602,516 available. Dividends were paid at the rate of 7 per cent. on the preferred and 6 per cent. on the common, totalling $183,264, while nearly $95,000 was transferred to realty and plant reserve account, $26,000 was set aside for taxes, and $25.678 written off patents, leaving a balance to carry forward of $272,863.

It is stated that the volume of business and profits was the largest in the history of the company. Not only has the balance in the profit and loss account been increased by $40,345, but a generous policy of writing off plant and machinery accounts has resulted in the book values being considerably less than the appraised values of the properties. The assets are set forth as amounting to $3,884,685, of which the main items are plant and machinery, $1,042,704; real estate and buildings, $706,549; and patents and goodwill, $894,278.

The board of directors were re-elected for the ensuing year as follows: S. J. Moore, A. E. Ames, F. N. Burt, W. C. Ely, C. H. Duell, James Ryrie, A. Jephcott and William Finlay.

The officers were re-elected as follows: S. J. Moore, president; A. E. Ames and F. N. Burt, vice-presidents; and E. G. Baker, secretary.

International Paper Company.—It is probable that the forthcoming annual statement of the company will disclose a record balance of earnings per share for the common.

Final figures are likely to show common share profits, after excess profits taxes and depreciation, of between $22 and $23 a share. This would compare with common share profits in 1916 of 31.65 per cent. For seven years' period to 1916, however, the company did not even earn the full 6 per cent. dividend for the $22,406,000 preferred.

The company has now reduced its bonded debt to less than $7,500,000, which is approximately a 50 per cent. reduction in less than fourteen months.

It is not likely that 1918 will be anything like as big a year as the past two. The price of newsprint is being held down by government influence, and the cost of production is steadily rising.

Canadian Westinghouse Company.—The annual statement of the company reflects further execution of war orders in the greater part of the year ending December 31st, 1917. After deducting business profits war tax, patriotic contributions, and making provision for doubtful accounts, net operating income amounted to $957,285. Added to this is interest on Dominion war loans bonds of $30,238 and $23,752 from bank interest and miscellaneous income, making a total net income of $1,011,276. This compares with an operating income in 1916 of $1,154,534, and in 1915 of $860,628. After writing off $165,000 for depreciation, a balance of $846,276 was available for dividends.

H. H. Westinghouse, chairman of the board, in presenting the financial statement, said: "The business aspect of the first half of the past year was a continued activity at high pressure in execution of previously placed orders for war supplies. In the latter portion of the year, with the realization that for reasons entirely apart from the record of successful performance made by the manufacturers of Canada, further allotments on a like scale would not be forthcoming in the immediate future, a general curtailment of operations took place, which was the first lull in a continued strain of more than two years."

Canadian Consolidated Rubber Company.—Both sales and net profits for the year ended December 31st last were the largest in the history of the company.

Net profits, after deducting all manufacturing expenses, as well as providing for repairs, depreciation, interest charges and the business profits tax, were $1,208,018, an increase of $302,813, or about 33 per cent.

When the regular preferred stock dividend had been paid the net surplus for the year was $998,034, equal to 35.6 per cent. earned on the common stock, on which no dividend is being paid at the present time. A year ago the net surplus was $617,601, equal to 22 per cent. earned, and in 1915, $342,854, equal to 12.2 per cent. earned.

The main features of the income statement and the balance sheets of the past three years compare as follows:—

	1917.	1916.	1915.
Sales	$16,323,431	$12,094,695	$7,522,147
Profit	1,208,018	905,205	534,978
Preferred dividend	209,984	209,979	192,123
Surplus	998,034	617,601	342,854
Total surplus	4,305,934	3,307,900	2,690,298
Current assets	11,180,120	7,780,761	4,994,417
Current liabilities	2,688,735	3,939,780	1,331,783
Working capital	8,500,385	3,840,981	3,662,634

Auditors' Certificate

We have audited the accounts of F. N. Burt Company, Limited, for the year ending 31st December, 1917, and we certify that in our opinion the above Balance Sheet is properly drawn up so as to exhibit a true and correct view of the company's affairs according to the best of our information and the explanations given us and as shown by the books of the company.

We have received all the information and the explanations we have required.

(Signed) CLARKSON, GORDON & DILWORTH,
Chartered Accountants.

At the ninth annual general meeting of shareholders held on March 25, 1918, the President, Mr. S. J. Moore, reviewed the operations of the company of the previous year.

The Board of Directors was re-elected for the ensuing year, as follows:—S. J. Moore, A. E. Ames, F. N. Burt, W. C. Ely, C. H. Duell, James Ryrie, A. Jephcott and William Findlay.

The officers were re-elected, as follows:—S. J. Moore, President; A. E. Ames and F. N. Burt, Vice-Presidents, and E. G. Baker, Secretary.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Courtney, B.C.—A block of $20,000 6 per cent. 20-year debentures has been issued by the municipal department of British Columbia for electric light purposes.

Niagara Falls, Ont.—The city has sold a block of $20,000 5 per cent. 20-year bonds for fire hall purposes, and a block of $6,152.49 5 per cent. 30-year bonds for sewer purposes.

Revelstoke, B.C.—A block of $8,500 5½ per cent. 10-year debentures has been issued by the municipal department of British Columbia for local improvement and sidewalk purposes.

County of Wentworth, Ont.—Messrs. A. E. Ames and Company, of Toronto, have been awarded a block of $150,000 6 per cent. 5-year debentures. The proceeds will be used for patriotic purposes.

Toronto, Ont.—The following is a report of the city's tax revenue for the current year:—

Total required for 1918	$24,046,653
(1) Revenue apart from tax	4,410,526
(2) Surplus of previous years, special credits, etc.	1,527,404
(3) Revenue from taxation	18,108,723
Total	$24,046,653

To secure this revenue from taxation requires a rate of 30.50 mills, made up as follows:—

Provincial war tax on assessment of $605,727,725 at 1 mill	$ 605,727
Civic war expenditure on assessment of $600,778,145 at 7.24 mills	4,349,633
General tax on assessment of $600,778,145 at 15.04 mills	9,035,803
School tax on assessment of $602,508,636 at 7.22 mills	4,350,112
Total	$18,341,277
Less taxes uncollectable, vacancy and other allowances, reductions and probable losses	232,554
Grand total	$18,108,722

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from March 18th to 22nd, 1918:—

School Districts.—Omand, $1,000 5-years not ex. 8 per cent. annuity; N. Sonlier, Finistino. Morris, $2,500 10-years not ex. 8 per cent. annuity; Henry Hegg, Viscount. Petain, $2,200 10-years not ex. 8 per cent. annuity; W. C. Latter, Piapot. Arras, $200 10-years not ex. 8 per cent. annuity; Joss Bonas, Muenster. Melaval, $2,800 10-years not ex. 8 per cent. annuity; R. W. Giles, Melaval. Eagle Creek, $1,600 10-years not ex. 8 per cent. instalment; V. H. Hamilton, Asquith. Flower Valley, $400 5-years not ex. 8 per cent. instalment; J. G. Haas, Shellmouth. Elfros, $3,000 10-years not ex. 8 per cent. annuity; W. Nichol, Elfros. Kalyna, $1,200 10-years not ex. 8 per cent. annuity; Jos. Zayonee, Claytonville. Maxwell, $1,200 10-years not ex. 8 per cent. annuity; W. M. Ennis, Wilke.

Rural Telephone Company.—Zelma, $8,100 15-years not ex. 8 per cent. annuity; E. W. Cline, Zelma.

The following is a list of debentures reported sold from March 18th to 22nd, 1918:—

School Districts.—Haverhill, $400; J. H. Kern, Moose Jaw. Bolney, $1,500; W. L. McKinnon and Company, Regina. Kandahar, $1,000; S. Holiski, Kandahar. Arras, $2,000, Boakview, $600; Canada Landed and National Investment Company, Winnipeg. Grosmont, $1,500; Nay and James, Regina. Grafton, $2,000; Waterman-Waterbury Manufacturing Company.

Rural Telephone Companies.—Titanic, $5,700, Clayton, $1,700, South Melfort, $4,200; W. L. McKinnon and Company, Regina. Richard, $11,000; Nay and James, Regina. Moose Creek, $3,200; J. A. Thompson, Winnipeg.

Villages.—LaFleche, $1,000, Plato. $2,600, Drake, $1,000; W. L. McKinnon and Company, Regina.

GROWTH OF CANADA'S TRADE

Increase in Produce of Munitions, Grains and Meats Since 1913

Canada's exports of war munitions and foods to the United Kingdom have increased tremendously since 1914, but the actual figures transcend anything anyone is likely to estimate. The customs report for the year ending March, 1917, has just been tabled in the Commons, and it shows that Canada's trade—even without taking into account the wonderful increases made in the past twelve months—has in some respects attained proportions that no one would have thought possible. This is not accounted for by the increase in prices. In volume, as well as in value, Canada's exports to Great Britain have increased astonishingly. The figures for a few familiar war munitions are here compared for the fiscal years 1913 and 1917:—

	1913.	1917.
Cartridges	$ 6,768	$238,148,300
Explosives	5,387	30,815,956
Gasoline launches	135	15,145,150
Guns	7,667	2,175,618
Boots	1,440	1,111,026
Ferro-silicon	nil	870,240
Wire and nails	543,451	3,138,109

Large Grain Exports.

As Canada was not a maker of war supplies previous to 1914, the foregoing figures are easily understood. But Canada certainly was an exporter of grain, meats and farm produce, and the following is a comparison, which includes quantities as well as values:—

	1913.	1917.
Oats	$3,592,247	$26,510,014
bushels	7,293,004	52,307,798
Wheat	$74,978,155	$193,697,313
bushels	77,722,465	152,043,222
Flour	$12,442,479	$26,006,600
barrels	2,880,157	4,030,978
Bacon	$5,313,711	$42,875,774
pounds	35,963,906	206,510,025
Beef	$71,896	$2,213,837
pounds	782,970	15,179,195
Butter	$173	$2,220,197
pounds	681	7,121,568
Cheese	$20,497,195	$36,463,272
pounds	153,886,885	179,568,863
Eggs	$9,224	$1,702,636
dozen	51,294	4,343,115
Canned lobster	$883,120	$2,025,560
pounds	2,824,057	3,662,148
Canned salmon	$2,605,344	$4,898,555
pounds	15,999,137	34,772,829

In most of the foregoing exports to the United Kingdom, the increase has been steady since the war began. In eggs, however, the maximum was reached in 1916, when 7,565,884 dozen, worth $2,191,687, were exported.

Mineral Exports to Britain.

Canada's mines have also been working overtime furnishing metal for the outside world. For the United Kingdom alone, the exports of copper in 1917 totalled 144,613 hundredweight, worth $1,080,133, as compared with only 53,855 hundredweight, worth $403,851, in 1913. Nickel worth $1,862,796 (124,001 hundredweight) was sent to the United Kingdom, as compared with 48,267 hundredweight, valued at $718,145, in the year before the war. The bulk of Canada's nickel still goes to the United States, and the figures for the fiscal year 1917 were 702,203 hundredweight, worth $7,062,758.

Some forms of lumber have tended to swell Canada's war exports considerably. In 1917 the Dominion sent 50 per cent. more spruce and other deals to the United Kingdom than in 1913, but the price had so increased that the value of this form of export nearly doubled, being $8,594,803, as compared with $4,683,821.

Only 74 horses, worth $14,400, were exported to the United Kingdom in 1913. By 1916 the number had risen to 21,833, worth $3,899,822. In 1917 the number dropped again to 9,499, worth $1,898,820.

A curious feature of the customs report is that it rceords imports of gold bullion from the United Kingdom in 1917 worth $14,646,131, as compared with only $98,409 worth in 1916.

Exempt from Dominion Tax

It is good business to increase your holdings of Victory Loan Bonds, because the security is of the highest quality, the income return attractive, and you are not required to pay Dominion Income Tax.

CONTRACTING FOR EXCHANGE

High Premium on New York Funds—Rate Has Reached More Than 1½ Per Cent.

BY H. M. P. ECKARDT

(Author of "Manual of Canadian Banking.")

The business community, especially that section of it having remittances to make to the United States, continues to be troubled by the high premium on New York funds. When the deputation of Government officials and bankers visited Washington a month ago, the exchange market for a short time acted as if relief were expected; but after several weeks had passed without any announcement of new credit arrangements in the United States for Canada's benefit, the quotations began to reach new high spots, and, during the second half of March the rate of premium between banks frequently stood above 1½ per cent. One report, which gained currency in the street, was that, as Great Britain did not take action to definitely stabilize the sterling exchange market in New York until the pound sterling had reached a discount of 2 per cent. as compared with the United States dollar, so our government would perhaps wait until the discount on our currency approached in the neighborhood of 2 per cent. In this connection it should be observed that when the premium on New York funds between banks, as published in the daily press, gets up to 1¾ per cent., customers of the banks requiring to purchase drafts on United States points would have to pay exchange at the rate of $2 per $100 in many instances.

Funds at Prevailing Rates.

The bank selling the exchange may have been obliged to buy funds in the exchange market at the prevailing rates as a means of supplying the requirements of its customers; and if the bank bought in this manner $100,000 of New York funds at a cost of 1¾ per cent., or $1,750, and subsequently sold to a customer $10,000 at 2 per cent., its profit on the sale, reckoned proportionately, would be but ¼ per cent., or $25. Also, if the premium fell to 1 or 1¼ per cent. before the remainder of the exchange was disposed of, the bank would, perhaps, be involved in a substantial loss.

The state of affairs recently prevailing in our exchange market has favored the more general use of the contract system. For many years the Canadian bank agents in New York have done an extensive business with United States exporters, importers and others in contracting to buy or sell sterling exchange at some date in the future at a fixed price. For example, an importer gives an order to a British company for goods to be shipped to the United States within a certain time limit, and arranges the date on which payment is to be made.

Adverse Movement of Exchange.

The importer has but a moderate margin of profit, and he cannot afford to have this margin seriously reduced through a contrary or adverse movement of the exchange market between the time of giving his order and the date on which remittance is to be made. Suppose the order is for £10,000 worth of goods and that sterling bills of the length of term he requires are then at 4.81. He makes his calculations on this basis; and then, later, when he requires to buy the exchange, he finds that the quotations have advanced to 4.83. This means that he must pay $48.300 in settlement instead of $48,100 as calculated. In other words his prospective profit is cut down by $200.

Contracting for Exchange.

Against this he may guard through contracting for the exchange at the time of sending his order. He could go to one of the Canadian bank agencies, or to any of the big United States or foreign dealers in exchange; and, his financial position being satisfactory, they would contract to sell him £10,000 exchange on the required date at a certain price. Thus this contract price for exchange constitutes the basis of his calculations; and assuming that the dealers who enter with him into the contract are sound financially, his risk of loss through exchange fluctuations is eliminated.

In the same way a big exporter, who contracts to ship certain goods to Great Britain at fixed prices, to be settled for by means of bills of exchange drawn on London, may wish to safeguard himself against a drop in sterling quotations between the time of making his contract with the Britisher and the date on which he can offer his bills of exchange for sale in the market. In his case the exchange dealer contracts to buy the certain amount of exchange at a fixed date and an agreed upon rate.

The exchange dealer may indulge in a little speculation in connection with these contracts for buying and selling bills on London. Thus, if he contracted to buy £10,000 two months hence, on June 1st, at 4.81 and did not hedge on his contract, a rise to 4.83 by June 1st, or at any time prior to June 1st, would enable him to make a good profit through covering sales at the higher price. But the conservative dealers do no speculate as a rule in this way. When one of our Canadian bank agencies in New York, for instance, contracts to buy £10,000 at a future date, they will probably endeavor to negotiate at once a short sale (or contract to sell) for the same or nearly the same amount, and the profit or difference in prices will likely be small, perhaps not more than is made on a cash transaction. If the bank has two customers, one wishing to contract for a sale and the other for a purchase, the amounts being approximately even, the margin of profit might be a little wider than if the bank on contracting to sell a certain amount covers it by contracting to buy a like amount from another dealer.

Quotations Moved Within Limits.

Prior to the war, quotations for New York funds in the Toronto and Montreal markets, moved within narrow limits on either side of par. The cost of shipping gold to or from New York being around 5-64 of 1 per cent., the quotations between banks rarely moved beyond a discount or premium of that amount. But since the war the fluctuations have been violent, owing to the restrictions placed on the movement of gold between New York and our centres. Canadian merchants importing goods from the States, to be paid for at some time in the near future, would certainly be relieved in many cases, if they were able to contract for the exchange at a fixed price. However, as there is a pronounced scarcity of bills on the United States, one can understand that the bankers would be reluctant to commit themselves extensively in this respect. There would probably be instances wherein a bank in Canada could count confidently on receiving from its customers or clients, fairly large amounts of United States funds; and where this is the case a basis would exist for contracting to sell its customers at a fixed price.

CANADIAN COMPANIES ENJOY LARGE PROFITS

Net profits of 15 prominent companies in the fiscal period ended December 31, 1917, amounted to $13,809,628, as compared with $12,699,985 in 1916. This is an increase of $1,109,643, or 8 per cent. The following comparisons are interesting:—

	Net profits.	
	1917.	1916.
Canada Steamships	$ 3,120,282	$ 2,571,006
Bell Telephone	1,973,070	1,910,450
Shawinigan Water	1,350,864	1,253,736
Dominion Power and Transportation	726,219	710,348
Toronto Railway	1,094,809	1,340,794
Ottawa Electric	409,669	383,327
Montreal Cottons	454,175	446,782
Jute Cottons	542,322	394,805
Canada F. and F.	584,874	369,228
Carriage Factories	10,149	4,154
Canada Cement	2,029,181	1,775,086
Shredded Wheat	1,046,111	1,175,760
Asbestos Corporation	253,789	215,476
City Dairy	70,257	18,018
Belding-Paul	142,757	135,986
Total	$13,809,628	$12,699,985

An increase of $13,731,938 in the customs collections of the Dominion for the fiscal year which ended on Saturday is shown by the monthly report of the Customs Department. During the twelve months ending March, duties collected totalled $159,681,046. For the previous twelve months the amount collected was $145,949,107. For March alone collections totalled $13,558,859, a decrease of $1,650,259 as compared with March, 1917, when duties collected amounted to $15,209,118.

LIFE INSURANCE AND COST OF LIVING

Should Premium Rates Be Affected?—Opinions Upon the Subject

BY M. P. LANGSTAFF, A.I.A., F.A.S.

In some recent numbers of Canadian Insurance there have appeared some interesting letters on the effect the rise in the cost of living may possibly have on the premiums paid for life insurance. One writer states: "Writers upon the subject of insurance frequently draw the attention of the public these days to the supposed fact that while the cost of nearly all other necessities has risen, life insurance has not advanced in price. The conclusion such writers evidently desire to be drawn is that the insurer to-day is getting his protection at bargain prices, but there is evidently a fallacy here." He then proceeds to expose this "fallacy" by the following reasoning. "Insurance companies are selling an indemnity payable in money. Now, while the cost of commodities rises, the value of money falls. The reason we pay more for things to-day than formerly is that money is worth less. It is cheaper. That is, it takes more money to buy anything of material value.

"Now, if money is cheaper, then the insurance is of less value, because it is payable in money. The question follows: 'If money is cheaper, why should the annual premium required to secure a given amount of it at death increase?' There is actually no economic reason why the annual premium should increase. If the indemnity is worth less, the premium is worth less—the two are in a certain relation approximately fixed. If the insuring company promised to pay the claim in wheat it would be natural to-day to look for a rise in the price of insurance, and then there would be a rise.

"In other words, the argument that insurance is going at a bargain to-day is mere advertising camouflage."

Cheaper Insurance.

In a later number another writer takes issue with him in the very succinct statement: "Your issue of February the 6th contains a clever letter to the effect that since money is at present cheap, insurance should be sold at lower rates. The chief reply to this fallacious contention is that only an infinitesimal portion of the insurance which is sold to-day will be paid in the near future. If his stand were sound, it would afford an argument for placing the reserve calculations upon four or five per cent."

Writer No. 1 then makes an able reply, but ignores the point brought forward by the second writer. He does right, however, in laying stress on the fact that the cost of insurance, that is the cost of protection, has actually advanced for the individual owing to the rise in the cost of living, for that individual needs more protection, more insurance than formerly to protect his family and enable them to purchase the same necessities of life that a less amount of insurance would have purchased years ago.

Now, admitting without question this contention of the rise in the cost of protection, let us come back to our real subject matter—the effect the high cost of living may have upon the premium rates for life insurance. It seems that both writers do not reach the point fully.

Upon what factors are premium rates based? Mortality, interest, loading. While the greater mortality experienced by life companies in the last few years may well affect premium rates, still as it is in no way connected with the high cost of living, we may ignore the mortality factor in this consideration of our subject.

Premium Should not Vary.

From the standpoint of interest. In stating that there is actually no economic reason why the annual premium should vary if money is cheaper because the insurance is payable in that same commodity, money, Writer No. 1 is correct only so long as the relative value of that commodity, money, remains constant between the periods when it is received as a premium and that when it is paid out as a claim. The fact is, indeed, that if money is yearly growing cheaper, that is, interest rates advancing, with the usual concomitant of a rise in prices in the cost of living, the net premium can be actually lowered, for it will be accumulated at a higher rate of interest to amount to the fixed benefit. But, on the other hand, if money becomes dearer, interest rates fall, and if they fall dangerously near the rate upon which the premiums have been calculated, it may actually be necessary to raise those premiums. Here in essence is the point raised by Writer No. 2—that it is necessary to reserve on a stringent basis because we have no surety as to what the trend of future interest rates may be.

Writer No. 1 states: "My letter was written to show that the premiums need not necessarily be increased—because we are dealing with money only, and not with every-day commodities. The premiums and the face-value of the policy will be affected similarly by any change in the value of gold, so that there is no reason for an increase." Is not the writer here confusing rising prices with high prices, or, rather, overlooking again the transition period through which prices may be passing between the time when the premiums are payable and that when the benefit accrues. Ignoring the mortality element for the purposes of our argument we can say that the fixed net premium has been calculated on the basis of an assumed fixed rate of interest to accumulate to a fixed benefit at the end of a certain period. But as prices rise so do interest rates, and consequently the accumulating premiums no longer bear the same relation to the face value of the policy.

When we say, however, that as prices rise so do interest rates, we do not mean that the rise in interest rates is proportional to the rise in prices. As a matter of fact, the rise in interest rates always lags behind the rise in prices, just as any fall in interest rates always lags behind any fall in prices. But the point is that the rise in prices is always accompanied by a rise in interest rates which affects the accumulation of the premiums which goes to provide for the face value of the policy, and that, consequently, there is a very real fallacy in the statement that "rising prices should have no effect on the cost of insurance because both premium and benefit are measured in the same terms of money."

Cost of Living Affects.

Then as to the loading factor which both writers have ignored. The great business of life insurance is not sold over the counter. Companies that have experimented along that line have proved ignominious failures. Experience has proved that it requires a vast body of salesmen to convince the insuring public of the need for insurance, and these salesmen must be paid. Companies must also have clerical assistance; expert accountants, actuaries, skilled investors, auditors, medical examiners, advertisers, etc., men who must be paid anywhere from a living wage to a high salary figure—men whom the cost of living does affect in the most material way—and the expenses of the company must advance approximately in the proportion that the cost of living affects these men. But the loadings on premiums to meet these expenses were calculated years ago on the much lower scale of living expenses which then existed. Is it any wonder then that any margin in these loadings is being rapidly encroached upon or swept away with the possible necessity of raising the loadings—and consequently the premiums, too? In fact, is it not probably true that it is only the higher interest rates due to the advance in prices freeing more margin in the interest factor to offset the reduced or vanishing margin in the loading factor that has enabled companies so far to keep their premiums at the same moderate rates?

We have then two forces working one against the other, one striving for an increase in the rates, the other for a reduction in those rates. And strange to say, both forces are engendered by the same cause, the increasing cost of living.

WESTERN CONDITIONS SATISFACTORY

In discussing western conditions last week with Mr. C. M. Simpson, president of the Empire Loan Company, Winnipeg, who had just returned from a trip to several Saskatchewan cities, he told *The Monetary Times* that things at the different points visited were most satisfactory. Business in Moose Jaw, Regina and Saskatoon was very brisk, and it was difficult to get a house in any of these cities. Mr. Simpson met two travellers whose headquarters should be at Saskatoon, but who were unable to get a house there, and as an alternative had taken up residence in Prince Albert.

Very early spring weather has opened up in the west and Mr. Simpson everywhere saw farmers on their land, preparing it for the seed, and in some instances saw seeders already at work. This is unusually early, good rains having fallen and the ground is in ideal shape to receive the seed. Increased production in the West this year is expected to be very great.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

BANK INTEREST

Reserve and Exact Interest or Discount Not to Exceed Seven Per Cent.

BY M. L. HAYWARD, B.C.L.

Section 91 of the Bank Act of Canada provides that "the bank may stipulate for, take, reserve, and exact any rate of interest or discount, not exceeding seven per centum per annum, and may receive and take in advance, any such rate, but no higher rate of interest shall be recoverable by the bank."

Cases frequently arise, however, where a bank attempts to "stipulate for, take, reserve or exact" a higher rate, and important questions then arise as to the rights of the parties under such circumstances.

In this connection it is also provided by the Interest Act of Canada that where no rate of interest is fixed by the agreement of the parties or by law the rate shall be five per cent.

Exceeding Seven Per Cent.

If a bank stipulates for a rate in excess of seven per cent., the interest, of course, cannot be collected, but the question then arises, what rate of interest, if any, can the bank recover?

Can the bank, in such a case, recover the seven per cent. which they are allowed to receive, or only the five per cent. allowed where no rate of interest is fixed, or, by stipulating for a rate in excess of that allowed by law is the bank prevented from recovering any interest at all?

In the case of McHugh vs. the Union Bank, an Alberta case, which went on appeal to the privy council, the bank contended that it was entitled to interest at seven per cent., while the customer claimed that the bank could only collect the five per cent., and the privy council decided that five per cent. was the correct rate.

Contention Right.

"We are of opinion," said the court, "that the contention on behalf of the customer in this respect is right, and that the interest must be calculated at the rate of five per cent. per annum."

In this case, the customer admitted the bank was entitled to charge interest at the rate of five per cent. and did not contend that the bank would not be entitled to interest at all, and merely argued that the bank could not collect the seven per cent. allowed by the Bank Act. The privy council was not, therefore, called upon to decide whether, under such circumstances, the bank would or would not be entitled to interest at all.

Interest or Not.

In the case of the Standard Bank of Canada vs. the Alberta Engineering Company, the supreme court of Alberta was called upon to decide whether the bank under such circumstances would be entitled to interest at five per cent. or whether they would not be entitled to interest at all, and the decision of the court was that interest at the legal rate of five per cent. could be collected by the bank.

The same point arose in the case of Merchants Bank vs. Bush, recently decided by the supreme court of British Columbia, and in that case Bush entered into an agreement with the bank guaranteeing that a certain company, a customer of the bank, would pay the bank all money due or which might become due by the customer to the bank, and all interest which the bank might charge the customer on advances or discounts, with a provision that Bush's liability should not exceed $3,000.

Exceeded Rate.

In dealing with the customer, the bank charged interest at the rate of eight per cent., contrary to section 91 of the bank act, and then when the bank attempted to collect from Bush the latter set up the defense that when the bank violated section 91, and charged a higher rate of interest than allowed, that released the surety, Bush, from his guarantee.

The Chief Justice of British Columbia, before whom the case was tried, held that the unauthorized interest released the surety, and on appeal, two judges of the British Columbia court of appeal took the same view.

"Inasmuch as an undertaking by the customer to pay eight per cent. was not one authorized by the bank act," said one of these judges, "therefore Bush's guarantee did not extend so as to include such a contract, the customer having undertaken to pay eight per cent. interest to the bank upon an advance at a rate the bank was not by law entitled to impose. In other words the bank, having entered into an unauthorized contract with the company, Bush's guarantee would not extent to or include such an arrangement."

Did Not Render Surety Void.

On the other hand the other two judges of the court held that the unauthorized interest did not render the surety agreement void, but that the bank could only recover interest at the legal rate of five per cent., and that Bush was liable for whatever amount could be legally collected up to the limit of $3,000 named in the guarantee.

"Shortly stated," said Judge Macdonald, "Bush's contract with the bank was to pay, if the customer did not pay, debts incurred by the customer to the bank up to $3,000. The fact that some of the alleged debts consisted of overcharges, which were not collectible, could not invalidate the contract of suretyship. The fact that more was claimed than could be substantiated would not prejudice the surety, because he could only be compelled to make good what the customer really owed up to the sum of $3,000."

The court being equally divided, two to two, the former decision that the surety was released, was upheld, but in view of the difference of opinion in the British Columbia court of appeal, the case, if carried to the supreme court of Canada on appeal, would be followed with considerable interest in banking circles, as it would settle a very important point.

ALCOHOL FROM CELLULOSE

There was delivered before the Niagara Falls Board of Trade on March 26th, an address by Mr. G. H. Tomlinson, B.A., on the subject of the production of alcohol from cellulose, which was of outstanding interest. This is the fifth of a series of similar addresses by local chemists before this board.

LARGE INCREASES IN STAMP BILL

An expenditure of $23,174,601 for postage stamps during the fiscal year ended March 31, 1917, is recorded in the annual report of the post office department, which was tabled in the House at Ottawa on March 27th. This expenditure is more than three times as large as that of a similar period in 1907, and $1,719,424 greater than a year ago. On March 31, 1907, the issue of postage stamps was valued at $7,576,748. The increase in ten years amounts to $15,597,853.

Statistics with regard to the number of dead letters originating in the Dominion are furnished by the report. It is shown that a total of 214,450 letters belonging to this class were returned by the British post office during 1917. The United States post office returned 188,281 letters, and other British colonies and foreign countries 14,131. This makes a total of 416,762 letters returned from outside the Dominion. It is exclusive of registered letters which come into this class.

COAL IMPORTATION VARIES

Fluctuations in Canada's importation of coal used in industries are shown by the report of the minister of customs for the fiscal year 1917. The importations of anthracite, on the other hand, show a fairly steady advance. The figures do not, however, include the undoubtedly abnormal imports since the end of March, 1917. The statistics are as follows:—

Anthracite Coal:

Year.	Tons	Value.
1913	4,237,310	$20,399,279
1914	4,385,709	20,734,126
1915	4,383.407	20.927,539
1916	4,429,143	20,460,571
1917	4,572,440	22,806,156

Bituminous:

1913	11,060,910	20,447,587
1914	13,754,244	26,140,676
1915	9,124,499	16,135,920
1916	9,631,101	10,219,206
1917	12,931,075	19,270,270

DIVIDENDS AND NOTICES

NOVA SCOTIA STEEL AND COAL COMPANY, LIMITED

DIVIDEND NOTICE

A Dividend of Two per Cent on the Preferred Shares of the Company for the quarter ending March 30th, 1918, has been declared, payable April 15th, 1918, to shareholders of record of March 30th, 1918.

By Order of the Directors.
THOMAS GREEN,
Cashier.

New Glasgow, Nova Scotia, March 16th, 1918.

By order of the Board
SAMUEL D. FOWLER,
Secretary.

Toronto, 30th March, 1918.

DOMINION TEXTILE COMPANY, LIMITED

NOTICE OF DIVIDEND

A dividend of one and three-quarters per cent. (1¾%) on the Preferred Stock of the DOMINION TEXTILE COMPANY, LIMITED, has been declared for the quarter ending 31st MARCH, 1918, payable APRIL 15th, to shareholders of record March 31st, 1918.

By order of the Board.
JAS. H. WEBB,
Secretary-Treasurer.

Montreal, March 4th, 1918.

A decided lessening of activity in the building trade throughout the Dominion is indicated in reports to the Labor Department for February. Returns from 35 cities for February indicate that employment decreased over 42 per cent., as compared with January, and over 46 per cent. as compared with February, 1917. There was great activity in most other lines of employment, more particularly in the shipbuilding yards.

In our issue of last week, we stated that the Montreal Agencies, Limited, of Montreal, had been appointed General Agents for Canada, for the Queensland Insurance Company of Sidney, Australia. The Queensland Insurance Company intend to write fire and marine business in Canada. It is only proper to state here that the Montreal Agencies, Limited, are being appointed as general agents for Canada for the fire business only.

THE FIFTEENTH ANNUAL REPORT OF THE DIRECTORS OF

The Great-West Permanent Loan Company

HEAD OFFICE, - - - - - - WINNIPEG, MAN.

To the Shareholders:

Your Directors have pleasure in presenting for your consideration their Fifteenth Annual Report of the Company's affairs as well as the Financial Statement for the year ended December 31st, 1917, duly certified by the Auditors of the Company.

The chief item among the Assets is that of Mortgages on Real Estate and Properties acquired by foreclosure amounting to $5,956,549.48. The mortgages are upon an improved Real Estate in Western Canada and yield a profitable rate of interest. Stocks and Bonds owned by the Company amounted to $165,507.60, or practically the same as last year. Included in this amount is the first instalment of $25,000.00 paid on account of the $250,000.00 subscription to the Victory Loan. Since December 31st there has been paid another $75,000.00 on this account.

Head Office Building and Site, stood at $327,504.16, about the same as the previous year. The interest in the Head Office premises held by the Imperial Canadian Trust Company and owing the Company remains the same. The next item of importance is that of cash on hand and on Deposit which was $301,983.87, a small increase over 1916 figures. As usual, the Company maintained large cash reserves throughout the entire year.

No change has taken place with regard to the Subscribed Capital with but a small increase in the paid-up capital, which now stands at $2,412,566.31, leaving about $14,000.00 unpaid. Debentures amounted to $1,537,849.80. It is very gratifying that our Debentures showed a gain over last year, as with the Old Country field closed temporarily so far as increasing our aggregate debenture holdings there and with the several large war issues floated by the Dominion Government in 1917, the year just closed was anything but favorable for making large increases in debenture sales. This was the general experience of all our Mortgage companies during 1917.

It is a matter for congratulation that our maturing sterling as well as Currency Debentures were so well renewed in the past year, in view of the many attractive investments, particularly Government Issues, which have been placed on the market, and to which such wide publicity and extensive advertising have been given. It is only additional evidence that loan company debentures are held in high regard by the investing public. With the valuable organization possessed by the Company, your Directors have reason to believe that with the requisite amount of effort put forth this year, our debenture sales will materially increase and show a substantial gain over the preceding year.

The Company's Profits for the year—after the deduction of all management expenses, and providing for interest and all other charges, were $206,370.77, or slightly under $1,900.00 less than the previous year. From the various reports of our leading Mortgage Corporations, which have come to hand, it has been noted that the profits for 1917 were, for the most part, considerably less than for the preceding twelve months. The high rate paid for borrowed money, large cash reserves maintained, inactivity in the loaning department due to the temporary decreased demands for good loans, were some of the chief reasons for a reduction in earnings last year among our Mortgage Companies.

After careful consideration of the existing conditions which may rightly be termed War Conditions, your Directors deemed it sound business, and in the best interests of the Company to reduce the dividend rate, and, accordingly, instead of paying the usual rate of 8 or 9%, two half-yearly dividends at the rate of 5% per annum, were paid. This enabled the Company to carry over a much larger amount of surplus profits than usual and therefore strengthened the financial position of the Company.

After paying all expenses, providing for interest and other charges, as well as dividends amounting to $120,366.61, and writing off the sum of $31,087.37, representing depreciation in Bank stock held by the Company, there remained to the credit of Profit and Loss Account $70,660.80.

With the view of providing for any possible depreciation in the Company's securities which might occur as a result of disturbed business conditions arising out of the war, your Directors decided to create a Contingent Reserve Fund, and accordingly set aside for this purpose $150,000.00 by carrying $70,660.80 from Profit and Loss Account and transferring from the General Reserve Fund the sum of $79,339.20. This leaves $606,562.82 at the credit of the Reserve Fund, and the combined total of the Reserve and Contingent Reserve amounting to $756,562.82 is equal to 31.36% of the Company's paid-up Capital.

Referring in a general way to conditions which prevailed last year, throughout the Dominion, it may safely be said there was quite a decided improvement, and this was due in a large measure to industrial activity stimulated by huge war orders; employment of both skilled and unskilled labor on a large scale, bountiful crops with record prices, and a ready market for all manufactured and agricultural products. As a marked example of the rapid transformation in the business and financial position of Canada during the last five years, it is only necessary to refer to the figures representing the public borrowings of the Dominion. In the year 1913, which was the record year up to that date, Canada's borrowings amounted to about $374,000,000.00, of which amount Canadian investors absorbed about 12%, United States 13½% and the remaining capital, amounting to 74½%, or $277,000,000.00, was secured from British investors. After the outbreak of the war it soon became evident that Canada's supply of capital from Great Britain would be greatly curtailed and possibly entirely cut off, and it would therefore be necessary for our Country to look to other sources for borrowed capital. Naturally attention was directed to the United States, our next best customer as a purchaser of our securities. It is interesting to record that the United States did respond even more readily than was anticipated, but with the advent of that Country into the war, conditions changed, and Canada was finally thrown upon her own resources and obliged to finance her own undertakings.

How well, and how quickly and with eagerness this country met the new and changed order of things is clearly reflected in the unprecedented total of Bond Issues in Canada in 1917, amounting to $725,325,000, as compared with $316,917,362 in 1916, $341,892,871 in 1915, and $272,935,067 in 1914. Of the record total borrowings in 1917, it is of especial note that the Government portion amounted to $676,000,000, due to the several issues of war bonds. It is of further interest to know that Canadian investors subscribed the large sum of $564,000,000, or in other words, about twelve times the amount subscribed in Canada in either of the years 1913 and 1914.

With the expenditure of these large sums of money in the Dominion, the effect on general conditions throughout the country is seen in the evident prosperity reflected in practically every branch of our industrial and commercial life. Bank clearings, export trade and agricultural returns, for instance, broke all previous records.

All these indications point to a return of prosperity to our country and with the vigorous campaign inaugurated for increased agricultural production, with the prevailing high prices, there is every reason why we should all look forward to a continuance of this prosperity even during the period of the world war. As to the period following the war, little apprehension need be felt as to the future of this great and growing Dominion.

Making due allowance for the temporary inactivity in Mortgage loan operations, this Company experienced a reasonably good year and your Directors are hopeful that the present year will witness a general improvement in all lines of business, and if their hopes are realized, it cannot but have a beneficial influence on the progress and development of this Company.

Your Directors again wish to record their hearty appreciation of the loyal support of the Shareholders, and the efficient services rendered by the officers and the staff during the past year.

At a subsequent meeting of the new Board of Directors, W. T. Alexander was elected President; J. G. Hargrave, Vice-President.

STATEMENT OF ASSETS AND LIABILITIES AT DECEMBER 31st, 1917.

Transferred to Contingent Reserve Fund, 1917		$150,000.00

AUDITORS' REPORT.

To the Shareholders:

We beg to report that we have audited the books and accounts of The Great West Permanent Loan Company for the year ending December 31st, 1917, and have found them properly stated and sufficiently vouched; we have also verified the mortgages and other securities, which we have found to be in order.

In our opinion the above Balance Sheet presents a correct view of the state of the Company's affairs as at December 31st, 1917, according to the best of our information and the explanations given us, and as shown by the books of the Company.

(Signed) D. A. PENDER, SLASOR & CO., C.A.,
Auditors.

Winnipeg, Man., March 12th, 1918.

THE BANK OF HAMILTON

The annual report of the Bank of Hamilton, covering fifteen months, ending February 28th, shows profits of $598,522, which represents 19.95 on the capital stock of $3,000,000. These earnings reported, however, do not include war taxes on circulation, patriotic contributions and pension fund assessments.

In the past fifteen months of its existence the bank has manifested undoubted evidence of its strength. Its deposits increased to $53,359,000 from $50,563,000 at the end of 1916 and $41,688,000 at the end of 1915. The quick assets, which include $6,024,000 of Dominion notes, $901,000 of current coin, and $2,300,000 in the central gold reserves, amounted to $29,616,666. General discounts on February 28th stood at 1916, and $28,119,000 in 1915. The total assets at the end of last month were $66,541,000 against $57,163,000 in 1916, and $48,254,000 in 1915.

EDMONTON WATERWORKS DEPARTMENT

City Commissioner A. G. Harrison, of the city of Edmonton, advises that the waterworks department of that city shows a large surplus for 1917.

The financial statement and balance sheet and the net result of the year's operation and management for the waterworks department for the year ending December 31st, 1917, show that after all expenditures have been met, including debenture interest, sinking fund, depreciation and bank interest, as well as maintenance and operation charges, there is a surplus of $38,189.75. This is the best showing this department has made in the history of the city.

For the year 1916 the surplus was $24,410.04. The total revenue of the department for the twelve months ending December 31st, 1917, was $368,868.15. The total expenditure was $330,678.40. The operation charges amounted to $160,920.72. The maintenance charges amounted to $22,986.42. The capital charges, including depreciation, were $146,771.26. Total mileage of mains under pressure in the system, 164.8 miles. Total cost of watermain maintenance for the year, $6,346.95, making the average cost of maintenance per mile, $38.70. During the year 168 new water services were installed and 132 house sewer services. Total number of house sewer services to date, 9,602. Total number of water services, 10,829. Average cost of maintenance per water service, 73 cents.

During the year a normal domestic pressure averaging fifty pounds per square inch has been maintained throughout the system on both sides of the river, above the hill, while the pressure on the flats has averaged one hundred and ten pounds per square inch.

The fire department has been enabled by means of its own equipment to boost the water pressure for fire fighting when and where necessary during the past year. This eliminates the necessity of boosting the pressure over the entire system of one hundred and sixty-four miles of mains and protects the entire system as well as the high duty pumps at the pumping station against unnecessary strain.

The growth of the system has been remarkable during the last ten years. In 1908 the city had installed 2,520 water services, 200 hydrants and 48.8 miles of watermains. The revenue that year was $49,633.67. In 1917 the number of water services was 10,829, fire hydrants 797, miles of water mains 164.8. The revenue was $368,868.15. The number of water meters in use in the city is 7,700. Average cost of maintenance per meter is 96½ cents. Since the installation of meters a great saving has been effected in the amount of water pumped.

Superintendent J. W. Turner and his staff are to be congratulated on the showing made, which is more remarkable owing to the world-wide adverse conditions as regards cost of labor and material.

The service given has been constant throughout the whole period, and by regular daily tests the water supply is shown to be free from all contamination. One pound of liquid chlorine per million gallons was used to sterilize the water and that was all that was found necessary and proved to be far more economical than the old hypochloride of lime system.

The branch of the Royal Bank of Canada at College and Yonge Streets, Toronto, is now located in their new premises two doors north of College Street.

*Note.—It will be noted that the figures relating to the imports and exports of coin and bullion for the twelve months ending Feb., were: imports 1916, $34,175,614; 1917, $26,979,553; 1918, $13,309,561: and exports 1916, $125,173,639; 1917, $196,510,395 1918, $3,560,234. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

MONTREAL STOCK EXCHANGE

Every Investor

should send for this Book

¶ Every Victory Bond owner—every investor, large or small—anyone who is interested in the investment of money in securities, should send for this book. It is being distributed free of charge by the Montreal Stock Exchange for the purpose of assisting and protecting the public in the investment of their savings.

¶ This book clearly defines the different classes of securities, and shows how the payment of principal and interest is secured. It shows the broadness of the market and why securities can be converted into cash when required. It tells of the methods and advantages of listing securities. Explains the functions of speculation, pointing out its value and its abuses.

¶ It describes the functions of the Montreal Stock Exchange, the facilities it offers, and the service rendered to the public by its members.

¶ It details the methods of how business is done between client and broker.

¶ It is a book of inestimable value to every investor—to anyone who is desirous of investing savings, either large or small amounts, in securities.

The edition is limited, so write to-day to the Secretary of the Montreal Stock Exchange, Room 437, Stock Exchange Building, Montreal, to make sure of securing your copy.

Montreal Stock Exchange

BANK CLEARINGS

The following are the bank clearings for the weeks ending March 28th, 1917, and March 29th, 1918, respectively, with changes:—

	Week ended Mar. 29, '18.	Week ended Mar. 28, '17.	Changes.
Montreal	$ 68,328,775	$ 67,001,825	+ $ 1,326,950
Toronto	61,881,479	49,102,167	+ 12,779,312
Winnipeg	42,286,284	39,552,308	+ 2,733,976
Vancouver	9,123,383	6,241,856	+ 2,881,527
Ottawa	4,835,864	4,319,258	+ 516,606
Calgary	6,039.307	5,463,782	+ 575,525
Hamilton	4,917,030	3,965,061	+ 951,969
Quebec	3,593,815	3,667,333	— 73,518
Edmonton	3,101,872	2,270,470	+ 831,402
Halifax	2,997,637	1,918,199	+ 1,079,438
London	2,035,770	1,812,655	+ 223,115
Regina	2,962,825	2,612,847	+ 349,978
St. John	2,030,678	1,995,298	+ 35,380
Victoria	1,697,118	1,420,490	+ 276,628
Saskatoon	1,688,994	1,640,484	+ 48,510
Moose Jaw	1,100,706	1,101,300	— 594
Brandon	562,302	441,035	+ 121,267
Brantford	1,020,542	667,713	+ 352,829
Fort William	519,320	398,510	+ 120,810
Lethbridge	977,532	698,101	+ 279,431
Medicine Hat	493,025	528,946	— 35,921
New Westminster	378,959	235,521	+ 143,438
Peterboro'	572,787	468,790	+ 103,997
Sherbrooke	842,762	891,835	— 49,073
Kitchener	527,085	494,610	+ 32,475
Totals	$224,515,851	$198,910,394	+ $26,764,563

The Toronto bank clearings for March are $246,559,204, compared with $231,728,865 for the same month in 1917, and $186,521,542 in March, 1916.

The Toronto bank clearings for the current week are $50,990,000, compared with $53,548,356 for the same week in 1917, and $46,958,734 in 1916.

NOVA SCOTIA FINANCES

Premier Murray, of Nova Scotia, has sold $50,000 ten-year 6 per cent. bonds to a syndicate composed of Wood, Gundy and Company, Dominion Securities Corporation, Eastern Securities Corporation and J. C. Mackintosh and Company, at 98, the bonds being dated April 1st, 1918. The premier has also placed $250,000 ten-year bonds at the same price with the Workmen's Compensation Board of Nova Scotia. These sales are in addition to the $1,000,000 issue sold last week to a syndicate composed of the Maritime Trust Corporation, of Halifax, and the Halifax Relief Commission. The Halifax Relief Commission have taken $750,000 worth of these bonds, the other quarter million being offered to the investing public by the Standard Bond Corporation, the bond department of the Maritime Trust Corporation.

Nova Scotia's chief financial requirements during the coming year, which are provided for by the above-mentioned sales, are as follows:—

Retirement of bank advances, $427,910; retunding, $248,500; last year's deficit, $239,912; farm settlements, $65,000; culverts, $45,000; Nova Scotia Sanatorium, $25,000; total, $1,051,322.

The refunding is of six issues made in 1888 and maturing this year. The amounts of the issues were $80,000, $78,000, $25,000, $20,000, $7,500 and $38,000. The first four issues were at 4½ per cent. and the last two at 4 per cent.

The debenture liabilities of the province amount to $13,362,706, of which $1,492,500 are payable at Halifax, $10,370,206 payable in London and $1,500,000 payable in Halifax and New York. The current liabilities amount to $547,529, of which $507,910 is due to banks in Halifax and $39,618 due to Dominion aid to agriculture. The total liabilities are $13,910,236 and the assets are as follow: Provincial department account at Ottawa, $1,055,929; Halifax and South Western Railway, $4,447,000; sinking fund and accrued interest, $586,517; current assets, $6,401,334; property assets, $5,435,000; lands and mines, $21,750,000.

THE CONTINENTAL LIFE INSURANCE CO.
TORONTO, ONTARIO

Here is Your Opportunity

The success which has attended the operations of the North American Life throughout its history has made association with the Company particularly inviting.

The year 1918 promises to be bigger and better than any heretofore. Some agency openings offer you an opportunity at this time.

Correspond with
E. J. HARVEY, Supervisor of Agencies.

North American Life Assurance Co.
"SOLID AS THE CONTINENT"
HEAD OFFICE - TORONTO, CANADA

"Representing The Mutual Life of Canada"

Efficient representatives of our Company will be found in every important centre in the Dominion and in the Island of Newfoundland. Their motto is "Service" and they will gladly furnish any needed information regarding Life Insurance in general and Mutual Life Insurance in particular. The Company issues policies on every approved plan—including Endowment Policies, Monthly Income Policies, and Policies designed for the protection of Business Enterprises. It has been the aim of the Mutual Life of Canada to introduce into its contracts every modern privilege that is compatible with safety, but the distinguishing feature of the Company is Mutuality. Under this system all profit from whatever source reverts to the Policyholders and so reduces the cost of protection. We furnish—
The largest amount of protection for the least possible outlay.

The Mutual Life Assurance Co. of Canada
Waterloo Ontario
Assets $32,165,432 Assurances $123,510,899

TO THE YOUNGER GENERATION

LIFE INSURANCE should appeal with peculiar force—for the reason that a Life Policy is the only investment in which the young have a decided advantage over their elders. Not only in the considerably lower cost—but in the greater immunity from ill health and other causes that prevent insurance—there is a strong argument for arranging this urgent matter of protection early in life.

The Great-West Life issues policies specially attractive to young persons. Premiums may be paid annually or otherwise, to suit the applicant.

Rates on request.

The Great-West Life Assurance Co.
DEPT. "F"
HEAD OFFICE : WINNIPEG

ALWAYS A PLACE FOR DEPENDABLE AGENTS

Those who can not only write applications but deliver policies, and are energetic in their methods. Good positions are ready for such men.

BANKERS LEAVE MONTREAL FOR CUBA

An official party from the Royal Bank of Canada left Montreal on April 3rd, en route for Havana, Cuba. The party was made up of Sir Herbert Holt, president, and three other members of the board of directors, Messrs. A. J. Brown, K.C., C. E. Neill, and C. H. Duggan. Mr. Neill, general manager as well as a director of the bank, left for New York on April 2nd. The other members of the party left on April 3rd.

A visit by some of the officers and directors of the bank to the bank's southern territory is usually an annual event. From Havana the party will this year make trips to other important points in the Royal's branch system on the island. They will be away in all about three weeks.

APRIL DIVIDENDS

NOVA SCOTIA TRUST COMPANY

The annual report of the Nova Scotia Trust Company, Halifax, of which Hon. C. T. Daniels is president, shows that for the fiscal year ended February 28th, 1918, the net profits after allowing for all disbursements were $15,173, which with the balance from the previous year of $28,683 made a total profit and loss account of $43,856. Out of this dividends amounting to $11,345 were paid, leaving a balance of $32,510 to carry forward. The paid up capital is $197,984. The total assets amount to $230,495, of which $27,149 is cash. The company's dividend rate is 6 per cent.

WEYBURN SECURITY BANK

Founded in 1911, the Weyburn Security Bank has continued to confine its operations to the province of Saskatchewan, where it has 19 branches.

Net profits for 1917 amounted to $74,279.86, or almost 20 per cent. on its paid-up capital. This is slightly less than 1916 when they amounted to $82,149, but with the improvement in general business conditions which is quite general throughout the West, it is safe to assume that this year's operations will more than catch up the decrease in this regard. To the reserve fund was transferred $25,000. Dividends paid amounted to $19,266, being at the rate of 5 per cent. per annum. The bank's holdings of Dominion and provincial government securities amount to $561,250, while its holdings of Canadian municipal securities and British, foreign and colonial public securities other than Canadian, stand at $444,733.50.

The present general manager, Mr. H. O. Powell, has been at the helm since the bank opened its doors for business. Under his management, combined with a board of directors well and favorably known in the districts in which the bank operates, it may be taken for granted that the affairs of the institution are in good hands.

MONEY MARKETS

March 21	788,200	719,100	+ 69,100
March 31	1,248,700	1,146.800	+ 101,900

EASTERN CAR COMPANY

The annual meeting of the Eastern Car Company was held last week at New Glasgow, N.S. Those present were Colonel Thomas Cantley, Frank H. Crockard, N. B. McKelvie, J. C. McGregor, J. W. Allison, F. Stanfield, J. H. McGregor, Archbibald McColl, Capt. Colin Fraser, Donald C. St. Clair, R. A. Chambers, W. D. Ross, J. K. Stewart and P. A. McGregor.

The president, Colonel Cantley, said that the company had started the year 1917 with a deficit of $103,000, but that this had all been wiped out with the exception of $19,000.

The French cars have all been finished and shipped. Of the Russian cars 2,400 without brakes have been completed, the bulk of them being held at a Canadian point. Payments on them are so far all in order and no trouble is anticipated regarding the balance of payments due, as satisfactory arrangements have been made. Work has been suspended on the 600 Russian cars with brakes, but a satisfactory settlement is expected in a short time.

The Russian contract has been profitable but the French contract was not. Both accounts are practically closed now, however. The company is now building 1,000 Canadian government 40-ton box cars and recently received orders from the Canadian government railways for 650 general service cars and 750 flat cars. No work has as yet been done on the general service or flat cars.

The orders received are practically enough to keep the plant employed for the first three quarters of this year. Barring unforeseen troubles, the company by the end of October will have wiped out its indebtedness to the Nova Scotia Steel and Coal Company and to the banks and will have a credit balance. Large amounts of material on hand will have been worked up and sold by that time. The present contracts incur no liability to the Nova Scotia Steel and Coal Company or to the banks, as payments on cars from time to time will enable the company to pay for all required material and labor.

The present officers and directors of the company were all re-elected.

The Hon. R. M. MacGregor, son of the Hon. J. D. MacGregor, has been elected vice-president and charter member of the directorate of the Nova Scotia Steel and Coal Company. Mr. R. M. MacGregor's father held that position before his death.

Conscription of Wealth

Our National Obligations Can Only Be Discharged By the Creation of Wealth—No Nation Can Tax Itself Into Prosperity—Taxation Policies of the Dominion Call for Careful Revision and Adaptation to Peace Conditions—Capital Will Not Be Sought if Only Reward is Its Confiscation—Taxation Must Not Go so Far As to Injure Economic Enterprise.

IT is clear that the end of the Great War will bring with it a radical re-formulation of fiscal policies and a far-reaching programme of taxation reform everywhere throughout the world. This is patent when one realizes how great a burden has been laid upon the productive process by imposts of one kind and another, including income taxes and excess profits taxation. It is absurd to suppose that industry and commerce can carry, in the days of peace, the heavy burdens imposed by war. And yet it is equally true that the huge war debts, both principal and interest, must be provided for, and that, therefore, taxation, with respect to the sum total of revenues required, at least, cannot well be diminished in its amount or scope. Nevertheless, the taxation policies of both Canada and the United States will need careful revision and adaptation to peace conditions, if the production of wealth, through which alone revenues can be secured, is to be pursued with vigor.

There is an old French saying that "virtue is apt to be more dangerous than vice, because not subject to the restraint of conscience." This aphorism is trebly true today. In an excess of virtue the visionaries and theorists propose to make use of the present war situation to advance schemes of social reform. They have seized upon the war as a pretext for advancing their plans for the promotion of economic equality—an equality which would reduce the incomes of the various classes to a dead level. Their proposals are mainly advanced under the specious guise of "conscription of capital as well as conscription of men." On the surface, this demand looks reasonable enough. When one attempts, however, to analyze carefully what is involved in this programme, one soon realizes that there are formidable difficulties involved in the plan. And not the least of these difficulties is the clear comprehension of the meaning of the term, "conscription of wealth." This phrase was ever on the lips of radicals during the flotation of the last Victory Loan. When requested to formulate clearly what was implied in the shibboleth, no answer was vouchsafed, save a foggy expression of the idea that wealth should carry a burden relatively equivalent to that involved by the sacrifices of the masses who had devoted their children to the winning of the war.

As is well known, a similar demand was made in the United States when the Republic threw its resources into the scales for the preservation of freedom and democracy. The clearest and most effective reply that has come to our attention was that made by Mr. Otto H. Kahn, one of the biggest men in the field of American finance. Mr. Kahn, in his pamphlet on "War Taxation," drew attention to the fact that American artisans and farmers were never so well off in the nation's history; that only a small percentage of the former had been drafted for war purposes; that agricultural laborers were deliberately left on the land; and that if any class had been protected since the outbreak of war, beyond another, it was the laboring element in the Republic. In the United Kingdom, in the United States and in Canada, the well-to-do came forward eagerly upon the declaration of hostilities; and, in proportion to their numbers, played their part with no less sacrifice and devotion than was shown by other elements in the community. On the side of sacrifice of life, therefore, there is absolutely no ground for building up an argument in behalf of labor as against the well-to-do, or even the capitalist class.

As already remarked, it has been extremely difficult to give the quietus to the "conscription of wealth" cry, not only because of the appeal to prejudice, but much more because of the indefinite nature of the term itself. Economists waited long for a definite and clear formulation of what was meant by those who advocated the conscription of wealth; and waited in vain, so far as we are aware, until Mr. A. G. Gardiner of the London Daily News, two or three months since, proposed a capital levy, at the conclusion of the war, to an amount large enough to bring the debt burden close to the tax-paying ability of the nation. Thus, it is seen that one of the foremost exponents of the conscription of wealth advocates, not so much a new programme of taxation, as the confiscation of property.

That a man of the ability of Mr. Gardiner, in control of the policy of an organ of international repute, should coolly propose the confiscation of wealth, in the sense of the taking over of private fortunes in great degree by the State, gives pause for serious consideration. Mr. Gardiner would go so far as to confiscate 25 per cent. of fortunes above a fixed minimum; his general argument being that the war and national sacrifice have created in large measure this increment of wealth; and that what has been created by the sacrifice of all should be placed at the service of all. From this point of view confiscation is equivalent to repudiation; for, plainly, those classes in the community which have subscribed so heavily for war bonds will find, under such a programme, that their economic position is weakened in the same measure and degree as though the State had repudiated a part of its obligations.

From the extreme radical standpoint, this scheme may appear to preserve the national credit and to work substantial economic justice. On getting under the surface, however, it will be found no less reprehensible, and scarcely less fatal in its results, than direct repudiation. A capital levy can be secured on all property in only one of two ways: By cash contributions, or by the taking over of physical property, or the securities representing that property. If cash contributions are demanded, the well-to-do and capitalist classes will be forced to borrow from the banks and other lending institutions; for it is scarcely to be expected that liquid capital will be available to the extent required for furnishing several billions to the treasury within a definite point of time. Under these circumstances the liquid capital, so essential for the proper functioning of the nation's industry, will be tied up in long-time, unproductive loans on nondescript property. The result could only bring calamity to the industry and commerce of the United Kingdom.

Nor, as the London Economist so ably demonstrates, would a capital levy on concrete property, on bonds and stocks and other certificates of indebtedness, bring better results. In the first place, a veritable army of government officials would be required to appraise and select property; and in the second place, such property would be worthless to the government, unless sold. Whether disposed of by government officers, or by capitalists themselves, it is perfectly plain that all would be sellers in a falling market, where there would be few buyers. This in itself would break the market, and knock the bottom out of prices of securities and property of all descriptions; the fatal effects of which would be felt all along the line, and especially upon government credit. The difficulties involved in selecting and appraising property would be formidable and almost insurmountable. Consider, for a moment, the extent and variety of stocks and other securities held; the nondescript parcels of real estate; the odds and ends and bizarre accumulations gathered from all corners of the earth. It would be a physical and economic impossibility to work out anything approaching substantial justice, with respect to a capital levy on property, of the nature advocated by Mr. Gardiner.

The simple fact is, that all ideas of conscription or confiscation of wealth must be abandoned, whether in the United Kingdom or upon this continent. The great need of the Western World, and all countries coming within the scope of Western civilization, will be a fund of investment capital at the close of the war. Heavy taxation, that approaches either conscription or confiscation, is equally unthinkable. Capital is not created by any process of legerdemain; but by abstinence, by self-denial and by saving, up to the point of privation. Only by the adoption of the principle of self-sacrifice, and by hard resolution, has the world been able to recover in the centuries gone by from the scourge of war; and for the present generation there is no other way out.

Capital will not be accumulated if the only reward for abstinence is the confiscation of its fruits.

Nevertheless, as every thinking citizen knows, it is of imperative importance to safeguard and protect the credit of the State. To that end industrial forces must be marshalled for the extinguishment, in due time, of the principal of the war debt, and for the taking care of interest payments. This will require in our own country heavy taxation and greater economic effort than ever before. At the end of February of the present year the gross national debt of Canada stood at $1,900,000,000, and the net debt at $1,300,000,000 as compared with $350,000,000 and $650,000,000 respectively, in the year before the outbreak of war. And the end is not yet; still heavier sacrifices must be borne. It goes without saying that the economic power and the potential resources of the Dominion are quite able to stand even this colossal strain, provided that an equitable, just and scientific fiscal policy is pursued by the authorities.

Our national obligations can be discharged by the creation of wealth, and by that method alone. No nation has yet succeeded in taxing itself into prosperity. To secure the fullest returns from our economic equipment, from our factories, mines, railroads and farms, they must be made to pay, and produce a surplus over the costs of operation. It is a futile and foolish policy that would so burden enterprise, in whatever form it takes, as to cause a slowing down of economic effort. This fact must be kept in mind in formulatng any scheme of taxation that will leave the producer little or no return above his cost of production—even including in the cost of production the wages of superintendence. For risk is inevitably associated with the productive process, and must receive its due reward. It is plain as a pikestaff that when taxation is carried up to the point where the producer retains only the costs of production, there is no reward for risk; and where there is no reward for risk, there is no incentive to enterprise, no incentive for introducing new methods, no incentive for throwing on the scrapheap obsolete machinery, and no incentive for saving. Under these conditions the man who has a fund of capital, great or small, may as well invest in mortgages, or tax-free securities wherever they can be found. The pure interest rate never has, and never will, afford incentive for audacity, for enterprise, for risk-taking in business.

This brings us to the root of the whole discussion, and brushes aside many of the sophistries that befog the controversy on the tariff, on income taxes, the tax on the unearned increment, and various other forms of land taxation. The fiscal problem is essentially simple in its formulation, although bristling with difficulties in programme and practice. Revenues for federal, provincial and municipal purposes are required, and will be needed after the war, in amounts greater than ever before: How shall they be secured without killing industry and commerce, and without harming agricultural interests? The problem is clear enough, and evident enough; but the answer exceedingly difficult. One fact, however, stands out above all others—taxation must not proceed to the extent of cutting the nerve of economic enterprise.

Mr. Otto Kahn, in the pamphlet already mentioned, suggests, by way of a partial answer, the imposition of a tax upon expenditures, as a supplement to the various taxes already in use. As Mr. Kahn points out, however, a tax on consumption must not be levied on foods and the necessaries of life. Such a tax would be new to this continent; although we have always had taxes on consumption, indirectly, under the tariff, throughout our history. Nevertheless—and especially during these years of war—there seems abundant justification for the imposition of stamp taxes on all purchases of luxuries,—on pleasure cars, silks and satins, jewelry and all articles that are plainly beyond the scope of "necessaries." It is admitted that it would be difficult to define accurately the articles coming within the term "luxuries"; but at any rate no great obstacles lie in the way. Obviously, tobaccos, snuff, liquors, and so forth, would be exempted, as these are already taxed under the excise duties.

While consumption taxes would be altogether new in Canada and the United States, they have long been used as a fiscal expedient on the European continent. France, indeed, in its municipal taxation, has for many years calculated tax-paying ability on the basis of "conspicuous expenditure." The householder that could afford to make a conspicuous display of wealth, under this theory, could also afford to pay a relatively heavier tax than those living more carefully. The subject is too big to discuss in all its details at the present time; but sufficient has been said to indicate that the tax would involve little or no hardship; would be broad in its base, since it would cover so many expenditures; and that it would, above all, induce saving and divert demand from luxuries to necessities. And in checking extravagance, not the least valuable effects of such a tax would soon be apparent.

INTEREST PAYMENTS ON VICTORY LOAN

Amount of Interest to be Paid June 1st Next Approximately $15,000,000—Fact That Bonds are Largely Held in Canada Facilitates Payment of Interest

BY H. M. P. ECKARDT

(Author of "Manual of Canadian Banking.")

In connection with the Victory Loan there is but one more payment to be made. It is expected that this transaction will be handled without difficulty, as have been the preceding payments. Owing to the large amounts of subscriptions paid in full on January 2nd, the sums to be provided on the succeeding instalment dates were considerably cut down; but on the other hand there were a number of large subscribers who turned in old bonds for conversion and who have been meeting their payments, as they came due, out of proceeds of the converted bonds. These parties, in numerous instances, will require to find cash to meet the May instalments, and possibly there may be a more active demand for loans on that account. Thus in the course of another few weeks the financial markets will have finished the great task of providing the national government with $400,000,000 of new money for war purposes. Then a month later, on June 1st, occurs the first distribution of interest to the holders of the bonds. This interest distribution will be the most important transaction of this kind which Canada has so far experienced.

Conversion of Holdings.

As there are no details yet available regarding the amount of old bonds converted, it is not possible to give the amount of the pending distribution. However, there were outstanding $350,000,000 of bonds belonging to the first, second and third war loans; and it appears probable that from $150,000,000 to $200,000,000 of these outstanding bonds were turned in. The article on life insurance companies' investments in the war loans recently published by *The Monetary Times*, indicated that in not a few cases the large companies converted all or nearly all of their holdings; and it is understood that the industrial companies, brokers, bond dealers, municipalities, trust companies, and large individual holders generally followed the same policy. The inducement to convert was stronger than on any of the preceding occasions. Net return on the Victory bonds, as offered to subscribers, was higher than on the earlier loans, and in case of the Victory bonds the nominal rate, as printed on the coupons, is 5½ per cent., as against 5 per cent. specified in the first, second and third loans. If it be assumed that $200,000,000 of old bonds were converted, that would make a total Victory loan issue of $600,000,000 with annual interest charge of $33,000,000; and if the conversions be taken as $150,000,000, the yearly interest would be $30,250,000. So it will be seen that even with the lower of the two estimates re conversion, the amount of interest payable on June 1st, will be approximately $15,000,000. No other single interest or dividend payment made by the Dominion government or any Canadian corporation approaches this amount. The nearest approach to it is seen in the Canadian Pacific common stock dividend which calls for $26,000,000 in four quarterly payments of $6,500,000 each. In case of Canadian Pacific Railway's distribution the greater part must be remitted to other countries.

Canadian Pacific Railway Securities.

Prior to the war something like two-thirds of the Canadian Pacific's common stock rested in Europe, mostly in the British Isles. Thus it was necessary to remit, roundly, $17,000,000 yearly to the European holders, this outgo being in addition to a large proportion of the preferred stock dividends which amounted to a little over $3,000,000 per year, and the charges on the consolidated debenture stock, amounting to $7,000,000 per year. Early in the war the British government shipped a considerable part of the British holdings of these Canadian Pacific Railway securities to New York, to serve as collateral to British loans there, and it may conceivably be the case that the arrangements made with the American bankers provided for remittance of the interest and dividends on these securities to New York instead of to London. If any such arrangement was made, it would not likely have a sensational effect on our exchange relations with the United States—since any large purchases here of sterling exchange by the Canadian Pacific Railway for dividend and interest payments due in Europe would probably be covered by the banks in the New York sterling market.

Owing to the fact that the Dominion government's interest payment on the Victory bonds is payable mostly to Canadian investors, the effort of financing the transaction is lessened. There will, of course, be some coupons collected by American holders, and these will involve a certain demand for New York funds; but as the Victory bonds are payable in Canada only, and not optionally in New York, as in the case of the third war loan, the American holders will apparently have to stand the loss in exchange, which will be no small item, if the premium on New York funds still rules well above 1 per cent. when the coupons mature.

Interest on War Debt.

While the payment of interest on the war debt is considerably facilitated by reason of its being held so largely at home, there are some other considerations which deserve to be noticed. In order to enable themselves to finance the successive domestic war loans, and to make large direct advances to the Dominion and British governments for war purposes, the banks have been obliged to adopt a repressive attitude towards the industrial and mercantile customers who ordinarily have the call upon the greater part of the normal increase of bank funds. Customers who have always made good and profitable use of such credits as the banks accorded them, have been held down to small lines and many worthy customers have not been able to secure the credits needed for carrying on their businesses to best advantage. The banks make more profits through furnishing credits to their regular customers, and their position is sounder when their funds are not so largely advanced to one big borrower, even though that borrower be the government; but there has been no choice—duty imperatively called them to the aid of the government, and the business interests of the country were necessarily pushed aside. This indicates one way in which our industry and trade would benefit if it were possible or practicable to obtain a part at least of our national war credits in the United States. We could well afford to send the annual interest abroad if by so doing there was a considerable increase in the volume of funds available here for credits to our merchants, manufacturers, farmers, and others actively engaged in productive work.

NEW PLATE MILL CONTRACT ADVANTAGEOUS

The plate mill contract with the government will benefit the Dominion Steel Corporation as well as the national industry of shipbuilding. It will ensure plates at reasonable cost since the contract price of $4.15 per hundred pounds for the first six months is less than one-third the price actually paid for plates imported from the United States during the last few days. This is the opinion in Montreal. The mill will be completed just within eighteen months at a cost of under five millions, and the capacity will be 100,000 tons annually, or double the government's minimum order.

Mr. C. F. Sise, chairman of the Bell Telephone Company of Canada, died on April 9th.

MORTGAGE LOANING SITUATION

Decrease of $13,000,000 in Loans Since 1914—Repayments and Government Displacements

"Between the close of 1914 and 1916, the first two full war years," said Mr. S. R. Tarr, editor of Canadian Finance, Winnipeg, at the meeting of the Dominion Mortgage and Investment Association at Toronto, on March 25th, "mid-western mortgages on the books of lending corporations (loan, trust and insurance companies) decreased from $276,109,246 to $273,455,031, that is by $2,654,215, or by a little under 1 per cent. During 1917 the decrease was undoubtedly much more pronounced. While nothing approaching complete information will be available for some months, the annual statements of over a dozen of the largest Canadian loaning institutions of all three classes show a drop of about 3½ per cent. in bulk of mortgage investments last year. These figures, of course, relate to all Canada. But the ratio of decrease would probably hold for the west. While repayments were doubtless proportionately larger on the prairies, owing to unprecendented monetary returns from agriculture, there was considerable now lending (as for instance by several Dutch companies) by way of loans in outlying homesteading districts. A 3½ per cent. decrease in 1917 would mean a drop of about $9,500,000, making year-end institutional holdings of mortgages somewhere about $264,000,000. Since 1914, therefore, the wartime falling-off to the end of 1917 has been over $12,000,000, taking into account only institutional lending. Loans through private channels possibly fell off another $1,000,000. Conservative estimating of the present grand total of prairie mortgage loans would bring a figure of something over $285,000,000, city as well as farm, but not including implement company liens, etc., which latter have been pretty thoroughly cut down during the past two years of agricultural prosperity."

Affected by Government Loaning.

"Naturally enough, in view of phenomenal money returns from western crops, the farm mortgage situation has been one of repayment rather than of new loaning during recent months. The Manitoba situation especially has been affected by government loaning at lower rates than market conditions warrant, resulting in the paying off of loans from the companies, and the placing of mortgages with the government instead. As only $620,000 (out of $1,500,000 approved applications) was put out by the Manitoba farm loans board up to the end of 1917, the displacement has not yet been large. Nor is it likely that the total by the end of 1918 will be over one and one-half million dollars. But the after-war effect of this condition upon the supply of loan funds is certain to be deterrent to an extent far beyond the actual amount displaced. Idle company funds are now being diverted into other channels, notably government securities, and there will be much difficulty in attracting them back to compete in a mortgage field where business is done on a basis apart from money market conditions. The danger to the farmer is that, after the war, while the government itself will not be able to supply the volume of funds eventually required, the loan companies will, to a considerable extent, have been scared out.

Below-Cost Government Competition.

"But for such below-cost competition, present and prospective companies (in order to preserve their agency and administrative organizations intact) would prefer to keep funds in the west at lowered rates. As it is, they are seeking other fields. Alberta, recognizing the situation, has announced a decision not to enter the loan field under present conditions, and Saskatchewan has practically halted. Manitoba keeps at it, though it has been able to get less than $200,000 from investors within its own borders for the Farm Loans Association. (The provincial treasurer in an optimistic moment told a meeting of life underwriters that the school children's savings alone throughout the province would make available over a quarter-million dollars for the scheme.) Saskatchewan did better and received subscriptions of something over $750,000 to its greater production loan. With no further local funds immediately in sight and realizing (as Manitoba has failed to do) the absurdity of lending at a lower rate than has to be paid by the government itself, the Saskatchewan Farm Loans Board has been advising applicants that no further loans can be made in the meantime—the 6½ per cent. rate promised being manifestly out of line with market conditions. Manitoba, however, blindly continues putting out money at 6 per cent., a rate originally based on supposed government ability to borrow at 5 per cent., while recent short-term borrowing has cost the province 7¾ per cent.

"Conducted on sound business lines, government mortgage lending to western Canada's farmers might quite well find justification. There were those in the loan company ranks optimistic enough to hope, when the Manitoba Farm Loans Association was first proposed, that this new development in the loaning field would increase the future incoming of capital, as well as tend to lower rates, for the reason that the government's own participation in the business might put an end to legislative tampering with the security underlying mortgage contracts. Loan company representatives on the joint committee of commerce and agriculture joined in its unanimous vote approving of government mortgage lending, if on sound business lines. Conservative lending institutions prefer a lower rate with assured security to a high rate with considerable risk of loss and of costly delays.

"It is but fair to say that real legislative progress was made a year ago in removing some of the disabilities complained of by lenders and borrowers alike. But it is to be feared that any gain to the Manitoba situation in this particular is more than offset by the provincial treasurer's refusal to recognize any change in world-wide monetary conditions, and by the associations continuing to lend to farmers at a rate of 6 per cent., based upon a supposition that money could be obtained at 5 per cent. and that 1 per cent. would more than cover all administration charges. As to administration costs, no definite information was vouchsafed in the meagre interim report given at the recent session of the Manitoba legislature. But it is known that British Columbia incurred an operating loss of over 3 per cent. under its initial government plan of lending to farmers at 6½ per cent. Since reorganization of its system it has been found necessary for that province to raise its rate to 7½ per cent.

Robbing the Future of Needed Funds.

"Given a fair field and wholesome but not destructive competition, lending companies would be able to go on putting out their available funds with advantage to all, when the borrowing demand again begins to increase. But it spells future trouble to the province as a whole for the government to hand out at 6 per cent. to first-comers certain limited funds obtainable at a low rate that bears no relation to ruling interest. It cannot be kept up, unless at a large direct loan to taxpayers, rural as well as urban. The doing of it even temporarily must tend to divert the attention of lenders to the other fields where there is no government competition, or where (as in Alberta and Saskatchewan) it is to bear some relation to actual money market conditions.

Difficulties in Compiling Statistics.

"Any attempt to compile comparative tables relating to mortgage loans in the three prairie provinces is beset by manifold difficulties. The province of Manitoba prints no official detailed figures whatever as to institutional investments. The other two provinces' figures are differently tabulated in various respects. It is surely high time that full and uniform information as to classes of investments and sources from which they come should be given by all provinces. For seven years Canadian finance has endeavored (by getting into communication with government departments and with the loaning companies) to tabulate the mid-west's investments coming through institutional channels. Its best efforts have failed to achieve accuracy, and the results here submitted are only approximate. Some of the difficulties arise from government returns lumping together in some cases all investments—mortgages, real estate holdings, policy loans, stocks, bonds, etc. It would only befog matters to enter into explanations of the adjustments made in arriving at the final figures presented, covering about 400 institutions in all. This much may be said of them, that they are the only systematic attempt made in any quarter at a joint compilation, and that, over a series of years, they give a fair idea of the investment trend in the prairie provinces."

The clearing house committee of the Chicago Clearing House Association has adopted a resolution recommending to banks that on loans made for the purchase of Liberty bonds the rate be 4¼ per cent. for the first 90 days and 5 per cent. for the succeeding 90 days.

TAXATION TANGLE IN THE WEST

Notwithstanding the gloomy predictions concerning the financial soundness of western municipalities, and notably of the cities, indulged in a few years ago, the West is coming to the fore with flying colors. There never was any real difficulty, worth the mentioning, in the financial affairs of the rural municipalities; but conditions were quite otherwise with respect to some of the cities and towns of Alberta and Saskatchewan. The important centres are making rapid headway in setting their financial affairs in order; but to do so it has required strict regulation of expenditures and the careful collection of revenues from taxation.

As is well known, both Alberta and Saskatchewan made large use of the so-called single tax in their municipal fiscal affairs before the outbreak of war. This did not mean that the single tax was relied upon exclusively, even in Edmonton and Vancouver, as a source of income, but that it was possible to exempt improvements in part from the burden of taxation. This permission was made use of extensively; and the burden on real estate shifted to a considerable extent, to land. All went well while the real estate boom lasted; but with the rapid decline in urban land values which culminated with the declaration of war, it was plainly seen that the cities and towns could no longer depend for a stable income sufficient to cover fixed and current expenditures, on the taxation of land values. Within the past year the provincial government of Saskatchewan appointed Professor Haig, of Columbia University, New York, to make a survey of urban taxation in the province, and to present recommendations for a revision of the existing system.

While Professor Haig's report is a carefully prepared document, presenting a clear view of actual conditions in the province, there is nothing new or striking in his recommendations. He recommends that the tax burden be shifted as rapidly as possible from unimproved lands to buildings; and that each class of property—land and buildings—be taxed according to its faculty, or ability to pay. Should the provincial government legislate in that direction it will relieve those real estate speculators who have clung desperately to their holdings during the past hard years. Moreover, the shifting of the tax burden, in greater measure, to improvements will undoubtedly result in providing a surer and more stable income to the urban municipalities; but it is equally plain that this burden will ultimately rest upon rent payers. This may be just and equitable; but at the same time there seems no sufficient reason for passing legislation as a measure of relief for those speculators who plunged in times of prosperity and now find the burden hard to bear.

One lesson worth while, at least, has been taught the people of Canada, whether of the prairie provinces or elsewhere—that a workable taxation scheme is to be found only in applying the principle of levying rates according to ability to pay. The single tax is no open sesame. Land, like other property, must fluctuate in value as long as risk is inherent in business activity; and if it fluctuates in value, the buoyant revenues that induce reckless financing in flush years may not be available in times of depression. Less reliance upon speculation, and the greater exertion of real productive power, is the *sine qua non* for ultimate economic success for the whole Dominion.

WESTERN IMMIGRATION AND LAND SALES

The record of Canadian Pacific land sales tells a remarkable story of western recovery. In the fiscal year ending June, 1915, the first year of war, the company's sales had fallen to 231,297 acres with aggregate sale price of $3,742,115. During the next fiscal period (ending June, 1916) the sales increased to 390,715 acres with sale price of $6,126,108. The next period is the half year ending December, 1916, and the results for this six months nearly equalled the business done in the whole of the preceding year—the sales being 328,574 acres and the selling value $5,295,345. Throughout 1917 the increased activity was fully maintained, the record for the 12 months ending December 31st being 789,055 acres, with total sale price of $14,330,811. Reports now coming down from the West are that the Canadian Pacific land offices are doing a record-breaking business. The tide of American settlers, which reached its height in the year ending March, 1913, when 139,000 people came in from the neighboring country, had steadily declined during the three succeeding years. In 1914 the Americans settling in Canada numbered 107,530; in 1915, 59,779; and in 1917 (year to March 31st), 36,937. During the year ending March, 1918, there was a substantial increase, and the newspaper dispatches from western centres state that most of the newcomers thronging the land offices recently are Americans—from California, the Middle West and New England.

It is, of course, well understood that the revival in Canadian Pacific land sales and in immigration from the United States is mainly due to the high price of wheat. Assured of getting around $2 per bushel for what they can produce in 1918, and confident that the prices realized in 1919 and 1920 will also be satisfactory, those having experience in farming naturally turn their attention to the cheap lands of our prairie provinces. Nowhere in the United States can lands of this quality be purchased at the Canadian prices. In most cases the prices current on the other side of the boundary line are from two to four times as great as in Saskatchewan and Alberta. This movement of Americans into Canada promises to have an important effect on our grain production in 1918 and 1919. Many of the new settlers have planned to break some land and plant a crop during the present spring; and it is certain that their efforts will result in a substantial increase of the area seeded in 1919. A satisfactory feature of the new immigration movement is that it has attained its volume in spite of the relatively poor yields of 1916 and 1917. In many parts of Manitoba and Saskatchewan the farmers in those two years received but a small yield of grain per acre. If under those circumstances the high prices attracted many settlers from the United States, we may reasonably anticipate that the combination of a big crop and high prices, when it materializes, will have a pronounced effect in building up the agricultural population of Western Canada. The favorable conditions under which the farmers have worked since taking off their last harvest have created a general expectation that the combination here referred to may be experienced in 1918.

SAVINGS BANK CHECKING ACCOUNTS

In view of the recent intimations to the effect that the banks have been considering a change of practice in regard to allowing savings bank customers to draw cheques upon their accounts, bank depositors have been discussing the probable effects of such a change. The savings bank checking account is of comparatively recent origin so far as the Canadian chartered banks are concerned. It is largely a result of banking competition and of the policy of establishing numerous branch offices in the residential and retail sections of the larger cities. To the average householder living uptown, the privilege of having a savings account at a bank a few doors away on which cheques might be issued payable anywhere in the city, has had a strong appeal. The branches in the cities, outside of the financial district, have thousands of these accounts, many of which are carried for no other reason than that of issuing two or three cheques per month for the purpose of paying the larger items of household expense. These savings bank checking accounts have been one of the main factors in developing the deposits of the city branches far beyond what they would have been if no such privilege existed. Thus they have been a factor in encouraging thrift and economical habits.

Because of their importance as deposit-builders, it is scarcely to be expected that the savings bank checking accounts will be abolished. Many branch managers would interpose a strenuous opposition to any proposals for doing away with them entirely. If the privilege were abolished, it is probable that a considerable number of the savings accounts bearing interest would be transferred to the current account ledgers, the interest payments ceasing. Hundreds of people have been educated to pay their accounts by cheque, and if they cannot do this by means of savings accounts they would do it by means of current accounts. But it may be taken for granted that a goodly number of the savings customers who have become accustomed to issuing a few cheques per month will never go back to the old method of attending in person at the bank to draw out the actual currency and then pay their larger monthly bills by cash. This would be a backward step, and it would not economize the labor in the bank. It is far better and more economical for all parties to have payments made by cheque, providing the amounts are not too small.

On the other hand, it is clear that many of the customers who have checking accounts in the savings department abuse their privilege—through issuing too many cheques. A savings bank account should not be active. Many bankers consider that if there is a steady balance of from $200 to $300, the bank can properly allow three or four cheques per month; but that accounts through which numerous cheques are passed should be in the current ledger, even if a fairly large balance is carried. In case of parties having large balances who wish to issue numerous cheques, the banks usually arrange for them to carry their funds in the current account ledger, stipulating for a free balance large enough to cover the cost of operating the account and give a profit; or the dormant portion of the balance may go into the savings ledger and an amount sufficient to carry the checking account is kept at all times in the current ledger.

INCREASE IN FIRE INSURANCE RATES

Many readers must have been interested in the announcement in the daily papers referring to increases in rates made by the fire insurance companies.

The fire insurance companies operating in the United States have followed the plan of making a general increase of 10 per cent. upon all the rates which they had been charging prior to the first of this year, and when the companies here recognized that an increase in rates was necessary, it was at first proposed to follow that plan, but after full consideration of the situation, it was decided that it would be better to increase rates in certain districts where the fires had been unusually prevalent and upon certain classes of risks where the losses have been frequent and severe. There have also been increases made in some towns where the fire apparatus has not been kept in good order.

The statistics furnished to the Dominion government during the last few years, of the premiums received and losses paid by insurance companies in the different provinces, show that in Ontario particularly the companies have been losing money. Taking into consideration the present high cost of building and for replacement of

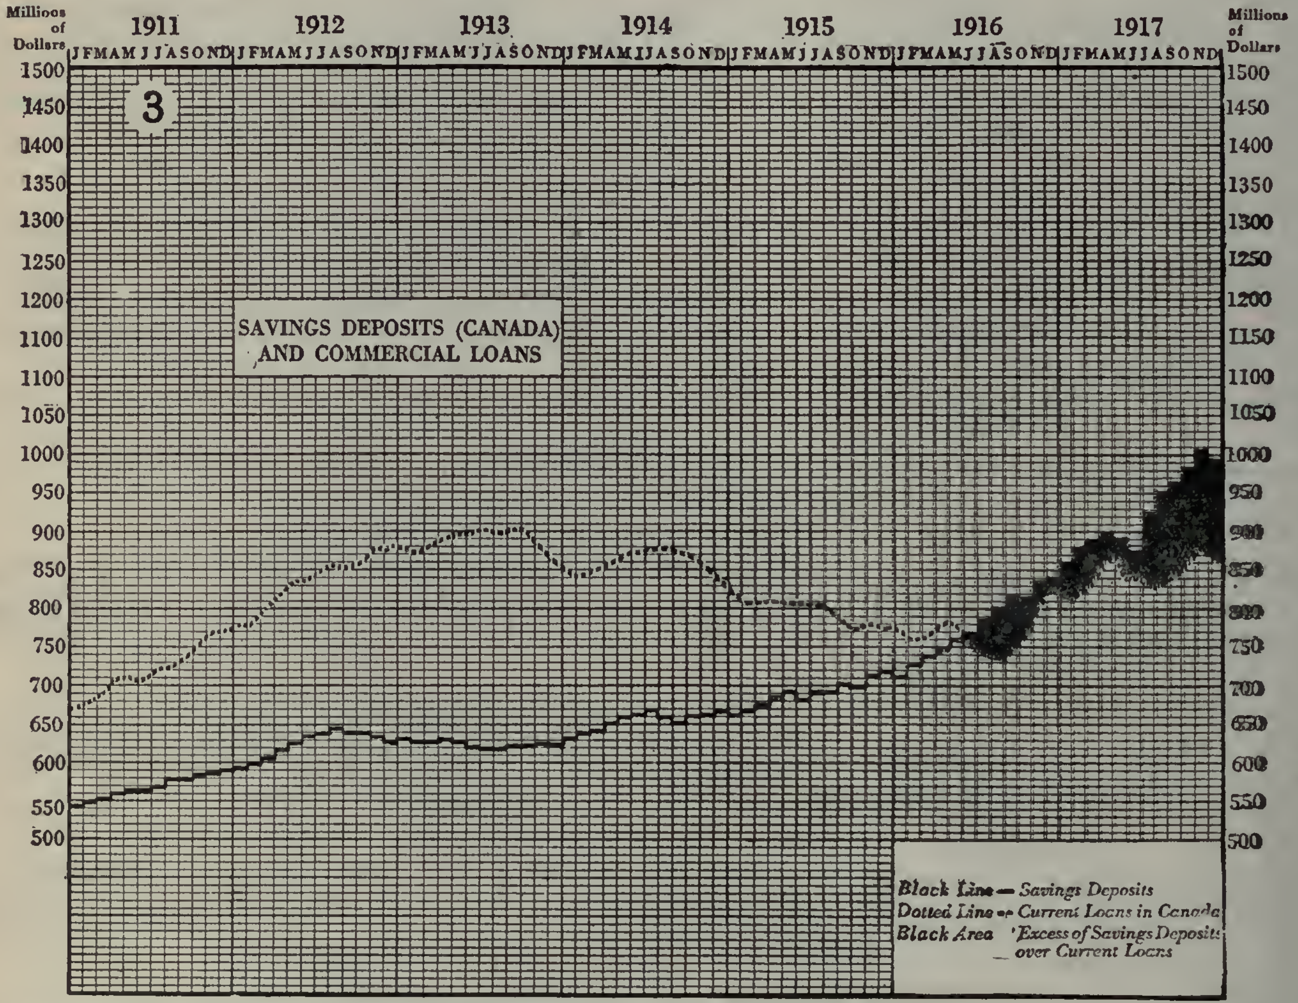
machinery and stock it entails upon insurance companies much heavier losses from a fire than would have been the case before the war, coupled too with the fact that there is undoubtedly an incendiary danger which, while perhaps a more severe hazard upon certain properties, is still a hazard upon all. There is also the very general employment of aliens and of men with little experience in the particular business in which they are engaged, all of which constitute a decided increase in the hazard which is being shown by the abnormal number of fires which have occurred in all parts of Canada, especially in Ontario, during the last few months.

It must be admitted by everyone that the insurance companies must receive a sufficient premium to keep them in a thoroughly solvent condition and that requirement is, if anything, more necessary now than was ever the case in the past.

The increase in rates will not apply at all to some large classes of risks in the community, such as private residences and ordinary stores in well-protected cities and towns. Where any increase has been made it is believed that it is fully justified by the changed conditions arising out of the war and from the heavy losses that have been already sustained. The method adopted in dealing with the abnormal situation is undoubtedly preferable to that of a general advance upon all rates which was the policy pursued in the United States by the insurance companies where they were confronted with a similar condition.

Relation of Savings Deposits to Commercial Loans



THROUGH the courtesy of Messrs. Greenshields and Company, we are able to present in diagramatic form some interesting comparisons between savings deposits in Canada and commercial loans. The following comment concerning the diagram is taken from the Monthly Review issued by this investment house.

One of the danger signals to Canadian business in 1912-13 was the marked decrease in savings deposits while current loans continued to expand. As savings deposits are the basis on which the banks make advances to business, the banks were forced to take in sail; business expansion halted and some depression set in.

The radical change in the situation existing then and now is shown in the chart given above. The curve of savings deposits has caught up with and crossed the curve of current loans and the black area depicts what could ordinarily be considered as the excess of the banks' loaning power for commercial purposes. Because of the large profits of the past few years, business is financing its needs at a period of the greatest activity in the history of Canada, with prices for labor and material abnormally high, with little more assistance from the banks than in 1912. Meanwhile, the increase in savings deposits is to be reckoned in hundreds of millions.

Because of this excess of loaning power, the banks have been able to make large advances to the Imperial government, continuing a flow of orders to Canada which became threatened by Britain's problems in finding means for payment.

GOVERNMENT OPPORTUNITIES AFTER WAR

Should Prepare Now to Obtain Highest Moral Standards in Politics, Business and Domestic Life

BY A. T. DRUMMOND, LL.D.

(This is the first of a series of three articles on the above subject to appear in "The Monetary Times.")

Canada is, at present, on the threshold of great changes in its relations to the Empire, in its methods of government, in its foreign trade, in the applications of science to industrial activity, in social conditions, and, we hope, in the determination to hereafter maintain only the highest moral standards in politics, business and domestic life. There never has been a period in its history when its governments had such splendid opportunities lying before them, of guiding these changes wisely into right channels. The government of the country is, however, a business, and, as such, must be conducted on business principles, and by men not only fitted by training and experience for the work, but possessing initiative and breadth of view. And here is where, under our political systems, it largely fails.

The Failure of the Party System of Government.

For long years, the party spirit has been promoted among the people by political leaders and by the press, and it has led to conditions in government which need a deeply cutting remedy. Let us, for a moment, look at past results as developed in the constituencies and thereafter in the government. Men who had attached themselves to one or other of the so-called political parties, and whose recommendations too often were that they had strong lungs, a ready flow of language and plausible reasons to give on the public platform for their party's attitude on public questions, were nominated by party associations, and were, as a rule, the sole candidates presented to the people for election to parliament. Men of independent views, wedded to neither party, and anxious only for honest, progressive government, were rarely encouraged. For the time being, a union government at Ottawa, one of the results of the war, has admitted of a partial fusion, which, it is to be hoped will become more pronounced as experience is gained, but throughout the country, the party organizations are still maintained. Under such conditions attending representation, it is not unnatural that, among those accustomed to the platform, lawyers in large numbers should enter parliament, and that not a few should find their way into leading positions in the cabinets of both the provinces and the Dominion. Most of these positions require men of initiative, of business training, and of experience in special lines of work, and lawyers, whose training and habits of thought lie more in the direction of precedents and statutory authority, than of personal initiative, and whose experiences of business methods are necessarily somewhat restricted, can hardly fill these important positions with that foresight and business precision which the future outlook of the country requires. And this applies equally to many other holders, from time to time, of cabinet portfolios, whose appointments have been made, not because of their special knowledge of the subjects which the positions involve, but largely because, both in and out of parliament, they have diligently served their party. Fortunately, in the past, there have been some men of exceptional ability in the country's service. There is here a pressing need for reform that will go to the very base of the party system as developed with us, and of appointments to cabinet positions. The establishment of union government affords an opportunity for reconsidering the whole system of government by party, as to whether it has not only failed to secure permanently efficient administration, but has produced discordant divisions among the people which interfered with independent thinking on national problems, and has often been inimical to the country's best progress.

A Suggestive System of Government.

A compromise between Canadian and the United States methods of government is suggestive, under which, very briefly put, the premier, who would be elected, for the life of parliament, by the country's representatives from among themselves, would select his cabinet, not from among these representatives, but from among the best business men of the country. Those thus chosen for portfolios would give their undivided time and ability to the country's affairs, each in his own department, uninfluenced by political or any other considerations, but perhaps, in certain cases, might be represented in parliament, during its sittings, by parliamentary under-secretaries of state, chosen by the premier from among the members, for the purpose of affording information to the members on departmental matters. The members, elected by their constituents, not for party considerations, but for their past record of character and ability, would enter parliament, each as an independent unit, unpledged as to his vote, and under no obligation except to bring his best thought and judgment to bear on the measures and issues introduced. Party organizations will regard such a system as Utopian and impossible of practical effect, but there is a very large and important body of electors, wedded to neither party, who are practically disfranchised under the present system, and who will welcome some system which will bring business initiative and energy into the country's affairs, and honest, careful administration, untrammelled by party, sectional or racial considerations. Proportional representation would not be thought of under such a system.

British Emigration and Concentration on the Land.

It is most desirable that Canada should foster immigration of the progressive Anglo-Saxon type, rather than, as hitherto, seek so largely to have its factories in the east and its western farms occupied by the unskilled and uneducated masses from central and southern Europe, who settling so often in communities by themselves, have raised serious problems in language, in education, and in moral standards. State directed emigration to the Dominions and colonies of the Empire will hereafter be a policy of the British government, and there is thus afforded a valuable opportunity for wise co-operation now with it by our Dominion and provincial governments in a general immigration policy, to take effect at once when peace is assured, and under which a fair share of this emigration from the British Isles will be attracted to Canada, instead of, as in past years, flowing to the United States there to aid in developing the resources and wealth of that country.

Hitherto, the desire of the Dominion government to attract population to the western prairies, has led to the settlers receiving free grants of 160 acres, and to their being allowed to locate wherever land was available. The result has been that these settlers have necessarily found themselves placed from at least one half-mile to one mile from each other, whilst very many went from 20 to 30 miles from the railways in the hope that in time some branch line would be built into their district. Few of them could cultivate even one-half of their 160 acres grant, and thus, not only was social life between them largely impossible, but even around each railway town, the number of settlers was so few, and so much of the land was lying uncultivated, that the business of the town was limited, and the grain raised was not one-half of what it could have been. If the free grants were reduced to 80 acres, which the British immigrants would consider large, and a policy of concentration were adopted, the number of settlers around each town could be doubled, and the business of the town, including grain deliveries, correspondingly increased, whilst social conditions among the settlers would be greatly improved, land values would increase, and the distance from the town would for most of the settlers be greatly diminished. It is not too late for the governments with their remaining Crown lands to prevent a repetition of what is now a marked detriment to the prosperity of the hundreds of towns and villages on the western prairies, and to the social and material advantages of the settlers themselves.

Fertilizing of the Land.

Agriculture is considered one of the bases of wealth in Canada, and both the Dominion and provincial governments, recognizing its importance, have special departments organized to assist in its development. The virgin soil of the country, especally of our vast western prairies, is rich in those chemical constituents that, with the climate, result in crops ideal in quantity and quality. When, however, the soil is gradually deprived of these constituents by continued cropping, year after year, without artificially returning them to it, both the quantity and quality of grain, vegetable and other products deteriorate. In the early days of Manitoba, the farmers there freely claimed to obtain 40 bushels of wheat to the acre, and much of this was graded No. 1 Hard, which gave a reputation to the grains from that province. Now, nearly 40 years afterwards, the average production to the acre for the whole province is under 16 bushels, and not much of

COLLECTIONS FOR BUSINESS HOUSES

The satisfactory service which the Merchants Bank renders to Business Houses, in the matter of collecting Notes, Drafts and other financial papers, is due to the number and strategic location of its branches throughout Canada, and the efficient system in force.

Special attention is given to collections; returns are promptly made and credited; losses are often prevented by the care and thoroughness with which we do this part of our work.

236 Branches and Agencies in Canada, extending from the Atlantic to the Pacific
New York Agency: 63 and 65 Wall Street
Bankers in Great Britain: The London Joint Stock Bank, Limited; The Royal Bank of Scotland

it reaches in quality the higher standard of years before. Even in Ontario, the average of last summer per acre, was for fall wheat only 23 bushels, and for spring wheat 21 bushels. No doubt each year brings unforeseen climatic causes which, sometimes in one and sometimes in another section, reduces the general average, but the plain fact remains that continued cropping, without sufficient, or, in so many cases, any compensating return to the soil, has resulted in a diminution of results per acre so large as not to be creditable to either the self-interest or the intelligence of the Canadian farmer. The different governments have been desirous of having larger areas placed under crop, but the real want is a larger production on the presently cultivated areas. What the governments should do in the interests of not only the farmers themselves, but of the consumers of their products in this country as well as in other countries which depend on us for food, is to promptly see that ample quantities are available of cheap, standarized fertilizers, concentrated, or at least freed from all unnecessary associated minerals which would only increase the cost of transportation to the farms; and that, under some well thought out system, for which our various experimental farms and agricultural colleges would furnish the basal facts, farmers would be compelled, as in Great Britain, to use fertilizers in given quantities according to the crops to be raised. There would be no hardship in this, but a clear advantage to the farmer himself, as well as to the country, in greatly enlarged production, better quality in the products, and much higher net cash returns. In thousands of the leases of English and Scotch farms, provision is carefully made under which given quantities of fertilizers have to be periodically applied to the soil by the tenant. And what is the result?—a production of wheat from two to two and a half times per acre what Canada's average last year was. And with the lower price here, the Canadian farmer cannot afford that enormous difference. His land originally came from the Crown as a free grant or at a mere nominal price, with the object of having it cultivated, and as our food supplies depend on this cultivation, there is an implied trust attached to the land that its fertility will be maintained. To compel the use of fertilizers is no curtailment of liberty, but is merely requiring the farmer to live up, not only to his own self-interest, but to his duty to the land itself and to the nation.

RAILROAD EARNINGS

The following is a statement of earnings and expenses of the Canadian Northern Railway for the month of February, 1918:—

	1918.	1917.	Inc. or dec.
Total gross earnings..	$ 2,691,000	$ 2,358,600	+ $ 332,400
Operating expenses ...	3,171,400	2,250,400	+ 921,000
Net earnings	480,400	108,200	— 588,600
Aggregate gross earnings from July 1st	27,263,100	26,822,700	+ 440,400
Aggregate net earnings from July 1st	2,279,700	6,886,400	— 4,606,700

The Grand Trunk Railway Company of Canada's reports for the year ended December 31st last are as follows:—

	1917.	Increase.
Gross receipts	£10,725,500	£ 905,800
Working expenses	9,002,900	1,774,900

FOOD PRODUCTION PROBLEM

Two Aspects: Immediate Necessities as War Measure; World Need After Peace

The problem of production which is occupying the attention of most of the prominent men of the world is ably discussed by Mr. Herbert Hoover, United States food administrator. He says: "Our great department of agriculture has primarily the duty of education in production, but it falls upon the food administration to keep in constant touch with the food demands of our own people and the needs of the allies and other nations, and to arrive at broad conclusions as to what is required from the American producer in order to serve these combined interests during the war. It is this aspect of food supplies that I wish to treat in asking your co-operation in an effort to increase the livestock of this country. In considering the production of food from the world point of view, we can obtain clarity of vision if we divide our foodstuffs roughly into bread grains, meats and fats, and fodder grains. This classification is based less upon chemistry and agriculture than upon the commerce of food.

"There are two aspects from which we can consider this problem: The first is the aspect of our immediate necessities as a war measure, and the second, the broader aspect of the world need after peace; for conditions growing out of the war disturbance to production will have the most material effect on the whole agriculture of the world for many years subsequent to peace. But in order to arrive at some proper conclusions as to our immediate problem, we need to review the present situation as to world food supplies and the necessary reactions we must obtain to remedy the weakness in this situation.

"The first commodity for consideration must be wheat—the predominant bread grain. Our rye takes a very minor part in bread making, for our total export possibilities are only 20,000,000 bushels. From a European breadstuff point of view, the other cereals are substitutes to be used in mixing with wheat, and a certain amount of wheat is essential.

Tables Illustrating World Situation.

Table 1.—Wheat situation in France, Italy, the United Kingdom and Belgium.

	Bushels.
Three-year prewar average imports from United States	79,426,000
Three-year prewar average imports from Canada	112,900,000
Three-year prewar average imports from elsewhere	188,478,000
Total	380,804,000
Average production	590,675,000
Estimated production for 1917	393,770,000
1917 deficiency	196,905,000
Total imports required to maintain normal consumption	577,709,000

Table 2.—Estimated export surplus of wheat in various countries from 1917 planting.

	Bushels.
United States	80,000,000
Canada	150,000,000
Total North American surplus	230,000,000
Australia:	
Present surplus	120,000,000
New-crop surplus	120,000,000
India:	
Present surplus	50,000,000
New-crop surplus	70,000,000
Argentina: Estimated surplus from January harvest	180,000,000
Total, other supplies	540,000,000
Grand total	770,000,000

"There is therefore, ample promise of a supply without effort on our part if shipping were available to transport it. But the world's shipping is already too short to afford sufficient tonnage to traverse the longer routes, and the bulk of the load thus falls upon North America. The journey to Australia and India requires three times the time of the one to North America and thus three times as many ships to transport the same quantity. Furthermore, the American route is best protected.

"The problem is thus simply one of ships. If ample shipping existed, there would be no need for saving or increased production of wheat on the part of the American people. But, on the other hand, if we can produce such economics in consumption and such stimulation of production in the United States and Canada as will enable us to feed the allies absolutely from this continent, and thus enable them in the final analysis to live without sending a ship farther afield than our Atlantic seaboard, we can resist the submarine indefinitely. There is, however, another phase to this accumulation of wheat in isolated markets. If peace should come, a large number of ships in military transport will be released, and this wheat, of course, will be available to Europe and will come into immediate competition with the American wheat. As you will see from the tables, it represents more than the necessary supply for the allies and is, with Russian wheat, an ample supply for all Europe, Germany and Austria included.

Crop Insurance for 1918 Wheat Growers.

"For this reason it was felt that if we were to ask the American farmer to expand largely his acreage in wheat, he should have some assurance that he would not do so at his own loss, if peace intervened. Congress therefore gave a guarantee of $2 per bushel at primary terminal markets as to the 1918 harvest. This guarantee does not apply to the 1917 harvest; and, while the United States food administration has developed a method by which, so long as the food administration lasts, the farmer may receive an assurance of $2.20 on the basis of the Chicago terminal market for his 1917 wheat, I would like to have it clear to every farmer in the United States that the food administration by-law comes to an end with peace. So if peace should come between now and the 1918 harvest there will be a period in which no guarantees exist, and in which the price of wheat may fall much below present prices, due to competition from the more distan countries.

"Even if carried over, 1917 wheat will not tall within the 1918 guarantee, and it therefore must be of prime interest to the American farmer to get his 1917 wheat into the market a the earliest moment. This statement is made not that I anticipate early peace, but to issue a warning that by failure to get his wheat to market the farmer would be absolutely gambling on the continuation of the war, with nothing to gain by withholding his 1917 wheat and all to lose should peace arrive

Price Should Depend on Harvest.

"With the stimulation of $2 wheat, we are going to have a very much increased acreage in 1918. If climatic conditions are right, we should have 1,000,000,000 bushels. If the war continues, this wheat will be vitally necessary; but i the war should come to an end, there will be no foreign market for at least 400,000,000 bushels of this wheat. The government must then take over the wheat and probably find a market for it at a very great loss. I should anticipate tha the government may lose from $300,000,000 to $500,000,000 on this wheat guaranty if peace arrives before the 1918 harvest is marketed.

"And, now, I would like to say frankly that I have fel from the beginning that the stimulation of the production o wheat for 1918 could have been obtained in perfect justice to the farmer if the guaranty had been given simply on the basis of a return on capital and labor, so that the price would depend upon the character of the harvest.

"This does not mean that the farmer would not receive more than the minimum in case war continued; but, in case of a good harvest and peace intervened, the government would have been saved several hundreds of millions of dollars if the guaranty had been placed on this footing, and justice would still have been done to the farmer. However, the guaranty has been fixed. It is an insurance against the submarine and any estimate of what it may cost we must leave to the future.

"We may summarize the bread-grain position by saying that for the 1917 harvest we must economize in consumption and for 1918 we have an assurance, as far as law can give it of large production. Every indication of the planting of winter wheat points to a large increase next year."

Mr. C. E. L. Jarvis, fire insurance man and one of the best-known adjusters in Eastern Canada, died recently afte a brief illness.

Head Office .. Winnipeg

ASBESTOS OUTPUT INCREASED

Canada's Production Last Year Stimulated by War's Demands

The production of asbestos continues to increase under the stimulation of war demand. The product has been marketed at much higher prices and the total sales show a substantial increase. Stocks on hand at the end of 1917 were slightly in excess of those reported at the end of 1916.

In addition to the production in the province of Quebec, which is derived from the asbestos areas at Black Lake, Thetford, Robertsonville, East Broughton and Danville, there is also included in the record of production as given herewith, a small output of crude asbestos amounting to 10 tons, valued at $2,150, produced and shipped from the Porcupine district in the province of Ontario. These Ontario operations have been discontinued for the present, but indicate the possibilities of sources of supply other than the well-known areas in Quebec.

Exports of Asbestos.

Exports of asbestos during the calendar year 1917 were 93,932 tons, valued at $4,903,326, or an average of $52.20 per ton and asbestos and waste 52,088 tons, valued at $430,956, or an average of $8.27 per ton. There was also an export of manufactures of asbestos, valued at $55,666.

The exports in 1916 were 96,775 tons of asbestos, valued at $3,872,463, or an average of $40.01 per ton, and asbestos sand and waste 33,564 tons, valued at $241,272, or an average of $7.18 per ton; also manufactures of asbestos valued at $4,741.

Output, Sales and Stocks.

The following table shows the output, sales and stocks of asbestos:—

	Output.		Sales.		Stock on hand, Dec. 31.		
1917.	Tons.	Tons.	Value.	Per ton.	Tons.	Value.	Per ton.
Crude	6,268	5,383	$2,748,071	$510.51	1,322	$ 738,195	$558.39
Mill	144,040	138,802	4,467,318	33.67	12,102	479,119	39.58

BANK OF BRITISH NORTH AMERICA

The annual report and balance sheet of the Bank of British North America for the year ending November 30th, 1917, which appears on another page of this issue, is a rather interesting document. It shows that the profits for the year, including the $104,222 brought forward from the previous year, amounted to $772,226, as compared with a total profit in the previous year of $598,522. Out of this the directors paid an interim dividend of $194,666 last October, leaving a balance of $577,559.

Out of this amount the directors have declared a dividend of 40 shillings per share, payable this month. The usual bonus of 5 per cent. was granted to the staff, calling for about $43,800. A special war bonus was paid to those members of the staff remaining on duty, and of not less than six months' service, to meet the increase in their necessary expenditures, which would cost approximately $34,066.66, and to carry forward $156,300.

The following comparisons, covering the past three years, will be of interest:—

	1915.	1916.	1917.
Demand deposits	$18,150,681	$20,511,339	$18,223,720
Note circulation	4,733,254	5,627,982	5,708,882
Total assets	61,513,696	67,785,957	77,682,843
Current loans, Canada	23,267,045	23,936,070	28,776,590
Current loans elsewhere	6,214,693	7,225,512	7,791,248
Dominion government securities	111,160	955,064	6,350,000

It will be noticed that the assets have increased ten million dollars, and almost six million dollars have been invested in government securities during the year.

Established in 1836, and incorporated by Royal charter in 1840, the Bank of British North America has built up an excellent reputation, founded upon correct banking principles and practice. Under the management of Mr. H. B. Mackenzie, the institution continues to enjoy the complete confidence of the public.

The first official indication that the United States government hoped to raise more than three billion dollars from the third Liberty Loan came last Tuesday, in a treasury statement asking that the country subscribe three or four times that amount and furnish 20,000,000 subscribers, which is just double the number of subscribers to the second Liberty Loan.

TRINIDAD ELECTRIC COMPANY

The earnings of the Trinidad Electric Company for February, 1918, are as follows:—

	Gross	Net.
Railroad	$ 9,309.23	$2,203.18
Light and power	10,003.24	4,389.32
Ice and refrigerator	2,926.79	418.51
	$22,239.26	$7,011.01

PORTO RICO RAILWAY COMPANY'S EARNINGS

The following is a comparative statement of earnings for February, 1918:—

	1917.	1918.	Increase.
Gross	$ 72,851.84	$ 83,185.94	$10,334.10
Net	35,794.04	40,412.21	4,618.17

The following is a statement of comparative earnings for two months ending February, 1918:—

	1917.	1918.	Increase.
Gross	$143,247.11	$165,307.40	$22,060.29
Net	67,621.08	76,354.06	8,732.98

PROPOSED NEW BRUNSWICK AUDIT ACT

In the legislature on April 3rd, Premier Foster introduced a bill to provide for the auditing of the public accounts of the province. He said that the proposed bill would replace the audit act of 1909. While the old act, he said, had good features and had worked to the benefit of the province, it had been in operation for eight years and those responsible for its operation felt that in some respects it could be improved upon. The new bill would create a comptroller and audit branch of the treasury department and contained other new features in connection with the handling of the public moneys of the province, which he felt would be an improvement on the old system. The bill would provide for the adoption of the double entry system of bookkeeping and made other changes which he felt sure would commend themselves to the members of the house.

AUTOMOBILE DANGER INCREASING

Fatalities are as Numerous as Serious Infections—Urban Centres Furnish High Rate

The increasing importance of the automobile as an instrument of injury and death was referred to by Mr. Lee K. Frankel, Ph.D., third vice-president, at the 11th annual meeting of the Association of Life Insurance Presidents, in New York. Statisticians are observing that while the mortality from communicable diseases has responded more and more each year to the measures instituted by health authorities for their control, injuries and fatalities resulting from the growing use of automobiles are steadily climbing. Where formerly diseases like typhoid fever, scarlet fever and others played an important role in mortality tabulations, fatalities due to the automobile are to-day as numerous as some of the serious infections. What this increasing incidence of automobile fatalities means to life insurance companies is indicated by the industrial experience of the Metropolitan Life Insurance Company. In an exposure of more than ten million lives annually the death rate from automobile accidents has more than trebled since 1911. In that year the death rate from this cause was 2.3 per hundred thousand; in 1916 it had increased to 7.4 per hundred thousand.

During this six-year period the rate for each year was markably higher than the rate for the preceding year. The rate for 1916 showed an increase of more than 37 per cent. over 1915. The figures for the first ten months of 1917 indicate a considerable increase over the totals of 1916. These figures do not reflect an isolated experience but are representative of what is going on in the country generally, especially in the urban centres of population. The data available show clearly that we have before us a problem of the first magnitude and that we must organize all communal groups interested in public safety to combat the growing evil. It will be necessary to interest legislatures and to educate the public generally, if we are to control the results of the automobile industry which has grown so tremendously in recent years.

The increase in the number of automobile accidents and fatalities bears a definite relation to the increase in the number of automobiles in use. The development of the automobile is a matter of common memory. The last decade has seen the automobile reach a condition of practical utility to permit its general use. It is estimated that in 1907 there were approximately 150,000 motor vehicles of all types in use in the United States. In 1911 the number of cars registered amounted to 677,000. In 1916 registrations had increased to more than three and one-half millions. On July 1, 1917, the number was very close to four and one-quarter millions. The annual rates of increase have varied somewhat from year to year. In 1912 it was 49 per cent. over the preceding year; in 1916 it was 43 per cent. over 1915. The indicated rate of increase in 1917 is about 40 per cent. over 1916. Apparently, we have not yet reached the diminishing rate.

Due to Type of Vehicle.

A study of automobile accidents and injuries leads to a consideration of the various types of vehicles. Experience has shown that the type of car operated makes a marked difference in the hazard. According to the reports of the Massachusetts Highway Commission, motor trucks and commercial vehicles caused 50 per cent. more accidents per vehicle than any other class of machine. In New York City motor trucks and commercial vehicles form less than 25 per cent. of the number of machines registered. The annual report of the police department for the year 1916 shows that the number of deaths caused by trucks and motor delivery machines was almost 40 per cent. of the total deaths (132 out of 335). It is obvious that the motor truck is the more dangerous type of machine. It is of interest to observe that in the country at large the number of commercial vehicles still forms but a small part of the total number of automobiles in use, approximately 11 per cent. The increasing use of the automobile for commercial purposes presents a very distinct source of future hazard which should receive especial attention.

Rate Higher in Urban Centres.

We have already referred to the increasing mortality rates from automobile accidents as shown by the industrial experience of the Metropolitan Life Insurance Company. It is interesting to note that these figures are almost identical with those for the general population of the country as reported by the bureau of the census. In 1916 there were in the registration area of the United States 5,173 deaths from automobile accidents, corresponding to a death rate of 7.3 per 100,000 population. In 1911 the rate was 2.2 per 100,000 or less than one-third the present rate. In 1915, the last year for which detailed figures are available, the rate was 5.9 per 100,000. For the cities in registration states, however, the rate was 7.6 per 100,000, while in the rural areas of these states, the figure was only 3.9 per 100,000 or just about half the urban rate. We are concerned, therefore, with what is primarily an urban problem. This is shown by the following tabulation of rates for some of the principal cities of the country for the year 1916, compiled by the Prudential Insurance Company:—

	Deaths per 100,000.
United States registration area	7.3
Nine American cities	8.7
New York	7.2
Chicago	10.0
St. Louis	9.1
Baltimore	5.1
Buffalo	12.2
San Francisco	13.6
Providence	10.2
Newark	13.4
Washington	9.9

The higher rate in urban centres is borne out by the experience of the Metropolitan Life Insurance Company, as shown by the following figures:—

Mortality in 1916 from Automobile Accidents, Metropolitan Life Insurance Company Industrial Experience.

	Deaths per 100,000.
Total company experience	7.4
Ten largest cities combined	8.3
New York	8.1
Chicago	10.0
Philadelphia	9.6
St. Louis	6.0
Boston	6.4
Cleveland	6.0
Baltimore	4.1
Pittsburg	9.1
Detroit	13.9
Los Angeles	17.0

These figures should be taken with reserve as there are no available municipal data in reference to the ratio of automobiles to population. The statistics compiled by The Automobile show the following state ratios of population per car for the states in which the above cities are located:—

States.	Population per car.
New York	30
Illinois	22
Pennsylvania	34
Missouri	27
Massachusetts	28
Ohio	18
Maryland	29
Michigan	16
California	12
Rhode Island	24
New Jersey	30

SASKATCHEWAN MORTGAGE & TRUST CORPORATION

The ninth annual report of this institution, with head office at Regina, reflects great credit upon the management, especially when the unsettled state of business conditions generally is taken into account. The net profits for the year amounted to $49,192.57, of which $43,807.30 was used in the paying of dividends, at the rate of 6 per cent. per annum, the balance being carried forward. This profit is somewhat in excess of 1916, when it stood at $43,032.61. The paid-up capital of the company is now $777,206, while the assets are $927,704.81.

In every branch of the company's business there was a healthy increase, with the exception of the item, interest accrued and in arrears, where a substantial decrease is shown, which is a pleasing feature of the report.

Taken altogether, those directly and indirectly concerned with the management of the institution, have good cause for gratification with the report as presented. Mr. C. V. Smith is manager and secretary of this progressive Western institution. Owing to the resignation of Mr. Robert Sinton, the vice-president, Mr. A. W. McGregor was elected to the vacancy on the board of directors.

EMPIRE RESOURCES AND WAR DEBT

Scheme to Relieve the Burden of Taxation—Full Use of Unutilized Resources

A paper was read on "Payment of War Debt by Development of Empire Resources," by Mr. H. Wilson Fox, M.P., at a meeting of the Royal Colonial Institute, London, England, last month.

"It cannot be properly or reasonably assumed," said the lecturer, "that the intervention or participation of the state in a limited number of branches of industry would sound the death-knell of individual enterprise in this country. On the contrary, it would almost certainly have the effect of providing an immense number of new openings for capitalists and workers. Take, for example, the electrical industry. Can it be doubted that if by state action practically unlimited supplies of cheap power were made available throughout the length and breadth of the land an almost indefinite expansion of the industry would take place? Moreover, so far as the comparatively few industries in this country in which the state might elect to participate are concerned, the empire resources development committee contemplates that any action taken would be on co-operative lines, so that a place might be found in a reorganized industry for the capital, brains and energy of those who are already engaged in it, while the state would assist with improved facilities, assistance and additional capital. The aim in each case would be to make a larger profit in the common interest by making full use of resources or opportunities which at present are either unutilized, only partly utilized or wasted.

Some Concrete Proposals.

"The first proposal is concerned with the fish supply of the United Kingdom. The committee—mainly on the initiative of Lord Dunraven, Mr. Moreton Frewen and Mr. Alfred Bigland, M.P.—have investigated the conditions affecting the supply and distribution of fresh fish in these isles, and has ascertained the following remarkable facts. The first is that the consumption of fresh fish (exclusive of shell fish) in the United Kingdom under pre-war conditions was less than 1½ oz. per head of population per day, out of about, say, 40 ozs. of food consumed on the average per head per day. The total weight of fish thus consumed was about 600,000 tons per annum. The second is that the amount received by the fishermen for these 600,000 tons of, as it is termed in the trade, "wet fish" was about £14,000,000, while the total retail price paid for them by the consumers was certainly not less than £25,000,000. The third is that practically unlimited supplies of the best food fishes could be obtained from the fishing grounds of Canada and Newfoundland and sold here at a considerable profit at prices far lower than those ruling before the war.

"The committee does not for a moment suggest that the whole of the difference between the £14,000,000 and the £25,000,000 which I have mentioned went into the pockets of the middlemen, though undoubtedly it is a very profitable trade. What it does say is that there is great waste and inefficiency in the process of supply and distribution; that if the means of transportation both at sea and on land were improved, and better facilities for cold storage were provided in every town and hamlet, the business of fish supply could be organized on an entirely new and vastly extended basis; that the trade could be carried on under conditions which would, in the majority of cases, not only improve the position of the fishermen and others now engaged in the industry, but also assure to the public plentiful and constant supplies of the best fish at greatly reduced prices; and that the state might reasonably expect to make a profit of from £25,000,000 to £50,000,000 per annum. It will be admitted that such results would justify considerable effort in order to attain them.

Canada's Grain Lands.

"A proposal of a different nature, emanating from Mr. Moreton Frewen, is that the home government, through the agency of an empire resources development board, might cooperate with the Dominion and state governments in Canada in the early development for sale of large tracts of grain lands, by the construction of roads, railways, granaries, elevators, docks and other facilities needed to make these lands readily accessible, and to assure to settlers the opportunity of marketing their crops to advantage. The suggestion made to the committee was that 'if we can negotiate a land grant of 200,000,000 acres from the great provinces of Alberta, Saskatchewan and British Columbia, we insure our food supply; we insure the food supply of the United States, and within the next quarter of a century the sale of farms in this improved domain would pay off the last penny of the empire's debt.' In justice to Mr. Frewen, it must, however, be recalled that at the time this suggestion was made it was not anticipated that the war debt would assume the proportions which now seem probable.

Power Supply and Coal.

"One proposal is that the state should take in hand the consolidation of the electrical power supply of the United Kingdom upon adequate and comprehensive lines. During the last ten years an investment by the Victoria Falls Power Company of £7,000,000 in establishing a power supply business on the Witwatersrand in South Africa by the use of steam-driven electrical plants of large capacity, has resulted, even in a district where coal is cheap, in a profit to all concerned—producers, consumers and the government—of more than £4,000,000 per annum. Moreover, nothing is being earned by the manufacture of by-products from the coal used.

"In this country the existing demand for power is more than fifty times as large. Coal is relatively expensive. The cost of installation per unit of plant would probably be less, and a substantial portion of the necessary distribution plant is already in existence. On the other hand, the load-factor would probably, at any rate at first, be considerably lower. It can, nevertheless, be argued with considerable force that if the state were to deal with this business on modern lines it might derive a profit of at least £100,000,000 per annum, while furnishing the community with supplies of light and power at far cheaper prices than those at which they are delivered to-day. The opportunity of obtaining practically unlimited supplies of cheap electrical power would certainly give rise to a greatly increased demand and would, in particular, tend to cheapen, improve and extend facilities for transportation. In this domain, similarly, the last word has not yet been said. Here, too, it is extremely probable that the state could co-operate with the proprietors of our railroad system with great material financial advantage and with considerable benefit to the general community. The possibility of effective action of this character largely, in fact primarily, turns upon questions of management.

As to the State's Necessities.

"The post-war revenue, which the government will have to raise by one means or another in order to discharge its ever-growing obligations, cannot now be expected to be less than £600,000,000 per annum, and may even exceed £700,000,000 per annum. It is idle to hope for any early and substantial reduction of government demands owing to the application of any method of pruning. Nor am I personally sanguine that the situation can be dealt with satisfactorily by resort exclusively to ordinary methods of taxation. Taxation of imports is not likely to yield any sum which will go far to meet our needs, while the burden of the income tax cannot be increased indefinitely with safety either by the raising of rates or extension of the area of its incidence. Some new method of obtaining money for the state must certainly be found, and for my part I am convinced that that new method must be based, not upon conscription of wealth already in existence, which I believe would be found to be both a dangerous and largely impracticable expedient, but upon the production of new wealth under conditions which will assure to the state itself the direct receipts of a substantial share of the profits earned. This, at any rate, is the belief and gospel of the empire resources development committee.

In Regard to Finance.

"With regard to finance, it is proposed that the precedent of the existing development commission of the United Kingdom might be followed. That commission was, in the first instance, financed by means of an annual grant of £500,000 from the consolidated fund for a period of five years, which ended on March 31st, 1915. This fund was placed at the disposal of the treasury, and might be spent by it on the advice of the development commission, but not otherwise. The development commission has no executive authority itself in regard to expenditure, and has pointed out the disadvantages of its position in this respect in a series of convincing reports. It is proposed in the present case that the board for the development of empire resources shall have full executive authority within its own sphere, and that, in the first instance, provision for its operations might be made on the basis of £10,000,000 per annum for a period of ten years."

FOOD PRODUCTION AND WAR

"I fear the disciplined people behind the German Army, the rationed family and the determination of wife and sister and daughter and mother to stand and starve—so that their fighting men may be fed—I fear it more than the Imperial German army itself." This is the warning of Premier Lloyd George. In drawing attention to the threatening of the battle line by lack of food, Dr. Abbott, secretary of the Organization of Resources Committee, Ontario, reminds us that Britain and France are now on food rations and that Italy is on the verge of starvation. Only continuous support from us can enable us to hold out. Only with a disciplined people behind can we hope to win. The rationed British nation, blood of our blood, bone of our bone, are proudly paying the price and sharing with France and Italy their limited stock of food. For in this there is mighty pride, a conscious measuring of their glory with the best traditions of ancient Sparta and of Imperial Rome, for Britons know that upon them rests the burden of saving humanity. The story of their service shall ring and echo forever along the hill tops of history.

The budget brought down in the British Columbia legislature on April 4th, estimates the revenue for the fiscal year ending March 31, 1919, at $9,900,055.12, with an estimated expenditure of $11,611,694.08, of which $1,853,440 is chargeable to capital account. If the anticipated revenue is secured the actual deficit will be $1,111,838.95.

PROPOSAL TO ESTABLISH BUREAU OF STATISTICS

Sir George Foster, in the House of Commons on April 4th, introduced a resolution to establish a bureau under the minister of trade and commerce to be called the Dominion Bureau of Statistics. The purpose of the bureau, according to the resolution, is to collect, abstract, compile and publish statistical information relative to the commercial, industrial, social, economic and general activities and conditions of the people. It is to collaborate with all other departments of the government in the compilation and publication of statistical records.

Mr. Jacques Bureau wished to know why it was necessary to establish such a bureau. At present there was a census branch in the department of agriculture, which took a census of the Dominion. As far as industrial statistics were concerned, he understood that the department of labor had officers which compiled them. He asked if it was the intention to have the statistical branches attached to various departments, merged under this new bureau.

In reply, Sir George Foster said that there was no intention of abandoning the statistical branches at present attached to different departments of the government.

The Sun Life Assurance Company of Canada operates actively on five continents, in 42 countries and under 22 flags; the sun never sets on the Sun Life empire.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

The following table, compiled by *The Monetary Times*, shows the volume of bank loans to municipalities since January, 1915:—

	1915.	1916.	1917.	1918.
January	$35,952,805	$32,015,371	$24,487,272	$40,015,466
February ...	38,437,903	35,149,915	26,121,324	43,535,628
March	41,227,449	38,649,462	29,877,911	....

Lincoln, Ont.—Tenders have been called for by the county for an issue of $50,000 5½ per cent. 10-year bonds.

Verdun, Que.—Messrs. Versailles, Vidricaire and Boulais, Limited, have been awarded a block of $450,000 6 per cent. 5-year bonds. The issue was sold at 95.70 and accrued interest for the whole amount. Eight tenders were received: Hew R. Wood Company offered 95.36, Hanson Brothers 93.99, A. E. Ames 93.93, Provincial Securities, Limited 94 net, Cie d'Archat et Vents de Debentures 93.80, Home Bank of Canada 94. St. Cyr, Gonthier and Frigon offered to sell the bonds at 96.50, from which would be deducted the expenses for advertising, etc.

Montreal, Que.—The Catholic School Commission is offering at par $2,500,000 securities, divided into $1,500,000 6 per cent. five-year bonds, and $1,000,000 6 per cent. two-year treasury notes. Instead of selling the securities to a banking syndicate, as has been done in the past, the school commission is selling direct to the public with the co-operation of the Hochelaga Bank. The bank will receive subscriptions at its branches beginning April 8th, and arrangements are also made for the filing of subscriptions with officials of the school commission. In making the offering the commission is advancing not only the merits of the securities as investments, but also the necessity that the public of Montreal should come to the assistance of the commission in its efforts to raise money for the building of new schools.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from March 25th to 28th, 1918:—

School Districts.—Maxwell, $1,200 10-years not ex. 8 per cent. annuity; W. C. Ennis, Wilkie. Berlin, $400 5-years not ex. 8 per cent. instalment; Jas. Greaves, Willow Hill. North Lake, $1,300 10-years not ex. 8 per cent. annuity; Todor Kurlak, Drobot. Lilian, $1,500 10-years not ex. 8 per cent. annuity; L. L. Bassham, Annette.

Rural Telephone Company.—Phippen, $5,800 15-years not ex. 8 per cent. annuity; C. E. Stodders, Phippen.

The following is a list of debentures reported sold from March 25th to 28th, 1918:—

School Districts.—Grafton, $2,000, Festubert, $1,800, Return, $1,800. Beaver Valley, $1,200, Hill Point, $1,800; Waterman-Waterbury Manufacturing Company, Regina. Poelcapelle, $1,200; W. L. McKinnon and Company, Regina. Runnymeade, $2,000; Nay and James, Regina.

Rural Telephone Companies.—South Melfort, $4,200, South Prince Albert, $10,300; W. L. McKinnon and Company, Regina. Verdun, $1,700; S. J. Kipley, Kipling. Little Quill, $6,300; J. A. Thompson, Winnipeg.

Village.—Moss Bank, $3,000; W. L. McKinnon and Company, Regina.

The board of directors of the American Cyanamid Company at their meeting held on April 2nd, declared a dividend of 3 per cent. on the preferred stock, payable May 1st, 1918, to stockholders of record as at the close of business on April 20, 1918. This dividend is for the six months' period ended December 31, 1916. The stock transfer books will be closed from April 21, 1918 to May 1, 1918, inclusive, and dividend cheques will be mailed.

ANOTHER BRITISH COMPANY ENTERS CANADA

The British Traders Insurance Company, which was organized in 1861, has decided to enter the Canadian field and will write fire and marine business. The company is now writing business practically all over the world, and has assets of over $5,000,000. Mr. C. R. Drayton has been appointed manager for Canada, with head office at Toronto. Mr. R. H. Williamson, formerly of the marine department of the Western Assurance Company, will have charge of the marine branch for the British Traders.

GREATER WINNIPEG WATER DISTRICT

According to the auditor's reports and financial statements of the Greater Winnipeg Water District for the year ended December 31, 1917, this very important enterprise is going forward steadily to completion.

On the aqueduct itself there has been expended to date $7,220,633.86, while on the building of the constructional railway $1,618,221.79 has been spent, which figure includes all the necessary equipment for the road.

The outstanding liabilities consist of $1,283,112 4½ per cent. inscribed stock and $7,500,000 5 per cent. five-year debentures. During 1917 $4,000,000 of the $7,500,000 was pledged with the Bank of Montreal as collateral security.

According to the condensed statement of expenditure, $10,625,943.02 has so far been put into the enterprise.

The policy of the administration in the letting of contracts has been to let them progressively. As the organization proceeded tenders were invited and contracts for separate portions awarded.

The statement sets out in detail the various expenditures, following the practice as followed in the 1915 and 1916 reports, accompanied by schedules giving in detail the subdivisions of expenditures.

SUN LIFE LIBERALITY REPEATED

A decision of importance to former policyholders of the British Columbia Life, recently reassured by the Sun Life, has been made regarding the extra premium chargeable under their policies, where the assured engages in military or naval service. The Sun Life management has voluntarily waived all restrictions regarding military and naval service in the case of British Columbia Life policies issued prior to August 1, 1914, and in force on the date of the completion of the agreement, and have further agreed that the present war clause of the Sun Life be made to apply to all policies issued since August 1st, 1914. Even in cases where British Columbia Life policyholders have signed an agreement limiting the company's liability to 25 per cent. of the sum assured, the Sun Life has undertaken to protect them against the war risk for the full amount.

Though according to the terms of the reassurance, the Sun Life assume only the liabilities covered by the British Columbia Life, it has decided to treat these new policyholders on exactly the same basis as if they had originally held Sun Life policies, accordingly any restrictions regarding military or naval service on policies issued before the outbreak of war, have been waived, and the holders of such policies who are now, or will be engaged in military or naval duties, will secure the full benefits without extra premium or other restrictions.

The feeling appears to be that a strong, well-established life company is warranted in adopting this broad, patriotic policy, whereas the smaller and younger life companies have felt compelled to charge an extra premium to offset the prospective extra mortality due to war.

A concession such as this will come as no surprise to a public familiar with the liberality of treatment consistently accorded to the policyholders of companies that have been reassured by the Sun Life. That it will be received with warm approval and appreciation by these policyholders and their beneficiaries goes without saying.

Mr. William Lucas, of the private banking house, Markdale, of William Lucas and Company, and eldest brother of Hon. I. B. Lucas, attorney-general of Ontario, was found dead in bed at his home on April 3rd.

LEGISLATION AFFECTING LOANING

Amendments to Dominion Lands Act—Report of Committee of Mortgage and Investments Association

That many opportunities have occurred, and have been taken advantage of, to directly impress upon members of the Dominion and provincial legislatures the injury done to the credit respectively of the Dominion and provinces by legislation that imposes additional burdens upon borrowers and upon agencies which endeavor to meet their needs, was the statement made in the report of the executive committee of the Dominion Mortgage and Investments Association presented at the association's annual meeting held at Toronto this week.

Dominion Lands Act.

Referring particularly to the Dominion Lands Act, the report said:—

"The attention of the Dominion parliament at its sittings during 1917 was largely absorbed by extraordinary war measures, hence our request for legislation to facilitate borrowing by the entrants to different classes of homesteads when settlement and other desirable conditions had been complied with, was deferred. We have, however, the assurance of the Department of the Interior that such amendments to the Dominion Lands Act as will implement our requests will be passed at the present session. These amendments will provide—

> "(a) Re-entrants to abandoned homesteads to be required to assume seed grain, fodder and relief liens given to secure advances to previous entrant.
>
> "(b) Provision for the issue of certificates of recommendation when duties have been satisfactorily performed, and for modification of requirements as to residence.
>
> "(c) Pre-emptors and entrants of purchased homesteads to be placed in a position, when their duties have been completed, to obtain loans on the security of the land thus acquired by them.

"The importance of these amendments will be more apparent when it is remembered that nearly 9,000,000 acres are at present under pre-empted and purchased homesteads. In the three years prior to March 31st, 1916, 9,311 entries for these classes of homesteads were made."

The report then referred to the difficulties in connection with seed grain and fodder liens.

Provincial Legislation.

The report recalled the fact that Mr. Langmuir, the president of the association, and the vice-presidents, Mr. Cronyn and Mr. Saunders and Mr. A. E. S. Holt, were deputed to visit Ottawa while the provincial premiers were assembled there for the purpose of discussing with them the desirability of amendments to western legislation. The situation in the west was fully reviewed and rectification in several cases was promised, notably in respect of the Volunteer and Reservists Relief Acts, the Dower Act of Alberta, and the Land Titles Act of that province in regard to the personal covenant in mortgages.

Membership of Association.

The members of the Dominion Mortgage and Investments Association number 36. The assets represented amount to $687,708,348, as compared with $615,203,623 a year ago. These figures do not include the assets of companies representatives of which are members of the affiliated provincial organizations. The following is a list of the members of the association:—

GOOD OUTLOOK FOR CROP THIS YEAR

The Winnipeg Free Press presents its first crop report of the season, just six weeks ahead of last year.

The report, summed up, indicates a very satisfactory condition of soil, and considerable seeding already done. Seeding will be general in Manitoba on April 8th, in Saskatchewan about April 10th, while in Alberta seeding will be general in the south about April 15th, and in the north a week later.

A few spots in southern Manitoba report fallow blowing, but rain recently helped the situation. Generally soil is reported moist and mellow.

The early seeding is apparently helping the labor shortage to some extent, but the situation is pretty acute in some districts, while the general report is that domestic help is almost unobtainable. Under existing labor conditions it is not surprising that, while a few districts report increased acreages, the general indication is for an acreage little, if any, in excess of last year. Average rate of wages for farm help is given as $60 for experienced men.

The Monarch Life representatives from various parts of Ontario assembled last week in Toronto to discuss the company's Ontario operations Mr. J. W. W. Stewart, managing director, was present and delivered a particularly interesting and inspiring address. He announced that at the end of the first quarter one-third of the volume of business set for 1918 had been secured. After the banquet Mr. Stewart was presented with a beautiful cane.

PENSIONS OR INSURANCE?

Which is the Better for Returned Soldiers? — Pension-Providing Scheme Has Broken Down

What should the State provide for its soldiers, pensions or insurance? This is the question discussed by Professor W. W. Swanson, of the University of Saskatchewan, in an interesting article recently in the Manitoba Free Press. His article follows:—

That the pensions paid by the Canadian government to enlisted men are inadequate has been proved beyond peradventure. Both in parliamentary discussions and in the recent convention of western Liberals held at Winnipeg this problem has received serious consideration. The cost of living has mounted so high since the outbreak of war that the provisional scheme for providing pensions to Canadian soldiers, or to their dependants, has broken down. The government of the day has decided to throw the onus of formulating an adequate pension plan upon the new parliament, refusing for the present to deal with the issue because of its surpassing importance. In the meantime, we may learn much from studying the plan outlined by the American congress for taking care of the soldiers and sailors of the nation. The present article will deal with the more important points that are worth considering in the forecasted American legislation.

Experience With Pensions.

The United States, although involved in relatively few wars in the course of its history, has had experience with pensions beyond that of any European nation, at least with pensions on the grand scale. The republic has shown the deepest gratitude to its old soldiers, especially to those of the period of the civil war. Indeed, the pensions paid American soldiers and sailors since 1861 exceed the total cost of the civil war, being in sum total somewhat more than $5,000,000,000 to date. Expert American financiers compute that it will cost the nation not less than $2,000,000,000 to extinguish its obligations to civil war veterans and their dependants. The sum in itself is a staggering one, but it takes no account of the expenses of administration and the possibility for future raids on the federal treasury. Unfortunately, it must be admitted that the politician and his henchmen have prostituted the name and meaning of patriotism, as far as pensions are concerned, and have used the nation's bounty to advance their own selfish interests and ends. Along with all this have come corruption, malfeasance in administration, political log-rolling and sectional preferments for party purposes. The simple fact is that the pension fund became a boodle fund to be freely drawn upon for political objects. And, it may be noted in passing, the maintenance of lavish pension payments became the special interest of the Republican party for a decade and more, in order that it might justify itself in the eyes of the people in imposing high tariff taxes upon them. Therefore, not only because Canadians are faced with the same problem, but also because the Dominion is deeply interested in, and affected by, the economic and social life of the United States, it is a matter of more than ordinary importance to us to learn that congress is determined that the pensions to be paid, as a result of the present conflict, shall not again be used to debauch public and private life.

Settlement in Advance.

It goes without saying that the generous-hearted American people are considering, not the propriety, but the equity and expediency of their pension plans. The administration was determined that the lessons of the civil war should not have been taught in vain, and that former blunders might be avoided. The main object sought by congress, therefore, seems to be the formulating of a plan whereby a long continued drain upon the nation's resources shall be prevented. Reduced to its simplest terms, this merely means that American people wish, as far as possible, to pay for the war while it is being waged; and the tremendously heavy taxation imposed upon the nation is but another aspect of the same problem. In this respect the United States is following the lead of Great Britain, which is paying not less than one-third the cost of the war from current income. However that may be, the pivotal point of the American pension scheme is the determining in advance of the sums to be paid to the dependants of those who fall on the field of battle, and to those who are crippled in their country's cause. It has been decided to pay those who have a claim upon the nation a lump sum, in lieu of an annuity, so that the burden may be more accurately estimated, and provided for during the life of the present generation.

The cancellation of pensions, and the substitution therefor of cash indemnities, presents a problem both intricate and difficult. For the carrying out of such a scheme, however, the administration has the benefit of a score or more state laws bearing upon workmen's compensation. As far as sickness and disabilities are concerned, the experience of the various state boards, gained in applying such compensation laws, will prove invaluable. Moreover, it should be observed that the federal government has already established a precedent of its own for providing insurance payments to the dependants of certain classes who are exposed to the risks of war. As perhaps most of our readers are aware, every steam vessel which leaves an American port must insure its master and crew against submarine risks. If the ship owner refuses, or neglects, to do so, the government itself takes action and provides the necessary insurance, making the premium payment a first lien against the vessel. This work is under the direction and administration of the bureau of war risk insurance of the treasury department. It has worked admirably well and has succeeded in affording full protection to the dependants of American seamen who are compelled to voyage into the war zone.

Wanted Expert Help.

It was natural enough, once the government had taken action in this direction, to continue the policy wherever it could be wisely applied. Therefore, immediately upon the outbreak of war, the administration summoned a conference to deal with the whole question of pensions, of the council of national defence, the department of commerce and the treasury department. The members of these bodies, after an exhaustive investigation of the pensions problem, leant their full approval to the plans of the administration for paying indemnities, in lieu of pensions, to the officers and enlisted men of the land and sea forces of the United States. The government, however, feeling the need of expert, technical advice, early in July, through the secretary of the treasury, called into consultation a large number of insurance officials; and afterwards appointed a committee of prominent insurance men to prepare a plan of insurance against personal injuries received by enlisted men during the course of the war.

Project Was Approved.

The committee approved the entire project. Several experts in insurance pointed out, however, that the proposed indemnity for injury or death is not, strictly speaking, subject to the principles underlying the theory of insurance. They draw attention to the fact that the scheme involves no problems in the working out of which insurance practice and experience could be very helpful. They were decidedly of the opinion that it would be inexpedient to interpose an insurance company between the beneficiary and the government, inasmuch as this would merely complicate the administration of the plan and would benefit no one concerned. The committee recommended, therefore, that the government should carry on the work proposed through the bureau of war risk insurance, or through some other special agency created for that purpose. Beyond doubt, the administration will take action along these lines.

In brief, it may be said that three lines of development are being worked out as part of a larger scheme for preventing distress among those dependent upon the officers and enlisted men in the American army and navy. Space prevents our going into details, but the elements of the plan may be simply presented as follows: Soldiers may assign a certain portion of their pay to dependants, as under the Canadian plan. When this is done, however, in the American army, an extra allowance will be paid by the government to the family, the amount of which will depend in large measure upon the number of children in it. Indemnities will be paid in case of death, or of total or partial disability. The size of the indemnity will be measured by the length of active service, the number of children in the family, and the financial loss falling upon the family through the father joining the active forces of the United States. Our readers should take special note of the following important provision: Insurance at regular rates in amounts from $1,000 to $10,000 will be provided for those officers and men who are willing to pay the usual regular premium rates. Under this plan the American government will meet the entire cost of the allowances and the indemnities, and will take upon itself the duty of paying

ESTABLISHED 1841

Dominion Bank Building, Toronto, Canada

the special war risk premium on insurance policies issued to its enlisted men. It strikes us that, in this particular, the American government is doing the right thing, and the worthy thing, by its army and navy; and that the Canadian government should no longer refuse to assume the special war risk on policies that have been taken out, or that may be secured, by our troops and their officers on active service.

Just as Well as Generous.

We have come to speak so lightly of hundreds of millions, and even of billions, of dollars since the outbreak of war that the enormous and crushing cost of financing the war no longer impresses the average citizen. In a sense this is no time to calculate costs—the war must be won, no matter how bitter the price in human material, or its cost in mere money. Nevertheless, the common people in Canada and the United States feel the cruel pressure of the war in their economic life. Although wages have been materially increased since the beginning of the struggle, they have been far outdistanced by the soaring prices of food, clothing, coal and all the necessaries of life, not to mention the comforts and luxuries. All these facts must be taken into consideration in dealing with any pension scheme which, although it should be generous to those on the battle line, must be just to the people at home.

In this connection, it is estimated that at $4,000 per man in the American army—which is likely to be the standard indemnity—the indemnities for 1,000,000 men in the field will amount to $400,000,000 a year. That is not a crushing burden for the great and powerful republic, but it is no small one and will be felt in consumption, as well as in income, taxation. Nevertheless, even so great a sacrifice may prove well worth while if it will save the American nation from extravagant pension legislation in the years to come. But will it do so? And—what is more to the point—ought it to do so? He is a wise man who would seek to impose limits upon the generosity of a great people whose sons have risked their all, including life itself, for the honor and safety of the nation.

Conditions in Canada.

In considering the pension legislation of the United States, as outlined above, Canadian readers may question whether it could be made applicable to conditions in this country. It would require, for its carrying out, a large annual sum, which would mean additional taxation or further borrowing. Most readers will agree that taxation in this country, tariff and incomes taxes considered, has reached its furthest limits. On the other hand, if indemnities were to be paid from borrowing, it might give the government an equally difficult problem. Be it remembered that the last Canadian loan in New York—premium, interest and commission to J. P. Morgan & Company being considered—cost the Dominion almost 8 per cent. Although the perils arising in connection with pension payments are very evident and great, it is probably expedient for the Dominion to assume these risks and spread its payments to Canadian soldiers and their dependants over a period of years. On the other hand, there is absolutely no reason as to why our government should not assume, as in the United States, the special war risk included in the premiums on insurance policies granted to officers and men who seek to protect, in this way, those dependent upon them. It is entirely unfair to call men to the colors under conscription, and impose upon them extraordinary risks, without extending adequate protection. Under the present Canadian pensions plan, no fair-minded person will argue that our soldiers and officers are sufficiently provided for. The way out is at least suggested in the American scheme—lump sum indemnities for officers, equalization of pensions as between enlisted men and officers of the lower grades, and bonuses on insurance policies to cover war risks. At any rate, it is evident that this question will come up again and again for consideration and investigation; and in the meantime it will prove well worth while to study carefully the proposed American legislation.

COBALT ORE SHIPMENTS

The following is a list of the shipments of ore, in pounds, from Cobalt Station for the week ended April 5th, 1918:—

Buffalo Mine, 88,000; Aladdin Cobalt, 72,000; Hudson Bay Mine, 64,234; Dominion Reduction Company, 86,000; McKinley-Darragh-Savage Mine, 234,763; total, 544,997.

The total shipments since January 1st now amount to 4,810,901.8 pounds, or 2,405.5 tons.

CONDITIONS IN BRITISH COLUMBIA

(Staff Correspondence.)

Vancouver, April 6th.

Industry on the Pacific Coast was never more marked than at the present time. The outstanding feature of activity is that it is not confined to any particular line of production, neither is it confined to any few sections of the province. Figures show that the benefit accrues to every community throughout the southern section, as well as in the northern portions. Perhaps British Columbia has felt the depressing material effects of the war less than most parts of the earth, and the reaction coming after the days of 1914 is noticeable. Naturally, the question arises, Will the businesses which have been built up and the industries which have been created continue after the war is over? Such a question will relate particularly to shipbuilding. This is the one big, new industry, employing thousands of men, and bringing in its wake a number of correlative industries, which, added to the activity in lumbering and mining, has created a general prosperity. This is noticeable in the cities, particularly Vancouver, where rents have been ascending rapidly, and for residences they are almost on a par with what they were in 1912 and 1913. They are bound to go up more as the demand continues for houses, as labor is not only dear, but very scarce, which, together with the high cost of materials, will discourage building.

This is the apparent immediate effect of the industrial activity, and the suggestion has been made that it will fall off after the war is over. British Columbia, because of its resources in raw materials, has been slower than other portions of Canada to feel oncoming depression, and has been quicker in reaction. To-day, apart from prices quoted for real estate, it is ahead of what it was in what are called the boom days of five or six years ago. Figures of large companies indicate a great advancement. So, even if there was a falling off, it is doubtful if the retirement would be further than where the province was when war broke out. That any such backward movement should again take place is merely problematical.

There is every reason to believe that present prosperity will continue The big shipbuilding plants which have been established have work for many months, and, with the money invested, the owners will strain every effort to secure fresh contracts. With the initiation of a steel industry, the future of shipbuilding on this coast would be assured, in the opinion of many. That is the industry about which there is doubt. Should it be that in time ships are not constructed in such numbers as at present, there is ample call for labor in many other lines, and there is little question but that it would be easily assimilated as released from the shipyards.

With the big basic industries there is no doubt. Though the cut of logs last year was 40 per cent. greater than in 1916, and more than double that of 1915, to-day timber is scarce. Export has been again prohibited, after having been allowed for three years. When the war is over and ship tonnage is available, there is big demand for lumber in all parts of the world, especially Europe. Big pulp and paper mills, now getting into operation, will also demand labor, for the disturbed world conditions hampers them now, and when things are settled they will have found a permanent place in the world's markets for their outputs. The demand for minerals such as British Columbia produces will also continue after the war. Prices of copper and silver, perhaps, may not be quite so high, but they will be enough to ensure activity for many years. Metallurgical experts do not look for much falling off in the big markets, and if there is any, they look for quick recovery.

War prices and war demands have had the effect of a bonus. Under such conditions, industries have been established and put on their feet, new properties opened up, and operations undertaken which, would have been impossible in ordinary times. Opportunity has been given for a start which will be a factor in the event of any adversity in conditions.

These features apply to the principal industries which have been and will be the backbone of British Columbia. They are so marked that total provincial production in 1917 will be a record, and that of 1918 will be even better. Industrial strength is such that it will be comparatively maintained, despite what takes place.—R. B. B.

An experienced fire insurance man

for office and soliciting. Large office, western city, good opportunity to right party. State experience. Address:—

Box 165, MONETARY TIMES, TORONTO.

CORRECTION

An error of an unusual kind occurred in connection with last week's issue. On Monday, April 1st, under the heading "The Markets," on the financial page, "The Toronto Globe" published an item which was erroneous, as it referred to bonds of the Nova Scotia Steel and Coal Company, whereas it should have referred to bonds of the province of Nova Scotia. This item was clipped in our office and handed to a sub-editor, with a request that the latter prepare a paragraph for our paper calling attention to the error and correcting same, so that investors who had read the item in the "Globe" would not remain under the impression that the Nova Scotia Steel and Coal Company were making a bond issue at the present time.

Through a misunderstanding, the correction was not prepared as intended, but the clipping from the "Globe" was sent to our composing room and inserted in our paper! The result is that we now have our own mistake to correct as well as that of our contemporary. The Nova Scotia Steel and Coal Company are not issuing any bonds at the present time. The item should have referred to the issue of provincial bonds, complete details of which were given on another page of last week's issue, and which had also been referred to at length in previous issues of our paper.—Editor, *The Monetary Times*.

DIVIDENDS AND NOTICES

DETROIT RIVER TUNNEL CO.

Detroit, Mich., April 2, 1918.

Notice is hereby given that the Annual Meeting of the Stockholders of the Detroit River Tunnel Company, for the election of Directors and the transaction of such other business as may be brought before the meeting, will be held at the Head Office of the company, in the City of Detroit, Michigan, on the First Thursday after the First Wednesday (being the 2nd day of May) of May, 1918, at 10 o'clock a.m., Standard Eastern Time.

DWIGHT W. PARDEE,
Secretary.

Rev. W. J. DOHERTY, B.A., L.Th., Sec.-Treas.
Synod of Huron, Box 307, London, Ont.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Kitchener, Ont.—March 3—The departmental store of Weseloh and Gouldie, Limited, owned by A. Weseloh and Geo. Patter, was destroyed. The estimated damage to contents was $35,000; to building, $7,000. A total insurance of $46,000 was carried in the following companies: Mount Royal, $5,000; Northwestern National, $5,000; Fire Insurance Exchange, $3,000; Canadian Fire, $10,000; Queen City, $2,000; Gore District, $3,000; Economical, $2,500; Merchants, $2,500; Styuvesant, $3,500; Monarch Fire, $1,500; British Northwestern, $5,000; Phœnix of Hartford, $3,500.

Vancouver, B.C.—March 4—Two-story vacant frame house owned by H. Grossman formerly, but now in the hands of the Mortgage Company of Canada, was destroyed. The cause is said to be of incendiary origin. Estimated loss, $658. Insurance to the amount of $1,500 was carried in the Beaver Insurance Company.

Three and a half years of war have caused an increase of $111,000,000,000 in the public debt of the leading warring nations, according to tabulations made by the Federal Reserve Board at Washington. Of this sum, $72,400,000,000 represents the debt increase of the allied nations and $39,300,000,000 that of the central nations.

BRIGHT OUTLOOK IN WEST

"Conditions throughout Western Canada are exceptionally bright this spring." Such was the opinion, expressed most optimistically to *The Monetary Times* this week by the western comptroller of the Ogilvie Flour Mills Company at Winnipeg, who has just returned from an extensive trip through the west.

"The spring season," he said, "is opening up much earlier than usual, and seeding is in full swing all over the west. The greater production idea has taken hold in real earnest, and greatly increased acreage will be sown this spring. The land has been well prepared to receive the seed, and everywhere the farmers are hard at it."

There is great need of more production, as practically all the European wheat-producing countries are tied up. The war it is felt, is becoming more and more one of agricultural production. The country that can produce food, and yet more food, is the country that is going to win. Canada should be able not only to supply her own needs, but to give substantial aid in the way of food supplies to the Allies. Canada has vast capacity for production, and yet, in spite of the continued high prices for grain, only 12 per cent. of western lands, recognized to be the finest farming land in the world, is under cultivation. Less than 25,000,000 acres of Canada's 483,000,000 acres of prairie land available for cultivation are to-day being utilized.

Land in western Canada, besides being wonderfully productive, is remarkably cheap, and prices for grain and produce are abnormally high. These factors have combined to bring into the country large numbers of United States settlers, who, in most cases, have sold their homesteads in the States for twice or three times the amount they are paying for their land in Canada.

Since January 1st the immigration department of one railway alone has handled over 500 families of United States settlers, who have realized the great future ahead of Canada, and who are eager to have a share in it.

Trade in practically all lines in Winnipeg and throughout the west is brisk. Implement dealers are rushed keeping up with orders, and a notable feature about the business is that it is largely on a cash basis. The agitation about the removal of duties on farm implements is occupying the minds of implement men to some extent.

Hardware firms are also very busy, the demand principally being from the farmers. Wholesale houses are rushed with orders.

In the city the demand for houses is quite active, and rents are advancing.

SEEDING HAS COMMENCED IN THE WEST

Reports from the west received at the head offices of the Canadian Northern Railway system in Toronto indicate that seeding has been commenced at many points throughout the three prairie provinces in the territories served by the western lines of that company.

The districts reporting include Kipling, Radville, Regina, Bengough, Moose Jaw, Hartney, Carlyle, Gravelbourg, Elrose, Kindersley, Battleford, Hanna, Sibbald, Benton, Calgary, Craigmyle, Drumheller, Rockyford, Battle River, Red Willow and Alliance.

The report indicates that seeding will be started in most districts in the west on or about the 10th of April.

Report of the Directors of The Bank of British North America, Presented to the Proprietors at Their Eighty-Second Yearly General Meeting on Tuesday, March 5th, 1918.

The Court of Directors submit the accompanying Balance Sheet to 30th November, 1917.

The Profits for the Year, including $104,222.14 brought forward from 30th November, 1916, amount to $772,226.02 of which $194,666.66 was appropriated to an interim Dividend paid last October, leaving a balance of $577,559.36, out of which the Directors propose—

To declare a Dividend of 40s. od. per Share, payable, less Income Tax, on the 5th April next.

To pay the usual Bonus of Five per cent. to all the Staff, estimated to cost about $43,800.00, and also—

A Special War Bonus to those members of the Staff remaining on duty and of not less than six months' service to meet the increase in their necessary expenditure, estimated to cost about $34,066.66, and to carry forward $156,309.55.

The above Dividend will make a distribution of 8 per cent. for the year.

The Dividend Warrants will be remitted to the Proprietors on the 4th April next.

The Directors have made a Donation of $10,000 to the Halifax Relief Fund, and although the disaster did not occur until after the close of the Bank's financial year, they have included it in the Accounts now submitted.

During the year the following Branch and Sub-Branches have been closed:—Quesnel, B.C., Boucherville and Varennes, P.Q.

And a Branch has been opened at Kamsack, Sask.

The following appropriations from the Profit and Loss Account have been made for the benefit of the Staff:—

To the Officers' Widows and Orphans Fund	$ 9,456.29
" " Pension Fund	44,743.89
" " Life Insurance Fund	11,680.00

The following statement prepared by request of a Proprietor at the last Annual General Meeting shows the present distribution of the Bank's Capital:—

In Canada	533	Proprietors hold	6,356 Shares.
" Great Britain and Ireland	1,295	" "	12,993 "
" Elsewhere	67	" "	651 "
	1,895		20,000 "

London, 26th February, 1918.

H. B. MACKENZIE, General Manager.
E. A. HOARE, G. D. WHATMAN, Directors.

We have examined the above Balance Sheet with the Books in London and the Certified Returns from the Branches, and we report to the Shareholders that we have obtained all the information and explanations we have required and that in our opinion, the transactions of the Bank which have come under our notice have been within the powers of the Bank. As required by Section 56, Clause 19, of the Bank Act of Canada, we visited the Chief Office (Montreal) of the Bank and checked the cash and verified the securities and found that they agreed with the entries in the books of the Bank with regard thereto. We further report that, in our opinion, the above Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs according to the best of our information and the explanations given to us and as shown by the books and returns.

London, 4th March, 1918.
N. E. WATERHOUSE, FRANK S. PRICE, Auditors.

The farmers of Canada contributed $2,119,267 to the federal treasury during the fiscal year, 1916-17, in customs taxes on agricultural implements and farm machinery. Figures given to the Commons on April 8th by the minister of customs, in reply to a question by Mr. J. F. Reid, of Mackenzie, showed that customs taxation for the year on thrashing machinery, outfits, etc., totalled $477,895 on traction engines, portable engines, etc., for farm purposes $806,356; on harvesters, reapers, etc., $89,257; on ploughs and parts thereof, $373,504; and on other farm machinery, $280,255.

ALBERTA'S COMPENSATION ACT

The Workmen's Compensation Act, which was read a second time in the Alberta legislature on April 8th, will apply to all the industries and all the businesses in the province, with the exception of railway companies, which have been left out of the scope of the legislation for one year on representations by members of the trainmen's unions.

The act will be operative in respect to mines beginning in August of the present year, and in respect to the other industries on January 1st, 1919. Meantime, negotiations would be undertaken, Premier Stewart informed the House, with a view to having a uniform compensation law for the three prairie provinces, and probably British Columbia as well. Dealing with the claim that the compensation in case of fatal accident should be an annuity instead of a lump sum, as provided by the act, the premier said that if it were found desirable to make a change the alteration of the law would be retroactive. In connection with this point the first minister frankly admitted that the State would have to recognize its responsibility for the care of widows and children. This forecasts an insurance feature for the act.

MONTREAL BOND ISSUE FULLY SUBSCRIBED

The Bank of Montreal has announced that the public issue of $6,900,000 city of Montreal 5-year 6 per cent. gold bonds has been fully subscribed and the lists closed.

The result should be gratifying to the city authorities as well as to the bank which handled the issue, because it is believed to be the first instance of a public loan, other than war loan, issued in Canada in the manner it was issued.

The bonds were offered at par, without accrued interest for payment on the 8th of April. This means the payment to investors of a bonus of interest from the 1st of December, 1917, to the 8th of April, 1918, thereby reducing the net price of the bonds to a figure which makes the interest return 6½ per cent. per annum.

Directors of Maple Leaf Milling have declared the regular quarterly dividend of 2½ per cent. on the common stock and a bonus of one per cent. in addition. Both will be payable April 18th to stock of record April 8th.

Investment Advice

The right kind of investment house for you to deal with is one that makes the closest study of investments, one that can give you statistical information and the benefit of ripe experience as to the wisdom of making the investment you contemplate. Members of the Toronto Stock Exchange are responsible and established authorities on investment matters.

Any Member of the Toronto Stock Exchange can buy or sell any security for which there is a market anywhere in the world.

OUTLOOK FOR LOANING INSTITUTIONS

When Will London, Paris, New York Be Able to Resume Absorption of Loan Companies' Offerings?

Discussing the outlook for loaning institutions at the annual meeting of the Dominion Mortgage and Investment Association, Mr. M. Chevalier, managing director of the Credit Foncier Franco-Canadien, recalled that during the last four years the supply of new funds has been very much reduced, that the money markets of Great Britain and France have been practically closed, that the United States market, which was looked upon for a time as the only accessible one for Canadian securities, has, since the United States' entrance into the war, considerably reduced the facilities, and that even the Canadian investor, who was a frequent depositor with loan companies, has had his savings attracted by powerful and higher bidders.

"Under these conditions," he said, "the loan companies' attitude could only be an expectant one. They have been living on their past business and will have to do so until the war is over. While commerce and industries have in various branches greatly benefited by the war and wonderfully developed, the loaning business is, and will be, stagnant, until the conditions I have just referred to have been modified.

What are Prospects?

"What then are the prospects? Here we are treading on unknown ground, and the experience of would-be prophets during the last four years has not been very encouraging.

"There are probabilities, however, and these may be suggested by the study of similar circumstances in the past. Here in Canada we can hardly find in the past history of the economies of the country a period resembling the present one. We have passed through serious real estate crises, which were the result of local conditions and greatly affected the loaning business, but never before has the loaning business been governed by conditions of such a varied and unexpected nature.

"It is a well-known fact that the importance of the mortgage loan business is in proportion to the influx of immigrants. Just before the war was declared, Canada received in one year over 400,000 immigrants and the result was that the year 1913 was the heaviest on record for the loan companies. The North-West people in those days were always asking for more capital, and very often they received more than they could digest.

"Less than a year after, all that optimism was destroyed and the depression intense. Immigration practically stopped, and to cap the climax, in 1914, the crops were so poor, that the governments thought advisable to come to the assistance of the Western farmers. Things looked then very dark, and the natural consequence should have been disaster for many. But here we had to realize that the influence of the war, notwithstanding its terrible consequences, had unexpected and beneficial results. One very good and one fair crop sold at war prices put the farmer on his feet again.

Under Normal Conditions.

"Under normal conditions his prosperity should attract a large number of newcomers. Many are already coming from the neighboring states, but will the European immigrant resume his influx when the struggle is over?

"Perhaps Great Britain will send us a number of her discharged soldiers, but the arrival of the others is still a doubtful problem. Until it is solved the demand for funds is bound to be moderate. No great development is possible without an increase in population, and the best that the loan companies can hope is that until a new active immigration movement sets in, conditions in towns may improve as well as they have done in the rural districts. Then conditions will be normal and loan companies will find sufficient employment for their available funds.

Period of Moderate Demand.

"No one can predict now how long that period of moderate demand may last. But the chances are that it will not be of very long duration. We must not forget that Canada, with its immense natural resources, its vast territories still unoccupied, offers an irresistible attraction to settlers and fortune seekers, and that the flow of immigration which is now at its lowest ebb, may unexpectedly attain torrential proportions.

"When this happens, will the supply of funds be adequate to the demand which would result from this movement? Until the war Canada was amply supplied, even to an excess and indiscriminately, not only through regular channels, but by private individuals who living thousands of miles away could not judge of the value of the securities they held. The losses these private individuals have had to sustain are not forgotten yet. Fortunately, the loan companies, guided by their experience, have kept out of the danger zone and enjoy a good credit.

Demand and Supply.

"As soon as the demand exceeds their present supply an appeal will have to be made. What will be the result? We have seen that the markets are all practically closed. How long is this going to last? When will London, Paris, New York, be in a position to resume absorbing the Canadian loan companies offerings? The question is not an easy one to answer.

"That these markets will, after a time, occupy their former place on money centres, there can be no doubt, but the recuperation may be slow. We hear a good deal about the enormous accumulation of debt in all the allied countries, but this may sound and look worse than it is in reality. The misfortune of some makes the fortune of others, money changes hands but does not vanish and new investors will replace old ones. Competition, however, is bound to be intense. Devastated countries will call for a large expenditure and government issues will be a prominent factor.

Rights of Loan Companies.

"In order to succeed in securing funds in these markets, as well as in Canada, borrowing companies will have to offer to the investor a security that will stand the most critical examination. Until lately Canada has enjoyed abroad the best of reputations. It is important that this good reputation be sustained and that nothing be allowed to create outside the impression that the capital invested in Canada is not sufficiently protected.

"Unfortunately, during the last four years, there has been a pronounced tendency amongst the legislators of this country to disregard the just rights of the loan companies, and to interfere with their agreements. This has been carried so far that it was found expedient to organize your association for the protection of the companies. Thanks to your efforts, some good has already resulted. Time and experience will take care of certain provincial schemes and I hope that with your assistance and the numerous protests which find their expression in our financial papers, the public will realize how dangerous it is to frighten capital away."

CANADIAN NORTHERN RAILWAY SITUATION

The government has issued a statement on the Canadian Northern Railway situation, which asserts that no part of the system has as yet been taken over, and denies that the government has been paying bond coupons or notes for the Canadian Northern or its subsidiaries. The government has, however, paid $25,000,000 to the Canadian Northern Railway, which has been utilized as follows: Reducing construction loans, $3,500,000; equipment, $6,051,502; interest and sinking fund on mortgage securities, $15,398,498. This is in addition to $353,894 cash subsidies paid last December and a payment of $1,867,858 made under Guarantee Acts.

The comparatively small amount of the $25,000,000 which has been spent for rolling stock and equipment indicates that an additional sum will be asked from parliament later this year.

Mr. John Appleton, secretary of the Dominion Mortgage and Investments Association, left Toronto last night for Vancouver to attend the annual meeting of the British Columbia branch. Before returning to Toronto Mr. Appleton will attend the annual meetings of the Alberta, Saskatchewan and Manitoba branches of the association, to be held in Calgary, Regina and Winnipeg, respectively.

C. W. Kirkpatrick, prominent newspaperman, of Hamilton, was recommended by the board of control to succeed H. M. Marsh, commissioner of industries, who resigned on April 1st. In making the recommendation, the controllers gave careful consideration to the qualifications of all applicants. It was held that Mr. Kirkpatrick's many years' publicity experience would particularly fit him for his new duties.

CANADA'S WAR EXPENDITURE

Up to the end of February Canada's war expenditure on capital account totalled $207,849,726. For the month of February war expenditure was $19,494,711, as compared with $23,285,988 in February of last year.

Revenue for the eleven months' period ended February 28th showed an increase as compared with the same period of the last fiscal year. For the eleven months ended February 28th, 1917, it was $205,417,039, as compared with $229,766,627 for the same period ended February 28th, 1918. Expenditure on consolidated fund account rose for the same periods from $113,161,357 to $124,781,421. Revenue for February, 1918, was $21,225,872, as compared with $17,513,473, the revenue for February, 1917.

Canada's total gross debt at the end of February was $1,096,393,359. Assets were $985,612,889, leaving a net debt of $1,010,780,470.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

St. Lawrence Flour Mills.—Directors of the company on April 8th placed the stock of that company on a regular 6 per cent. basis, with the declaration of a dividend of 1½ per cent. for the quarter ending April 10th. The dividend is payable May 1st to shareholders of record April 15th.

In addition to the dividend of 1½ per cent. the directors declared a bonus of 1 per cent. for the quarter, so that the return on the common stock, if the bonus is continued, will amount to a return of 10 per cent on the stock.

Imperial Oil Company, Limited.—The company has recently put into effect a new scale of wages, covering employees at the various plants which the company controls throughout the country. The new scale will mean an immediate increase of approximately $650,000 per annum in wage charges, and follows other increases which have been made from time to time, particularly since the outbreak of the war. At the same time an important change will be inaugurated in connection with the working hours. Process men in the refineries who have been working twelve hours per day shift are to be placed on an eight-hour basis, while each employee in this class will have one day off in every seven. In respect to other classes of refinery labor previously working ten hours per day, there will be a reduction to nine hours per day with an increase in wages at the same time.

William A. Rogers, Limited.—In presenting the annual statement of the company to shareholders, S. J. Moore, the president, states that the profits of the company were affected by the entry of the United States into the war and the resultant falling off in the silverware trade.

The profit and loss statement compares as follows with previous two periods:—

	1917.	1916.	1915.
From previous year	$226,148	$188,499	$176,689
Profits	81,855	240,648	189,810
Bond interest	19,421	......	......
Preferred dividends	63,000	63,000	63,000
Common dividends	22,500	90,000	90,000
Reserve	.....	50,000	25,000
Carried forward	203,081	226,148	188,499

Canadian Fairbanks-Morse Company, Limited.—At the annual meeting of the company, on April 9th, earnings for the year, after deduction of operating costs and taxes, were reported as $1,033,817. From this was set aside $251,843 for depreciation, leaving net for the year of $781,974, compared with $636,629 in 1916. From this was deducted $135,000 preferred dividends and $436,000 dividends on common, leaving a surplus for the year of $210,974. The profit and loss statement compares with the previous year as follows:—

	1917.	1916.
Balance forward	$1,129,466	$ 697,836
Earnings	781,974	636,629
Totals	$1,911,440	$1,334,466
Preferred dividends	135,000	45,000
Common dividends	436,000	160,000
Surplus	$1,340,440	$1,129,466

Kipawa Fibre Company, Limited.—The prospectus of the company, a new Canadian industry, has been issued. The Riordon Pulp and Paper interests are closely associated with the enterprise. The mills are at Timiskaming, Que. The officers are: President, Charles Riordon; vice-president and managing director, Carl Riordon; second vice-president and manager, C. B. Thorne; secretary-treasurer, F. B. Whittet.

It is proposed to issue presently $500,000 bonds, $6,000,000 common and $6,000,000 preferred shares.

The purpose of the company is to make high-grade bleached sulphite pulp, and it is pointed out that the European product has not heretofore sold in America below $60 per short ton, ex-dock at Atlantic ports, making the delivered price about $63, and it is now selling at $160 per ton.

It is claimed that the company will be producing pulp while prices are still high. Assuming that the company will be able to sell its product at only $63 per ton, with a cost of $35, the net profits would be $28, which, on the basis of 100 tons per day, would be $840,000 per year, equal to 14 per cent. on the $6,000,000 preferred stock.

Sloss-Sheffield Steel and Iron Company.—The pamphlet report of the company for the thirteen months ended December 31st has been issued. The profit and loss statement shows total operating profit of $3,370,614 after deducting operating expenses, repairs, maintenance, renewals, etc. From that amount there was deducted $227,500 for bond interest and $665,741 for depreciation and depletion charges, making total deductions of $893,241, and leaving a balance of $2,477,373. Taking out $325,000 to cover the estimated income, war and excess profit taxes left $2,152,373; dividends amounted to $573,881 on the preferred stock and $148,869 on the common stock, a total of $722,750, which, deducted from the last previous balance, left $1,429,623 to be carried forward. Adding the previous surplus of $4,311,691 made the total profit and loss surplus as of December 31st, 1917, $5,741,314. The balance sheet as of December 31st shows total liabilities and assets of $27,844,354. Among the assets was $208,094; accounts receivable from customers for pig iron, coal and coke, $1,463,761, and Liberty bonds owned and subscribed for to the amount of $342,850. Accounts payable amounted to $738,908. President J. W. McQueen says during the year an appraisal was made of the properties of the company by qualified experts not connected with it, and that the values appearing in the balance sheet reflect the result of this appraisal and do not differ materially from those given in previous financial statements.

McKinley-Darragh Mines.—The annual report of the company, covering the year 1917, proved rather a disappointment to shareholders. Nevertheless, the actual physical and financial assets of the property as it stands are worth nearly double the current market price of the stock. The report shows that: Ore reserves are 1,076,182 ounces; slimes, 200,000 tons; liquid assets, $398,660.

The ore reserves at the current market value are worth 92 cents per ounce, or $920,000, and on this there is, on the 1917 cost basis, a clear profit, even after depreciation, of 35 cents per ounce, or equal to $350,000. The report does not give an estimate of the silver content of the slimes, but, as Cobalt slimes go, there should be at least six ounces to the ton. Now, 200,000 tons at this rate would mean 1,200,000. There are no mining costs in recovering the silver from slimes, and McKinley's entire costs, exclusive of mining, in 1917 were about 16 cents per ounce, leaving a profit of some 75 cents. The slimes should, therefore, be worth as an actual asset about $800,000. Hence, the table of actual assets, exclusive of ore in sight and the prospective value of the mine, works out at approximately $1,500,000, against issued capital of $2,247,692, or equal to 70 cents per share, as follows:—

Value of ore reserves, net	$ 350,000
Liquid assets	398,660
Value of slimes, net	800,000
Total physical and liquid assets	1,548,660

During 1917 McKinley-Darragh recovered 908,756 ounces of silver and shipped 1,020,545 ounces. Total net profits were $259,794, and dividends took $269,723. The surplus at the end of the year stood at $242,514, and, as was pointed out above, the liquid assets in cash, ore and supplies amounted to $398,660. The following table shows the company's ore reserves as compared with a year ago:—

	Ounces.
Estimated ore reserves on January 1st, 1917	1,714,302
Ore developed during year 1917	398,786
Total	2,104,088
Ore removed during 1917	1,027,906
Estimated ore reserves on January 1st, 1918	1,076,182

The company has 200,000 tons of tailings, with valuable silver content. An oil flotation mill is treating these tailings

Proposed Thrift Campaign*

Provision of War Credits for Great Britain—Inculcation of High Ideals Into the Minds of the Young—Introduction of School Savings Banks—Promotion of Economic Preparedness—Elimination of Waste and Extravagance.

By **GEORGE W. MORLEY, LL.B.**
(Formerly Secretary of the Canadian Bankers' Association).

It is a well-recognized fact amongst publicity men who have had experience in thrift campaigns on this continent that effective campaigns cannot be accomplished by fits and starts, by spasmodic newspaper articles or occasional advertising. Interest and enthusiasm must be aroused, and when aroused must be maintained for an appreciable period to allow time for the habit of saving to be thoroughly inculcated into the minds of the people. In the campaign which I have in mind there would be no overlapping of the territory covered by the Food Controller and the educational campaign being carried on by him. There would be well-written articles of an interesting and instructive nature in the press, discussion of ways and means, and exchange of ideas. There would be inspiring meetings held during the noon hour for factory employees, for children in the schools and for adults generally in the public halls. Thrift clubs and associations would be formed with the object of buying war savings certificates. To put it concisely, thrift must be made the general topic of conversation. The probable results of such a campaign would chiefly be as follow:—

(1) The provision of war credits for Great Britain, which is the primary object.

(2) The inculcation of high ideals into the minds of the young, as the future of the nation is in their hands.

(3) The introduction into the schools of a department of instruction now sadly neglected.

(4) The introduction of school savings banks to a wider extent.

(5) The attainment by the people of a better grasp of the principles of safe investments in government funds.

(6) The promotion of a greater degree of economic preparedness. Work is now plentiful, and wages high. This condition will not continue as a period of depression will immediately follow the war.

(7) The elimination, to a great extent, of waste and extravagance.

The proposition, if carried into effect, will result in the establishment of local thrift associations in all cities, towns and counties throughout the Dominion—a Dominion-wide thrift compaign. Every citizen will have the suggestion of thrift before him constantly for the period of six months. For the sake of illustration I submit the following:—

A person comes to breakfast in the morning and finds in the paper a quarter-page article suggesting his need of thrift. He turns to another page and reads a story telling of successes made by heads of families who have saved.

He takes the street car and finds a message for him in the advertising space. He goes into his office or factory and finds illustrated cards constantly before him during the day, emphasizing the advantages of saving.

On pay day, the wage earner finds in his envelope an interesting thumb-nail folder pointing out to him a new manner in which he should save.

He goes home and his child shows him one of the thrift booklets which he has been handed at school, and a discussion on the habit of thrift ensues around the family table. He finds advertisements in the evening paper, reminding him of modes to save as well as of ways to spend. After dinner, he may decide to go to the "movies" where between each reel is flashed on the screen another reminder of the thrift campaign.

The housewife, when she goes shopping, buys a thrift booklet at the bookstore, sees cards in the windows, and perhaps after her child comes home from school, she assists him in a prize contest for an essay on "Thrift."

Finally, at the height of the campaign, when everybody is interested, Thrift Sunday is declared and every clergyman in the city adds his influence by utterances from the pulpit reminding the public of the close relation existing between religion and thrift.

The outline of the plan is as follows:—

The city of Toronto is to appoint a commissioner to assume entire control of the campaign in Toronto. He is to confer from time to time with what would be known as the central committee, composed of three prominent citizens and a leading publicity agent. The city to be divided into wards—each ward, if possible, to have a committee appointed by the Board of Trade, to keep in close touch with the commissioner. The committee should comprise a banker, newspaperman, clergyman, merchant, lawyer, manufacturer, chartered accountant, university professor, physician, and trades unionist, with power to add to their number men in other walks of life. This ward committee will choose their own chairman, organize

Comment upon this article appears in our editorial columns on page 9.

a speakers' bureau, arrange for meetings from time to time, forward monthly reports to the commissioner as to the progress of the campaign in its particular neighborhood, and generally keep in close touch with the commissioner, arranging for co-operation as follows:—

The Schools, Colleges and Universities.

(*a*) The establishment of schools savings systems such as the Brooklyn system, whereby children may be taught how to conduct a savings bank themselves, and be allowed the privilege of opening a bank account at a chartered bank as soon as anyone had a dollar to his credit. I have the forms which are used in Detroit, and it would be quite easy to arrange for someone to go there and see the system in actual operation, with a view to installing it here. I would suggest a conference with the cashier of the Peninsular State Bank, Detroit, who is in close touch with the working of the system. Printed instructions would be provided for school principals respecting the plan, and monthly reports on accounts could be furnished the commissioner.

The cashier of the Peninsular Bank, in a letter some time ago gave the following concise account of the Brooklyn saving system:—

"All the work is done by pupils of the schools; eight boys and as many girls are selected to take care of the savings in each school. They form an organization just like that of a bank, with president, cashier, assistant cashiers and bookkeepers. One day a week is designated for receiving deposits, and on the day the pupils in charge of the bank are on hand half-an-hour before school opens. The bookkeeping is done after school hours. As soon as a pupil's deposits in the school bank amount to $1 he is given a treasurer's or cashier's check, which he may deposit in any savings bank of the city, opening an account on which he will be paid interest. A regular set of blanks is provided in the schools with deposit slips, checks, receipts, etc. Under this plan the pupils not only learn the importance of saving their money, but receive training in banking methods, which is of great value to them in later life."

(*b*) Provision for regular systematic thrift talks before the schools, a manuscript of an appropriate address being furnished every month by the commissioner, and fresh booklets on thrift being distributed every month to be read in class and taken home. Special attention could also be devoted to questions on arithmetic relating to thrift.

(*c*) The distribution of lapels to be worn by children, *e.g.*, "I save dollars, do you?"

(*d*) The co-operation of the universities and colleges with a view to educating the poor and supplying lectures through their departments of political economy.

Newspapers, Periodicals and Leaflets.

(*a*) The publication of regular editorials, news items, advertisements and articles on thrift, and by having a special supplement on thrift in weekly papers and Saturday editions.

(*b*) The donation of prizes for the best essays and definitions on thrift, and for the best thrift slogans, and arranging for publication of the same.

(*c*) The printing of pamphlets and leaflets on such subjects as the saving of coal, food, extravagance and bad form in dress, and the unnecessary use of motor cars and the consumption of gasoline. These could be distributed through the post office or through the media of the police.

(*d*) The co-operation of booksellers in keeping supplies of books on thrift, a list of which could be furnished by the commissioner.

The display of signs and cards in railway coaches, street cars, steamboats, and the use of electric signs by such companies as the Hydro-Electric and Toronto Electric Light companies.

In arranging for special attention to be given to the opening of savings bank accounts, as for instance the encouragement of thrift among their employees in general, and the distribution of printed enclosures when pass books and cancelled cheques are handed back to the customers at the end of each month.

In arranging for a "Thrift Sunday" once a month, and if clergymen so desire it, laymen having special knowledge of thrift could occupy the pulpits, a monthly communication to be sent by the commissioner suggesting material for sermons. Literature used in the campaign also would be provided in order that clergymen may have a proper understanding of the scope of the campaign.

Chartered Accountants.

In arranging for the preparation and distribution of monthly account cards and for the collection of same. These to be examined by a committee with a view to pointing out faults and publishing monthly hints and leaflets of advice as to how best to cut down expenses and keep books. I would suggest that folders for accounts be distributed to households in the following form, or to the like effect:—

(Inside of the folder)

TO HELP THE FAMILY BUDGET EXPENSES.

(Some suitable motto)

Wages	Should Spend	$	$	$	$	$	$	$	$	$	$
$	Spent as follows:	House Food	Clothes	Car Fare	Amusement	Education	Patriotic; Red Cross; Religion	Insurance	Other Expenses	Savings	Total
Day											

(Outside of the folder)

PERSONAL ACCOUNT

OF

ADDRESS ....

for week ending

....1918.

Cinematograph Theatres.

Arrangements could be made with the Bureau of Commercial Economics, Washington, for illustrated lectures and motion picture films such as "The Reward of Thrift," a three-reel photo play produced by the Vitagraph Company of America. The various theatres could arrange for itineraries. This form of advertising thrift would be excellent, as the "movies" are very popular with the public.

Arrangements should be made to teach foreigners Canadian customs, *e.g.*, educate them to distinguish between an immigrants' bank and a chartered bank by the distribution of thrift talks in their own language and persuading them to keep their money in the country.

Encouragement of Thrift at the Source.

It is chiefly where the wage and salary earner draws his pay that the best opportunity for advancing the cause of thrift presents itself, and the idea would be to teach him habits of thrift which would tend to have him become a consistent money saver. I would suggest that thrift be encouraged in the following ways:—

(*a*) By printed cards containing thrift mottoes displayed in offices and workrooms—mottoes to be changed every two weeks.

(*b*) By thrift talks by prominent men at noon meetings.

(*c*) By the distribution of folders containing thrift reminders enclosed in pay envelopes.

(*d*) By the formation of factory savings associations and other clubs, *i.e.*, combinations of wage earners in the buying of war savings certificates. In this regard I would suggest that one of the following two plans (if not both) be adopted:—

(1) In order to save time and eliminate inconvenience to employees in going to banks and post offices, make arrangements for post office or other officials to come once a week and sell war savings certificates on the ground, and in order to catch the smaller savings, have sold stamps of twenty-five cents each which will be applied on $10 certificates.

(2) The plan adopted in England, and followed in Australia. The idea would be to encourage systematic saving by grouping a number of people together and having them agree to contribute a certain sum per week, two weeks, or month (as the case may be) to a common fund, appoint a secretary-treasurer to do the banking, and have him hand out pass books and enter up the deposits made therein from time to time. This plan would not only encourage thrift on a small scale, but would also result in the buying of certificates and allowing the government to use the money at an earlier date than would otherwise be the case. For instance, if thirty-five people agree to contribute to a common fund, a twenty-five-cent contribution every week by each of them would result in the purchase of a $10 war savings certificate instead of the government having to wait thirty-five weeks for certificates amounting to $350.

(*e*) For the sake of convenience the printed forms could be issued, signed by the employee instructing the pay clerk or bookkeeper of the factory to deduct so much each week and apply it to the purchase of a war savings certificate.

(*f*) Where pay envelopes are not used, and pay sheets adopted, a memorandum could be attached thereto calling the attention of the employee to save so much each pay day.

(*g*) On each cheque issued, an endorsement of a few words regarding thrift could be stamped at the left-hand top corner.

(*h*) The inauguration of strict office rules respecting office waste. For example:—

(1) The saving of all string, cord and twine from packages received.

(2) The use of clipless paper-fasteners and the discontinuance of clips and pins, except in necessary cases.

(3) The use of special delivery stamps only after an employee is convinced that service secured will be worth the difference.

(4) The encouragement of employees to think far enough ahead to use mail instead of telegraph or telephone.

(5) Economy in the use of blotters, correspondence paper, etc.

(6) The encouragement of the use of fountain pens, by means of which ink is saved and efficiency increased.

(7) The use of backs of letters having no value coming into office for memorandum paper.

Co-operation and Encouragement.

The above is a mere outline of what could be accomplished if a thrift campaign became a fact. Besides the media mentioned there would be the following:—

The co-operation of women's clubs, such as the Daughters of the Empire, Women's Canadian Club, Young Women's Christian Association, etc., in encouraging economy in dress, good housekeeping and domestic science, and in the collection of old rags, papers and magazines; of children by the use of thrift lapels; of the Canadian Club, Rotary Club, clearing houses, Young Men's Christian Association, boards of education, the Canadian Manufacturers' Association, the Canadian Press Association, the Ontario Motor League, lumbermen's, dry goods and tanners' associations, insurance companies, express and steamboat companies, and by the use of advertising media such as theatre programmes, tickets, envelopes and curtains, wagon signs, thrift exhibits in shop windows (showing the contrast between thrift and waste), health pamphlets, leaflets (as to the saving of coal and the disposition of rubbish), electric signs, lobby cars, window signs, bill boards, store window posters, periodical public parades, cartoons in newspapers, with series of thrift pictures with the purpose of focussing attention, besides innumerable other methods of co-operation and media which would be suggested by people of every calling from time to time.

COBALT ORE SHIPMENTS

The following is a list of the shipments of ore, in pounds, from Cobalt Station for the week ended April 13th, 1918:—

Trethewey Mine, 77,980; La Rose Mine, 62,719; Coniagas Mine, 88,000; Beaver Mines, 72,469; O'Brien Mines, 64,640; Dominion Reduction Mines, 66,000; Buffalo Mines, 154,000; Kerr Lake Mines, 119,671. Total, 705,479 pounds, or 352.7 tons.

The total shipments since January 1st now amount to 5,516,380.8 pounds, or 2,758.2 tons.

ESSEX COUNTY BOND ISSUE

Messrs. A. E. Ames and Company, of Toronto, have been awarded a block of $60,000 6 per cent. bonds, payable in 20 annual instalments. The issue was sold at 98.539.

The production of silver from the Nipissing for the month of March amounted to $308,048, thereby exceeding the February output by over $12,000, and maintaining its big record of approximately $10,000 per day. According to a statement by Mine Manager Park to the president and directors of the Nipissing Company, the amount of bullion shipped during March totalled $475,013, as against the $308,048 produced.

LETTERS TO THE EDITOR

Farmers' Money at Low Rates

Editor, *The Monetary Times.*

Sir,—Among the varied and interesting contents of your issue of April 15th, certain statements are made which appear to me to require some qualification or explanation.

In your editorial headed "Financing the Small Farmer," you give some interesting particulars as to efforts made to revive interest in production in the New England States. According to the facts you quote, that movement is very desirable. You state, however, that in Canada, aside from the chartered banks, little or nothing has been attempted in this direction. The writer of the article in question must have overlooked the fact that there is a very considerable amount of money being offered to the farmers in the Canadian West at rates as low as those for which the government itself has to pay for the funds it requires. The farmers, however, are enjoying such prosperity as enables them to pay off their mortgage indebtedness, and those who are not paying off their mortgage indebtedness are increasing their capital in the farm by additional stock and implements to aid them in increasing production.

You have also overlooked the fact that in Manitoba the Honorable Mr. Winkler has provided for the farmer financial facilities for obtaining livestock, and the same policy is being vigorously pursued by the Honorable Duncan Marshall in Alberta.

I am merely drawing attention to these facts as I think so influential a journal as *The Monetary Times* should give due credit to such laudable efforts.

It is noted that, in a paragraph following your editorials, you state that the first ten months' operations of the Manitoba Farm Loans Association show a very satisfactory condition. It would be very interesting to your readers to have the facts in connection with the operations of this association. You will remember that a short time ago the Honorable Mr. Brown made a statement in the local legislature which did not give any information upon which the success of the undertaking could be judged.

The outstanding facts are that the Manitoba government is paying 7¾ per cent. for money, while it is loaning, to a very limited extent (and probably this is the only redeeming feature of the association's loaning operations) at 6 per cent. Mr. Brown, it will be noted, also stated that some telephone replacement funds had been obtained at 5 per cent.

As *The Monetary Times* is highly regarded amongst the trust companies and other fiduciary corporations, it will come as somewhat of a surprise to them that it lends—by stating that the operations of this association are in a satisfactory condition—countenance to the misuse of the replacement funds to which I have made reference. If the trust companies whose operations are regulated by statute were to misuse trust funds as the provincial government of Manitoba appears to have done, they would find themselves in the hands of the law and those responsible would be fortunate if they escaped the common jail. Your efforts to direct attention to the adequate financing of the farmers, I may add, is very laudable and will be fully appreciated by all who realize the present position of the Empire. Any aid given, however, should be on sound principles.

I have just been informed by a friend who was in Winnipeg recently that the plan for co-operative borrowing by farmers for the purchase of livestock has made some progress but that has been arrested by the fact of the rate of interest which the local associations may pay the banks being fixed at 6 per cent. As you will understand that when the Manitoba government itself has to pay 7¾ per cent., it cannot be expected that the banks will be willing to advance money to these said associations at 6 per cent. Naturally then, however laudable may be the efforts of the associations, it cannot be expected that the banks will continue to provide accommodation at a 6 per cent. rate.

The provincial treasurer, I understand, approached the banks with a view to their being more generous, but they pointed out to Mr. Brown that his experience with the Farm Loans Act might have shown him some of the difficulties incident to providing funds at 6 per cent. The only answer he could make was—"Oh, that will have to be changed." There is no doubt of that.

The great mistake which appears to be made by those with the laudable desire to assist the farmers, is their belief that the government can provide credit at less than its market price. The result is that money will not stay in those provinces. Mortgages are being paid off and the money remitted to Europe. The action of the provincial governments in thus trying to interfere with the law of supply and demand is turning the current of capital away from a field which has unmeasured possibilities in the way of production. This is one of the results of making economic law the football of parties and politicians.

Yours, etc.,
"Britisher."

Toronto, April 11th, 1918.

[*The Monetary Times* is indebted to "Britisher" for his interesting and instructive letter. In regard to the operations of the Manitoba Farm Loans Association, the views of this journal are well known through editorial comment during the past year or so. The paragraph to which "Britisher" refers, so far as we recollect, was obtained as an announcement to the press by the association some weeks ago, and was the association's own views as to the results of its work. This should have been stated at the time. Editor, *The Monetary Times.*]

Life Insurance and Cost of Living

Editor, *The Monetary Times.*

Sir,—In your issue of the 5th inst., Mr. M. P. Langstaff has offered an interesting criticism on some letters of mine that have appeared in Canadian Insurance. Mr. Langstaff has not misunderstood my meaning but has introduced some new factors which I had not thought necessary for my purpose—which was to expose a very obvious fallacy.

Writers and speakers on the value of life insurance have made much of the fact that while during the last decade or more other necessities of life have risen enormously in price life insurance remains the same and so might be regarded as comparatively cheap. But this is a superficial view.

In purchasing boots and shoes or groceries we deal with two different things, money and the material bought or sold. In life insurance we consider an indemnity and the premium for it both of which are to be paid in money. What affects the one therefore affects the other, so that there is no anomaly in the fact that while bacon, flour, rent, fuel, etc., have soared in cost life insurance remains the same.

What I contended was—and it cannot be refuted—that premiums bear an approximately fixed relation to the amount of the policy. As the value of the one fluctuates so will that of the other. I used the word approximately so as to allow for variation in interest and the increase in the expense element in the loading. But these would affect the principle at issue so little as to be negligible. I had by no means overlooked these factors but it would be only confusing to discuss them.

I called the argument for cheap insurance "camouflage" and that is just what it is. In many essentials the cost of living has increased from 50 to 100 per cent. But supposing the companies substantially increased the premiums, how absurd this would be in view of the fact that the face value of the policy would buy only about one-half of what it would have procured formerly. Why should we pay an increased premium for a decreasing benefit.

If it were necessary for the companies to raise their rates for insurance with those of other commodities they would not hesitate one moment to do so unless they wished to commit hari-kari. The fact that the companies refrain from raising their rates with the prices of other things clearly proves that it is not necessary to raise them—and no one knows this better than Mr. M. P. Langstaff.

Yours, etc.,
B. W. N. Grigg.

Waterloo, Ont., April 12th, 1918.

Mr. J. Gardner Thompson, manager for Canada of the Liverpool and London and Globe Insurance Company, and president of the Liverpool-Manitoba Insurance Company and also of the Globe Indemnity Company, was a visitor to Vancouver recently.

THE EXCHANGE SITUATION

The persistence with which the quotations for New York funds stick in the neighborhood of 1¾ per cent. premium, is causing much discussion; and merchants, manufacturers and others who require to purchase exchange in considerable amounts are manifesting some uneasiness over the continuance of the adverse conditions. It will be remembered that the large exports of Canadian grain last fall turned the exchange with the United States in our favor; and as the American embargo upon gold exports was then in force, New York funds in October sold at a discount of ½ per cent., with an extreme drop on one occasion to 15/16 per cent. Then came the Canadian bankers' trip to Washington, as a result of which the United States government agreed to release $25,000,000 for export to Canada if required. Although very little gold came over, this announcement rectified the position of the exchange market—the quotations throughout November and during the first half of December being close to par. After the close of interior navigation the grain movement, of course, was cut down to small dimensions; and perhaps as a result of the scarcity of export bills, the quotations for American exchange began to rise in the second half of December. For practically the whole of the first quarter of 1918, the market has been very much against us, the high record of 1⅞ per cent. premium being reached a short time ago.

It is to be noted that the exchange market misses the sundry flotations of Canadian bonds in the American market, which were in evidence throughout 1915 and 1916. Every now and again some Canadian province or large city would place in the United States an issue of new bonds, the amount of which might range from $1,000,000 up to $7,000,000 or $8,000,000. Proceeds of such flotations would go to the credit of our banks in the books of their New York correspondents; and the banks found these credits very useful for supplying the exchange needed by Canadian importers during seasons in which the grain exports were at low figures. When the United States entered the war, in April, 1917, these sales of our securities in the American market had to be discontinued. The Washington government wished to have the available funds of its investors reserved for its own war issues. The accounts of our banks in New York were thus no longer replenished from time to time by means of the payments in connection with new bond issues there. Also, we have been under obligation to remit interest to New York on account of our securities held abroad. Some of these interest remittances are important. The interest on the $100,000,000 New York loan of the Dominion government placed there last August, calls for $2,500,000 on February 1st and a like amount on August 1st. Interest on the $75,000,000 Dominion loan of 1916 requires $1,875,000 on April 1st and a like amount on October 1st. Then we have been obliged to repay the principal as well as the interest on a considerable number of our maturing bond issues. Since the $7,000,000 loan of the city of Montreal matured in December last, various other Canadian municipal and provincial bond issues have fallen due in New York, and Canada has been obliged to find exchange to retire them at an inconvenient season of the year. Exports of Canadian grain will be resumed on a large scale next month, and it is but reasonable to expect that the movement will have some effect in correcting the abnormal exchange situation.

PROPOSED THRIFT CAMPAIGN

Elsewhere in our columns will be found an outline, by Mr. G. W. Morley, of a nation-wide thrift campaign. The recognition by parliament that it will require at least $500,000,000 to finance Canada's military needs during the present fiscal year, brings sharply to the fore the need of devising the most efficient methods for financing a tremendous undertaking of such scope and magnitude.

Quite correctly, Mr. Morley emphasizes the fact that thrift campaigns "cannot be accomplished by fits and starts, by spasmodic newspaper articles or occasional advertising." The programme proposed is comprehensive in scope; and if carried into effect immediately should accomplish much in accumulating that indispensable reservoir of capital absolutely essential to finance Canada's part in the winning of the war.

Briefly stated, this programme involves the providing of war credits for the United Kingdom, and incidentally, of course, for Canada; the inculcation of habits of thrift and patriotic ideals in the young; the teaching of thrift in our schools, universities and workshops; and the instruction of the whole nation in correct principles of investment and the management of funds. If even a tithe of what is outlined be carried into practical effect, lasting results, beneficial to the economic life of the nation will be in evidence long after the close of the war.

One cannot over-emphasize the simple, stark truth that saving is vital to the winning of the war. Nevertheless, there is confusion in many quarters as to the precise connotation of this term; for there are sharp limits set upon the extent to which fruitful thrift can be carried. For example, the Food Controller and his staff have taught the Canadian people how to substitute other commodities for sugar, beef, bacon and wheat—foodstuffs essential for the support of our overseas troops. Loyal and patriotic citizens have done their utmost to co-operate in this direction, only to discover that, in many cases, the substitutes are much higher in price than the original foods. No one would grumble at this state of affairs, even if the saving of the right kind of exportable foodstuffs raised the cost of living in the individual family budget, if it were not for the fact that higher prices for substitutes reduces saving power and limits, to the same extent, power to invest in war loans.

Against this no decent-minded citizen can complain, for our soldiers at the front must come first, and receive full support no matter what hardships are imposed upon those at home. It does emphasize, however, the absolute necessity of careful distribution of available supplies, as well as efficient production. Nevertheless, it is obvious that the supplies requisite for the support of the men at the front must be produced in great degree, day by day, and month by month, as the war is being waged. To produce these supplies demands the most rigorous application of the nation's industrial energy to essential war work. And the control of industrial power costs money.

Thrift produces two specific results, aside from its lasting effects upon character—it provides the funds for the control of industrial power, and at the same time withdraws that industrial power from non-essential industries. Ceasing to spend upon luxuries, directs capital and labor to the mining of coal, the production of ships and shells, the breaking up of a bigger acreage of fertile lands, the exploitation of timber limits and a score or more of other basic activities. In a word, to save money is nothing if it does not also save industrial power.

We are not convinced that Canada's labor forces have as yet been effectively organized. The penalty which the government has recently made it possible to impose upon the shirker and idler should be vigorously enforced. There are thousands of men in the Dominion under-employed; thousands imperfectly employed; and other thousands available, if need exists, to be withdrawn from the field of marketing into that of production. It is clear, none the less, that no industry should be denuded of its labor force uselessly, until a definite demand for labor comes from employers in factory, mine, or on the land—from those engaged in turning our war supplies. Unemployment can accomplish nothing by way of winning the war, nor idle factories and shops. Thrift is essential up to the point of providing fluid capital for war loans; but beyond that point, it becomes a vice. There is a world of difference between saving and hoarding. To make clear that distinction, and to fire every man, woman and child with enthusiasm, and to deepen the will for victory, is the all-essential task that confronts those planning and organizing the great drive for financing the war.

CANADA AND THE LIBERTY LOAN

The campaign in the United States for flotation of the third Liberty Loan is proceeding vigorously. Many of the cities and towns have already reported subscriptions considerably in excess of the amounts which they were asked to subscribe. Recent news from the battle fronts in France and Flanders has been such as to stir the hearts of the people and awaken them to the serious nature of the military crisis that was precipitated by the launching of the great German offensive. The heroic resistance of the Anglo-French and American forces, and the heavy losses sustained by them in their great fight for human liberty, have already been effective in swelling the loan subscription lists; and the financial community is confident that the $3,000,000,000 asked for by the Washington government will be far more than covered.

At first it was thought that the monetary situation in Canada might be affected adversely—through the movement homewards of American funds yet employed here, and through further drying-up of the stream of American investment money running in this direction. But the behavior of our exchange and money markets during the first half of the Liberty Loan flotation period, indicates that these apprehensions were groundless. It is evidently the case that most of the temporary funds employed in Canada before the United States declared war, has been returned already; and the recall of the remainder probably would not have a pronounced effect upon us. At any rate, since the loan prospectus was issued, on April 6th, the premium quoted here for American funds has shown a slight tendency to fall.

As regards the movement of American funds to this country, it is well known that the sales of Canadian provincial and municipal bonds in the United States have been comparatively small since last April—for a considerable time our provincial and municipal borrowers have been obliged to make their new issues of bonds in the domestic market. The bond houses in Toronto and Montreal have, however, been able to sell sundry bonds to individual investors in the United States, these parties being attracted by the unusually high interest yields; and probably their sales to these clients would be suspended or discontinued during the flotation period. Some American capital continues to drift here in the form of remittances to branch American plants by the parent concerns for the purpose of adding to the equipment or extending plants. This movement is not likely to be stopped by the loan campaign, in cases where there is urgent need of increased productive capacity. It is conceivable that a very successful flotation with the loan heavily over-subscribed, might lead to a re-opening of the discussion of an American credit for Canada in connection with the trade balance. If that matter is taken up again, and if it is decided that circumstances would permit of the granting of a substantial credit to our government, the financial situation here, especially as regards exchange, would undoubtedly be favorably affected.

EFFECT OF WAR LOANS ON SAVINGS BANK DEPOSITS

The following extracts are taken from a circular recently sent out by the investment house of Blyth, Witter and Company, Los Angeles, Cal. After asking what the effect of the Liberty loan and war savings certificates on savings bank deposits in the United States will be, the circular reads:—

Great Britain and Canada have entered the second half of their fourth year of the war. During the whole period their respective issues of war debt totalled $24,500,000,000 and $925,000,000. At the outset their respective savings deposits aggregated $1,120,000,000 and $722,000,000, while at the present time they are reported $1,266,000,000 and $983,000,000. Respective increases 13 per cent. and 36 per cent. On the per capita basis, the debt of the United Kingdom of Great Britain before the war was $76.20, which compares with $615 at the present time; while savings deposits per capita are practically unchanged from $80 before the war to $79 at the present time. In Canada the per capita debt before the war was $69, compared with $166 at the present time, an increase of 140 per cent.; while savings deposits per capita have increased from $93.05 to $119.85, a growth of 28.8 per cent.

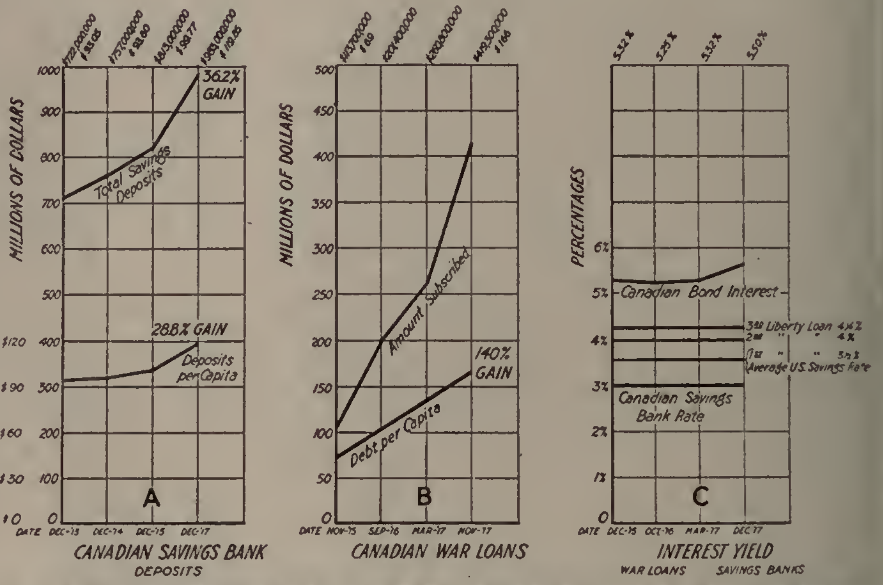
Canada, in general respects, gives the best basis on which to make predictions of the future trend of savings bank deposits in the United States as a result of recurring war loans. Accordingly, a graphic chart based on Canadian statistics has been prepared, as shown hereof, which may indicate a condition likely to materialize in our own country. Of the three divisions of this chart, A indicates the growth of savings bank deposits from December, 1913, to December, 1917, which took place during practically the same period in which Canadian war loans to the extent of $445,000,000, were subscribed, as shown by B. In a period of sixteen months war loans equalling 62 per cent. of the savings bank deposits at the beginning of that period were subscribed, and at the end of the period savings deposits had increased 36 per cent.

While the interest yield on Canadian loans exceeds 5 per cent., Canadian savings bank allow an average of 3 per cent., and in spite of this lesser rate, have constantly gained in deposits. If such an interest disparity fails to check the growth of savings bank deposits in Canada, it appears logical to assume that in the United States, where Liberty Bonds yield from 3½ per cent. to 4¼ per cent., with savings banks paying from 3 per cent. to 4 per cent., the growth of savings deposits will continue proportionately greater than in Canada.

The number of subscribers to successive war loans is indicative of an increased investing power, which, as above shown, has not been as a result of the diminishing savings bank deposits.

	Persons subscribed.
Canada's first war loan	1 in every 317
Canada's second war loan	1 " " 229
Canada's third war loan	1 " " 187
Canada's fourth or Victory Loan ..	1 " " 10
The first English loan	1 " " 23
The second English loan	1 " " 38
The third English loan	1 " " 13
United States first Liberty Loan ..	1 " " 27
United States second Liberty Loan	1 " " 11½

War savings certificates, if results in the United States follow those of Great Britain, will not lessen the growth of savings bank deposits. The British War Savings Commission reports that thrift has been stimulated to the ultimate good of the savings institutions.



In the above diagram the small figures at the lower extreme left, and the smaller figures across the top of Diagram A represent the increase in per capita savings deposits during the period under review, while the lower and shorter line in Diagram B represents the increase in per capita debt. C indicates the relative interest paid on Canadian war loans, Liberty loans and by savings banks.—Editor.

CROP OUTLOOK FAVORABLE

According to the "Monthly Commercial Letter" of the Canadian Bank of Commerce for April seeding has already commenced in the western provinces. The weather so far has been favorable and in all three provinces there is a very large increase in the land ready for crop. The only difficulty at present is in procuring additional labor in order to seed the larger acreage properly, but government departments are co-operating, as far as possible, in aiding farmers to obtain both labor and machinery. Fortunately the spirit of co-operation among all the agencies which aid production is very pronounced, and as a result it is anticipated that the acreage seeded will be greater than that of any previous year. More than usual attention has been given to procuring the best class of seed and municipalities have been given power to help farmers who, from one cause or another, are without proper supplies. In Ontario seeding has been completed in some districts, while in others some delay has been experienced in obtaining seed as a result of transportation difficulties.

It is quite apparent that farmers, while giving due heed to the urgent call for a larger supply of wheat, are not neglecting other forms of production. During the past month many sales of pure bred cattle have been held, and the prices paid indicate a more intelligent interest in this branch of farming. The production of wool has also attracted more attention than hitherto, especially in the western provinces where shearing time is now approaching. Alberta expects this year to lead the other provinces in the volume of this product. The provincial treasurer states that the wool clip increased from 500,000 pounds in 1914 to 2,086,000 pounds in 1917, with an advance in price from 16 cents to 57 cents.

The price of wheat in Canada for the 1918 crop is to remain at $2.21, which is regarded by the farmers themselves as being satisfactory. The prevailing prices of other grains, although not fixed, are very much higher than a year ago. No. 2 C.W. oats are quoted at 91¾ cents as compared with 65 cents, No. 3 C.W. barley at $1.65 as compared with $1.10, and No. 1 N.W. flax at $3.84 as compared with $2.69⅞. Large quantities of wheat continue to be delivered at interior elevators, and in the hands of farmers there are considerable stocks yet to be hauled to country elevators.

Henry A. Sherrard, chief agent of the Western Assurance Company, died Wednesday last, after an illness of one year. Mr. Sherrard entered the service of the Western Assurance Company thirty-six years ago as a junior clerk. He was born in Ireland fifty-four years ago and had been a resident of Toronto for many years.

GOVERNMENT OPPORTUNITIES AFTER WAR

Need of Expansion in Imperial and Foreign Trade—Forethought of Problems Encouraging Production

BY A. T. DRUMMOND, LL.D.

(This is the second of a series of three articles on the above subject to appear in "The Monetary Times.")

That New South Wales last year had an external trade with thirty-seven different sections of the British Empire and with ninety-four foreign countries or their island groups in the Pacific ocean, and that this trade embraced dealings with every continent on the globe, is a suggestion to us in Canada that our external trade, which in the past, before the war, had been so largely restricted to Great Britain and the United States, is capable of great expansion in a similar way if we throw into it as much enterprise and energy as we have done into the home trade. The war has now opened up new markets among our Allies, not only in war munitions, but in railway and special engineering equipment, military clothing, food supplies, aviation material and ship construction, and the problem for the Dominion government and the manufacturers will be to not only retain this advantage, but to arrange now to extend it after the war to all other lines of production in which Canada can excel. Great Britain lives by its external trade, and its government has already awakened to the need of immediate steps to largely increase it, whilst the United States is making strenuous efforts, through its government, its banks and its manufacturers, to largely expand, especially in Europe and South America, its already important foreign trade. Thus, with the competition which these two countries and Germany will, when peace arrives, create, it will require all the forethought which our Dominion government can now, without any delay, give to the problems of encouraging production, of securing information, and of, in advance, preparing transportation facilities and trade arrangements; and equally, it will need all the initiative and energy which our manufacturers can apply to the economical utilization of our varied natural resources if Canada is to successfully invade the markets of the Empire, as well as those of foreign states. The Dominion government may well give direct encouragement, as did the British government, to the formation of a great trade corporation to promote not only foreign trade and its long credit requirements, foreign exchange and the gathering of information regarding foreign credit, but new enterprises in Canada, the insurance of foreign and domestic bills and other lines which do not compete with the purely Canadian banking business of our own present institutions. The government has also its opportunity of encouraging, by direct aid, chemical and electrical research, which the last four years have especially shown to be of such vast importance to the development of our natural resources and of our manufacturing interests. And there are markets waiting now for our initiative. For some time there has been a growing desire throughout the British West Indies for closer commercial relations with Canada, and now is the time to follow this up and not leave it until after the war. Brazil and the Argentine are other markets waiting to be investigated.

Weights and Measures.

In Great Britain strong efforts are being made in banking and commercial circles to introduce the decimal system of currency, with the sovereign, or one pound sterling, retained as the unit, and the Associated Chambers of Commerce, which include British commercial bodies in even foreign countries, have at the same time presented petitions and prepared legislation for the consideration of parliament in London, under which, if passed, the metric system of weights and measures will become the legal standard in Great Britain. The adoption of this standard will not only simplify the present cumbersome system, but would co-ordinate British weights and measures with those of many other countries, and be thus of great value in the enormous foreign trade of the Kingdom. As Canada long since adopted as its standards the British system of weights and measures, and is now preparing to enter largely into the foreign trade, the same arguments which are being employed in Great Britain in favor of the metric system would apply as strongly here. Why should not our Dominion government investigate the subject now?

In eight of the provinces of Canada we may be said to be a one-language people, with English as our sole acquirement, but are intersected by another extensive province in which French is almost exclusively spoken, and where the pride of the people in their language has raised serious problems in education in other provinces into which there has been an overflow of population from this province. Under the Confederation Act the subject of education was reserved to the provinces, but since the war began the development of the foreign trade and the more intimate connection of Canada, now and in the future, with Imperial interests at home and abroad, have brought education in foreign languages within the range of the requirements of the Dominion government, but on a broad basis, which will embrace not only the conversational and correspondence sides, but a knowledge of the literature, institutions, political relations and commercial laws and customs of the foreign countries with which trade is being developed. Business with France will, in the coming years, be large, and thus the French language will be a feature of interest in all of the more important manufacturing and exporting cities of the Dominion, whilst, at the same time, of great value in the constant intercourse of the people of the other provinces with those of Quebec, both socially and in business. All of the provinces in eastern Canada have thus a direct interest in encouraging the study of the French tongue, and this, perhaps, more than anything else, will help to allay the ill-feeling presently pervading the French-Canadian people. Acquaintance with foreign languages will also raise the educational standards in all of the provinces. No well-educated man should, at home or abroad, have to admit his inability to use any but his own mother tongue. And the need of an intimate acquaintance with modern languages will increase as the foreign trade continues to expand as our Dominion government's foreign interests enlarge, as they must, and as our association in Imperial affairs, leads, especially our Canadian university graduates, into the diplomatic, civil, consular and trade services of the Empire, which will be, without doubt, opened to them all over the world. Here then is an opportunity for our Dominion government to at once advise with the provincial governments and the universities with a view to stimulating this study.

Transportation Problems.

An over-readiness to yield to sectional demands and some lack of insight as to the real needs of the country in transportation have been serious results in the past of our Canadian political systems. Extensive and costly lines have been built by the Dominion government through long stretches of country where there never can be a progressive population and a paying traffic, and where climatic conditions will always be a barrier to economic operating. Subsidies have also been granted by both provincial and Dominion governments to transcontinental lines for the construction of subsidiary lines and branches to open up new country, when the already built sections were, and would be for years, suffering for want of a local population and business for which there were large openings. Overseas transportation appears, on the other hand, to have been somewhat neglected by the governments, although on both the Atlantic and the Pacific oceans there were splendid opportunities for a maritime trade. Why, for instance, is it that, except for sugar, our direct trade with the West Indies has languished, that our merchants so extensively buy tropical products in New York and Boston instead of importing them direct, and that our manufacturers have practically lost the West Indian markets to the superior enterprise of New York, Boston and New Orleans? And the markets of Venezuela and the central American states were involved at the same time. Why is not trade cultivated with the Argentine, Uruguay and Brazil, where there are increasingly progressive people and extensive markets both for our own products and for many which we, in turn, need? Inadequate or complete lack of transportation facilities form one important reason. It is the part of the Dominion government to enter into trade agreements with foreign states and nations, to subsidize ocean transport lines, to promote fast freight services on its own and other railway lines in this country, and by trade information from its representatives in other countries and in other ways encourage and facilitate individual enterprise in building up a foreign trade.

Some important problems in transportation needing attention are:—

Fast two to three-day freight services, equipped as to temperature and ventilation, between Toronto, Montreal and

the Halifax piers; fast steamships, similarly equipped, that will ensure delivery of West Indies products in Montreal and Toronto within fifteen to sixteen days from West Indian ports, and cold storage facilities at points of shipment.

To facilitate business with the maritime provinces and abroad, constituting the Intercolonial and Transcontinental Railways from Moncton westward to Quebec as one double-track line, which would continue thence as an allied, double-track Grand Trunk and Dominion government system to Montreal, Toronto and Chicago.

To aid the Transcontinental Railway between Winnipeg and Moncton in meeting expenses, sending over it all import and export traffic and all maritime province's business, originating on or going to the Canadian Northern and Grand Trunk Pacific lines at Winnipeg and westward, only Ontario and Quebec business being routed via their Ontario lines.

Replanting of Trees.

Thirty-five years ago an international convention was held in Montreal in the interests of forest preservation from fire and of more conservative methods in lumbering and granting of timber licenses, which then had no relation to the existing forest supplies and to the future needs and revenues of the country. The attendance was large, and the interest aroused in the United States resulted shortly thereafter the establishment of the important Bureau of Forestry at Washington and of forestry departments in some of the state governments and of various state forestry associations. In Canada the result was much less satisfactory. The Dominion and provincial governments were for many years somewhat indifferent to the issues involved, apparently comforting themselves with the belief that our forests were almost limitless; that existing methods were satisfactory; that the burning annually of the pines and other trees in two or three townships would not, amid boundless supplies, affect the general situation, and that the future might well take care of itself. The friends of forestry were unheeded in their repeated warnings, and it is only within the last few years that the largely decreased supplies of pine and spruce lumber, the small sizes of the logs and the continued devastations of forest fires, entailing great loss of life and vast quantities of forest timber, at last awakened our slumbering Canadian governments and forced them to realize that something must be done. Protection from fire is now receiving some attention from the different governments, although the writer has repeatedly, but in vain, suggested to them that carelessness and disregard of forest regulations, which always have been the greatest causes of forest fires, should, if only for the moral effect it would have, be made criminal. Little consideration has, however, as yet, been given to afforestation; that is, the replanting of the destroyed areas. It is an important problem if our duty to the future is worth a thought. What is needed is an immediate government policy, supported by legislation, under which many thousands of young pine, spruce and hardwood trees will be annually planted and cared or by each of the different governments on a systematized plan in the burned and cut-over districts formerly occupied by these trees in eastern Canada and British Columbia; and further, that in all grants or renewals of Crown leases to lumbermen there should be strict provision for the leaving, on each acre leased, of two or three each of mature pines and other woods for seeding purposes, and for the planting and subsequent care of two or three young trees of the same species for every tree cut down for lumber purposes; and all this to be carried out under proper forestry regulations.

Municipal Legislation Needed.

An unduly extended area within its limits, an extraordinarily large assessed property valuation, a comparatively small population, and a municipal debt out of proportion to the population and apparent wealth of the municipality are not unknown features in connection with scores of the cities, towns and villages of the western provinces. The inclusion within their limits of many hundreds—occasionally running into the thousands—of vacant lots, as if each town plot had in it the future of a great city, enabled these places to greatly extend the values on their assessment rolls, and to borrow correspondingly on the strength of this apparent security. During recent dull years hundreds of these lots, in each of many cases, have been abandoned to these municipalities through the taxes being unpaid, and, although highly assessed under the single tax system, have in reality often barely a farm value.

Legislation seems urgently needed under which no city, town or incorporated village would be allowed to annex any new areas unless a given number of approved buildings had been erected and permanently occupied on, for instance, each ten acres proposed to be annexed, whilst no village should be incorporated unless its boundaries were limited to a quarter of a section, or even less.

There should also be legislation under which all municipalities should have more defined limitations fixed for them, both as to population and assessed property, beyond which debts could not be incurred unless for public utilities, from which it is purposed to obtain ample net revenue to meet their respective interests and sinking funds as well as renewals, whilst as to these public utilities, no propositions should be permitted where the municipality would not control, or the operation of which would lie or extend outside the municipality, as in the case of an interurban railway.

Measures should also be passed to compel every city, town and village to utilize its garbage and sewage for economic purposes, including fertilizing the soil on civic or other farms, instead of, as so generally at present, depositing them in dumps or in the lakes and rivers, there to form a source of danger for their own citizens or those of neighboring municipalities. Similar legislation should also apply to the wastage of all mills, chemical works and factories generally, in probably all of which wastage can be utilized for its by-products, or directly as a fertilizer. These are pressing problems from the points of view of both conservation of waste and public health.

BANK OF HAMILTON

The 46th annual report of the Bank of Hamilton, appearing on another page of this issue, contains a statement of the business of the bank for the 15 months ended February 28th, 1918. Another period of successful business has been experienced. The profits for the 15 months were almost $600,000, which is more than the profits for the preceding business year, even after allowing for the extra three months. After paying five quarterly dividends at 12 per cent. per annum, and other expenses, including contributions to the Patriotic, Red Cross and Relief Funds, they have been able to carry $232,421.80 to the credit of profit and loss, or almost $25,000 more than last year.

The continued advance in prices and in wages has resulted in a further increase in circulation, and, in spite of the drain through war loans, both current and savings deposits have increased considerably.

The bank's holdings of Dominion and provincial government securities, which were last year $569,458.46, are now $3,295,775.32. This indicates the extent to which the bank has helped to meet the unusual financial needs of the Dominion and provincial governments at the present time. At the same time their holdings of other Canadian securities have been increased.

The bank also wrote off during the year $50,000 against bank premises, the present valuation of these being $2,145,455.13.

COST OF VICTORY LOAN

A statement was submitted to parliament on the 12th inst., by Hon. A. K. Maclean, acting minister of finance, showing the cost of floating the last war loan. The expenses were given as follows:—

Organization expenses	$ 376,000
Publicity campaign, paid to Dominion Publicity Committee	163,000
Canadian Press Association	207,000
Remuneration to brokers	750,000
Commissions to canvassers	1,140,000
Remuneration to bankers	984,395
Total	$3,620,395

Further expenses, including printing, etc., would, it was announced, bring the total to about $5,000,000, or about 1¼ per cent. of the allotment. *The Monetary Times* got in touch with the department of finance for further information, but were advised that fuller details are not at present available.

Mr. C. H. Neely, United States manager of the Ocean Accident and Guarantee Corporation, and formerly manager for Canada of the same company, is visiting Toronto this week.

Value of Life Insurance to the Individual and to the State

The War Has Inculcated Habits of Thrift—The Menace of Unemployment or Illness, Old Age and Death, is Ever Present—Economic Importance of Population Makes Vital the Problem of Conservation of Human Life in Canada.

IT requires little or no argument, so far as details are concerned, to demonstrate the vital value and growing importance of life insurance to the community as a whole, as well as to the organized community, the state. It is patent that increased insurance per capita, whatever form that insurance assumes, lessens the burden of taxation for the whole community, and avoids the necessity of dealing out doles to the aged and the infirm, whether through charity or direct government action. Doubtless the filial tie is, in most instances, sufficiently strong to prevent actual want overtaking parents in old age; but, for this, experience has shown sufficiently well that there is no guarantee. Moreover, a hundred and one circumstances and accidents of fate may intervene, which result in throwing the aged and infirm upon exterior aid of one sort or another. Even from the selfish point of view, therefore, whether of the state or the individual, the providing of sufficient insurance, in relation to financial power, is not only desirable, but essential as well.

Main Sinews of War.

The war has driven home, as nothing else could, the supreme value of thrift. Contrary to general opinion, it is not the large corporations, financial or industrial, that provide in the main the sinews of war. In the United Kingdom alone, since the outbreak of hostilities in August, 1914, credits have been arranged on war account to the astonishing total of $35,000,000,000, the greater part of which has been secured through the combined effort of the entire nation. Thrown upon its own financial resources by the exigencies of war, Canada has subscribed a total of $982,000,000 in answer to the government's appeal for $450,000,000. It was recently stated in the Commons, by the acting minister of finance, the Hon. Mr. McLean, that approximately $500,000,000 would be required from the Canadian people to finance the military necessities of the government for the current fiscal year. The amount will be forthcoming, but it will be forthcoming only by rigorous excision of extravagant spending and by a combined drive for the practice of greater saving and thrift.

Life Insurance Agents.

Life insurance agents are the skirmishers on the advanced battle line in this thrift campaign. Far from being unproductive, as has been unjustly charged in some quarters, these men are performing service of the utmost value to the community and the state. It is beyond our immediate purpose to delve into the problem as to what precisely is the nature of production; it must suffice to say that the maker of material goods is far from being the only producer in the community. The worker who concentrates upon the production of necessary services is essentially a producer; for even the material product is not finally produced until the sales force places it in the hands of the final consumer. This point needs no elaboration—it is only when the worker is divorced from association with the marketing of material goods that he is liable to find the aspersion, "non-producer," cast at him. And for high-minded men, convinced of the value of their work, it is doubly difficult to put forth their best energies and effort under these conditions.

The life agent performs at least two services of fundamental importance—in his everyday activities he is carrying forward the campaign for saving, economy and thrift, on the one hand, and helping in great degree to remove the menace of economic want due to old age or death, on the other. During the course of the war the inculcation of habits of thrift and the providing for enforced saving are of the greater national importance. But at the conclusion of hostilities, when the colossal financial burdens at present imposed upon the community by the demands of war are removed, the securing of economic freedom for workers in every sphere of life will take on a new and higher significance.

Just as risk is inevitably associated with industrial enterprise, so, like a shadow, it follows the individual worker throughout all his productive years. The menace of unemployment, of accident, of illness, old age and death, is ever-present, and no man can put forth his best efforts until that menace is wholly, or in part, removed. Insurance of one kind or another has, during the last generation in particular, been so designed in principle and practice as to meet the need of the individual, and to effectually remove the economic risk attaching to life. So important was this problem considered in Germany before the war, that the state had developed a great scheme of social insurance to remove the disabilities under which the masses of the people laboured. The United Kingdom, a few years since, formulated a programme for government insurance against sickness, and—to a smaller extent—against unemployment. In addition, the United Kingdom spent millions of dollars each year on old-age pensions. We are persuaded that state action, on this continent, will not bring the results that private enterprise can achieve; that the management of the Intercolonial, in Canada, and of the Post Office in both the Dominion and the United States has not made government administration and the supervision of economic activities welcome to the people. The responsibility of carrying forward the vitally important service of insurance must remain in the control of private enterprise.

Estimating Life.

The war has demonstrated as never before the value of human life. Estimating life in the lowest, material terms—and neglecting for present purposes all cultural and spiritual factors—it is clear that the loss of a single man on the field of battle subtracts from the wealth of the state. The soldier's life is snuffed out, in the majority of cases, while he stands on the threshold of the years of greatest production. There is here, then, a double loss—the loss of twenty or thirty years of productive labor, and the loss of the expenses of bringing him up to the producing age. It needs no special argument to teach Canadians the economic importance of population. For a decade before the outbreak of war increased immigration occupied the minds of our government and people alike. The settling of the prairie provinces, through immigration from the United Kingdom, Continental Europe and the United States, geared up every commercial and industrial enterprise in the land. The country knows full well that increased population is essential for the complete utilization of our economic equipment, and for the reduction of per capita taxation costs. That increased population can be secured by natural increase, and by immigration, both of which are important. Hitherto, attention has been centred upon the latter problem; but, in view of the great demand for labor for the rebuilding of Europe, it will be well not to place too much reliance upon a rapid increase of immigration at the close of the war.

Conservation of Human Life.

The problem of the conservation of human life becomes a matter of imperative importance, then, to this country. This is a problem that bristles with difficulties, medical, economic and social. Human life is conserved to the extent that it is made more vigorous, and to the extent that its years are lengthened. It may not be generally known what a marked difference there is, in this latter particular, between the peoples of the various modern nations. In Sweden and Denmark, the average life is 50 years; in the United States and England 45 years; in India 25 years. Short as the span of life in our generation is, it has been greatly lengthened within the last hundred years. In England within 50 years, five years have been added; in Prussia during the last 25 years, 6 years have been added; while, if Europe as a whole is surveyed for the last three hundred years, it will be found that better economic conditions have added enormously to the span of life. In conserving human life no one single institution is doing so much as the life insurance company.

The life agent, therefore, need make no apology for the kind of work he is doing in war time—work, whether he knows it or not, that is of supreme value to the state. On the other hand, it is equally true that no man can justify his work to-day, unless it has in it something of the nature of social service; and unless he throws into it his every effort. Human labor is about the most precious commodity in the market just now. Through the reserves of labor, efficiently directed and administered, the war will be won. It is necessary to keep that idea and ideal before us in these dark days.

days in which no slacker, whether within or without the zone of military operations, can be tolerated. In a word, the imperative duty lies upon the nation of so conserving and strengthening its economic resources as to provide the widest opportunity for the absorption of its soldiers, at demobilization, in normal business pursuits, and for meeting the pressing problems of peace.

DISABILITY CLAUSE IN LIFE POLICIES

Sixty Per Cent. of Insuring Public Demand It—Prominent Feature of Workmen's Insurance Laws

If the insurance salesmen of some 50 years ago could have foreseen the policy contracts which the salesmen of the present day are able to present to the insuring public, they would have turned sea-green with envy. The old pioneers who blazed the trail for the insurance companies in those days were like most pioneers, in that they had much labour with a modicum of gain. Not only had the public to be educated into the fundamental principles of life insurance and its indispensability, but the agent had no trail of allurng fragments leading up to his proposition, in the shape of surrender values, paid-up insurance, loan privileges, extended term insurance, and so forth. But competition and legal enactments have gradually led to the introduction of one privilege after another, so that the present day contract errs, if at all, on the side of liberality.

Of these various privileges which have been introduced from time to time, the total and permanent disability clause is, probably, of most recent date. Not that insurance against disability is in itself new. As Mr. B. D. Mudgett points out: "Under the name of invalidity insurance it forms a prominent feature of the workmen's insurance laws of a number of European governments, where protection has long been granted against both temporary and permanent invalidity caused either by accident or disease. As early as the 18th century, invalidity insurance was furnished to members of the mutual aid societies of Germany and Austria, and it was extended rapidly in the 19th century to many classes of workers. The friendly societies of Great Britain and the fraternal orders and labor unions in the United States have likewise paid disability benefits. With the stock companies in the United States insuring accident and health risks, this sort of protection, has, of course, held first place, but the value of accident and health policies has been greatly restricted by the fact that these companies issue a one-year term contract and possess the option, therefore, of refusing to renew at the time when the insured may be most in need of the protection."

Introduced by European Companies

The European life companies were the first to introduce the disability clause in their contracts, and it was not until 1896 that the clause was adopted by any of the American companies. Since then, however, it has spread rapidly and appears now in one form or another in the policy contracts of the great majority of the American companies.

It was the year 1910 before the Canadian companies were permitted by law to insert the privilege, and even then it was only in a restricted form. The Canadian Insurance Act of 1910 authorized the companies to "issue life policies, including in the same policy insurance against disability caused by accident or sickness, but the amount of such disability insurance shall not exceed the premiums payable or accruing on such life and disability policy during the period of disability insured against, but in case of total and permanent disability the company may, at the request of the insured, and without further payment of premiums, pay, in full settlement of the policy, and as a substitute for all other benefits and privileges thereunder, a total and permanent disability benefit not exceeding the sum insured under the said policy." In 1917, this section was amended to permit of the payment of total and permanent disability benefits under life insurance policies without reducing the amounts which may be paid as main benefits, and Canadian companies were thus enabled to incorporate a clause in their policies which could compete successfully with that of the American companies. The Actuaries' Club of Toronto, realizing the importance of having uniformity among the companies in respect to this disability provision, appointed a committee in the fall of 1917 to draft a clause suitable for use by Canadian companies. This committee drew up the clause which has since been adopted by practically all the Canadian companies. Its main provisions are as follows:—

"Upon proof being furnished to the company that the assured has become wholly disabled by bodily injury or disease, so that he is and thereby will be, permanently and continuously, unable to engage in any work or occupation whatever for remuneration or profit, then:—

Waiver of Premium.

"(a) The company will waive the payment of the premiums which may become due thereafter under this policy during the continuance of such total disability. In making any settlement under this policy the company shall not deduct any part of the premiums so waived and all benefits provided by this policy including surrender and loan values, shall be determined in the same manner as though any premiums waived under this provision had been paid in cash.

Monthly Income.

"(b) Furthermore, the company will pay to the assured a monthly sum equal to $10 for each $1,000 of the principal sum assured by this policy, the first monthly payment to be made six months after receipt of the said proof of total and permanent disability, and subsequent payments monthly thereafter during the continuance of the said total disability of the assured, ceasing with the last monthly payment preceding the maturity of this policy. The amount of this policy payable at maturity shall not be reduced by any payments made under this disability provision."

The liberality and genuine worth of the disability clause as illustrated in the above form, are self-apparent. Nevertheless, we find here and there companies declining to employ it in their contracts. Such companies argue that the provision is not life insurance; that it may be misrepresented by agents; that there will be a tendency to give the clause too much prominence, to the ignoring of other and more important features; that it is difficult to define disability, and litigation may possibly result therefrom; that there is a lack of disability statistics upon which to base the premiums; that competition has led to inadequate premiums being charged for the benefit; and so forth.

Provision is Not Life Insurance.

(a) Life insurance should give permanent protection, otherwise it is not worthy of its name. The occurrence of permanent and total disability may necessitate the lapsation of insurance that is badly needed by the assured. True, the policy may contain provisions for automatic extension, but as such extended period is of limited duration and, moreover, necessitates a growing indebtedness on account of unpaid premiums, it may be of little value in the average case of disability. Moreover, life insurance should provide for all the risks of death, and total and permanent disability has itself been called a sort of "living death" and the period is usually of brief duration before actual death takes place.

Misrepresented by Agents.

(b) The clause in the majority of cases is so clearly and unambiguously worded that it is difficult of misconstruction. Insurance enactments and the work of the Life Underwriters' Association have, too, made the day of misrepresentation in insurance salesmanship virtually a thing of the past.

(c) That there will be a tendency to give the clause too much prominence, to the ignoring of other and more important features. This objection would hold in the event of a company granting the clause being in competition with one that does not issue it. But as the great majority of companies now have the provision in their policies, such competition would rarely occur. In the main, the disability provision would not be advertised beyond its real merits.

Total Disability.

(d) That it is difficult to define "total disability" and litigation may possibly result therefrom. The point involved here, is the limitation of the benefit to those who are totally disabled from earning a "living," quite regardless of the normal occupation of the insured or the kind of "living" he may be enabled to make, if accident or disease render him unable to follow his accustomed vocation. For instance, we can imagine a musician having the fingers of one hand injured so that he can no longer follow his usual occupation, but he may still be able to earn a remuneration in some other way. In this connection an amusing story is told of the case of a man who was totally paralyzed. His wife was a thrifty woman who operated a chicken farm. While in the husband's sick room one day, she had an inspiration, and returning, packed a number of eggs about the invalid's body, the experiment resulting in the hatching out of a brood of chickens.

A MARK OF CONFIDENCE

During 1917 this Corporation assumed the administration of 488 Estates and Trusts, valued at over $10,000,000. Efficient service begets confidence. Write for booklets, "Making Your Will" and "A Talk With a Business Man."

Details of a Safe Investment

are contained in our Booklet, "Guaranteed Trust Investments." On the Guaranteed Trust Investment Plan moneys are entrusted to us for a three-year period or for one of five years. Such funds are invested by us for the most part in carefully selected first mortgages on improved real estate. Sums of $500 and upwards are accepted, and interest at a satisfactory rate is paid by cheque half-yearly.

We are glad to mail a copy of the booklet anywhere on request.

National Trust Company
Limited

Capital Paid-up, $1,500,000 Reserve, $1,500,000
18-22 King Street East, Toronto.

The query naturally followed: "Was the man wholly incapacitated from contributing to the support of the household?"

In practice, however, few, if any, claims of total disability arise, the genuineness of which cannot be determined without difficulty. Taking, for example, cases of paralysis, insanity, incurable tuberculosis, locomotor ataxia, we see that the question of total disability or otherwise can easily be proved. Then, too, the clause specifies certain accidents which, without prejudice to any other cause of disability, the company will consider as valid claims—e.g., the entire and irrecoverable loss of the sight of both eyes or the severance of both hands at or above the wrists, or of both feet at or above the ankles, or of one entire hand and one entire foot.

Lack of Disability Statistics.

(c) That there is a lack of disability statistics upon which to base the premiums. Some force pertains to this objection without doubt, as the American companies have not been employing the clause a sufficient length of time to allow for the accumulation of sufficient trustworthy data in respect to total and permanent disability. Fairly reliable data, however, has been found in the experience of American fraternal societies and tables constructed therefrom, and the premiums deduced from such tables are recognized as being safe, and a fair measure of the risk involved until the experience of the old-line companies themselves is available.

The introduction of the total and permanent disability clause is a real step forward in the evolution of the life insurance policy. The "waiver of premium" and the "monthly income" throughout disablement gives protection where and when it is greatly needed, and performs a true function of life insurance. The privilege is here to stay. In the language of a contemporary: "Each year we see companies adopting it which have previously been hostile or lukewarm toward the plan, and when we read criticisms from those which have not yet adopted it, we are reminded of the reply of a well-known Bishop who was asked for an opinion concerning tango dancing. He stated that in the course of his pastoral duties he had not chanced to see the tango danced, which he suspected was likewise the case with most of those who were so vigorously criticizing it in the newspapers."

WINNIPEG RED CROSS CAMPAIGN SUCCESSFUL

(Western correspondence.)

Winnipeg, April 15th.

The generosity of the people of Winnipeg was again demonstrated in a marked way by the Red Cross campaign which closed last week. Three hundred thousand dollars was the amount aimed at from the city and $300,000 from all the rest of the province of Manitoba. The whole of the $600,000, and more, has been raised in the city and suburbs, and in all likelihood the province will easily raise $400,000, thus making the handsome total of $1,000,000 for this most worthy cause from Manitoba. The business men of the city had a splendid organization and looked after the business and down town districts, while the women's organizations looked after the residential districts, the whole city thus being thoroughly covered.

INVESTMENT OPPORTUNITY

Messrs. A. E. Ames and Company have just issued a letter to their clients in which they draw attention to the opportunity afforded by Canadian preferred stocks as a means of augmenting income with a minimum of risk to the investor.

"Under present conditions," said Messrs. A. E. Ames and Company, "investors naturally desire to secure as great a return on their funds as is possible with reasonable safety. To those who have a substantial part of their moneys invested in high-grade securities, such as government and municipal bonds, the opportunity of the greater income return available through purchase of some of the better class industrial preferred shares is worthy of attention.

"These securities have long formed a recognized part of British investment lists, and discriminating Canadian investors are becoming increasingly seized of their possibilities. The special earnings which many industrial companies have realized during the war period have greatly strengthened the equities behind the shares and placed the companies in strong financial position, which should stand them in good stead during the period of readjustment from war to peace conditions."

NEW INCORPORATIONS

Large Manufacturing Company Incorporated With an Authorized Capital of $6,000,000

The largest company incorporated during the past week was: International De Lavand Manufacturing Corporation, Limited, $6,000,000, Toronto, Ontario.

The following is a partial list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The amount noted is the authorized capital, and the persons named are provisional directors:—

Fraserville, Que.—La Meunerie Modele, Limiteé, $15,000. Fabien Plourde.

Brantford, Ont.—Brantford Realty Company, Limited, $100,000. James Harley, Archibald Manson Harley.

Lauzon, Que.—Edouard Ruel, Limiteé, $150,000. Desanges Blais, Edouard Ruel, Joseph Cyrille Ruel.

Windsor, Ont.—Morris Knowles, Limited, $40,000. Morris Knowles, John Marie Rice, George Frederick Maglott.

Joliette, Que.—La Compagnie a' Bois Bedard, Limiteé, $250,000. Joseph Hermas Sansregret, Joseph Onesime Malo.

LIFE INSURANCE IN BUSINESS

As a Factor — Product of Developed Civilization — Western Honesty

"If I were to preach a sermon this morning," said Mr. Frank Pike, in his address before the Edmonton board of trade on April 9th, "I would take as my text, 'The stone which the builder rejected has become the chief corner-stone.' " A few years ago, when insurance agents came in to see me, many and many a time have I treated their arguments almost with contempt, and rather proudly told them that I did not need their insurance or advice, as I had sufficient surplus to protect my family in case anything happened to me. As a proof of this, I used to produce a little tin box, full of titles to various pieces of real estate, agreements of sale and a few mortgages. At that time my box was filled to overflowing with these documents, and I remember that my few insurance policies were shoved carelessly in a pigeon-hole in the vault. But to-day, if you look into that tin box, you will find that the titles and the agreements, as well as the mortgages, have nearly all evaporated. There is nothing left of much intrinsic value but the insurance policies. So you see the application of the text that "The stone which the builder rejected has become the chief corner-stone."

Life insurance is a product of developed civilization, and, in its spirit of self-sacrifice, we might almost add, Christianity. Savages and wild men of the remote parts of the earth pay little heed to the future. They live from hand to mouth—gluttony to-day, starvation to-morrow. When we look back to the carnival of extravagance that prevailed on these prairies a few years ago, it is enough to make us wonder whether we had progressed very much from the days of our cave men ancestry

Habits of Thrift.

The great war has brought us to our senses. We now take a saner view of life, and have a greater realization of its realities. People have lost, to some extent, the malignant "get-rich-quick" fever, and are now endeavoring to arrange their affairs in a more thoroughgoing, systematic manner. They are cultivating habits of thrift and economy, which will undoubtedly mean the economic salvation of the country and the nation. This condition of affairs makes it much easier for sound, conservative business men, such as insurance agents and bankers, to conduct their business. In the banks we go a great deal on moral character, as well as on a man's financial standing, and I do not know of any surer sign of a well-balanced mind than the fact that a man has provided against future contingencies by ample life insurance.

Business men during the last four or five years have gone through a period of great stress and strain, and, in times like these, men undoubtedly need, as we say in Newfoundland, "a sheet anchor to windward," to help them bear the strain of financial worries.

If a man has the comforting thought that, no matter what happens to him, his wife and family are protected, in case of his death, from a cold and unsympathetic world, where, to a great extent, the law of "the survival of the fittest" still prevails, it will relieve his mind of a great load of worry; it will brace his nerves, and enable him to make a better success of his business undertakings.

Considering for Loan.

In view of this, when considering a man's application for a loan, if we find that he is of the thoughtful, methodical, careful type, who is making provision in the best available way—ample life insurance—for the contingencies to which human life and human affairs are liable, we have much more confidence in that man and in his ability to make good. A man's first duty undoubtedly is to his wife and family and those depending upon him. He should see to it that they are protected; but after this has been done, a man also has another duty to perform, and that is to provide, as far as in him lies, for debts contracted by him. Especially do I refer to money borrowed, and not particularly to real estate entanglements. There is a difference.

Not long ago a man who had borrowed four or five thousand dollars from the institution came in and threw down a life insurance policy for $5,000, payable to the bank. He said: "My wife and family are provided for, and now I want to do something for you. I borrowed money from this institution some time ago, and since then my affairs have become somewhat involved through an overdose of real estate. The money was loaned to me in good faith, not only on the strength of my statement, but my character and ability were taken into consideration, and I look upon the loan as a debt of honor, and feel in duty bound to meet it—living or dead." Now, this is not cheap sentimentality, neither is it an extreme case. It is only what an honest man should do, and in my experience of twenty years in this western country I have found the great majority of men absolutely honest, paying their debts if there is any possible way of doing so. Dishonesty does not readily take root in this western country, with its freedom and freshness. It is of exotic growth and not indigenous to the west.

Provide Against Contingency.

Taking into consideration all the great potentialities of this country, there is no reason why a man should not, if he receives a reasonable amount of encouragement and assistance, get on his feet again. There is only one thing a man cannot avoid, and that is the uncertainty of human life, and he can only provide against this contingency by a life insurance policy.

There is another factor which might be dwelt on briefly. Take the case of a manager of an incorporated company. I can mention companies in this city, the success of which depends, to a great extent, on the experience and ability of the managing director, who has spent years in becoming familiar with every detail of a rather technical and complicated organization. The death of such a man would undoubtedly mean a financial loss to the corporation, and in cases of this kind directors should see that a certain amount of insurance is taken out on their manager's life, payable to the company, and the premiums charged to expense, or, better still, contingency account.

Insurance Indicates Thrift.

No doubt, at times, some men are tempted to over-insure, and perhaps there are times when the consequences of this means disaster in the shape of abandoned policies and lost premiums; but where one man overinsures, I would say that ten do not take out sufficient insurance when they are young.

It has frequently come to my attention that young men in our service, who are sufficiently thrifty and thoughtful enough to take out a substantial life insurance policy, and who have the moral stamina of providing something from their monthly salary for their annual premiums, are the types of young men who can be most depended upon to develop into trusted and tried executive officers.

Life insurance is undoubtedly a good investment, whichever way you take it. The largest policy ever taken out was for $2,500,000 on the life of the greatest United States financier, J. P. Morgan. Last year a policy of $2,000,000 was taken by H. P. Davison of the Morgan firm. The largest policy written on the life of a Canadian was $1.500.000 on Sir Mortimer B. Davis, of Montreal. No shrewder men than these ever lived.

Most of us dislike the thought of growing old, and if we are fairly well protected by life insurance, which should mature before the days of reduced working power and diminished income, we shall find that the gathering weight of the passing years will be considerably lightened.

COBALT'S ORE OUTPUT

Since the first silver was discovered in Cobalt, in 1903, the production has been as follows:—

	Aver. price, cents per oz.	Ounces.	Value.
1904	57.2	206,875	$ 111,887
1905	60.4	2,451,356	1.360,503

ONTARIO

Make Your Vegetable Garden a Family Affair

The best way to insure the success of your vegetable garden is to get every member of the family interested in it.

Don't put the whole burden upon father and mother. Any child over the age of ten years can, and usually will be glad to help, if his interest is encouraged; and even younger children may be shown how to help.

The way one family cultivated a very successful vegetable garden last year was as follows:

The husband and wife planned the garden. The man spaded up the soil and manured it as he went along.

Then he and his wife and their two eldest children raked it all over thoroughly and put in other fertilizer. In this way they got the ground into good condition.

The man planted the potatoes, the corn, the tomatoes and the cabbages.

The woman attended to the beans, peas, green onions, spinach, radish and lettuce.

The children looked after the late onions, parsnips, beets and carrots. And they all helped one another with the hoeing.

What was the result?

There grew up in that family a friendly rivalry and an interest in the garden such as no person would have believed possible had the experiment not been tried.

The family had plenty of salad vegetables during the summer. They preserved sufficient tomatoes, beans and pickles to last all through the Winter and they took off enough potatoes, beets, carrots, parsnips and onions to carry them through until March of this year.

What this family did your family should be able to do. The way they went about cultivating their garden is described in a booklet entitled "A Vegetable Garden for Every Home." This book has been prepared by the Ontario Department of Agriculture for distribution to any householder who will send for a copy. It is full of helpful, practical suggestions, including plans for various sized gardens. You can get a copy free by filling out and mailing the coupon below.

Organization of Resources Committee, Parliament Buildings, Toronto.

Dear Sirs:

Please send me a copy of your booklet "A Vegetable Garden for Every Home."

REDUCTION OF LIFE INSURANCE DIVIDENDS

Should the Dividends of Life Insurance Companies be Reduced?

M. P. LANGSTAFF, A.I.A., F.A.S.

In times like these the annual reports of the various financial institutions receive special and widespread study, illuminating as they do, the trend of business conditions in the different parts of the country. This holds particularly true of the reports of the life insurance companies, whose operations are influenced by so many factors, viz., investment conditions, rising costs of living, mortality rates, etc.

The majority of financial institutions have felt the strain and turmoil of the times, and that the insurance companies are not passing through entirely unscathed is witnessed by the growing discussion on the advisability of reducing dividend scales, or its alternative, the raising of premium rates. It is especially interesting, therefore, at the present time to study the annual reports of the life companies with a view to ascertain, as well as their sometimes meagre data will allow us, the toll which the exigencies of the times are laying upon them—for example, to learn what effect the greater proportion of investment on government bonds—compulsory to a considerable extent—has had upon the interest earnings; how much strain the increased cost of living, with its concomitant rise in the expense of writing new business and in caring for the old, has thrown upon the premium loadings; whether the war claims are proving excessive and placing the total claims beyond the actuarial expectations upon which the premiums are based; whether the hardships entailed by the war are raising the lapse rates or accentuating the policy loan evil; and, finally, whether any or all of these factors combined are sufficient to encroach dangerously upon the margin of safety in the present premium scale.

In touching briefly on a number of these points I propose to use the ratios of some of the leading companies for the past few years. In using the much-maligned "ratio" as our divining-rod, it is perhaps necessary to say a word in its defence. As is well known, the "ratio," whether that of interest, mortality, expense, or otherwise, when employed for comparative purposes as between companies, is absolutely pernicious and contains the grossest fallacies. When applied to the same company, however, from year to year by those in close touch with that company's affairs, it should give many useful indications; and similarly, when applied to various companies over a number of years, the "year" being the basis of comparison and not the "company," it should allow of tolerably clear conclusions being drawn as to the general trend of the insurance business throughout the country in respect to mortality costs, interest earnings, expense rates, and so forth. It is in this latter way, then, that I shall endeavor to use the ratio.

Let us first consider mortality rates. The ratio I have taken is the death losses per thousand dollars of assurance. For comparative purposes between two companies this ratio would, of course, be altogether unsatisfactory, as it takes no account of the ages of the companies or of the reserves held against the claims that have arisen. For our purposes, however, the ratio gives us the indications we require.

Death Losses per Thousand Dollars of Assurance.

Company.	Year 1912.	Year 1913.	Year 1914.	Year 1915.	Year 1916.	Year 1917.
A	11.87	11.38	13.97	15.06	15.36	13.19
B	9.61	8.86	10.99	10.21	12.34	14.25
C	4.32	3.31	6.96	5.16	9.56	7.48
D	4.71	4.80	4.16	5.45	5.74	6.29
E	4.83	4.70	3.86	4.47	8.63	7.70
F	5.40	5.99	7.06	5.20	8.34	8.81
G	8.32	6.31	7.97	7.06	8.29	8.46
H	6.24	6.45	6.80	7.88	9.73	10.22
I	9.11	7.30	6.74	8.39	10.51	7.45
J	10.32	8.57	8.77	9.54	9.96	10.85
K	5.09	4.17	4.65	4.74	7.77	7.71

A glance at the above table will show that the death losses of the war years have been considerably higher than in the preceding years. The trend for the companies on the whole, can be seen more easily if we sum these several columns. The totals are as follows:—

Year.	Total.	
1912	79.82	Average 77.86
1913	71.84	
1914	81.93	
1915	83.16	Average 97.26
1916	106.23	
1917	102.41	

Treating 1914 as a pre-war year for the Canadian companies, we have our average for the three war years to the average of the three years just preceding, in the proportion of 97.26 to 77.86, that is, a jump of 25 per cent. for the war years. Judging from the fact that the year 1916 does not show much variation from 1917, and that Canada's fighting forces at the front reached their maximum in these years, we can reason that the mortality as shown by these years, so far as the war is concerned, has reached its maximum. This 25 per cent. over the normal, while it has probably wiped out most of the mortality profit for the companies, has still, judging from the statements of the various companies, left the "actuarially" expected mortality, that is, the mortality allowed for by the premiums—both ordinary and war extras—slightly in excess of that actually experienced. Speaking generally, therefore, we can say that from the standpoint of mortality alone, the present premium rates are sufficient, provided the scale of dividends to policyholders includes no mortality profit, but that otherwise the rates would have to be increased to the extent that mortality profit has entered into the dividend calculations.

It might be said, however, that under present conditions, if there is one point where one should err on the side of caution, it is in respect to allowances for excess mortality. It is recognized that the fighting this year may reach an intensity never before experienced, and if so, an ultra-conservative attitude in respect to dividend payments would be sound business policy.

Interest Earnings.

Interest Rate.

Company.	Year 1912.	Year 1913.	Year 1914.	Year 1915.	Year 1916.	Year 1917.
A	5.38	5.75	5.97	5.86	5.89	5.84
B	5.65	6.23	6.03	5.90	5.46	5.37
C	8.00	8.11	8.22	8.35	8.30	7.87
D	7.43	7.49	7.52	6.12	6.55	6.87
E	7.91	7.90	7.93	7.62	7.58	7.36
F	6.83	7.15	7.02	6.84	6.73	6.72
G	6.43	6.96	6.85	6.69	6.69	6.61
H	6.09	6.27	6.35	6.66	6.76	6.63
I	5.85	6.15	6.25	6.14	6.07	5.92
J	6.09	4.99	5.26	5.36	5.19	5.52
K	6.02	6.51	6.71	6.48	6.07	5.91

With the exception of several companies that before the war had a preponderance of their funds invested in real estate mortgages, the last few years have seen very little change in the interest rates of the Canadian companies. Any reduction, indeed, has been due to the gradual transfer of funds from mortgages to bonds and debentures. As the latter class of security does not entail the investment expenses of the former, it is quite possible, indeed, that the net rates of the companies might even show an increase. This would certainly be the case if we gave weight to the margin of safety contained in the investments, for, while the mortgages of the life companies have, on the whole, been well selected and limited to a conservative percentage of the property values, yet it will hardly be urged that they equal in security the gilt-edged bond holdings of the various companies. As an indication of how the investment pendulum has been

AUDITOR'S REPORT

In accordance with the provisions of Sub-sections 19 and 20 of Section 56 of the Bank Act, we report to the Shareholders as follows:

We have examined the above Balance Sheet with the bonks and vouchers at Head Office, and with the certified returns from the Branches, and we have obtained all the information and explanations we have required, and in our opinion the transactions which have come under our notice have been within the powers of the Bank.

We have checked the cash and verified the securities of the Bank at the Chief Office and at several of the principal Branches during the fifteen months covered by this statement, as well as on February 28th, 1918, and have found that they agreed with the entries in the books of the Bank with regard thereto.

In our opinion the Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs according to the best of our information and the explanations given to us, and as shown by the books of the Bank.

Hamilton, 18th March, 1918.

gradually swinging from the mortgage to the bond field, the following figures will be interesting: ;—

Percentage of Total Assets.

Company.	Year 1913. Mortgages.	Year 1913. Bonds.	Year 1915. Mortgages.	Year 1915. Bonds.	Year 1917. Mortgages.	Year 1917. Bonds.
A ..	36.58	25.81	36.97	25.10	32.69	32.40
B ..	35.52	26.95	32.61	28.60	27.09	38.45
C ..	80.39	5.20	76.77	4.98	65.38	14.18
D ..	72.57	1.51	52.29	1.73	44.16	12.10
E ..	70.74	2.09	60.77	7.83	53.40	19.45
F ..	66.49	10.39	52.19	21.04	37.76	37.19
G ..	81.25	3.98	67.28	16.20	44.06	40.39
H ..	49.18	21.83	42.21	25.97	33.97	43.41
I ..	55.58	21.93	54.54	23.32	45.21	32.91
J ..	34.22	31.10	29.46	35.00	25.65	55.47
K ..	9.33	57.92	12.50	52.21	8.95	57.80

From the standpoint of interest earnings, the companies are, I think, in an enviable position. The war has given them an unprecedented opportunity of purchasing at bargain prices gilt-edged, long-term bonds, and has, as it were, guaranteed them a high interest rate for many years to come in a way which they could not have secured from the short-term mortgage investment. When the pendulum swings again towards the mortgage field they will be ready to meet the situation, both from the sales of appreciated bonds, and also from their steadily growing income. The only conclusion we can draw, then, is that the war, so far as interest earnings, present and potential, are concerned, has placed the majority of life companies in an improved position, well able to maintain the liberal dividend apportionments from the interest earnings that they have been making during the past few years.

Expense Rates.

Expense to Income.

Company.	Year 1912.	Year 1913.	Year 1914.	Year 1915.	Year 1916.	Year 1917.
A	14.64	14.88	15.60	16.44	16.97	18.75
B	22.62	20.62	22.01	21.05	21.29	22.24
C	24.73	24.56	24.06	24.81	23.42	26.73
D	27.98	27.80	29.50	29.59	31.16	31.87
E	24.79	26.36	26.13	23.52	22.82	22.62
F	21.62	21.67	23.67	23.47	24.47	24.55
G	24.35	23.75	22.65	19.79	20.38	21.67
H	16.64	17.44	17.00	16.39	15.83	19.20
I	18.15	19.72	19.32	20.69	20.66	22.33
J	18.84	17.17	22.81	20.78	18.58	17.71

The expense rates here given show, in the main, a tendency to increase, though there is hardly enough swing to give any sure indication as to the rate at which the cost of business has been increasing. If the cost of business were constant and the same amount of business were written each year, then, of course, the expense rate, as found above, would decline, owing to the renewal premium income, with its lower cost, gradually assuming a greater proportion to the total income. Where, however, owing to the conditions of the times or to increased progressiveness, a company writes new business in such proportions that the ratio of business written to old business in force increases, then the expense rate given above, even though the cost of business remains uniform, will advance.

Hence this factor, the varying amounts of new business written, deserves especial attention in any consideration of the expense ratios of the Canadian companies for the past few years, as will be seen from the following table, where, it will be noted, that the war years have been very productive years for the insurance companies in respect to amounts of new assurances:—

Issued Business to Old Business.

Company.	Year 1912.	Year 1913.	Year 1914.	Year 1915.	Year 1916.	Year 1917.
A	12.38	11.68	9.84	10.40	12.75	13.85
B	21.34	19.02	16.93	15.06	15.51	19.90
C	24.18	25.30	17.03	20.47	22.96	25.76
D	23.39	27.46	23.36	15.15	23.84	28.87
E	33.76	28.74	25.15	22.60	21.41	22.79
F	22.74	21.60	19.15	18.09	21.46	23.76
G	24.24	17.52	15.46	15.35	16.29	18.50
H	15.66	18.50	16.62	14.56	15.46	18.35
I	16.48	17.11	14.78	16.75	18.12	21.00
J	18.90	18.72	15.89	15.97	16.62	16.99

From the "expense to income" ratio, therefore, it is impossible to judge to what extent the increase in the ratio is due to increased cost of writing business or to the greater proportions of new business written. If we take a period five years apart, however, and endeavor to give effect to the relative costs of procuring new business and in caring for the old business we can get a better indication of the way in which expenses have increased in the life insurance business. I have used figures from Stone and Cox tables.

Company.	Year 1911. Expense rate on New premiums.	Year 1911. Expense rate on Renewal premiums.	Year 1916. Expense rate on New premiums.	Year 1916. Expense rate on Renewal premiums.
A ...	$115.46	$11.55	$126.99	$12.70
B ...	112.23	11.22	127.17	12.72
C ...	132.95	13.29	134.39	13.44
D ...	147.35	14.74	159.64	15.96
E ...	119.11	11.91	111.26	11.13
F ...	112.30	11.23	134.46	13.45
G ...	121.08	12.11	124.53	12.45
H ...	104.79	10.48	102.33	10.23
I ...	124.91	12.49	135.11	13.51
J ...	100.94	10.09	135.51	13.55
K ...	101.92	10.19	102.31	10.23

From these figures it is clear that in the main, the cost of business for insurance companies has made a pronounced rise, and must have a marked adverse effect upon the ability of the companies to retain their present dividend scales

We have now glanced rapidly at the trend of the mortality, interest, and expense rates, the three main sources upon which the earnings of life companies are based. If we could also ascertain the ratio of surplus earned on ledger assets for the years under consideration we should have a more exact indication of how these three elements combined are influencing the earnings of the insurance companies. From the reports of the companies, however, it is impossible to obtain this ratio accurately, and we must be content with the rough deductions we can arrive at from the figures given above. A summary of these shows that one of the factors, the interest earnings, calls for no retrenchment in dividend payments, but that the other two factors, mortality and expense, would seem to demand either a considerable reduction in the scale of dividends that have been paid during the last few years, or an increase in the premium rates. These deductions are based, of course, on the supposition that the dividend scale has approximated somewhat to the earnings. Where, in the case of any company, a considerable margin has prevailed between the earnings and the dividend payments, it is quite possible that no retrenchment may be necessary. It is quite possible, too, that here and there some individual company has, by increased economy, offset the extra expense drain, or by a very stringent war clause has nullified the extra mortality caused by the war claims. Other points, too, enter into the problem, such as the decline in market values, the stringency of the reserve basis, the maintenance of an adequate contingency fund, and so forth. The object of this paper, however, is merely, by a casual consideration of the trend of the important ratios, to ascertain the nature of the extra strain being thrown on life insurance in general by the excrescences of the times.

VANCOUVER TAXES

The city council of Vancouver has struck a tax rate of 24 mills, or about the same as last year. In order to do this, the council has decided to resort to a tax on improvements, instead of assessing land values alone. Otherwise, a rate of over 30 mills would have been necessary. The rate is nominally 26.6 mills, but a discount of 10 per cent. is allowed for prompt payment.

Mr. George W. Goodall, Western Manager of The Monetary Times, will leave Winnipeg next Tuesday on his usual Western spring trip, calling at all the important towns and cities between Winnipeg and Vancouver. In view of the improved business conditions that are prevailing in Western Canada, Mr. Goodall's weekly letter will be an interesting feature during the next few weeks.

INCREASED ACREAGE IN THE WEST

Figures for acreage for this year's crop, given out by the United Farmers of Alberta, show a 50 per cent. increase in fall ploughing for Alberta, a total acreage of 3,000,000 in wheat alone for this province, and a total acreage of 6,000,000 in Saskatchewan prior to beginning of spring farm work.

There is an increase in new breaking for this year's crop in Alberta of 250,000 acres.

The Saskatchewan summer fallow totals 3,750,000 acres, or a million acres greater than the highest of any year previous.

THIRD LIBERTY LOAN SUBSCRIPTIONS

On April 11th Liberty Loan subscriptions reached the $400,000,000 mark, according to conservative estimates compiled at Washington from official treasury department figures.

Eight of the eighteen Federal Reserve districts had reported subscriptions of $212,005,250 up to the close of business on April 9th.

The first Liberty Loan, in April, 1917, was for $2,000,000,000. It was over-subscribed by $1,035,226,850, or very nearly 52 per cent. More than 3,960,000 men and women, or 99 per cent. of the total number of subscribers, subscribed for amounts ranging from $50 to $10,000. Only twenty-one subscriptions were received for $5,000,000 or over.

The second Liberty Loan campaign came in September, 1917, when $3,000,000,000 was offered, and resulted in an over-subscription of approximately 54 per cent. In other words, the over-subscription to the $3,000,000,000 issue was $1,617,532,300.

Taking advantage of the right provided by law to allot one-half of the over-subscription, the treasury department made the total issue of the second Liberty Loan $3,808,766,150.

The number of subscribers more than doubled, there being 9,400,000, in comparison with the 4,000,000 of the first Liberty bond issue

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Sherbrooke, Que.—Messrs. A. E. Ames and Company, of Toronto, have been awarded a block of $150,000 6 per cent. 5-year coupon gold bonds.

Quebec, Que.—The minister of finance has authorized the bond issue of the city for a sum of $479,000. The bonds will be issued at five-year terms, bearing 6 per cent. interest.

Saskatoon, Sask.—A block of $100,263 5 per cent. bonds, dated January 1st, 1914, and due January 1st, 1944, have been awarded to Messrs. W. A. Mackenzie and Company, of Toronto.

Bradford, Ont.—Messrs. W. L. McKinnon and Company, of Toronto, have purchased a block of $15,600 6 per cent. bonds payable in 30 annual instalments. The proceeds will be used for hydro-electric purposes. These bonds have been guaranteed by the county of Simcoe.

Edmonton, Alta.—Sealed tenders will be received by the debenture branch of the department of education up to Thursday, April 25th, 1918, on five blocks of school district debentures amounting to $19,480. Separate tenders are to be made on each block. The following are the blocks: Block No. 1, Rurals, 10-years, 7 per cent., Ardmore School District, No. 3463, $500; Leader School District, No. 3494, $1,200; Mossy Bank School District, No. 3538, $1,500; Centennial School District, No. 3502, $1,800—$5,000. Block No. 2, Rurals, 10-years, 7 per cent., Bonny Doone School District, No. 3477, $2,000; Meiklejohn School District, No. 3544, $1,800; Hilliard School District, No. 3546, $1,800—$5,600. Block No. 3. Village District for assessment purposes, 10-years, 7 per cent., Evanston School District, No. 2902, $3,000—$3,000. Block No. 4, Rural, 7-years, 7 per cent., Federal School District No. 3566, $2,000—$2,000. Block No. 5, Rurals, 10-years, 7 per cent., Naples School District, No. 2852, $1,000; Metagama School District, No. 3458, $1,000; Flagstaff School District, No. 3505, $1,880—$3,880; total, $19,480.

SAVING THE FORESTS OF ONTARIO FROM FIRE

Great strides towards effective forest fire protection were made in Ontario last year under the provincial forestry branch, according to "Conservation," notwithstanding that the transfer of authority over this work was not made until a relatively late date. About 1,100 men were engaged in this important work, including fire rangers, inspectors and head office supervision. The organization is to be further extended during the coming season, and the supervision will be stricter. Increasingly efficient results may be expected from year to year, as the men become better trained and incompetents are weeded out.

A total of 1,110 fires were reported, of which 68 per cent. occurred before July 1. Of the fires attributable to railways, 60 per cent. occurred along the National Transcontinental. Settlers clearing land were charged with 91 fires, and neglected camp fires with 154.

The total area burned over was 384,164 acres, of which 19 per cent. was timber land, 39 per cent. cut over land, 20 per cent. young forest growth, and 21 per cent. barren. The total amount of timber damaged was estimated at about 15 million feet, in addition to 91,246 cords, mostly pulpwood, and 781,685 ties.

Material progress has been made in the construction of permanent improvements, such as lookout towers, trails, telephones and portages. A beginning has also been made in securing the disposal of logging slash where this constitutes a danger to life and personal property, as is frequently the case in the clay belt. Some 3,500 permits were issued for the burning of settlers'-clearing slashes. This means a very great reduction in the danger of fire escaping and causing damage, to say nothing of loss of life.

Ontario has now definitely taken its place alongside the other governmental agencies throughout Canada that are adopting up-to-date methods of organization and policy for the reduction of the enormous forest fire losses which have proved so costly in the past.

SEEDING IN THE WEST

(Western correspondence.)

Winnipeg, April 15th.

Seeding is now well advanced in all parts of the west, the season being easily two weeks in advance of last year. There is a great demand for farm tractors, the supply in most cases not being equal to the demand. One implement dealer, in discussing the situation with *The Monetary Times* last week, said they were getting practically all cash from the farmers on tractors and other implements this spring. The western farmer in these days is a very prosperous member of the community. He is driving the latest model automobile, and in many cases carries large balances in the bank.

The influx into the west of United States settlers with money still continues. The Canadian Pacific Railway land department in Calgary records the applications for land in Alberta to be in excess of 6,000,000 acres over the previous year. In fact, the offices in Calgary these days resemble boom days. They are bringing money and equipment with them, and are a distinctly desirable class of settlers.

The supply of labor for getting in the crop, while not acute, is serious in many parts of the west. Boys from the cities have gone out in large numbers in response to the "Sons of the Soil" S.O.S. call, organized by the government, and from reports have been a great help, and relieved the situation to some extent. Wages are exceptionally high, single men getting as high as $900 and board for one year and married couples $1,200.

BRITAIN'S OVERSEAS TRADE INCREASES

The monthly statement of the British Board of Trade giving the imports and exports for Great Britain for February, shows increases of £28,105,000 in imports and £2,803,000 in exports, as compared with February, 1917.

The following table shows the trade of the United Kingdom in February, 1918, compared with the same month last year:—

	1918.	1917.
Imports	£99,053,000	£70,947,901
Exports	40,090,000	37,287,486
Excess of imports	£59,954,000	£33,660,415

Comparative figures are given in the following table of the United Kingdom's trade by months for 1916, 1917 and 1918:—

Imports.

January	£ 74,935,741	£ 90,552,967	£ 90,058,714
February	67,335,579	70,947,901	99,053,000
Total for two months.	£142,271,320	£161,540,868	£198,111,714

OUR WATER POWERS AND FUEL SITUATION

Their Relation—Heat, Light and Power Needs—Industrial Development Depends Upon Fuel Power

"It is axiomatic that Canada's heat, light and power needs must be considered as one great national problem, and also that the domestic and industrial development depends primarily on the co-ordinated use of all the fuel-power resources of the Dominion." This statement was made by Mr. J. B. B. Challies, M.Can.Soc.C.E., at the first general professional meeting of the Canadian Society of Civil Engineers at Toronto, on March 26 and 27, 1918

"Development along independent and divergent lines," he said, "has, in the past, prevented adequate correlation of the great Canadian industries of fuel production and hydropower supply. There is now, however, as a result of the fuel shortage, developed a consensus of opinion among men familiar with fuel and hydro-power matters in Canada, that there is between these allied industries, enormous scope for national co-operation which would be conducive to their mutual advantage, as well as to the common weal.

Location of Water Powers.

"When considered in retrospect, the production of hydropower in Canada has undoubtedly been an industrial achievement and an engineering triumph worthy our nation. In the short space of about 25 years, there has been developed and put in use, nearly 1,800,000 water horse-power. The present per capita power development in Canada is larger than all other countries except Norway. It is the same with respect to our known undeveloped water power. No country enjoys to a greater degree the benefits of cheap, dependable hydropower, and no country has had these benefits more universally applied for municipal, industrial and domestic use. That Canada is recognized as one of the great water power countries in the world is due largely to:—

"1. The nature and extent of our water resources—abundance and seasonable distribution of rainfall; the regimen of our rivers—upper waters well forested with large lakes, suitable for regulation—rivers flowing through valleys with well concentrated falls.

"2. The fortunate location of the waterfalls with respect to existing commercial centres, and related raw materials.

"3. The consistent endeavors of governments, Dominion and provincial, in having water powers thoroughly investigated and intelligently administered.

"4. The business acumen and foresight of the capitalist, and the professional skill and courage of the engineer, in blazing the trail of pioneer water power development and use.

"5. The almost universal adaptation of electric energy for municipal, industrial and domestic purposes.

Development of Water Powers.

"In general, the use of water power in Canada may be briefly described as follows:—

"(a) For municipal, including domestic and ordinary industrial purposes, about 78 per cent. of total developed, or 1,348,490 horse-power. So far as these uses are concerned, further requirements will probably be met for some years by additional installations at, and increased storage for, existing plants. In certain centres, however, as for instance the Niagara power zones, growing requirements can only be met by new water power developments.

"(b) Pulp and paper, about 14 per cent. of total developed, or 248,075 horse-power. Further pulp and paper plant requirements can probably be met for some time by additional installations to present plants, although the tremendous growth of this industry will necessitate the development of new water powers in different parts of the Dominion. There are now 54 pulp and paper plants scattered throughout Canada and several new plants have been under serious contemplation, some of which would be in use now had it not been for the difficulty of financing due to war conditions. On account of the isolated nature of the industry—away from commercial centres—power requirements for pulp and paper need not conflict with other demands upon hydro-power.

Electro-Chemistry.

"(c) Electro-chemical and similar processes, about 8 per cent. of total developed, or 140,000 horse-power. While the United States have achieved almost a world supremacy in electro-chemistry, this industry in Canada is of very recent growth. It has, however, expanded at an enormous rate, entailing recent extensive additional installation in present plants, and requiring in the near future the development of additional water power sites. Our propinquity to the United States, and our abundance of essential raw material will compel the migration to the Dominion of many new electrochemical plants of importance and value.

"The products of the electro-chemical industry are extremely diversified. They include aluminum, silicon, calcium-carbide, cyanamid, ferro-alloys, graphite, carborundum, chlorine, etc., many of which are indispensable in the arts and in manufacture. Without aluminum the modern high-speed scout airplane would not exist; without electro-chemical abrasives and ferro-alloys manufacturing processes would be lengthened many-fold. Our industrial supremacy in times of peace is dependent upon these products to a very considerable extent.

"One of the most important electro-chemical processes is the fixation of nitrogen. About 30,000 horse-power is used for this purpose at Niagara by the American Cyanamid Company, and while other plants of this kind have so far not been put into operation commercially in this country, they have been seriously contemplated, and await only a sufficient source of low-price power for realization. The electro-metallurgical industry is in its infancy, but promises great expansion, especially in the production of nicu-steel in Canada. Few people appreciate the rapid growth during the last two years in the use of electric furnaces for the production of the highest grades of steel. By proper foresight the demand for hydropower for these industries need not conflict with other demands, as, for instance, municipal, domestic and ordinary industrial uses. Total developed power, about 1,735,598 horsepower.

Hydro-Electric Power.

"In considering the future of water-power development in Canada, it is important to note that it means the use of a non-expendible resource, and in many cases represents the substitution of an inexhaustible resource for an exhaustible one. For this reason, the use of hydro-electric energy should be encouraged in every reasonable way.

"Further development of water power in Canada will, undoubtedly, be extensive, and must depend very largely on: (1) Additional requirements for municipal, industrial and domestic use; (2) growth of pulp and paper industry; (3) new electro-chemical and electro-metallurgical processes; (4) electrification of steam roads, especially terminals and adjacent engine divisions; (5) substitution of hydro-electric power for fuel power in manufacturing and industry.

"In the rapid development within a short space of time of our water powers to the extent of nearly 1,800,000 horsepower, it is natural to expect that there has been some misconception in design, in construction, in conservation of opportunity, in overlapping of service, and even in governmental administration, although as to the latter it is an axiom in British jurisprudence that 'the King can do no wrong.' If we were starting *de novo* to develop our water powers, with our present knowledge of what is essential in government investigation and administration, of what is really basic in conservation of resource, of the present practice of the art of hydraulic and electric engineering, and last, but by no means least, of what is the most important or prior market demand, from a national standpoint, from particular power sites, whether general municipal requirements should precede electro-chemical and allied industrial requirements, we would, for instance, most assuredly produce a very different power situation at Niagara. At the same time, this most important and world-famous source of our electric energy has well served us. Generally speaking, our water powers have undoubtedly proven to be one of Canada's most valuable assets.

"Looking to the future in power development, if Canada is to reap full benefit from her heritage in white coal, there must be a constructive liaison between (a) the various Dominion and provincial government administrative departments concerned in water power matters; (b) the producing corporation or commission; and (c) between the consuming public. Concurrently with such a liaison there must also be an adequate co-ordination of the development and use of water power with that of all other power-producing agencies.

Necessity for Development.

"Anyone who has listened attentively to the very able presentation of the various elements in the fuel situation during the last two days, must realize that there is a prodigious field for such co-ordination in the development and use of our varied power and heat-producing resources which will combine the effective use of all, along lines for which each is best adapted, and which will, by avoiding duplication or misdirec-

tion of effort, promote the efficiency of both individual and conjoint use.

"The necessity for the correlated development and use of all our fuel-power resources has surely passed the agitational or educational stage. The many urgent reasons for such correlated use are stressed a hundred-fold by the coal shortage experience of last winter.

"Cheap power promises to be one of Canada's greatest assets in the post-bellum industrial rivalry of nations for world trade. Our great fuel reserves, supported by our water-power resources, represent a sure source of cheap power, and should guarantee Canada her share in world trade, if our varied fuel-power resources are availed of to their maximum possible advantage."

LAW OF BROKER AND CUSTOMER

Customer's Stock May Be Released on the Payment of Own Liability

BY M. L. HAYWARD, B.C.L.

In the case of Conmee vs. The Securities Holding Company, it will be remembered, the broker sued the customer for the balance due on certain stock over and above the margin, and the Supreme Court of Canada held that the broker could not collect from the customer on the ground that the broker had pledged the customer's shares, with others, for a greater sum than the customer owed the broker, without any agreement with the pledgee whereby the customer's stock could be released on the payment of his own liability, and that there never was a time when the broker could appropriate to the customer his shares which had been pledged on payment to the broker of the customer's liability.

The case of Clarke vs. Baillie decided by the Supreme Court of Canada in 1911, is another case along somewhat similar lines. In this case the customer gave a Toronto broker orders to purchase certain New York stocks on margin, and the broker pledged this stock, together with other stock, in which the customer had no interest, for a bulk sum exceeding the customer's indebtedness.

In the latter case, however, the brokers sued the customer for the balance due on the stock; but in the Clarke case, the customer, after the stock had been pledged by the broker, applied to the broker for the stock, tendered the balance due, and the broker delivered to the customer the certificates for the stock which she had ordered. Then, after the transaction had been closed up in this way, the customer learned of the manner in which the broker had dealt with the stock and sued the broker for damages.

Pledge Customer's Stock.

In this case the court recognized the principle that the broker has the right to pledge a customer's stock bought on margin so long as he does not pledge it for an amount in excess of what was due by the customer in connection with the purchase of the stock, and it was proven that when the customer asked for delivery of the stocks and tendered the balance the certificates were handed over to her without any delay.

In view of these facts, and as the broker made no profit on the pledge, and the customer suffered no loss thereby, and the broker delivered to the customer the shares ordered, the court held that the customer could not recover damages for the action of the broker in pledging the stocks, while laying down very clearly that the right of a broker carrying stock on margin to pledge the stock for his own purposes is limited to the extent of his advances

"There can be no doubt," said the Chief Justice, "as both parties admitted, that the broker had the right to hypothecate the stock for his customer so long as he did not pledge it for an amount in excess of what was due him by the customer in connection with the purchase."

Exceeded Authority.

Judge Idington also pointed out that after the broker exceeded his authority in pledging his stock, "it is idle to speak of the other securities being ample or the personal credit of the broker in New York being ample, so long as the charge exceeds the value of the stock presumed to have been bought."

The decision of the court went upon the ground, however, that the broker made no profit and the client suffered no loss and the stock was delivered to the customer on demand.

On this point Judge Davies says: "On the ground, therefore, that although the brokers were not, under the terms of their contract as I construe it, justified in pledging the shares in the manner they did, yet, as they delivered the shares to the client immediately she demanded them and that she did not suffer any damage whatever from the alleged impropriety, I think that this action cannot be sustained."

Must Not Exceed Advances.

Summing up this case and the Conmee case, it will be seen that they lay down the following rules:—

1. A broker carrying stock on margin for a customer has the right to pledge the stock for his own purposes.
2. The broker has no right to pledge the stock for an amount greater than the amount of his advances, unless he can redeem the customer's stock on payment of the amount of the customer's liability.
3. If the broker pledges the stock for an amount exceeding the amount of his advances, and is not at any time in a position to deliver to the customer the shares pledged on payment of the amount which the customer owes, the broker cannot collect the balance from the customer.
4. If the broker does pledge the stock for an amount greater than his advances, but delivers to the customer on demand the number of shares carried for the customer which the customer accepts, then the customer cannot recover from the broker damages for the unauthorized dealing with the stock.
5. A memo on the broker's statement that "when carrying stocks for customers we reserve the right of pledging the same or raising money upon them in any way most convenient to us," does not justify the broker in pledging the stock for a sum greater than is due from the customer to him.

FORD TRACTORS ARRIVE IN TORONTO

Twenty-seven Ford tractors, ordered by Ontario farmers through the Ontario department of agriculture, have arrived at reshipping points. Nine tractors reached Toronto last week. These will be forwarded at once to Georgetown, Clarkson, Mono Road, Stouffville, Caledon East, Agincourt, Cheltenham and Newcastle. More are on the way.

Altogether, the Ontario department has sold to farmers practically one hundred tractors, delivery of which will be made within a few weeks.

MUST INCREASE FLAX PRODUCTION

There is at the present time an almost imperative demand for an increased production of flax. The reason is that flax fibre is used in the construction of airplane wings, and the fact that the withdrawal from the war of Russia has practically cut off Great Britain's chief supply of that product.

It is urgently necessary that the supply be maintained, and Great Britain is looking to Canada to assist in that respect.

B. Turnbull, of the Flax Control Board of the Imperial War Office, in a letter to the department at Ottawa, referring to the situation caused by Russia's defection, says that "it is a matter of the utmost urgent national importance that as large an area as possible in Canada should immediately be put under cultivation of fibre-producing flax," and urges the most vigorous action on the part of the authorities to encourage every effort to meet the demand.

Ontario has responded, and will plant an extra 8,000 acres this year. This province has already developed a flax business which is worth $2,000,000 a year, and last year supplied the Irish flax mills, which are threatened with grave curtailment owing to the shortage, with 30,000 bushels.

The soil and climate of British Columbia, especially the Fraser valley, are said to be particularly well adapted for the raising of this product, and if the farmers of that province hurry they may yet be able to have a share this year in this great Imperial project.

The crop is said to be a profitable one. One and a quarter bushels of flax will plant an acre of ground, and a market is assured. The question of increased production is one of labor largely, but it is suggested that in British Columbia the women who will be employed as berry-pickers might be continued in the flax fields, the crop following the berries closely.

FIRES AND THEIR CAUSES

Cause of Fire Should Be Traced—Analysis of Conditions Leading Up to Fires

BY HENRY LYE.

During the past twelve month Canada has had a series of heavy fire losses in connection with which there has been no ground for suspicion of moral hazard or of any evil intent on the part of the owners of the properties destroyed; in fact, many of the owners have suffered financially directly, as well as indirectly.

There have been so many of these fires and they have been so serious in the values destroyed, as to create a sort of nervousness on the part of the public as well as the insurance companies on the principle that 'what has been may be."

Very few persons realize the ramifications of interests detrimentally involved in these fires, the unravelling of which would startle the minds of the people and possibly lead to more efficient means of prevention of such disasters in future, but indifference and want of feeling and thought are contented by the reading of the accounts of fires with the comment of fully or partially insured, not knowing or caring as to the personal sufferings of those indirectly affected.

Example Better than Precept.

We have been told that "example is better than precept," and are faced with the fact that no prophet's warning ever prevented the perpetration of the evil denounced, except in the case of Jonah, who was himself vexed by the success of his preaching in the reformation of the Minevites; no experiences have led to action; even Lord Roberts was denounced and ridiculed by the wiseacres then in power and in the newspapers then published. So history, ancient or modern, offers no encouragement to those who have had experience and have observed the events of the past.

It is true that we have commissions of conservation, but we know that they have not known how to conserve, and, consequently, have entailed expense to no profit.

The only efficient conservation has been on the part of the credit men's associations, which have done immense service to the country by investigation of the personal characters, habits, systems and reliability of retailers and have prevented the accumulation of unsaleable goods, whilst insisting on the keeping of proper accounts.

Sale Prices of Commodities.

The continued increases in the sale prices of commodities have led to some care as to the safety of goods which could not be replaced at the cost of those on hand, and the increased prices of materials and labor, of furniture and furnishings have promoted some care in preservation of buildings and contents.

The unusual severity of the weather in the scarcely yet past winter has in some cases nullified precautions, but the great fires to which we first alluded, have not been explained or justified,,so far as can be judged by the published reports, we can reasonably infer that most of them have been caused by simple carelessness, whilst their individual extent has generally been owing to overcrowding and ill-arrangement, sometimes arising from urgencies of production, delays in delivery and, in some cases, by the overgrowth of business for which the buildings were neither designed nor properly adapted.

Carelessness of Those in Charge.

As to carelessness on the part of those in charge, we have had notable instances: In one case, where the different departments were isolated, the watchmen found it troublesome to open and again close the fireproof doors during their several rounds, and so from mere laziness left them open until their morning watch; in another case, the watchmen cleaned up every floor carefully, dumping the refuse into the local conveyors into the vault from which it was to be carried into the furnace. They left open the doors of the chutes and left a trail of inflammables from the furnace to the vault, and went to the supper provided for them in the upper story, intending to dust and clean up after supper; meanwhile, a spark fell from the fire in the furnace, and half a million dollars in value was damaged or destroyed without any evil intent on the part of any one.

It cannot be too greatly impressed upon the minds of the inspectors of the fire insurance companies that fire seldom occurs from causes plainly seen or ordinary. Consequently, they should have more than ordinary care in making investigations into possibilities as well as of probabilities, insisting on special precautions under extraordinary circumstances, as it is unusual for fires to originate on the front door steps. Adjusters and fire wardens are not justified in reporting "causes unknown"; it should be part of their duty to the people of the Dominion to ascertain the cause of fires in all cases.

YEAR'S POSTAGE REVENUE

An expenditure of $23,174,601 for postage stamps during the fiscal year ended March 31st, 1917, is recorded in the annual report of the post-office department. This expenditure is more than three times as large as that of the similar period in 1906-07, and $1,719,424 greater than the year 1915-16. On March 31st, 1907, the issue of postage stamps was valued at $7,576,748. When compared with figures of the last fiscal year the increase in ten years amounts to $15,597,583.

DEMERARA ELECTRIC COMPANY'S EARNINGS

The following are the earnings of the Demerara Electric Company, Limited, Halifax, for February, 1918:—

	Gross.	Net.
Railroad	$5,486.77	$ 205.61 (loss)
Light and power	7,771.11	4,019.23
Miscellaneous	......	114.06
		$3,987.68

GOOD BUSINESS IN SOUTHERN ALBERTA

According to the annual report of the Lethbridge board of trade, out of $1,200,000 worth of business transacted by one of the leading implement concerns of that city in 1917, 92.7 per cent. of it, to the extent of approximately $1,100,000, was done in cash. In 1916, 82 per cent. of the business done by this branch, to the value of somewhat less than one million dollars, was for cash. In 1917 figures, therefore, not only show a substantial increase in the volume of cash business done, but also a larger amount of cash business. The prospects for 1918 are considered to be even better than they were in 1917.

ONTARIO'S FARM CONDITIONS

Horses are more in request, but buyers are careful to buy only those of good quality. Cattle generally are thin, but healthy, and are somewhat less in number than formerly. At a sale in Durham county recently purebreds sold at from $240 to $360, and twelve grades averaged $124, including day-old calves. At the same time calves are being vealed at from four to five weeks old, bringing from $15 to $18.

The demand for milk and dairy products continues strong. Dundas county shippers and Montreal wholesale men have agreed on 30 cents a gallon for milk all summer, with a raise to 32 cents in September, which is considerably higher than last year's prices. With the scarcity and high prices of feeds, it is likely that milch cows will go on the grass somewhat thinner than usual.

Hogs are high in value, prices running from $20 to $20.75 a hundredweight. Owing to the scarcity of feed, some are being turned off as soon as drovers will take them. Young pigs are very hard to procure, as owners seem to want to do the finishing.

Sheep are on the increase, and the demand has caused prices to advance considerably. The marketing of field crops goes slowly on. Hay is plentiful, and brings from $12 to $14 a ton. Barley, oats and rye command high figures. Four carloads of turnips were purchased by a Michigan firm last week for seed purposes at 22 cents a bushel, but where sold locally for feeding, prices of these roots have been 7 cents to 8 cents a bushel Ensilage is running lower in the silos than for many years at this date; in fact, corn generally is hard to procure.

Farm labor of good quality is scarce, and many boys and inexperienced men will have to be used. Business men of Kenora are being organized for assisting in seeding and harvest.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4 c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent. extra if charged.

BOOKKEEPER, ACCOUNTANT, BANKER, OFFICE MAN.—Become an expert in your chosen profession. The demand for high-grade trained men is keen. The trained man is not only able to respond and make good when opportunity presents itself, but has the power within him to create opportunity. Mail instruction in Higher Accounting, Chartered Accountancy (C.A. Degree of every province), Banking (Degree of Canadian Bankers' Association), Auditing, Business Law, Cost Accounting and Bookkeeping. Satisfaction assured—highest endorsements of successful students. We also teach—Commercial Art—Advertising—Show Card Writing—Salesmanship—Story Writing and Journalism—Civil Service and all Commercial Subjects. Write us for particulars (Department M.T.) Shaw Correspondence School, Toronto.

MOOSE JAW RENTAL AGENTS.—The Ralph Manley Agency, Limited, Walter Scott Block, Moose Jaw, handle the renting of Moose Jaw Improved City Property. Their facilities permit them to rent and re-rent property as well as looking after collections and any necessary repairs. Established 1908. Correspondence solicited.

OFFICE AND CREDIT MANAGER, at present and for last ten years employed by one firm in Western Canada, and who formerly was manager of a small branch Bank, for family reasons desires position in Ontario or in Montreal; $2,500 initial salary required. Is married man. Address replies to Box 167, *The Monetary Times*, Toronto.

INTERNATIONAL LOAN COMPANY, LIMITED

The fifth annual meeting of the International Loan Company, Limited, was held March 11, at the head office, 706 Confederation Life Building, Winnipeg. It was gratifying to the president and the shareholders present to be presented with a report which can only be regarded as the most satisfactory in the company's history. As showing the steady development of the company during the past few years, the following comparative figures are of interest:—

	1915.	1916.	1917.
Total assets	$179,308	$205,788	$239,435
Contracts receivable	158,649	187,845	210,220
Interest accrued	10,318	14,488	13,980
Cash in bank	5,237	2,698	1,573
Capital paid-up	151,242	175,372	210,595

In seconding the motion in favor of the adoption of the report, Mr. B. McKenzie Gunn, the vice-president, called the attention of those present to the fact, that while the number of shareholders had increased 38 per cent. and the paid-up capital 20 per cent., the general operating expenses in connection with the year's business was just about the same as in the previous year, which was striking evidence of the efficient management of the company. This was a well deserved compliment.

During the year twenty-four new loans were placed upon the books of the company, the majority of these being farm loans. One hundred and ninety-one new shareholders were added during the year. The number of shareholders now stands at 697, a large percentage of which are farmers in the province of Manitoba.

The company has just moved into new offices in the Curry Building and is apparently making satisfactory progress.

Mr. J. W. Mackenzie, manager for Canada of the Preferred Accident Insurance Company, of New York, returned to Toronto from Montreal this week, after completing organization arrangements for that city.

DIVIDENDS AND NOTICES

DETROIT RIVER TUNNEL CO.

Detroit, Mich., April 2, 1918.

Notice is hereby given that the Annual Meeting of the Stockholders of the Detroit River Tunnel Company, for the election of Directors and the transaction of such other business as may be brought before the meeting, will be held at the Head Office of the company, in the City of Detroit, Michigan, on the First Thursday after the First Wednesday (being the 2nd day of May) of May, 1918, at 10 o'clock a.m., Standard Eastern Time.

DWIGHT W. PARDEE,
Secretary.

THE MERCHANTS BANK OF CANADA

QUARTERLY DIVIDEND

Notice is hereby given that a dividend of **Two and one-half** per cent. for the current quarter, being at the rate of **Ten** per cent. per annum, upon the Paid-up Capital Stock of this Institution, has been declared, and will be payable at its Banking House in this city and at its Branches, on and after the 1st day of May next to Shareholders of record at the close of business on the 15th day of April.

By order of the Board.
D. C MACAROW,
General Manager.

Montreal, 26th March, 1918.

CANADA CEMENT COMPANY, LIMITED

PREFERENCE DIVIDEND

DIVIDEND No. 33.

Notice is hereby given that a dividend of 1¾% for the three months ending March 31st, 1918, being at the rate of 7% per annum on the paid-up Preference Stock of this Company, has been declared, and that the same will be paid on the 16th day of May next, to Preference Shareholders of record at the close of business, April 30th, 1918.

H. L. DOBLE,
Secretary.

Montreal, April 16th, 1918.

NEW VICTORIA BOND ISSUE

Local and Montreal bond houses are offering a new issue of 6 per cent. ten-year bonds of the city of Victoria, B.C., at 92.89 and interest, a price which offers a return of 7 per cent. to the investor. The bonds are dated April 1st, 1918, and mature April 1st, 1929, and are in denominations of $1,000. Victoria's finances are in good shape, and the city has had a good record in the money market.

VICTORY LOAN BONDS

The Canadian Bank of Commerce, in its monthly commercial letter, says that Canadian citizens are under the impression that having bought and paid for Victory bonds it is not unpatriotic to dispose of them, and they have been encouraged in so doing by offers made by manufacturers and tradesmen to take them in payment for goods. Generally speaking, bonds taken in trade are at once offered for sale and tend to depress the price and thus create a condition that will adversely affect the sale of future issues. As soon as a Victory bond goes on the market the seller practically shifts his loan to the government on to the shoulders of some one else. The only way to help the government by the use of savings is to invest in these bonds and to hold them.

MONTREAL STOCK EXCHANGE

The Advantages of buying "Listed" Securities

THERE are many advantages to the investor in buying Securities that are listed on the Stock Exchange.

First: Careful and minute investigation is made into the affairs of a Company. Then certain regulations are made which assure the public of securing an equality of information on the issue of financial statements, dividend notices, and other matters of interest.

Prices on listed securities are established, not by a group of dealers, but by the public at large.

Then there is the advantage of obtaining a daily record of all transactions. Quotations are published in most Newspapers, or can be secured almost instantly by telephone or telegraph no matter where you live.

Any member of the Montreal Stock Exchange can buy or sell for you any Listed or Unlisted Securities, which have a market anywhere in the world.

Write to-day for valuable booklet on investing to the Secretary, Montreal Stock Exchange, Room 431 Stock Exchange Building, Montreal.

Montreal Stock Exchange

RECENT FIRES

It's a Hard Rub

For a woman to unexpectedly find it necessary to become a breadwinner. You wouldn't like your wife to come to that, would you?

But what about your widow? Why not provide for her a regular monthly income to begin at your death and continue as long as she lives? You can do it by means of an Imperial Life policy.

GOVERNMENT LOANS TO PROVINCES

In reply to a question in the House of Commons, Ottawa, on Tuesday last, Hon. A. K. Maclean, acting minister of finance, stated that sums of $2,000,000 and $2,500,000 have been loaned to the provinces of Ontario and Saskatchewan, respectively. In the House recently, it transpired that the government had advanced money to two provinces which, however, Mr. Maclean deemed it inadvisable at the time to name.

WM. A. ROGERS, LIMITED

The 17th annual meeting of Wm. A. Rogers, Limited, was held on Monday, the 15th inst. The annual report presented to the shareholders showed net profits for the year amounting to $81,855.41, as compared with $240,648.84 for last year. The difference is accounted for by the falling off in the silverware trade in the United States during the latter months of the year, and the disturbed conditions growing out of the entry of that country into the war.

The company also purchased during the year, the business of Simeon L. and George H. Rogers Company, and important changes were made in the administration of the business; $222,800 of additional preference stock was issued in connection with this purchase. As a result of the agreement with Canadian Wm. A. Rogers, Limited, it has been necessary to again assist that company in its dividend payments. This agreement extends until 1924.

During the year $600,000 of 6 per cent. serial bonds were issued, most of which have been sold. The interest on these bonds was paid, amounting to $10,421.84, as were also the quarterly dividends on the preference stock and one quarterly dividend on the common shares.

Another event of the year was the formation of Wm. A. Rogers, Limited, of California, to handle the business on the Pacific coast. This company is a subsidiary, and is reported to be making satisfactory progress.

British Colonial Fire Insurance Company

The sixth annual general meeting of the shareholders was held at the Company's office, No. 2 Place d'Armes, Montreal, on Wednesday, the 10th of April, 1918.

The President, Mr. Lafleur, said that he was confident that he expressed the sentiments of the shareholders in stating that the Company had sustained a great loss in the person of the late President, the Honorable C. E. Dubord, whose place he now fills, and that the shareholders had lost a sincere and sympathetic friend.

A statement of the business transacted in 1917 was submitted:

The net premium income amounted to $261,336.47 and the total income to $315,599.87.

The premiums written during the past year show an increase of $81,388.97 over the year 1916, and the income from all sources, for the same period, shows an increase of $82,518.49, the disbursements showing an increase of $74,060.30.

The cash assets amount to $285,683.48 and the Ledger assets to $1,176,000.30.

The liabilities to the public amount to $142,846.40.

A report was also submitted of the Managing-Director's recent sojourn in Europe with reference to the passing of reinsurance treaties and the extension of the Company's operations in that country, this being facilitated by the connections which the Company enjoys through its shareholders in France.

By reason of arrangements made, the "British Colonial" expects to receive a larger volume of business, and steps have, therefore, been taken to increase the paid-up capital during the present year.

In view of the extension of the Company's affairs, it was decided to establish an Advisory Board in Paris, and to increase the number of the Directors residing in France. The following directors were elected in addition to the French Directors at present holding office: Messrs. Dupont-Descat, Luzarche-Dazay and le Vicomte de Jessaint.

The Honorable Ernest F. de Varennes was elected to the Board and the Directors whose term of office had expired were re-elected.

At a subsequent meeting of the Directors Mr. I. L. Lafleur was elected President, Mr. J. B. Morissette, Vice-President, Mr. J. E. Emile Leonard, Treasurer, and Mr. Theodore Meunier, Managing-Director and Secretary.

PUBLICATIONS RECEIVED

Insurance.—Annual number of the "Continental Life Line." Published monthly by the Continental Life Insurance Company, Toronto.

Labor.—One of a series of lectures of the "Employment Department and Employee Relations" in systematic course. By F. C. Henderschott, of the New York Edison Company.

Investment.—A brief summary, based on the authentic statistics of the current state of business in Canada. Published monthly by Greenshields and Company, of Montreal.

Annual Report.—The forty-eighth annual report of the Royal Bank of Canada in book form. Besides containing the usual directors' and auditors' reports, there is included a "Roll of Honor" of members of the staff who have enlisted for overseas service, also a summary of Dominion statistics for the past year.

Finance.—Monthly financial report. Published by Lloyds' Bank, Limited, London, Eng.

Canadian estimates for the fiscal year ending March 31st, 1919.

Pamphlet entitled, "Let's Choose Executors and Talk of Wills." Published by the Standard Trusts Corporation, Winnipeg.

Municipal.—The Municipal Year Book for 1918, compiled by Mr. Hubert Groves, director of the Municipal Intelligence Bureau, has just been issued. It contains a description of the city, its extent, population, assessment, parks, wards, schools, churches, courts, banks, libraries and theatres. It deals with such matters as the Canadian National Exhibition, the Hydro-Electric power system, the Harbor Commission, and the leading manufacturing and trade associations. It gives practical information regarding the city's government, and contains a story of Canada's part in the war.

The Municipal Hand Book is published by the Municipal Intelligence Bureau, Toronto. Price, $1.

COUNTY OF LINCOLN SELLS BONDS

Messrs. Wood, Gundy and Company, of Toronto, have been awarded a block of $50,000 5 per cent. 10-year bonds. The issue was sold at 94.64.

Why Risk Your Savings?

This is no time to guess about the ability and integrity of your broker.

You can make sure of sound advice and a square deal by consulting Members of the Toronto Stock Exchange. They are financial specialists and will gladly advise you on your investments without any charge.

Any Member of the Toronto Stock Exchange can buy or sell any security for which there is a market anywhere in the world.

WESTERN TRUST COMPANY

The annual meeting of the Western Trust Company was held recently at their head office in Winnipeg, and the annual report for the year ended January 31st submitted. The profits for the year amounted to $82,499, being a small increase over the profits for the previous year.

Dividends at the rate of 5 per cent. per annum were paid during the year, amounting to $50,250. The sum of $25,000 was again transferred to reserve against investment in subsidiary company, and the balance transferred to profit and loss account, to the credit of which there is now $56,336. Most of the company's assets are invested in real estate mortgages.

RAILROAD EARNINGS

"Representing The Mutual Life of Canada"

Efficient representatives of our Company will be found in every important centre in the Dominion and in the Island of Newfoundland. Their motto is "Service" and they will gladly furnish any needed information regarding Life Insurance in general and Mutual Life Insurance in particular. The Company issues policies on every approved plan—including Endowment Policies, Monthly Income Policies, and Policies designed for the protection of Business Enterprises. It has been the aim of the Mutual Life of Canada to introduce into its contracts every modern privilege that is compatible with safety, but the distinguishing feature of the Company is Mutuality. Under this system all profit from whatever source reverts to the Policyholders and so reduces the cost of protection. We furnish—
The largest amount of protection for the least possible outlay.

THE ANCHOR OF LIFE INSURANCE

"We all need our anchors, and I know of no better one than a Great-West Policy," is the opinion of a prominent Western financier, expressed in a recent letter to The Great-West Life.

Life Insurance offers the surest way of providing for the welfare of dependent ones. A Great-West Limited Payment Policy gives the additional advantage that the insured is enabled to provide for his own future as well.

Rates on request.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Brazilian Traction, Light and Power Company.—While the gross earnings of the company increased during February by 443,000 milreis, the net decreased 320,000 owing to an increase of 763,000 milreis in operating expenses. The gross earnings for the first two months of the year were 15,152,000 milreis, compared with 14,138,000 during the corresponding period of 1917. The net was 7,261,000 and 7,887,000, respectively, a decrease for the two-month period of 626,000.

Northern Ontario Light and Power Company.—The annual report of the company for 1917 shows that the interest charge on the company's first mortgage 6 per cent. sinking fund bonds was earned over 2¼ times. After payment of dividends on the preferred stock and a charge for the depreciation reserve, $50,000 in excess of the amount so charged last year, there was a surplus for the year of about $37,000.

Delivery of power to the Kirkland Lake gold mining district was made early in 1917, and earnings from this source contributed $64,768 to the company's gross returns. The earnings also reflect substantial increases in sales to the Cobalt mines, as well as to the various municipalities served.

The report states that the great demand for silver and its enhanced value offset the threatened strained labor conditions and relieved the mining situation. Higher labor and material costs are reflected in the increased operating expenses over the previous year.

Dominion Linens, Limited.—The financial statement of the company for the year ended December 31st, 1917, shows an increase in earnings of more than 61 per cent. over the previous year. Profits, after deducting cost of management, paying bank interest and writing off bad debts, amounted to $50,578, compared with $31,326 in previous twelve months. Dividends on preferred stock amounted to $16,915; $13,153 was allowed for depreciation of buildings and plant, and $5,000 for depreciation of inventories. After writing off balance of charter and organization expenses, etc., there remained surplus for year of $6,679, which brings profit and loss balance up to $29,767.

Inventories of goods manufactured and raw materials stand at $196,590, compared with $149,997 at the end of the previous year. Real estate, plant and buildings are now valued at $372,386, compared with $376,671, the latter amount including trade marks and goodwill, which are now valued separately at $95,000. Cash on hand and in bank amounts to $14,404, and bills and accounts receivable to $56,975. Current liabilities total $64,106.

National Brick Company of Laprairie, Limited.—At the annual meeting of the shareholders of the company a statement covering the operations of the fiscal year ended February 28th was submitted. No printed statement was provided for the shareholders, and when the president, A. A. Ayer, was asked if a statement would be mailed to the shareholders, replied that the directors had not yet ordered it, and that such action would not be in the best interests of the shareholders. The statement read showed little change from that of the previous year. Operating profits were $22,957 after all writing-off had been done. For the previous year profits were $42,714, from which $20,000 was deducted for plant depreciation. No figures are given concerning depreciation, and as the president compared the past year's earnings of $22,957 as against $22,714 for the previous year, the assumption is that a similar deduction for plant depreciation was made before striking the operating profits. The principal change in the balance sheet is an increase from $11,060 to $23,000, which appears under the head of mortgage in the liabilities. This increase, Mr. Ayer explained, was due to the fact that a mortgage adjoining the Laprairie yard was found to be in the hands of the Quebec Trust Company, as it had not been properly transferred.

Crow's Nest Coal Company.—Net profits of $57,635 for the year ended December 31st last, as against $340,501 in 1916, were shown in the annual report presented to shareholders of the company by President Elias Rogers at the annual meeting, held recently. There was a balance at the credit of profit and loss the previous year of $322,840, and an old account of $896 which had been written off was paid during 1917, so that, with the addition of the profits before mentioned the credit balance at the end of the year was increased to $381,013.

During the year the company spent on improvements and developments in connection with the coal company and its subsidiary companies $125,102.57. This included payment of the Coal Creek Branch Railway, purchased from the Canadian Pacific Railway.

The coal mined during the year amounted to 504,768 tons, as against 910,839 tons mined in 1916, and the coke produced was 146,533 tons, as against 268,989 tons in 1916. The decrease in tonnage was owing to strikes and shortage of labor.

The total of the assets is given as $6,883,871. The mines, real estate, plant and equipment are valued at $5,327,540, after setting aside $952,897 for depletion and depreciation. Securities and shares owned are given a valuation of $972,192. Coal, coke and stores on hand amount to $247,573, accounts receivable to $300,210, and cash on hand and in bank to $28,726.

The paid-up capital stock totals $6,212,666. Other liabilities include $120,232 contingent liability and insurance reserve, accounts payable $141,878, and $28,080 due to bank.

BANK BRANCHES CLOSED

WINNIPEG ELECTRIC RAILWAY COMPANY

The annual report of this company submitted at their annual meeting on March 18th, shows a net income of $151,621.80 less than for last year.

The gross earnings increased slightly, but the operating expenses also increased considerably, through the increase in the price of supplies and of labor. As a result the net income is also less than for last year. However, after paying the fixed charges, and allowing $201,050 for depreciation, a balance of $152,579.65 was transferred to surplus. The amount now at the credit of the surplus account is $1,218,106.58.

The company is still suffering from jitney competition. A permanent settlement of this question is looked forward to in the near future, after which, it is announced, arrangements will be made to carry out certain improvements in the physical properties of the company.

BRITISH COLUMBIA ESTIMATES

The provincial estimates for the year ending March 31st, 1919, were submitted to the legislature of British Columbia on the 3rd inst. Useful improvements in the form of the estimates, both of revenue and of expenditure, have been introduced by the comptroller-general, Mr. A. N. Mouat.

The items of revenue, which were formerly shown collectively, are now grouped under the various departments. A total revenue of $9,900,055.13 is expected for the year, being practically the same as the amount in the estimates for the past year. A yield of $2,215,000 is anticipated from the income tax, $1,700,000 from land taxes and $2,203,050 from the department of lands. The expenditures are similarly grouped according to departments, the total being $11,611,694.08, as compared with $10,800,804.67 for last year; the amount chargeable to capital is $1,953,440. The new form of submitting the estimates shows exactly the expected cost of each office or department, and will therefore afford more direct control over the expenditures of public money and be a guide to more efficient and economical administration. At the same time the separation under different heads makes it possible to show each in greater detail.

New Records

Results secured during the past year re-affirm the position of the Sun Life of Canada as the leading life assurance organization of the Dominion.

It leads all Canadian Companies in annual New Business, Total Business in Force, Assets, Surplus Earnings, Net Surplus, Premium Income, Total Income and Payments to Policyholders.

Fair-dealing and progressive business methods are the foundations for the Company's phenomenal growth.

LOANS MONOPOLIZE THE FIELD

The capital applications made during the months of January, February and March, according to the quarterly compilation made by the "Economist," London, England, show a total of £475,259,000. Of this figure £472,246,000 represents government borrowing. The total of £475,259,000 compares with £214,362,100 for the previous quarter and £825,925,200 for the first quarter of last year. The applications by quarters for 1916 and 1917 compare as follows:—

Quarter.	1917.	1916.
First	£ 825,925,200	£156,251,200
Second	221,254,300	131,022,500
Third	57,054,400	111,578,000
Fourth	214,362,100	186,584,700
Total for year	£1,318,596,000	£585,436,400

IMPORTANT INSURANCE AMALGAMATION

The speculations which have been current during the past couple of months regarding the company that has made the offer to purchase the shares of the Century Insurance Company, Limited, of Edinburgh, Scotland, are now set at rest by the announcement that an agreement has been entered into between the Friends' Provident Institution and the directors of the Century, whereby the shareholders of the latter company are to receive for their shares £6 5s. each, together with a 2s. final dividend for the year 1917 from the company.

The arrangement come to is of an unique character among insurance fusions, this being the first instance in which a mutual life office has allied itself as partner with a composite office.

The Friends' Provident Institution transacts life insurance alone, while the Century operates practically all other forms of insurance in addition to a progressive life department. Each one will continue operations on its own distinctive lines, while acting in the closest possible co-operation for mutual benefit. The intention is that the general manager and certain directors of the Century shall join the board of the Friends' Provident, and the former company will be similarly represented on the board of the Century. In this and other ways the two businesses will be closely linked together, while the individuality of each will be maintained.

The Century Insurance Company was founded in 1885 as the Sickness and Accident Assurance, Limited, the present name being adopted in 1901 as a more concise and distinctive title in view of the extended operations which had then been entered into and were then contemplated. In 1900 the total assets of the company amounted to 126,000 pounds sterling, while at the end of 1916 this had increased to 1,544,000 pounds sterling, and it is understood that a substantial addition to this sum has been made during the year just closed.

The Friends' Provident Institution was founded in 1832 by members of the Society of Friends for the purpose of mutual life assurance for Quakers and their connections. Throughout its history the Friends' Provident has been noteworthy for the large surpluses realized for its members. Quakers and their family connections are not numerically an important part of the nation, but control or are closely associated with many substantial financial and commercial undertakings in England. The Friends' Provident from this limited but influential class has succeeded in building up funds now amounting to over 3¼ million pounds sterling. About 1915 the members decided that the time had arrived for a broadening out of the field of operations, so far as life assurance business is concerned. This aim was achieved by opening the Institution to the general public in that year, when it was incorporated by special act of parliament.

Mr. Henry Brown, general manager of the Century Insurance Company, Limited, is to be congratulated on this important issue of his long and devoted labors on behalf of the Century Insurance Company. The climax was reached when the Friends' Provident Institution deemed it worth while to pay for the shares of the Century double the market quotation of a few months ago. While the bargain is admittedly one of decided advantage to the Century shareholders, it is also advantageous to the Friends' Provident Institution. Each office will extend its connection under its own name, and with the combined resources of about five million pounds sterling this new amalgamation bids fair to become one of the leading insurance institutions in the British Empire.

The Century Insurance Company, Limited, at present transacts business in Great Britain, India, Australia, New Zealand, United States and Canada, their Canadian manager being Mr. T. W. Greer, of Vancouver, B.C., in which city the head office for Canada is located.

Forty merchants of Brampton have formed a Retail Merchants' Association. The officers are: President, A. H. Milner; vice-president, E. W. Boyle; secretary, W. J. Bartlett; treasurer, C. V. Charters; executive committee, Jos. Dawson, H. McKillop, H. B. Burton.

The Board of Trade figures for March show an increase in imports of £26,090,000 over last year, and a decrease in exports of £8,109,000. The principal increases in imports were: Food, £7,000,000; raw materials, £11,000,000, of which cotton accounted for £7,000,000. The chief decreases in exports were in manufactured articles.

BRITISH COLONIAL FIRE INSURANCE COMPANY

The sixth annual meeting of the British Colonial Fire Insurance Company was held on the 10th inst., in Montreal, Mr. I. L. Lafleur, the president, occupying the chair.

The statement, as presented, showed a total income of $315,599, of which amount net premium income accounts for $261,336. Premium income for 1917 shows an increase of $81,388 over the previous year, while the increase in income from all sources shows an increase of $82,518. Over against this increase there has been an increase in expenditure of $74,060. The cash assets of the company now amount to $285,683 and the ledger assets to $1,176,000, while the liabilities to the public amount to $142,846.

Mr. Theo. Meunier, the managing director, was able to report to the meeting that as a result of his visit to France last year, satisfactory arrangements with regard to re-insurance treaties and the extension of the company's operations in that country had been made, and there was every reason to expect a larger volume of business during the present year. In order to adequately cope with this situation steps have been taken to increase the paid-up capital during the present year. In order also to strengthen the position of the company and in view of the extension policy which has been adopted an advisory board, resident in Paris, will be established. It was also decided to increase the number of French directors by three.

At a subsequent meeting of the directors Mr. I. L. Lafleur was elected president, Mr. J. B. Morrissette vice-president, Mr. J. E. Emile Leonard treasurer, and Mr. Theodore Meunier managing director and secretary.

BANK CLEARINGS

The following are the bank clearings for the weeks ended April 12th, 1917, and April 11th, 1918, respectively, with changes:—

	Week ended Apr. 11, '18.	Week ended Apr. 12, '17.		Changes.
Montreal	$ 94,054,721	$ 58,601,623	+	$35,453,098
Toronto	67,676,368	44,630,470	+	23,045,898
Winnipeg	49,849,166	46,941,249	+	2,907,917
Vancouver	10,546,615	5,036,410	+	5,510,205
Ottawa	6,448,697	4,300,597	+	2,148,100
Calgary	7,024,958	5,756,758	+	1,268,200
Hamilton	5,213,839	3,395,768	+	1,818,071
Quebec	4,394,805	3,612,771	+	782,034
Edmonton	4,140,319	2,392,406	+	1,747,913
Halifax	3,763,674	2,055,245	+	1,708,429
London	2,599,261	1,763,325	+	835,936
Regina	3,887,058	2,306,631	+	1,580,427
St. John	2,472,730	1,680,437	+	792,293
Victoria	2,422,635	1,350,457	+	1,072,178
Saskatoon	2,018,129	1,497,466	+	520,663
Moose Jaw	1,467,023	980,349	+	486,674
Brandon	636,897	492,731	+	144,166
Brantford	903,044	608,688	+	294,356
Fort William	635,801	385,469	+	250,332
Lethbridge	950,760	715,303	+	235,457
Medicine Hat	482,619	517,015	—	34,396
New Westminster	421,146	200,498	+	220,648
Peterboro	685,992	448,410	+	237,573
Sherbrooke	878,929	500,236	+	378,693
Kitchener	664,192	651,214	+	12,978
Totals	$274,239,378	$190,821,535	+	$83,417,843

The Toronto bank clearings for the current week are $66,580,728, compared with $85,120,986 for the same week in 1917, and $43,616,392 in 1916.

Reports from the thirteen leading English banks show a substantial increase in deposits during the past year. It shows a financial condition indicating hopeful prospects for continuing the war to a victorious close. The thirteen banks officially reported held in cash December 31st, 1917, amounting to $1,123,739,566, as compared with $1,074,459,376 held the year before. There has also been a substantial increase as to liquid assets, money at call and bills. The net profits of the thirteen banks aggregated $48,600,000 in 1917, as compared with $43,837,477 for the year 1916 and with $34,050,730 for the year 1915. Proportion of cash to liabilities on December 31st, 1917, was over 19 per cent., showing a good margin of reserves.

Government Opportunities After the War*

Two Problems Confront Canadian Government With Respect to the British West Indies, Both Involving a Federal Union—Government Ownership of Railways — The Post Office and Possibilities of Aerial Service — Necessity For Deepening St. Lawrence River Between Montreal and Lake Ontario.

By A. T. DRUMMOND, LL.D.

At an early period in our Canadian Confederation Newfoundland was understood to be willing to become one of the provinces of the Dominion, but desired its debt to be taken over by the federation. Unwisely, probably, most people will now think Sir J. A. Macdonald, then the Canadian premier, raised objections and the negotiations were broken off. The amount involved was a relatively small matter to us, but probably then very important to the island colony. At this later day, when the problems of the great war have brought all the scattered sections of the Empire into such closer touch, politically, commercially, and in the realization of a common brotherhood in aims as well as arms, might there not be an opportunity for again approaching Newfoundland with an equitable proposal which would be advantageous to the colony, commercially, and in view of imperial interests, whilst it would complete the Dominion, territorially, from the Atlantic to the Pacific Ocean. Canada's position is now so strong that it could afford to meet Newfoundland in a spirit of not only fairness, but magnanimity.

The British West Indies problem is more complex. Including British Guiana, British Honduras and Bermuda, there are fifteen Crown colonies, none possessing responsible government, but each with its official government, with executive powers, and appointed from London, and each with its separate tariff, debts and laws. Whatever important undertakings are proposed in any colony are subject to the approval of the secretary of state for the colonies. The total population is 2,100,000, of which under 5 per cent. are whites, the remainder being blacks, East Indian coolies and some Chinese, Portuguese and Indians. Under this Crown colony system the people are really in a condition of tutelage, and, as a consequence, have practically had taken from them all incentive to initiative, and even interest, in their own political and larger commercial problems. And yet, there are among them strong, capable men of British stock, long resident in these tropical countries, and, through business, directly interested in their prosperity, who, in their wide knowledge of local affairs and their broad views, are as well—possibly better—fitted to grapple with their countries' problems as the official world presently is, and to whom, later on, after some experience, could be entrusted by the colonial office the reins of government.

Two problems are at present in readiness for consideration by the Canadian government with respect to the British West Indies. The one involves a federal union of the whole of the island and mainland colonies under one government as a new dominion, which would enter into a commercial union with Canada. The other also involves a federal union, but under one local government of a provincial character, for the purpose of entering politically, as such union, into the Canadian federation. Federation with Canada has been advocated in England by sections of the press which had overlooked the black and coolie problems in the West Indies, and the position which these two millions of people would occupy in respect to manhood suffrage, to which they would become entitled, to competition in the labor world of Canada, where workmen of a different race are tolerated with difficulty, and to education, since the tendency in every English-speaking province is to make this compulsory. It would be possible to refuse the suffrage to the blacks and coolies until they had passed a literary test, and that would not be unfair, whilst the differences in climate would probably lead to the vast mass of them remaining by preference in the West Indies, and thus not competing with labor in our more northern country. There is, however, a more immediate difficulty arising from the very large and increasing business which several of these West Indian colonies have with the United States, and which might be seriously disturbed by political union with Canada and by the introduction of its widely different tariff. These considerations have thus suggested that the federal union of these Crown colonies as a new dominion under one government, and, as such, commercial union with Canada, would be more advantageous, as it would leave the black and coolie problems to be dealt with by the new dominion, and, while leaving the almost limitless United States market still open to these colonies, would give them the additional large market here in Canada.

In Great Britain, the board of trade, which largely corresponds to our department of trade and commerce, has been reorganized and its functions greatly expanded to meet the new conditions which, after the war, will be imposed upon it through the greater activities of British interests at home and abroad. Industrial Britain has been rudely awakened by the war's realities, and has found not only innumerable defects and deficiencies in its trade and commerce, which must be remedied, but very many untried enterprises and new markets, which must be established and facilitated, in all of which greater direct interest and helpfulness on the part of the government is an absolute necessity. Following conferences with a small, informal committee of leading business men, the work of the board has been constituted under two main divisions, the more important of which, the department of commerce and industry, has again been subdivided into six sections: commercial relations and treaties, overseas trade, industries and manufactures, industrial property, industrial power and transport, and statistics.

An enlargement in its scope of work seems very suggestive in our corresponding state department. With our new interimperial and foreign trade to be facilitated by commercial treaties and agreements; the numerous transportation problems, both overseas and at home, to be solved; home industries to be developed or encouraged; our natural resources in their relation to trade to be investigated; the intimate bearing of science on industry to be followed up and

---

**This is the last of a series of three articles on the above subject to appear in "The Monetary Times."*

aided; our tariffs to be adjusted to help trade; our proper commercial representation at important points within the Empire and in foreign countries to be maintained; and many other subjects directly bearing on the business of the future, all pressing for attention, the department of trade and commerce could become the leading department of the Dominion government. What also has been realized in Great Britain, and is equally important here, is a more intimate knowledge by the department of the various industries and their needs through frequent visits to the business centres and personal conferences with the industrial leaders.

Government Ownership of Railways.

G. H. Roberts, the British minister of labor, and one of the leaders in the labor party, confessed, on January 26th last, that in his propagandist days he thought state machinery the one panacea for overcoming all ills. Experience had taught him that that belief was not very sound. Those who formerly clamored for state control now showed, he found, resentment against it, and were asking for decentralization and the ability to control their own affairs. In Ontario and the western provinces the easily-led public, which so often appears to think only superficially, if at all, over government and municipal problems, has been persuaded by sections of the press and by some ambitious men, who have closed their eyes to past experience, to approve of government ownership of railways That Great Britain and the United States, in taking over control of the railways, have in view only co-ordination of the traffic in the interests of the war, and that there is to be no interference with corporate ownership and enterprise, are now settled. The Canadian government has, however, a different and a difficult problem before it, arising from its own construction and ownership of railways, legacies from the past and financial conditions before, as well as occasioned by the war. It is one of the functions of government to encourage and stimulate individual and corporate enterprise, and not to displace it, or even encroach upon it. That a limited control should be exercised by it in seeing that the public was reasonably served can be at once admitted, but, with conditions as they have long existed under our political systems, it is not possible for governments to plan, construct and operate railways with that single regard for economy in construction and operating, financial returns on the capital expended and future development which characterize private corporations. This has been the invariable experience in Canada with government ownership of railways, whether in case of the Dominion or of the provinces. A suggestive plan for the consideration of the Dominion government would be the leasing of its railways, presently owned, to private corporations under reasonable conditions that will admit of the payment of the operating expenses and maintaining the lines at a high standard, whatever surplus accrues being divided with the government; and, as to the two transcontinental lines now in difficulties, providing by legislation for temporary delay in meeting the interest on their bonds and for the 15 per cent. increase in rates being extended to several years to permit of gradual development of the traffic, and to give these roads that financial strength that will enable them without assistance to raise the necessary funds for renewals and improvements to the permanent way and for more ample rolling stock to meet the expected better conditions of the future in the western provinces.

Other Important Matters.

A great public work of equal interest to Canada, to the American states bordering and west of the Great Lakes, and to the shipping interests and in the food supply of Great Britain, awaits the action of the Dominion government in the deepening of the St. Lawrence River between Lake Ontario and Montreal, thus completing an uninterrupted highway of about 2,000 miles for great ocean steamships from the sea to almost the centre of the continent at the head of Lake Superior. To make each large city on the Great Lakes an ocean port for seven months of the year means for them a vast accession of direct Empire and foreign business.

The post-office department at Ottawa might well take advantage of the new developments in aerial services to have letters, newspapers and parcels carried by aeroplane between the larger cities in the interest of both economy and quick delivery. The automobile would also be a valuable aid in the same business with the smaller towns. Extensive automobile services are projected by the United States post-office department, and even twenty years ago parcels were carried by post-office vans every night in England between certain leading points, reasonably distant from each other, as between Oxford and London.

The opportunity awaits both the Dominion and provincial governments of giving partisan appointments and patronage in government orders and contracts their final death-blow and burial. Let it no longer be a slur on Canadian governments that ability is constantly ignored in order to give party followers a recompense for services, and that, in the issuing of contracts firms of the highest standing here and abroad are passed over because they or their representatives are not on the party patronage lists.

ONTARIO WORKMEN'S COMPENSATION IN 1917

The third year of operation of the Workmen's Compensation Act closed December 31st, 1917. The number of accidents and the amount of compensation show a considerable increase over the prior year.

The total amount of compensation awarded during the year was $2,913,085.81, as against $2,011,468.94 during 1916; the total number of accidents of every kind reported during the year was 36,514, as against 26,092 during 1916.

The increase is partly the result of increased industrial activity and partly of increased rate of wages, which automatically increases the workmen's compensation. The most marked increases in compensation and accidents were in munition manufacturing in schedule 1 and in operation of railways in schedule 2.

The compensation in schedule 1 industries amounted to $2,289,529.44, and the accidents reported numbered 30,701; the compensation in schedule 2 amounted to $623,556.37, and the accidents reported numbered 5,813.

Of the total 36,514 accidents reported during the year, 454 were fatal cases.

The average number of notices of accident received each working day during the year was 126, and the average amount of compensation awarded each day was $9,071.

CANADA'S VICTORY LOAN

The following is a statement made by Messrs. Greenshields and Company, of Montreal, in the April issue of their monthly review:—

"The final instalment on Canada's Victory Loan will fall due on May 1st, and the present understanding is that no new issue will be placed on the market until the autumn.

"It is quite probable that the investment situation could not stand the strain of a major loan operation without the period of recuperation that will intervene on the present plan. Granting that for this and other reasons—chiefly the disturbance to ordinary business which a big loan operation involves—a new issue will be deferred until the autumn, the need for something to keep alive the spirit that animated the Victory Loan campaign is self-evident. Full payment by investors of all but a very small fraction of the Victory Loan will be completed next month. From then until the autumn the danger is real that, so far from further progress being made, habits of thrift and saving developed and encouraged by the Victory Loan will become impaired unless some national effort is made to keep the necessity of such habits constantly before the country."

The opinion is expressed by the review, "that in the interval between the final instalment of the Victory Loan next month and the new loan in the autumn there is opportunity for a successful movement directed along the lines of the thrift campaigns of Great Britain and the United States. Great Britain has raised no less than $1,400,000,000 through sales of war savings stamps and war savings certificates. The United States figures are approaching the billion-dollar mark. Canada's effort along the same lines has been absurdly feeble. The last figures as to sales of war savings certificates showed a few millions. The war savings stamp idea, once announced as part of the government's programme, is never heard of.

"Politicians and the government departments they direct are very busy these days, and it is easy to dismiss suggestions worth while with the plea that there is already too much to do. Outside of political circles there is an army of workers ready to put their best effort into any plan that will further the war. The success of the Victory Loan was made by just such workers. What they need for a new effort, preliminary to and in furtherance of the next war loan, is a little leadership from official quarters."

WORKMEN'S COMPENSATION IN NEW BRUNSWICK

Finding of Commission Which Investigated Operation of Ontario and Nova Scotia Acts

The following is the text of the report presented to the provincial legislature of New Brunswick by a commission appointed for the purpose of investigating workmen's compensation:—

We have the honor to present to you the conclusions at which we have arrived with regard to the operation of a workmen's compensation law in this province.

The order-in-council of January 3, 1917, authorized us to consider the operation of the Ontario and Nova Scotia acts, in their respective areas, in regard to their applicability to this province. This was enlarged by the legislative assembly at its last session, and further power given to us under Chapter 35 of the acts of this province, passed in the present year of his Majesty's reign. The consideration of these acts necessarily led, to a greater or less degree, to the consideration of other acts in Europe, Australia, New Zealand, the United States and South America.

Common Law Liability.

It may be well to explain fully, in express terms, the common law liability, as between the employer and the employee. Under the common law the employer is liable to the employee for certain injuries sustained by him in the course of, or arising out of the employment. This principle of the common law was enforced against the employer, but subject to three defences, which may be stated as follows:—

First, negligence on the part of the employee.

Second, the doctrine of common employment, which, shortly stated, means that if one employee is injured by the act of a fellow-employee, an action would not lie against the employer.

Third, what is called the doctrine of the assumption of risk, wherein the employee was assumed to know the hazard upon which he entered, and therefore, by accepting money for his services he contracted himself out of the liability by the employer. That is the common law doctrine. This, however, was modified by the passing in England of Lord Campbell's act, which was re-enacted in this province and which may now be found in the Consolidated Statutes, Chapter 79. The effect of this act was to vest in the heirs of the injured person the right of action against the employer. At common law the right of action died with the death of the injured man, this statute gave the right to the injured man's heirs to proceed against the employer. There is, therefore, the common law right to consider, which we may discuss in this way; the liability of the employer to the employee, subject to the defences which we have suggested above, and enlarged by Lord Campbell's Act.

In the year 1884 legislation was implemented in Germany by which the common law doctrine of that country was varied, and the Workmen's Compensation Act was passed. This was followed by Norway in 1887, and successively by nearly all the European nations, as time went on.

Principle Widely Accepted.

In point of fact there are 46 nations or peoples in Europe and portions of the British Empire, as well as in South America, which have accepted the principle of workmen's compensation. Turkey is perhaps the one European nation which has not yet passed legislation of this kind. In America and Canada during the last seven years about forty acts have been passed which adopt the principle.

The principle means that there shall be fastened upon the industry in which the workmen is engaged the hazard of that industry. Or 5 per cent. of the assessment, of the workmen to be compensated, and the liability of the employer to pay assessments of some sort in order to meet his liability. So that the modern doctrine would seem to run in this wise, that the industry which has caused loss to the individual, whether it be that of life or otherwise, should pay the loss. Or practically that the statutory law should restore to the individual the loss occasioned by the industry itself, and this proposition we venture to suggest for your honor's careful consideration.

It will probably be found to be true generally, that modern workmen's compensation costs more than the old plan of employer's liability; but, on the other hand, it confers larger benefits upon the employee, while it relieves the employer of a heavy personal liability. The material question to consider is the expense of doing business by way of a government commission. It has been found, broadly speaking, that the commissions have transacted the business at much less cost than the insurance companies, and in this connection it is necessary to say that the government of the province should pay part of the expense of the commission, probably all of its administrative expenses.

In the province of Ontario, where, of course, the income of the commission is large, the cost has only run to about 4½; putting it still more broadly, the right whereas the ratio of expense of insurance companies is probably not less than 35 per cent. It is therefore clear that of the total amount collected by a commission, a much larger amount is returned to the employee than is returned by the systems at present in force. One reason, and probably it is a sufficiently sound one, why the province should contribute to the expense, is that in some cases those who are left behind by the injured workman become a charge upon the public, and the assessment which is made under the workmen's compensation plan upon all industries does away with the possibility of these public charities, and the contribution should, therefore, be made partly by the public. This is true in all the provinces of Canada where the commissions are in force, but on account of the short time they have existed in British Columbia, Manitoba and Nova Scotia it is not feasible to give exact details of cost.

Nova Scotia's Legislation.

The Nova Scotia Act runs in this wise: Fifty-five per cent. of the injured workman's wages is paid when he is incapacitated, and less in proportion to the injury when partially incapacitated. If death ensue, $20 a month to his widow until death or re-marriage, in the latter event two years' annuity and $5 a month for each child but the latter not in all to exceed $20 a month, no matter how many children, until each attain the age of sixteen years.

A certain number of occupations are excluded in Nova Scotia by regulation, on account of the smallness of the number employed, or for some other reason, for those which are so excluded the common law rights are preserved. In cases where the statutory right to collect is given to the employee, the common law right of action and all other statutory rights are taken away.

On the practical side of the question, and accepting the principle of workmen's compensation, we venture to say that the act of Nova Scotia is more nearly applicable to New Brunswick than any other. The acts of British Columbia, Manitoba, Ontario and Nova Scotia, are too drastic to be applied in their entirety in New Brunswick. In fact, in those provinces there is generally assumed liability, ended in some cases only by death of the workman, or his or her dependant, if the latter is a widow. While all of these acts may be open to question at one point or another, yet each has strong features, and after full consideration we suggest that an act along the lines of that of Nova Scotia, modified in some particulars, but enlarged in others, be submitted to the legislative assembly of New Brunswick, strict provision being made:—

Firstly, to limit by way of weekly or monthly payments, the amount payable to any one person, or his or her dependants to $3,500. This suggestion varies radically the other acts, but we believe the limit should be fixed in the public interest.

Secondly, that the Nova Scotia act be again varied by a provision for first medical aid of a character to be determined by the commission itself.

Thirdly, that a system of merit rating be adopted so that the rate of assessment to each employer will be fixed to some extent upon the record of his own particular business. And, therefore, if the record of any particular industry were especially good, it could be noted in a general consideration of all rates.

Fourthly, if it is possible that consideration be given to a scale of specified payments in lieu of the weekly or monthly one as above described in case of certain specified injuries.

Fifthly, that the act only apply to those whose employers have filed their payrolls as may be provided by the act, but that failure to comply shall leave the employer open to action at law, and that he should be placed under heavy penalty as well for such failure.

Sixthly, that in order to keep as close watch over each industry as possible, that the provisions of the Factory Act be extended, so that it will be necessary for each engineer to have a certificate for the special industry in which he is engaged which shall set forth the date of his employment, and notice to be given to the government of the termination of his engagement, in other words the government should know at all times where each engineer is employed.

Seventhly, that negotiations be entered into with the Medical Society of New Brunswick to fix, if possible, fees for first medical aid or for other services which may be rendered under the act.

Eightly, that provision be made to include occupational or industrial diseases.

Ninthly, that the $5 monthly to be paid to each child be not limited to any number.

Tenthly, when an employee is paid more than $1,500 a year the act shall only apply on that basis; to those who are paid less than $6 a week, full wages shall apply.

Eleventhly, that the waiting period be fixed at seven days, no payment to be made for any part of this time, unless incapacitated for that period when compensation shall be paid from date of injury.

Twelfthly, that provision be made to pay burial expenses in case of death of workman, the amount of which shall be limited in the act to a special sum.

Committee's Recommendation.

We therefore recommend that an act be passed embodying the above suggestions; believing that from an economic point of view each industry should carry its own burden, so that every human life which is jeopardized in the process of creating should be paid by the industry affected. In other words, that human life, human thought, human action which have been impaired by injury arising out of, or in the course of employment, should be repaid by the industry which has caused the loss, which therefore would carry the burden of debt to the individual, it would also thereby relieve the employer in many instances of his present heavy liability.

EMPLOYERS' LIABILITY ASSURANCE CORPORATION

The thirty-seventh annual report of the Employers' Liability Assurance Corporation which appears on another page of this issue is without doubt the best in the experience of the corporation. To have brought about an increase in premium income of $4,702,130 over that of 1916 during a period of war is indeed a great accomplishment, and reflects credit upon the management.

The total premium income for the year reached the remarkable total of $16,983,150. As in previous years the greatest increase came from the United States, although in every country in which the corporation does business there was an increase in every class of business.

During the year the corporation paid under policies $7,773,850 on 45.8 per cent., which is 2.8 per cent. lower than the percentage of losses paid the previous year.

The reserve for unexpired risks stands to-day at $6,856,500 as compared with $4,912,000 in 1916. In dealing with the reserve last year, Lord Claud Hamilton, M.P., the chairman, stated, "owing to the unusual amount of excess premiums they might have well reduced this reserve," and the running off of that reserve had more than justified that remark. "The same," he said, "was true of this year, as the increase in premiums was due in large measure to excess premiums, all the liability of which was already earned. In spite of that they had still made the reserve the full 40 per cent. as in respect of the other premiums."

The reserve made for outstanding losses was $5,926,500 compared with $4,529,000 a year ago.

The investments of the corporation, totalling $15,632,761, are of the very highest class of British government securities, municipal securities of the colonies, high-grade foreign municipal and government securities.

Mr. C. W. I. Woodland is general manager of the corporation for Canada and Newfoundland. Mr. Woodland is one of the prominent men in casualty insurance circles in Canada. Under his management the Canadian business reveals a very healthy and vigorous condition notwithstanding the conditions brought about by the introduction of provincial workmen's compensation operations and unsettled business conditions generally.

The fire department of the corporation is under the direction of Mr. John Jenkins, whose work as a capable fire underwriter is recognized throughout Canada.

PERSONAL NOTES

MR. J. W. RUGGLES has been appointed a director of the Standard Chemical Iron and Lumber Company, Toronto.

MR. E. V. CHAPLIN, C.A., has opened offices at 312 Kennedy Building, Winnipeg, the firm of Saul and Chaplin having been dissolved.

MR. ARTHUR BARRY, general manager for Canada of the Royal Exchange Assurance, has returned from England after a two weeks' visit to his head office.

MR. R. HOME SMITH, of Toronto, has been elected president of the Buffalo, Lockport and Rochester Railway, succeeding Mr. Wm. Osgood Morgan, of New York.

MR. C. W. I. WOODLAND, general manager for Canada and Newfoundland of the Employers' Liability Assurance Corporation, has returned to Toronto from the South.

MR. JAMES K. PICKETT has been appointed general manager of the Union Trust Company, of Toronto, succeeding Mr. J. M. McWhinney, who recently resigned. Mr. Pickett has been for some years past manager of the company's office in Winnipeg. In 1898 Mr. Pickett joined the staff of the Imperial Life Assurance Company and remained with that company until he reached the position of general manager of it upon the retirement of Mr. Thomas Bradshaw. In 1914 Mr. Pickett left the Imperial Life Assurance Company and shortly afterwards went to Winnipeg as western manager of the Union Trust Company.

JAMES K. PICKETT.

MR. J. T. WILSON, president of the Dominion Life Underwriters' Association, accompanied by Mr. J. H. Castle Graham, secretary, met a number of Winnipeg life insurance underwriters at a conference and luncheon at the Fort Garry last week. Messrs. Wilson and Graham are making a tour of the Dominion in the interests of the association.

LIEUT. HENRY V. LEMESURIER, of 63 Isabella Street, Toronto, son of Mr. G. G. LeMesurier, manager of the Imperial Bank, Toronto, is reported to have died of wounds. He had been in France for two-and-a-half years and was educated at Upper Canada College and Trinity College School, Port Hope. A brother, Capt. A. B. LeMesurier, has been in France since October, 1914.

MR. J. F. HARPER, manager of the Bank of Hamilton's branch in Vancouver, and at one time manager at Hamilton, has retired from the service on pension. He has been in the employ of the bank over 35 years. Mr. Harper will continue to reside in Vancouver. He is succeeded by Mr. J. W. McCabe, who was formerly manager of the branch at Queen Street and Spadina Avenue, Toronto.

THE QUESTION OF AMERICAN CREDITS

The mercantile community here has been looking expectantly to Washington in the hope that the representations made there this week by Finance Minister White will lead to credit arrangements which will make it unnecessary for the Dominion Government to put into force the drastic prohibition of imports suggested a short time ago at Ottawa. Canadian merchants have co-operated heartily with the government in carrying out the various measures designed to make the people more thrifty and economical. They would no doubt acquiesce in the proposed prohibition of imports if that was the only way in which Canada could continue to send war supplies to Europe in the present volume, while at the same time continuing her settlements to the United States for goods imported from that country. But a drastic interference of this kind with trade movements which have been long established, would cause great loss and distress in both countries. When the list of imports was announced, it was explained that Canada's imports of those commodities amounted to $150,000,000 per year. This shows how important are the trades that would be affected. Many of the houses handling these goods have gradually built up great organizations by means of which the merchandise is bought, sold and distributed in the most efficient manner; and it would be a great loss to the country in every way if these organizations were rendered useless.

If the United States government makes direct loans to the Dominion, or it is agreed that a certain limited portion of the proceeds of American loans to Great Britain may be expended in Canada, the necessity for the sweeping prohibition of imports would not be so pressing. It might, perhaps, be deemed advisable to place restrictions or limitations upon the importation of certain items rated as luxuries or near-luxuries, with the object of reducing the expenditures of Canadians upon such articles and also as a means of further improving our exchange position. But the large or main difficulty in regard to exchange would be removed by an arrangement providing for successive credits in New York placed at our disposal by Great Britain or the United States government—the funds coming in either case from the latter party.

According to this week's news from Ottawa, Canada is officially asking the American government for $100,000,000 of war orders, and it is said that there is a good prospect of our receiving orders to that amount. If these expectations are realized, this development also will be such as to lessen the necessity for prohibition of imports. As a matter of fact, if the United States gave us $100,000,000 of war contracts and credits besides, it is difficult to see how our government could go on with the proposed general prohibition of imports. By giving us the orders Uncle Sam would therefore expedite his own military preparations, and also probably ensure to American manufacturers of the important commodities above referred to, the continued existence of their market in Canada.

CANADIAN TRADE AFTER THE WAR

Whether there will be a war after the war or not, lies in the lap of the gods. Free-trade England is not quite so wedded to Cobdenite theory as in ante-bellum days, and is more than disposed to carry on a vigorous economic offensive against the Central Powers after the signing of peace. The United States has within recent weeks taken over alien enemy property of a corporate or business character, including the mines, timber limits, wharves and shipping owned by German corporations and individuals. Both the United Kingdom and France realized too late the hold that German finance had secured on vitally important national enterprises; and in both nations, notably in France, there is a determination that German capital with its programme of "peaceful penetration" must not be given the opportunity to aggrandize itself and place national interests in danger in the future.

Fortunately for Canada, the chief capital investments in this country were made by the United Kingdom and the

United States. From the Motherland and the Republic capital will come in the years succeeding the war according to the Dominion's necessary requirements; and, needless to say, such investments will be welcomed. It is only natural, however, to expect that the Dominion will set its face against any policy of economic penetration that Germany may attempt on this side of the water. Whether the brutality and arrogance of the Central Powers will compel the Allies to create an economic combine against them, in self-defence, has yet to be determined; but it is evident that competition, in any event, will be keener after the war than has ever been experienced before.

Canadian and American manufacturers have yet a great deal to learn from Germany with regard to the efficient marketing of their products. And still in another particular, hardly less important, Germany had surpassed the world in the sphere of industry and commerce. Attention to detail had lifted German industry to a commanding position of world power; and it is that same attention to detail that has permitted the enemy to survive and, indeed, to achieve important results during the course of the present struggle.

It may be admitted that, in the great standardized industries of Canada and the United States, the main economies have been effected; but certain details in achieving economies have been overlooked—economies that may make all the difference between success and failure in the fierce competition that will ensue at the close of hostilities. Intensive cultivation achieved marvellous results in German agriculture; and intensive cultivation gave the key to success in German industry and commerce. It is wise to increase one's economic knowledge, even if the lesson be taught by the enemy.

It is patent that many small economies can be effected, both in shop and office—by the keeping of fewer and better records in the office, by the avoidance of duplication, and by so organizing the work that computations need not be undertaken again and again for the same kind of job. And in the shop, chemical analyses of metals will perform wonders in reducing the costs of manufacture; castings in the foundry may be made smaller and so require less finishing; designs and costs may be worked out with greater detail and care. The truth is that, in many Canadian and American plants priding themselves on their output, only the rudimentary work of organization has been carried on. Filing systems have become obsolete; there is unnecessary and wasteful shifting of men on jobs, the natural breaks in the work, at noon and morning, not being regarded; and, much more, there is no full utilization of machinery.

In many industries there is a "slack" season for both workers and machines, a slowing down in the process that makes for the waste of both capital and labor. By efficient planning it is often possible to carry over jobs for such slack periods, just as the progressive farmer makes work for rainy days. Some managers, in factories turning out standard products, install machinery with a view to its utilization in dull time on other types of work. This is important when markets are narrow for the main output. Moreover, by the use of high-speed tools, by reducing time wasted between jobs, by the full utilization of the equipment, important economies in labor may be achieved.

In other directions savings may be effected by careful inspection of the work turned out; by preventing waste of materials; by careful buying of stock, and the cutting of trade credits. Packages, barrels and boxes may be used a second time—there being at present useless waste in connection with the boxes required in the cigar and tobacco trade and elsewhere. When it is recalled that the Standard Oil Company manufactures 220 grades of kerosene, naphtha, benzine and gasolene from the residuum, and makes 994 different kinds of paraffins, waxes, greases and candles, it will be seen how vitally important are the use of by-products, and the elimination of wastes, for the success of modern industry.

HIGH INTEREST YIELDS

In last week's offering of city of Victoria ten-year bonds at a price to yield investors a full 7 per cent., the interest rate on security issues of large Canadian cities reached a new high spot. Prior to this, the highest yield obtainable on new issues of our leading cities was 6¾ per cent., which rate was first established by the last flotation of the Greater Winnipeg Water District. The city of Montreal loan placed recently by the Bank of Montreal gave a return of about 6½ per cent. A loan made a few months ago by the city of Lethbridge was offered to the public at 7⅛ per cent., but Lethbridge is one of the smaller cities and would not naturally command so favorable a rate as Montreal and Winnipeg. The interest rate on Ontario county bonds has not risen to the high levels reached by some of the large cities. Thus *The Monetary Times* last week announced the sale of $60,000 Essex County 6 per cent. 20-year bonds at 98.399; and of $50,000 County of Lincoln 5 per cent. 10-year bonds at 94.64. These were the prices paid by the bond dealers; and, obviously, the prices subsequently made by the dealers to their clients would not give yields as high as those referred to above. One reason for the lower interest on the county bonds is that their requirements are comparatively small—both of the issues here mentioned were considerably less than $100,000, whereas the city issues often run into the millions.

Even the lowest of these interest rates are decidedly attractive. Three or four years ago, an investor wishing to confine himself to first-class Ontario municipal bonds or farm mortgages, could not get more than, say, 5¼ per cent. on the mortgages and 4¾ or 5 per cent. on the municipals. The higher interest yields have been beneficial to the classes who are obliged to live on the interest of a limited capital, in cases where the parties can convert or invest their funds into the new issues. For example, a widow with the proceeds of a $10,000 life policy can now secure a yearly income of $700 from city bonds, as against an income of but $500 from the same class of investment procurable four years ago. Also, any one with fixed capital invested in bonds now maturing can convert the investments into new securities yielding better returns. But, of course, the man who has his funds tied up in stocks bought at pre-war prices and now quoted far below purchase price, or the man who has low-interest bearing bonds which do not mature for some time to come, cannot take advantage of the present opportunities to the same extent. For those who can take full advantage of them, the increased yields on high-class investments help materially to offset the rise in the cost of living. The exceptionally good returns on these investments should also have a tendency to promote thrift and economy among all classes. Under present conditions, every $1,000 saved represents an increased interest income of about $70 per year. A wage or salary earner, if able to put away $200 in a twelve-month period, can thereby give himself or herself an increase of a dollar a month. Steady repetition of that process soon begins to tell upon the income account, especially if supplemented by occasional increases of regular pay.

WHAT ARE NON-ESSENTIAL INDUSTRIES?

No doubt, Canada's main business is the winning of the war, and the bending of every effort both of labor and capital to the attainment of victory. Nevertheless, such a programme, fundamentally important as it is, must not obscure the plain fact that victory will be achieved mainly, if not solely, through our ability to wear out the enemy. And this cannot be accomplished by impairing the industrial power of the nation.

In some quarters it is considered highly unpatriotic to spend on so-called luxuries, on automobiles, silks, and commodities of like nature. In brief, the argument is that reserves of capital and labor should be concentrated on the production of foodstuffs and munitions of war alone—that spending money on comforts and luxuries is entirely reprehensible. This logic is valid only insofar as capital and labor can be employed on war work. Ceasing to spend on automobiles, pianos, gramaphones and other so-called "luxuries" would result merely in causing unemployment, both of labor and capital. Idle labor and closed factories never yet paid taxes, or helped to sustain the productive energy of any nation.

Canadians have been informed that the government will require some $516,000,000 during the current fiscal year on war account alone. It is only from earnings, interest and profits that this vast sum can be procured. Depositing funds in the savings banks is not exactly hoarding; the banks must use these funds for the support of industry or forego profits. If, however, spending on luxuries is curtailed, it will be impossible to find productive use for this capital. The main argument for saving, in the sense of hoarding, in order that Victory Bonds may be bought, is patently absurd. Manifestly, the full employment of the entire reserves of the country's capital and labor is requisite for the support of war loans, and a *sine qua non* for the winning of the war.

Mr. S. Hare, president of the Packard Motor Company, in a speech recently delivered in New York, drew sharp attention to this important subject. He made public for the first time the fact that the Liberty motor, adopted by the United States government for all its aeroplanes, was the invention of the Packard Company. On the perfecting of this motor three years were spent by the engineers in Mr. Hare's employ; and it was a "non-essential" industry that, in this particular at least, saved the situation for the American government. Mr. Hare drew attention to the undoubted fact that there was, after all, a definite limit to the number of men that could be employed upon specific war work; and that so long as shipbuilding, munition-making, and food production did not suffer from lack of labor, there was no logical reason for slowing down those industries engaged in turning out the ordinary products of peace.

The exchange situation between Canada and the United States requires careful investigation and adjustment. It may be necessary to curtail our importations of luxuries; but that fact, arising solely out of the problem of financing our foreign trade, should not lead to confused thinking on spending and saving within Canada itself; for saving, manifestly, can be achieved only through the productive process.

EDITORIAL NOTE

We have received a communication from a valued correspondent, "Britisher," concerning our recent editorial "Financing the Small Farmer." This will be found on page 8 of our issue of last week. Our correspondent takes exception to the assertion that, aside from the chartered banks, little or nothing has been attempted in financing the small farmer in the direction outlined. It is said that we have overlooked the work done in Manitoba in enabling the farmers to purchase livestock under the facilities provided by the Hon. Mr. Winkler, and in Alberta by the Hon. Duncan Marshall.

Insofar as the buying of livestock has been a success under this legislation in the two prairie provinces, something has been done to remedy the situation; but we have no great confidence in the ultimate success of co-operative borrowing, whether for livestock or other purposes. The prosperous farmer, the "big" farmer, has little or no difficulty in securing funds at present, providing he is willing to pay the market rate. Canadian loan companies operating in the West are both able and willing to finance such farmers, at prevalent market rates for funds. It was rather, however, of the small farmer, still in the pioneer stage, of whom we were thinking. We believe that it ought to be possible to encourage the man on the land who has little capital but plenty of grit and ability. As every one knows, this is a real difficulty, and one that has not as yet been really solved—for the co-operative principle does not present the real solution. We are grateful to our correspondent for drawing our attention to what appeared an obvious omission of important factors in the situation. For our part, we believe that private enterprise, both in industry and agriculture, offers the best solution of the problem. Canadian financial institutions have operated fairly, and with scrupulous honesty, in the past; and through their enterprise in attracting capital to this country for agricultural purposes, we must depend, in large measure, for success in the future.

INCREASE IN CANADA'S TRADE

An increase of $315,292,044 in the trade of Canada during the fiscal year ended on March 31st last is shown by the monthly statement issued through the customs department. The statement shows that at the end of the last fiscal year the grand total of Canadian exports and imports was $2,564,462,215, as against $2,249,170,171 at the end of 1917. Domestic merchandise exported from Canada last year totalled $1,540,027,788, while the imports during the same period were $962,521,847. Foreign merchandise was exported to the total of $46,142,004.

Dutiable goods to the amount of $542,319,623 were imported into Canada during the year just ended, and free goods to the amount of $420,202,224. Duty collected during the year totalled $161,588,465, as compared with $147,623,230 in 1917. The imports of coin and bullion during 1918 were $12,279,173, against $28,081,120 in the previous year.

Although the total trade of the Dominion shows a marked increase in the year, the statement shows that there was a falling off in exports and imports in the month of March, as compared with a year ago. In March, 1917, the total trade was $230,722,774, while during the past month it amounted to only $191,737,332. Of this total, $87,255,698 represented merchandise entered for consumption in Canada, and the exports totalled $99,854,987.

Products of Canadian factories to the total of $636,602,516 were exported during the past fiscal year, as compared with $477,399,676 in 1917. Exports of domestic agricultural products reached a total of $567,713,584, and animal products exported amounted to $172,743,081. Products of Canadian forests were sent out of the country to the amount of $51,899,704, and Canadian minerals exported totalled $73,760,502.

CONDITIONS IN THE WEST

Wheat Seeding Practically Completed—Trade Situation—Labor Supply Better

(Staff correspondence.)

Winnipeg, April 23rd.

From reports received through our western representative and from other sources conditions in Western Canada could not well be improved on, and the season is easily a month ahead of last year. In many instances wheat seeding is completed and ideal weather prevails.

W. J. Black, Dominion commissioner of agriculture, who has just completed a tour of the western provinces, interviewed by *The Monetary Times* on his return to Winnipeg, said: "I never knew the spring to open so uniformly and favorably as has prevailed this spring. The prospects are good in all the provinces. In British Columbia there is a most hopeful and optimistic tone. The lumber industry is busy, which has a beneficial influence on trade in general. There is a greater interest in fruit-growing, and efforts will be made to better shipping facilities to the prairie provinces so as to develop the growing business in all lines of fruit.

Trade Generally Good.

"Everywhere," said Mr. Black, "conditions are good and the prospects are bright. The ranchers in Alberta are cheerful, and report that the stock came through the winter in prime condition, and in every section the farmers exhibit a fine spirit and are anxious to do their utmost to increase production. There have been good rains at various points and seeding is well advanced."

Reports from Winnipeg wholesale and business houses indicate trade in the west in all lines to be good. Prices in many lines are continually on the increase. Wholesale houses are very busy keeping up with orders.

Winnipeg Board of Trade.

The activities of the Winnipeg board of trade are varied, but in every case are looking to the good of the community. In discussing the transportation problem as it exists in Winnipeg, last week they passed the following resolution:—

"Whereas the operation and development of the Winnipeg Electric Railway has been seriously retarded by the competition of what is known as the 'jitney' service; and,

"Whereas the Winnipeg Electric Railway is recognized as an indispensable public utility, the extension of which should be encouraged and aided in every reasonable manner in the interest of the city at large;

"The council of the board of trade hereby places on record its full approval of the action of the city council and board of control in taking steps to abolish the running of jitneys on streets upon which cars of the Winnipeg Electric Railway operate a regular service, and to place the jitneys (if the service is permitted in any form) under strict regulations;

"But we insist that the Winnipeg Electric Railway Company give a definite guarantee, satisfactory to the city council, that it will furnish a service that will eliminate the possibility of the public having to suffer any inconvenience through the change."

Western Coal Supply.

The western coal operators and miners are urging on the Dominion government that they prohibit the bringing in of any hard coal from the eastern States to anywhere west of the lakes. This would undoubtedly be a hardship, especially to the fuel situation in the city of Winnipeg. The board of trade, with its usual alertness, took action in this matter also at its meeting last week by passing the following resolution:—

"If western consumers must wait until June before they find out where their coal is coming from they will have suffered a serious handicap. Best time of year for bringing coal up the lakes is immediately following opening of navigation. The government should definitely state certain territory, including Manitoba, will be allowed to use coal from eastern States whenever it can get it. Rest of the territory should look to western mines for supply. In any event, arrangement just made is most unsatisfactory, and instead of it we would prefer conditions that prevailed during past winter. A. E. Boyle, secretary."

The wheat acreage has increased remarkably this year. An estimate by the financial editor of the Calgary Canadian is to the effect that the increase will approximate 25 per cent., although later reports indicate that this figure is a conservative one, and that the province as a whole will show a greater increase in acreage for this crop.

Some exceptionally large tracts of ground are being broken in Alberta, working both night and day shifts in breaking ground on a tract of 15,000 acres which he recently purchased. Of this tract, 5,000 acres of that portion broken last fall will go into oats and wheat, 5,000 will be summer-fallowed and 5,000 acres will go into flax for this season. Forty miles a day is being broken.

The labor supply is better than had been earlier expected. The provincial department of agriculture, through its employment bureaus, has distributed approximately 2,500 men. Most of the elevators of the province have closed for a thirty-day period, and the result is that many farmers and their helpers, who would otherwise be engaged in the hauling of grain to town, are now engaged in assisting neighboring farmers to get the crop in.

GRAIN IN CANADA

According to the bulletin issued by the Census and Statistics Office recently, the compilation of returns collected from elevators, flour mills, railway companies and crop correspondents shows that on March 30th, 1918, the quantity in Canada of wheat and wheat flour expressed as wheat was 77 million bushels, as compared with 126 million bushels last year, 197 million bushels in 1916 and 79 million bushels on February 8th, 1915. The total for 1918 comprises 25 million bushels in the elevators, flour mills and in winter storage in vessels, 32 million bushels in farmers' hands and 20 million bushels in transit by rail. Of oats, including oat products expressed as oats, the total quantity returned as in Canada on March 30th, 1918, was 155½ million bushels, as compared with 184 million bushels last year, the total for 1918 comprising 24½ million bushels in elevators and flour mills, 124 million bushels in farmers' hands and 7 million bushels in transit by rail. Of barley, the total quantity in Canada on March 30th, 1918, was returned as 16 million bushels, as compared with 15 million bushels last year, the total for 1918 comprising 4 million bushels in elevators, 11 million bushels in farmers' hands and one million bushels in transit by rail. Of flaxseed, the quantity in Canada on March 30th, 1918, was 2,420,000 bushels, as compared with 5,662,000 bushels last year, the 1918 total consisting of 1,459,000 bushels in elevators, 516,000 bushels in farmers' hands and 445,000 bushels in transit by rail.

The reports of crop correspondents show that out of the total wheat production of 1917, 14 per cent., or nearly 32 million bushels, remained in farmers' hands on March 30th, 1918. This proportion is lower than last year (21 per cent.) and than in 1916 (23 per cent.), and compares with 13 per cent. in 1915. Of the remaining field crops, the proportions and quantities estimated to be in farmers' hands on March 30th are as follows: Oats, 31 per cent., or 123,910,400 bushels; barley, 20 per cent., or 10,944,600 bushels; rye, 13 per cent., or 491,800 bushels; buckwheat, 18 per cent., or 1,251,500 bushels; corn for husking, 12 per cent., or 937,000 bushels; potatoes, 30 per cent., or 24,130,500 bushels; turnips, etc., 14 per cent., or 8,644,100 bushels; hay and clover, 26 per cent., or 3,536,300 tons. The stock of potatoes, viz., 24,130,500 bushels, compares with 15,969,000 bushels last year, with 12,960,800 bushels in 1916, and with 32,310,000 bushels in 1915; flax, 9 per cent., or 515,800 bushels.

The total wheat crop of 1917 (223,007,000 bushels) were of merchantable quality, the proportion being 95 per cent., as compared with only 85 per cent. last year. The proportions per cent. of other crops estimated to be of merchantable quality last year are as follows: Oats 91, barley 90, rye 89, buckwheat 76, corn for husking 50, flaxseed 89, potatoes 77, turnips, etc., 83, hay and clover 87. For corn, the proportion is the lowest on record, and compares with last year's estimate of 58 per cent.

The Saskatchewan fire loss in 1917 amounted to $2,750,000. Over 50 per cent. of this loss was due to carelessness—burning rubbish, burning straw piles, children playing with matches, carelessly throwing down lighted matches, cigar and cigarette stubs, overheated stoves, defective stovepipes, defective chimneys, cleaning clothes with gasoline near stoves and open fire.

BRITISH TRADE COMMISSIONER

Monetary Times' Editor, Fred. W. Field, Receives British Government Appointment

Fred. W. Field, who was editor of *The Monetary Times* for eleven years, has been appointed by the Imperial Government as His Majesty's Trade Commissioner at Toronto. Mr. Field was asked last December whether he would accept this appointment, and he resigned his editorial position on the first of this month in order to assume his new duties. He has now opened offices in the Confederation Life Building, Toronto, and is already actively engaged in promoting trade between Great Britain and Canada.

In 1907 Mr. Field succeeded the late Mr. James Hedley as editor of *The Monetary Times*, having previously been assistant editor for one year. Mr. Field came to Canada from England in 1906, and for a few weeks was engaged in "free lance" work for various magazines and newspapers, but before long he accepted the assistant editorship under Mr. Hedley. In England, Mr. Field had been engaged in special assignment work on various newspapers, and for a time also was in the Civil Service. He was born in Twickenham, England, on April 4th, 1884, and was educated at Tiffin's School, Kingston-on-Thames, and by private tutors. He spent a year in France after leaving school and later spent some time in Holland.

As an editorial writer on financial, insurance and economic subjects, Mr. Field earned an international reputation. He is a keen critic, an able statistician and a fluent writer upon a wide range of topics. His work upon the Annual Review and Outlook Number of *The Monetary Times* was exceptionally remarkable. His editorials were very widely quoted throughout Canada, England and the United States.

Mr. Field's series of articles on "Capital Investments in Canada" were reprinted in book form and had a wide circulation, as had also his booklet on "Trade Prospects and Resources of Northern Ontario," prepared for the Toronto Board of Trade.

He was held in high regard by his contemporaries in the newspaper world and by business and financial men generally throughout Canada, being frequently called into important private conferences on trade, financial and other matters.

In his new work Mr. Field is associated with a recently created department of the British Government, namely, the Department of Overseas Trade (Development and Intelligence), of which Sir Arthur Steel-Maitland is the head. The new organization combines the Department of Commercial Intelligence of His Majesty's Board of Trade and the Commercial Department of the Foreign Office. It will control all the foreign services which have to do with commercial matters. Of these there are three kinds. There are the trade commissioners appointed to further the United Kingdom's commercial interests within the British Empire. These, formerly four in number, are now to be sixteen. The commercial attachés of the diplomatic missions to foreign countries are the second class of officers controlled by the department. It is proposed to expand and reorganize this service, and its functions will be to keep the government informed as to the general financial and economic state of foreign countries and to keep a constant watch for the benefit of British trade. This wide commission to the commercial attachés represents a serious attempt to obtain a broad and scientific conspectus of the business field in other countries, both as to the opportunities and the dangers that present themselves. The third class of officers, the consuls, are to discharge the duties hitherto allotted to them in the towns and districts to which they are appointed.

Mr. Field is attached to the first-named group of officers, the trade commissioners in the British Empire, his territory embracing the whole of the Province of Ontario. The governments of the Dominion have been offered by the Imperial Government the facilities afforded by this extended commercial intelligence service, and most of them have accepted the offer in whole or in part. Canada, for example, will make use of the service in countries in which it has not trade commissioners of its own.

BUDGET STATEMENT NEXT TUESDAY

A new domestic war loan is likely to be foreshadowed in the budget speech, which is to be made on Tuesday next, by Hon. A. K. Maclean, acting minister of finance. Estimates as to the amount of the loan vary from one hundred and fifty million dollars to a quarter of a billion.

The financial statement of the Dominion for March as just published shows that the net debt has risen to $1,106,394,023. At the outbreak of war the debt was about $337,000,000. This means an increase of $770,000,000 since August, 1914.

The government is confronted with the problem of securing much additional revenue. At present there is much conjecture as to how it is to be raised. Hence the interest that is being taken in the budget statement to be made next Tuesday.

LARGE AMOUNT OF INSURANCE WRITTEN

The following is an article, referring to the work of the Bureau of War Risk Insurance of the Treasury Department in the United States, which appeared in a recent issue of the Official Bulletin, Washington:—

Complete figures, now available, show that in the six months since October 6, 1917, the bureau has sent out 1,706,330 government cheques for allotments and allowances, death and disability compensation and government insurance. These payments, aggregating $50,403,462.89, were made up as follows: $50,164,986.12 for allotments and allowances, $60,958.60 for death and disability compensation, and $177,518.17 for government insurance payments.

In six months government insurance on upward of 1,700,000 soldiers, sailors and nurses was written for a grand total of approximately $14,000,000,000. The average amount of insurance applied for was close to $8,500, the minimum permitted by the law being $1,000 and the maximum $10,000.

The entire life insurance written in the year 1917 by all the stock and mutual companies, fraternal orders, associations and societies in the United States was approximately $6,000,000,000. The Bureau of War Risk Insurance is thus by several hundred per cent. the largest life insurance concern in the world. At the first climax of the government insurance campaign insurance was sold at approximately a two-billion-dollar-a-week pace. On the record day of the bureau applications for $500,000,000 of government insurance were received.

Government insurance is still being written in large volume. Approximately $400,000,000 was added to the total the last week.

April 12th, 1918, was the last day on which persons who joined the military and naval service on or before December 14th, 1917, could apply for government insurance. Spurred on by the congressional extension of time from February 12th, many soldiers and sailors fell in line with the insurance ranks, eager to make themselves and their families "100 per cent. protected" and the nation's fighting forces "100 per cent. insured."

All new men joining the colors, if they wish the protection of United States government insurance, must make application within 120 days after entry into the service. This time limit is imposed by law. No persons are insured until they have made specific application.

COINAGE OF CANADA SINCE CONFEDERATION

History of the Development of the Royal Mint at Ottawa Details of Coins Turned Out

In a recent issue of the Journal of the Canadian Bankers' Association, Dr. James Bonar, Deputy Master of the Royal Mint, Ottawa, writes an interesting article on the work done at the mint.

Historians of currency have shown how the early British settlers in the New World carried with them the memory of British sterling and its kindred shillings and pence, while their very home trade was barter till their dealings with the Spanish possessions supplied them with Spanish dollars. Thus, in the course of the 17th century, dollars invaded the North American mainland, to stay there ever afterwards. After a long series of ratings of the dollar in terms of the English pound, and an unsuccessful attempt to introduce British small change by ordinance (O. in C., 1825) into the colonies generally, it became evident that on the mainland at least the victory lay with the dollar currency.

There had been legal recognition of that currency here as early as 1796, when Lower Canada and Upper Canada, divided in 1791, agreed to give legal standing to the gold eagle, and also to the silver dollar of the United States. The union of the two Canadas, Ontario and Quebec, in 1840, was promptly followed by an act (1841) which, indeed, reasserted the pound as the basis of the currency, but made the eagle and silver dollar of the United States, equally with the British sovereign, legal tender by tale to any amount, with a favorable rating of the silver dollar that made that particular coin the preferred coin and current standard of value. An act of 1853 sanctioned the use of dollars, cents and mills alongside of shillings and pence. An act of 1857, compelled the use of dollars and cents in public accounts.

Canadian Dollar Currency.

From this point, *de facto* dollar currency in Canada begins to be Canadian dollar currency, and not simply borrowed pieces or money of account. The Royal Mint in London, and, under its supervision, the private firm called "the Mint," Birmingham, struck coins for the Canadas, Nova Scotia and New Brunswick, from 1858 to 1864, and for Prince Edward Island as late as 1871. After Confederation had politically united the first four provinces, there was also a monetary union; and, when the Island joined the Confederation in 1873, it made no further attempts to have coins of its own.

The amounts coined for the four from 1858 to 1864, and for the Island in 1871, are recorded in a table printed in the annual report of the Royal Mint for 1908. It was prepared by Mr. John Roe, accountant of the Ottawa Mint, from the figures then accessible. Mr. Roe's researches, when he was on furlough in London, 1911, enabled him to correct those figures by adding two consignments of coin previously overlooked. The following are the corrected totals:—

For Canada, that is to say Upper and Lower Canada—1858—Silver, $350,000; bronze, $100,000 in cents. 1859—Bronze, $95,790, in cents. 1860—Bronze, $1,114, half cents. The silver consisted of 20 cents, 10 cents and 5 cents.

For New Brunswick—1861—Bronze, $10,000, in cents. 1862—Silver, $50,000, 20 cents, 10 cents, 5 cents. 1864—Silver, $45,000 (as before); bronze, $10,000, in cents.

For Nova Scotia—1861—Bronze, $10,000, including $2,000 half-cents. 1862—Bronze, $10,000, in cents. 1864—Bronze, $10,000, including $2,000 half-cents.

For Prince Edward Island—1871—Bronze, $10,000, in cents.

Confederation Issues.

These last were struck at Birmingham, and their mint mark is H, for Heaton, head of the firm. The grand total of pre-Confederation issues is: Silver, $445,000; bronze, $256,904. It will be noticed that the list includes the half-cent, that has disappeared, and the twenty-cent piece, that is disappearing. Even the latest currency act (of 1910) is tender towards the rights of the early pieces. "The silver, copper or bronze coins heretofore struck by authority of the Crown for circulation in the provinces of Ontario, Quebec and New Brunswick, under the acts at the time in force in the said provinces respectively, and such silver, copper or bronze coins as before the passing of this act, have been struck by the same authority for circulation in Canada, under the acts at the time in force in Canada, shall be current and a legal tender throughout Canada at the rates in the said currency of Canada assigned to them respectively by the said acts and under the like conditions and provisions." No other silver, copper or bronze coins than those which the Crown has heretofore caused to be struck or may hereafter cause to be struck for circulation in Canada, or in some province thereof, shall be a legal tender in Canada. As a matter of fact, the only troublesome survivor has been the piece of twenty-cents, a denomination now out of use in Canadian coinage, and, happily, to all appearance passing out of use in Newfoundland. Its likeness to the quarter has been its ruin. The half-cent betrayed a greater parsimony than prevails now; men were careful about small expenses, and needed small pieces by which to reckon them.

Confederation Currency Reform.

At the time of Confederation, currency reform was in the air. The Latin Union of 1865-6, at first including only Belgium, France, Italy and Switzerland, had fixed the standard of fineness, both for gold pieces and for the five-franc silver piece, as nine-tenths; and the International Monetary Conference held in Paris during the exhibition recommended a uniform gold standard of nine-tenths fineness for all civilized countries. The first currency act of the Dominion parliament, 1868, tried to give effect to this last idea by providing that Canadian dollar currency should be of the same value as that of the United States, and, if the United States followed the recommendations of the conference, their example should be followed. It retained the pound as the basis of currency, and restated the rating of it in dollars. But in 1871 the entire currency of the Dominion was made one, the use of dollar currency was prescribed for all accounts, and the gold eagles and double-eagles of the United States were frankly ranked with the sovereign as legal tender, provision being made for possible Canadian gold coins. This act of 1871 gave character to the Canadian currency till it was replaced by the act of 1910.

The coinages under the act of 1871 were as follows: 1870—London, silver, 50 cents, $225,000; 25 cents, $225,000; 10 cents, $160,000; 5 cents, $140,000—$750,000. 1871—London, silver, 50 cents, $100,000; 25 cents, $100,000; 10 cents, $80,000; 5 cents, $70,000—$350,000. 1872—Birmingham, silver, 50 cents, $40,000; 25 cents, $560,000; 10 cents, $100,000; 5 cents, $100,000—$800,000. 1874—Birmingham, silver, 25 cents, $400,000; 10 cents, $60,000; 5 cents, $40,000—$500,000. 1875—Birmingham, silver, 25 cents, $250,000; 10 cents, $100,000; 5 cents, $50,000—$400,000. 1876—Birmingham, bronze, 1 cent, $40,000—$40,000.

Silver and Bronze.

The totals of silver and bronze, respectively, for the following 32 years are: 1880—Birmingham, $400,000; nil. 1881—Birmingham, $450,000; $20,000. 1882—Birmingham, $300,000; $40,000. 1883—Birmingham, $300,000; nil. 1884—London, $25,000; $25,000. 1885—London, $138,000; nil. 1886—London, $300,000; $15,000. 1887—London, $85,000; $15,000. 1888—London, $230,000; $40,000. 1889—London, $136,585 (including recoined 20 cents); nil. 1890—Birmingham, $155,000; $10,000. 1891—London, $200,000; $14,525 (including recoined copper and bronze coin). 1892—London, $298,000; $12,000. 1893—London, $160,000; $20,000. 1894—London, $144,518 (including recoined 20 cents); $10,000. 1895—London, nil; $12,000. 1896—London, $140,000; $20,000. 1897—London, nil; $15,000. 1898—London, $217,000; nil. 1898—Birmingham, nil; $10,000. 1899—London, $398,895 (including worn coin and recoined 20 cents); $24,000. 1900—London, $589,000; $10,000. 1900—Birmingham, nil; $26,000. 1901—London, $420,000; $41,000. 1902—London, $354,000; $30,000. 1902—Birmingham, $420,000; nil. 1903—London, $311,537½ (including worn coin); $40,000. 1903—Birmingham, $334,000, nil. 1904—London, $350,000; $25,000. 1905—London, $450,000; $20,000. 1906—London, $809,460¾ (including worn coin); $41,000. 1907—London, $1,194,000; $24,000. 1907—Birmingham, nil; $8,000.

Grand Totals from Confederation.

The grand totals from Confederation to the last year before the Ottawa Mint are: Silver, $12,109,996; bronze, $607,525. The fractional amounts (.50, 1903; .75, 1906) result from the Royal Mint's practice of accounting for all the metal furnished for outside work to the last cent. The recoining of worn copper and bronze (1891), though unusual, is not unexampled. It occurred on a great scale in London in 1908-1910, and it has happened in Ottawa on a small scale in 1914.

The large amount of silver and bronze provided in 1907 was a prudent insurance against the risk of scarcity. Her own Mint once opened, Canada was to depend on herself for her coin: at the same time the capacities of the new Mint were untested. The precaution was perfectly wise in the circumstances; but the effect was that the first year of the Canadian

branch of the Royal Mint was not a year of great activity. The issues for the first ten years were as follows:—

1908—Gold, sovereigns, 633; silver, $63,025; bronze, $21,604. 1909—Gold, sovereigns, 16,275; silver, $868,300; bronze, $39,300. 1910—Gold, sovereigns, 28,012; silver, $1,464,000; bronze, $42,020. 1911—Gold, sovereigns, 256,395; silver, $1,391,000; bronze, $54,480. 1912—Gold, sovereigns, 515, Canadian coins, $1,477,490; silver, $1,392,000; bronze, $50,000. 1913—Gold, sovereigns, 3,742, Canadian, $1,890,690; silver, $1,175,000; bronze, $55,600. 1914—Gold, sovereigns, 9,077, Canadian, $1,499,705; silver, $734,002; bronze, $35,100. 1915—Gold, sovereigns, 13, Canadian, $535; silver, $206,000; bronze, $50,400. 1916—Gold, sovereigns, 11,035, Canadian, none; silver, $1,302,000; bronze, $110,700. 1917—For Canada: Gold, sovereigns, 187; silver, $1,862,200; bronze, $116,900. For Newfoundland: Silver, $240,000; bronze, $7,000.

Maximum was Passed.

In the year 1916 the number of pieces struck was 19,640,000. The number estimated in 1907 as the maximum for which the Mint was equipped, was 20 millions. The figure so narrowly approached in 1916 has been passed in 1917, the number struck being 28,650,000, including 2,000,000 for Newfoundland. For obvious reasons pieces struck may be greater or less in number than pieces issued. The discrepancy has been slightly increased for Canadian coin since the Currency Act of 1910, which instituted a Pyx examination of Canadian coins analogous to the London Pyx examination of Imperial gold and silver coin, but held in Canada by assay commissioners from different parts of the Dominion.

The said Currency Act of 1910 involved several other changes. The first, which was hardly noticed, was the important shifting of the emphasis on the sovereign hitherto characteristic of all such acts. Instead of being defined by relation to the sovereign, the currency of Canada is now defined in terms of a gold standard of a stated fineness. The sovereign is introduced as simply one of the gold coins which are to be legal tender at a stated rating in dollar currency. The American gold coins, from the half-eagle to the double-eagle are similarly retained as legal tender. The second change was the introduction of Canadian gold pieces for $20, $10, $5, $2.50. The third change was the sanction of a silver dollar.

Canadian Gold Pieces.

The Canadian gold pieces, after a short popularity, have not entered into active circulation. Gold has, indeed, played a far larger part in the work of the Mint than its founders themselves ever imagined, but it has not been in the form of coined pieces. In the debates in the Dominion parliament (especially on May 15, 1899), which were the prelude to the act of 1901 establishing the Mint, it was suggested that, like the Australian Mints, the Canadian Mint might supply the Empire with sovereigns. This has not been the case; but it was not for lack of gold. Gold came to the Mint to be refined, and it soon appeared that the coining of it, contemplated in the Royal Proclamation of November 2, 1907, was not desired either by the depositors or by the general public. Regulations for the receipt of deposits, framed in 1909 in terms of the sovereign, were recast in 1913 in terms of the dollar, to the general satisfaction. The refinery attached to the Mint was twice enlarged. Begun in 1911, with an equipment for the electrolytic refining of gold, it added, in 1914, the chlorination process practised in Australia, which turns out gold bars with much greater celerity, if not to quite as high a degree of fineness. A change, in progress even before 1914, was precipitated by the war. The amending "act respecting Dominion notes," made express provision for the reception of gold bars into the government reserves. Up to that time bars had figured there only to the value of $222,933.99. It has not been the practice to give full statistics of the production of bars by the Mint in the years of war, or full information as to the quantities and origin of the rough gold received. But of the change in the relative importance of coined gold and gold bars there is no manner of doubt. The habit of turning gold into coin has become a habit of turning it into bars.

The change is partly cause, partly effect, of a new view of the gold standard taken by economists generally. Most economists no longer believe that a gold standard involves a gold currency, or at least such a currency extensively used. The sovereign itself is said to be more extensively used, in proportion to other coins, throughout the land of Egypt than the land of England. In Canada for some time we have had a gold standard without a gold currency. Issues of notes are based upon gold, but, so long as this is known or believed, no ordinary citizen, for the ordinary purposes of life, desires any currency but notes for large sums, silver and bronze tokens for small sums.

Circulation of Subsidiary Coin.

An estimate of the circulation of subsidiary coin—i.e., silver and bronze, is made by the Ottawa Mint every year, and the results are given in the annual report. Take, for example, the estimate given in the report of 1914. It is, for each member of the population, $2.29 silver, 14.4 cents bronze. The Mint arrives at this result (1) by taking the net amount of coin issued during the year, and dividing it by the population, of which the census commissioner furnishes the probable figure; (2) by taking the net amount of coin issued from 1858 onwards, similarly divided. The dividend is in both cases reduced by the worn coin recoined and reissued. There is added, for comparison, the amount of Dominion notes of the smaller values (25c. to $4) in circulation on December 31st; the result is $2.88 per head.

With allowance for the coin of the United States deported by the banks (over one and a half millions in 1914), and the remnant not deported, the estimate for the silver circulation is likely to be fairly accurate. It is the maxim in some quarters that the issues of metallic currency are cumulative; in other words, that what is sent out among the people stays among the people, still playing its part as coin, or is brought back as worn coin. This may be nearly true of silver pieces; it seems otherwise in the case of bronze pieces. In proportion to the number issued, the number collected for recoinage is very small. Though their value as coins, at least before the war, was three or four times their value as metal, their insignificance to a people far from extreme poverty would seem to lead to a mere neglect and waste of them. It is too probable, therefore, that the number of bronze pieces remaining to be divided among the people of 1914 is by no means the sum of the pieces issued from 1858 onwards. The yearly issues fill real gaps, and how the gaps are made is matter for conjecture.

In the case of gold coin, the Mint can form no estimate of circulation per head. The Ottawa Mint is not the only coiner of sovereigns, but has as its rivals the London Mint and the three branch Mints of Australia. The sovereigns of all the five Mints may be, and occasionally are, represented here. There is a general agreement that the total is small.

Circulation of Gold Pieces.

The circulation of the Canadian gold pieces ($5 and $10) is even less. Most of them are now reposing in the vaults of the government as part of the reserve against Dominion notes. The greater part, even of the reserve, is held in the gold coins of the United States, and these coins are probably the chief gold pieces in circulation throughout Canada to-day. The banks of the Dominion, and in some degree the post offices, are the only bodies that can bring us near probability in any estimate of the gold coin in circulation.

TORONTO'S WAR EXPENDITURE

Referring to Toronto's expenditures for war purposes since 1914, Mayor Church stated recently that of the $11,000,000 granted, $4,000,000 was for insurance, $2,750,000 for provincial war tax, $2,250,000 for grant to Patriotic Fund and Red Cross and $1,500,000 to city employees overseas. "The policy for those war expenditures was laid down in the fall of 1914, and the policy was simply continued," said the mayor. "The maintenance charges during the past four years have been stationary, and no debt has been added except the war expenditures. All capital charges except these have been stopped. A pay-as-you-go policy has been adopted, with no overdrafts. Each year there has been a surplus. The tax rate would have been 20 mills had it not been for the fact of the war expenditure and the inability of the city to float any bonds, having to put everything into the tax rate. The heavy annexations of recent years have also been responsible for part of the increase."

The C. W. Lindsay Company, of Montreal, has had a prosperous year. In addition to the paying of the regular dividends of 7 and 8 per cent. on the preferred and common stocks, the directors announce the disbursement of a 25 per cent. bonus. It is expected that this will take the shape of a stock dividend.

MOST MEN OBJECT TO BEING APPOINTED EXECUTORS

Almost every business man, when appointed as Executor of a friend's estate, realizes he has not time, and, possibly, not the experience required to efficiently administer his friend's affairs in addition to his own. When private Executors wish to be relieved of the responsibilities of Executorship, they should consult this Corporation. Full information and Booklets on request. Interviews especially invited.

MONEY MARKETS NOW AND AFTER THE WAR

Wisdom and Foresight Necessary to Meet the Situation Brought About by War

In the Railway Age, investment economist section, of April 5th, the following article, by Sir George Paish, appears and contains observations that will interest many readers.

Rarely has there been greater difficulty in coming to any definite conclusions as to the future course of the world's money markets, and were it not that the world's common interest was likely to induce, indeed to compel, everyone to act with great consideration and with a quite unusual degree of wisdom, one would not be so hopeful about the future as the facts of the situation now justify. Actual experience of what has been accomplished during the present war fully warrants one in anticipating that any further difficulties will be safely overcome and that the world's credit system will emerge from the extraordinarily trying ordeal to which it has been subjected not only uninjured but greatly widened and strengthened. On every hand admiration is expressed for the wonderful manner in which money has been provided for war in all the belligerent countries and everyone now recognizes that such things would not have been possible but for the growth of banking and investment which had rendered the credit system prior to the war so powerful and so efficacious in supplying the world with the capital it needed for the development of its natural wealth and manufacturing power, as well as for the provision of the machinery of transportation and of distribution.

No more convincing testimony to the efficiency of the credit system in providing money for war is required than the fact that all the money needed to finance the colossal expenditures of this war has been supplied on the general comment that if so much money can be found for war then why not for improving the condition of the great mass of the people in all countries.

Certainly the credit system has attained a reputation in war which it will not be easy to live up to in peace, and it is partly because everyone now recognizes that bankers and investors in giving credit are able to create wealth that there is some uncertainty about the future. All the old landmarks and tide levels upon which bankers used to rely for guidance have been swept away by the great torrent of credit now sweeping over the world. It is obvious that the credit system of the past was merely a child in comparison with what it will be in future now that in the present emergency it has become fully known.

When one considers how greatly credit has contributed to the expansion of the world's wealth in general and to the well-being of these countries in particular in which it was most highly developed before the war one realizes that after the war is over the well-being of the race will show a rate of progress never hitherto witnessed now that the possibilities of the credit system are so widely recognized; that is, provided that the war is ended by a democratic, clean and good peace.

To appreciate the course of the money market not only during the war, but after the war is over, it is essential to take the experience that is now being gained by the public into account.

The experience gained of war in these days shows that with everyone co-operating and with everything possible being done to facilitate the creation of credit both nationally and internationally there is practically no limit to the amount of money that can be borrowed both from bankers and from the investing public.

Of course, it is essential that we should all realize that at the present time these vast credits are not adding to the permanent wealth of the world and that for the greater part they are pure inflation, forcing up the prices of commodities, wages and profits. Nevertheless they are attaining the end in view, the stimulation of human effort to produce things needed in a great crisis and to enable war to be waged on a scale never hitherto regarded as possible. Nor can it be denied that if the object in view had been the creation instead of the destruction of wealth the world's well-being could have been enhanced in a most remarkable manner by such a vast creation of credit.

And no one can doubt that the world having had such an object lesson in the possibilities of credit will seek to apply its advantages after the war to the production of wealth and that as a result of this wider knowledge and appreciation of the power and the value of credit, wealth will increase much more rapidly in the future when the war is over than it did in the past.

It is the situation thus created that renders any forecast of the future of the money market a matter of very great difficulty.

One thing, however, is clear—that there will be no lack of demand for banking and investment money in all countries, both for the purpose of pursuing the war and, when peace comes, carrying out the work of reconstruction. The proportions of the sum required that will be provided by bankers and investors respectively cannot yet be decided. That depends upon many considerations. Just now investors in Europe are disposed to think that the war has entered upon its last stages and that the economic pressure upon Germany and Austria will at last have the desired result, and are rather more disposed to allow their money to accumulate in the hands of bankers until they can form a clearer idea of how long the war is likely to last. The consequence of this is to bring about a plethora of banking money in London and to cause bankers to reduce the rates of discount and the government its rate for treasury bills. But already a greater attractiveness of government bonds in comparison with bankers' deposit rates and treasury bills is again causing investors to subscribe to the government loans more freely.

Fluctuations of this kind are, of course, inevitable and can be more or less ignored, the essential factors in the situation being the constant need of all the money that can be supplied both by bankers and investors in all parts of the world until the war is over.

After the War Conditions.

In considering the post war situation, account must first be had of the position that the war will leave. First of all, we shall have the fact that the belligerent nations will be heavily indebted to the rest of the world for produce and food supplied during the war, the payment of which they have been allowed to finance temporarily in the countries from which the things have been bought.

Of course, if the countries in which these temporary loans are incurred were to demand immediate payment of the money due to them a very awkward situation would arise. But they are likely to do nothing of the sort. In the past, these countries have obtained very valuable help from France and Great Britain in the shape of immense loans of permanent capital for the development of their resources, and now that the situation is reversed they are likely to act with the same consideration as was shown to them, and to make no demand for payment which cannot be readily met.

What is likely to happen is that these countries which normally are borrowers and not lenders and need to import more goods than they can usually pay for by exports will, after the war is over, again begin to go ahead and will take payment of the loans they have made to other countries during the war in the goods they need for their development. In other words, they will gradually take back the capital which they have accumulated abroad during the war from their great sales of goods and produce and will not need to borrow from other lands until the money due to them is liquidated. In this way the balance of trade against the belligerent nations that has piled up during the war will be gradually adjusted until eventually the effect of the war entirely disappears and the world resumes business as usual.

The inevitable effect of this situation will be to maintain prosperity and the volume of business in the countries that are now greatly adding to their wealth and are in a position to ask for payment after the war for the produce and goods sold to the belligerents during the war. On the other hand, the need to repay these loans will compel the belligerent nations to become both economical and efficient in order to produce the goods they will require to export in order to redeem the debt they have incurred to other nations as speedily as possible.

Maintaining Present Prosperity.

Possibly, but not probably, this temporary debt will be liquidated by sales of securities possessed by the warring countries whose holdings of foreign securities alone amount to some £7,000,000,000 ($35,000,000,000). But inasmuch as the countries to whom the money is due will for the most part need it for new capital expenditures not much of the debt is likely to be liquidated in this manner.

But whatever view is taken it is obvious that the international financial situation after the war will be a very complicated, not to say a delicate one, and will need to be handled with the greatest wisdom and circumspection.

Indeed, the importance of adjusting the financial situation will not be inferior to that of finding a solution of the

economic situation. In Russia we see that food is plentiful in some parts of the country, while in other parts vast numbers of people are starving because they have not the means of purchasing the food they need. No very great difficulty would have been experienced in adjusting this situation had the rulers of Russia really wished to do so, had given a reasonable amount of thought and good will to the matter, and had applied themselves to adapting the country's financial machinery to its economic needs.

It is of supreme importance that a situation such as that now existing in Russia should not be allowed to arise in the world at large after the war, with consequences as appalling as, or even more appalling than, those that have been witnessed in Russia.

Already suggestions have been made to bring about an understanding between all the nations of the world for the purpose not only of mutual defense and protection against any aggressive country in future but also to deal with the grave economic situation likely to arise after the war when the peoples of the enemy countries will be prepared to bid for food and raw material at any price unless an arrangement has been already reached for distributing the world's supplies of the essentials of life equitably between the nations. And it is obvious that a similar understanding is demanded for dealing with the financial situation not merely for the purpose of dealing with the problems directly arising from the war but in order to provide the poorer nations of the world with the financial assistance they will urgently need in order to enable them to pay for the food and raw material they will want to preserve them from starvation.

STEEL INDUSTRY IN BRITISH COLUMBIA

Establishment Would Bring Prosperity and Development —Iron Ore Plentiful—Coal Situation

(Staff Correspondence.)

Vancouver, B.C., April 20th, 1918.

It has been said that prosperity and development follow the establishment of the steel industry, and more than one instance can be cited in support of the statement. Certain it is that none of the larger industries can get along without steel, and many of the smaller depend in a large measure on an adequate supply of steel and iron. On the Pacific Coast, where steel ships are now being built, the necessity of making the chief requisite material has been brought strongly home. From time to time, the establishment of a steel industry in British Columbia has been agitated, but it has been felt that the market has not been sufficient to warrant the expenditure of the large amount of money necessary to install furnaces and rolling mills. As to iron ore, there is no doubt, for there is plenty, according to government reports, adjacent to both Vancouver and Victoria, at which points the building of steel ships concentrates. That this iron ore can be manufactured into material suitable for the purpose has been demonstrated, for in ships of the United States navy, constructed on the Pacific Coast, is iron mined on Texada Island, one of the larger islands in the archipelago of the Gulf of Georgia. The Vancouver Board of Trade has issued recently a bulletin on "Iron Ore in British Columbia," containing statistics in regard to the supply of iron ore, also the supply of coke.

There then would seem to be good cause for the present movement on foot in British Columbia to secure federal assistance toward the inauguration of a steel industry there. The matter is being spiritedly taken up, and a deputation is about to visit Ottawa in regard to the matter. The British Columbia administration has already passed a law to pay bounties on pig iron manufactured in the province.

Would Mean Steel Shipbuilding.

If a steel industry were established, would it mean the continuation of the building of steel ships on the Pacific Coast after present contracts have been filled? The impression prevails that the great impetus given to shipbuilding will fall off with the cessation of hostilities in Europe, and, if so, would there be enough general business to continue a steel plant in operation If shipbuilding could be continued in British Columbia, it would be a fine thing, not only as far as the industrial situation there is concerned, but also for Canadian commerce, for where ships are owned, maritime trade increases. This is, perhaps, the real primary point to be settled. A steel industry would be of great assistance in marine development, for much big repair work is done in connection with Pacific shipping and more will be done with a drydock on Burrard Inlet, and if steel ships are to be constructed, a steel industry is essential.

Inquiries have been made by towns in Ontario regarding supplies of coal from points as far west as Edmonton. Satisfactory answers have not been received, for the mining of coal in districts contiguous to the Rocky Mountains has not been of such magnitude that supplies are available for what might be called foreign fields. These mines have been developed mostly with a view to filling local demand, local in this instance meaning the prairie provinces.

Large coal companies are operating to capacity in British Columbia and new companies are getting into the field. In addition, there are vast coal deposits ready to be opened, once capital is available and the market is assured. If any coal could be supplied it would be from British Columbia, but even there no more is mined than is sufficient for provincial needs and contract accounts. Government assistance would be necessary if coal were to be brought from the Pacific Coast, even if it were that some could be spared to alleviate the stringency in Ontario, for no ships are available to bring it via the Panama Canal and car shortage and high freight rates deter commercial shipments overland.

From the United States.

Pennsylvania anthracite has been shipped via the Great Lakes and rail to Pacific Coast cities, where it sold for about $18 per ton, about $11 of which was for freight charges. Nanaimo coal on April 16th sold for $5.80 per ton at the pit mouth, so that with freight and handling charges the cost in Ontario would be about $20 per ton. Coal from the Crow's Nest district might come cheaper. This, of course, is concluding that shipment could be effected.

Consumers of coal in Ontario would not be used to the bituminous article which is generally found in British Columbia. It is good as soft coal goes and, while not in the same class as anthracite, it is a very valuable product and could easily be utilized as a substitute As for getting it to the east, lack of tonnage is a drawback that can hardly be overcome and high cost of rail carriage is another deterrent, but the matter has its possibilities in times of great necessity.

Food Production Purposes.

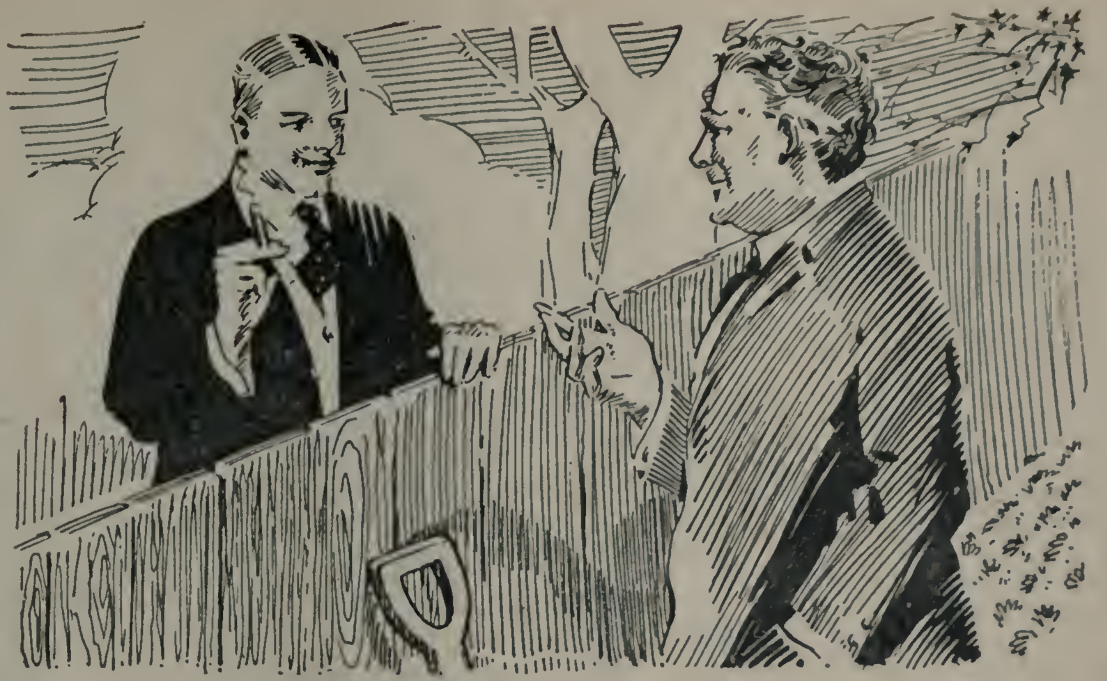
By giving publicity to the experiences of different communities, others are able to learn the most that can be done to increase food production, which is one of the big problems. The British Columbia legislature, which is about to close its annual session, has passed an act conferring upon municipal councils the power to make available for food production purposes any unused land lying within municipal boundaries. The proposal is to give five days' notice, to be posted up in the municipal hall and on the lot or lots, and then the land may be occupied and if the council sees fit it may call for tenders for the use of the property. The bill does away with formality in the matter and if the land is not being used, it is possible to bring it under cultivation at short notice.

In western cities, perhaps, more than in eastern, there are many lots which might be used for food production purposes. In Victoria last year, the city council took up the matter of cultivation of vacant lots, but under the new legislation there is nothing now to hamper any municipality in British Columbia from utilizing to the utmost any land within its boundaries that is suitable for growing some necessary commodity.

In other ways, British Columbia is helping production. This province is not generally counted on as having a great agricultural industry, because with its mountains and forests one more easily thinks of the lumber and mining industries. These are the two principal, but agricultural activity is by no means small and the value of production last year was roundly $30,000,000, compared with $35,000,000 in the lumber industry and $37,000,000 from minerals.

Seed at Cost.

To assist farmers particularly in outlying sections, the government has adopted distribution of seed at cost. Not only will the seed be distributed at as low a price as possible, but cash need not be paid, the farmer's note being good until such times as he can pay off the indebtedness from the proceeds of his crop. In this way, the government is helping to finance the man who needs money to keep his farm going. This is in addition to a loan proposition inaugurated previously, whereby the man on the land gets needful help. In many parts of the country this matter is not given as much consideration as its importance warrants; too much attention cannot be given to it, particularly at a time of year when growth is starting.—R. B. B.



Why Potatoes are $1.90 a Bag in Ontario while they are Rotting in Prince Edward Island

(An Actual Conversation Between Neighbors)

Said a citizen recently, "I don't see why potatoes are $1.90 a bag in Ontario while they are rotting in Prince Edward Island."

His neighbor replied: "The reason is simple. There are no freight cars available to bring potatoes from that market to this. The only way to beat the price, is to grow your own, the same as my wife and I did.

"I don't want to rub it in," he continued, "or say I told you so, but you and I could have equal sized gardens (50 ft. deep by 40 ft. wide). They are right next to each other, so it is fair to assume the soil is equally workable.

"We both have a fair amount of spare time, yet I well recall that last spring you had a lot of quiet fun with me when I was plugging away in the garden getting the ground ready to put in vegetables.

"What has been the result?

"By a little study, and a little work, and a disposition to laugh at our mistakes and forget our disapointments, the wife and I took off that patch all the salad vegetables we needed during the summer, and we were able to put into the cellar enough potatoes, carrots, beets, onions and parsnips to last us until the end of March. Besides which, the wife made pickles and canned tomatoes and corn to last us even longer.

"We made mistakes of course, and we didn't get all we expected out of the ground, but we learned a whole lot, and we feel certain that this year we shall get better results.

"I admit that if you charged up the time we both spent on the job, you might argue that we didn't make a profit, but if we hadn't been working around the garden we should have been loafing anyhow; at any rate we have not yet had to pay $1.90 a bag for potatoes, or buy any other vegetables."

* * * *

This conversation actually took place. One of the parties to it wrote this account of it. Not the man who did the cultivating, but the man who has been convinced by his neighbor that it will be well worth his while to grow vegetables in his garden this year.

The Organization of Resources Committee does not need to harp very much upon the necessity for every man and woman who can, to utilize every piece of ground available to them for growing vegetables.

The farmers of Ontario have been urged to grow more wheat, and to produce more abundantly of the farm products that can best be sent overseas. The people in villages, towns and cities, therefore, are asked to grow food to feed themselves as far as possible, so that overseas supplies may not be drawn on unless absolutely necessary.

We particularly urge you to grow beans, peas, onions, carrots, parsnips, beets, cabbages and potatoes if you have room. Never mind so much about radishes, lettuce, tomatoes and salad vegetables.

Write now for a free copy of the booklet entitled "A Vegetable Garden for Every Home," prepared by the Ontario Department of Agriculture. It is full of helpful practical suggestions, including plans for various sized gardens. You can get a copy by filling out and mailing the coupon below.

NON-PARTICIPATING INSURANCE

Participating Policy More Profitable—Question of Competition—Reduction in Non-Profit Rates

Some years ago, an English actuary, referring to the tendency of life offices to reduce their non-profit rates to a minimum, said, "After the various bases have been decided on for the calculation of office premiums, there remains the question of competition. This question is particularly acute in the cases of whole life non-profit rates, as there is no compensating element of bonus rates to hold before the public. It is evident from the divergence in the actual rates quoted that there are some offices which can obtain business at relatively high rates of premium, for reasons such as: (a) The standing of the office, (b) the persuasive powers of its representatives, (c) the compulsory nature of the assurance (in most 'financial' cases); but the tendency in recent years has been to bring out 'minimum' rates of premium.

"Competition between offices is a good thing in so far as it prevents them from being over-cautious in their estimates in the calculations of premium rates, and it may be that in the past there was a tendency to charge rather higher premiums for whole life non-profit policies than the circumstances required. Naturally enough, when the public began to find that in many offices the participating policies were on the average more profitable to the assured than non-profit policies, the offices commenced to reduce their non-profit rates, and in effect to allow those assured under the revised rates a portion of the profits."

Participating Profits Large.

Among Canadian companies it has generally been found that during the last few years, although the non-participating rates have been reduced to a minimum to meet the competition of certain large American companies, who write only non-participating business, yet, in spite of these low rates, the assured usually found that he was consulting his own interests by taking a participating policy. Owing to the high interest rate, the low mortality experience, the light expense ratios, of the average Canadian company, the profits to participating policyholders have been exceptionally large, and a participating policy need be in force only a few years before the profits to its credit are sufficient to offset the lower premium of the non-profit policy. Moreover, from that point on, the participating policy shares more and more extensively in the profits of the company, whereas the premium of the non-profit one remains fixed in price. The non-profit policyholder, although he may have the satisfaction at the very outset of his policy of knowing exactly what he is going to draw, may yet feel assured that with a good company he has signed away his share in its future profits, and that, in event of his living a few years beyond the issue of the policy, he will have the more expensive contract.

Policyholders' Dividends.

For these reasons, among well-established companies, a small percentage of non-participating business may almost invariably be regarded as a sign of strength that a company has earned a reputation as a profit-payer, and that the public are for that reason more easily persuaded to take the with-profit assurances. The latest Government Blue Book gives the proportion of non-participating and participating insurance carried by each company, and the truth of the above statement may easily be upheld from a consideration of this proportion and the general standing of the company.

The growing discussion on the advisability of Canadian and American life companies reducing their present dividend scales, has brought the matter of the relative merits of participating and non-participating insurance again to the fore. There is no doubt that, if there is a wide-spread and pronounced reduction in policyholders' dividends, the insuring public will begin to evince decided favor for the non-participating contract. This would probably not mean that such reductions would mean less insurance being written, for the public, at the present time, is taking too healthy an interest in insurance and is too well educated in its intrinsic soundness and desirability, to be swerved from its premier investment.

At the same time while there may possibly be a widespread reduction in policyholders' dividends, it would be unwise to look for any pronounced reduction. Life companies are still making large earnings, especially by way of interest returns, which have always been their chief source of profit. This source of profit indeed has been little if at all impaired. In fact, some companies show an actual gain in this source of profit during the last few years. We think, too, that any unforeseen causes operating against the interests of the companies to such an extent as to cause a pronounced reduction in dividends would certainly be accompanied by an increase in the present low, non-participating premiums. For the non-participating business must not be allowed to operate against the interests of the participating. Non-participating policyholders must pay their own way. And if expenses and mortality costs increase to such an extent as to bear heavily upon the savings from excess interest, the present non-participating rates with their slim or negligible loadings must be advanced. The companies will see that the interests of the participating policyholders are adequately protected. The moral is—if there be a moral—that now is the time to insure. Those taking non-participating insurance will be getting guaranteed insurance at bargain rates. Those taking participating insurance will obtain somewhat higher guarantees, and can also rest assured that their future interests will be guarded as sedulously by the strong Canadian companies as have the interests of participating policyholders in the past.

NEW BRITISH TAXATION

Still higher taxes are to be imposed in England, according to the proposals announced the other day by the Chancellor of the Exchequer. There is to be a general increase in the income tax, and the principle of progression receives another application in the large increase in the rates for extensive incomes. The super-tax is now to apply to incomes of £2,500 and over, instead of £3,000 and over.

Postal rates are increased from one penny to one and one-half pence, and the stamp duty on cheques doubled to twopence. The rates on spirits and beer, tobacco and luxuries are also to be raised.

YIELDS ON INVESTMENTS IN STOCKS AND BONDS

The following table of investment yields of stocks and bonds has been compiled for *The Monetary Times* by Messrs. MORROW & JELLETT, Members. Toronto Stock Exchange, 103 Bay Street Toronto:—

April 24th, 1918.

One of our subscribers is anxious to get hold of a copy of January 15th, 1915, and any subscriber wishing to turn this in to us will have his subscription advanced one month.

"Official permission for the issue of these securities, as required by Order-in-Council (3439) of December 22, 1917, has been duly obtained. Such permission, however, does not constitute an approval of the issue as regards its merits or security in any respect. It signifies merely that the sale of these securities is not considered to be incompatible with the requirements of Canadian war finance."

The subscription list will close on or before April 30th, 1918.

5%	of the par value on	Application
20%	" "	Allotment
62%	" "	June 15, 1918.
87%		

The right is reserved to allot a portion only of the amount applied. If only a portion of the amount applied for be allotted, the balance of the deposit will be applied towards payment of subsequent installments. Payments may be anticipated in whole or in part at any time. Interest will be allowed on payments at the rate of 7% per annum. Accrued interest will be adjusted upon final payment.

The full prospectus (copies of which we shall be pleased to furnish on request) contains a letter from the President of the Company, from which we summarize as follows:—

1. **Annual capacity of mill** 62,000 tons newsprint paper, 21,000 tons surplus sulphite pulp and 22,500 tons surplus groundwood pulp.
2. **Capacity of water powers** 48,000 horsepower, of which 28,000 horsepower is developed and in operation.
3. **Pulp wood lands** 1,000,000 acres, estimated to contain more than 5,000,000 cords paper-making woods, in addition to which 15,000,000 cords are available in the vicinity of the mill.
4. **Value of properties** estimated by Mr. George F. Hardy, Consulting Engineer of New York, at $13,200,000.
5. **Funded debt** $6,400,700, including this issue of 7% Convertible Mortgage Debenture Stock.
6. **Earnings** for the year ended December 31, 1917, as certified by Messrs. Price, Waterhouse & Company, after deducting all interest charges, amounted to $777,864.02—more than eleven times the annual interest ($70,000) on this issue of $1,000,000 7% Convertible Mortgage Debenture Stock.

Conversion Privilege

This issue is convertible at the holder's option into Common Stock, par for par, at any time **after** March 1st, 1921, unless redeemed **before** March 1st, 1921, by the Company at 110% and accrued interest.

Application will be made to list this issue on the Montreal Stock Exchange.

Name (in full)..
(Mr., Mrs. or Miss)

Address (in full)..

Date.......................... ....

Application should be made on this form and forwarded with a cheque drawn to the order of the Royal Securities Corporation, Limited, for the amount payable on application ($5 for each $100 par value applied for).

ABITIBI POWER AND PAPER COMPANY, LIMITED

On another page of this issue will be found the prospectus covering an offering of $1,000,000 7 per cent. convertible mortgage debenture stock of the Abitibi Power and Paper Company, Limited, at 87 and accrued interest, to yield 8½ per cent. In view of the importance of the Canadian pulp and paper industry, an industry which has the remarkable total of $145,805,000 invested in it, which is more capital than is employed in any other single industry in Canada, and the important place this industry is bound to occupy for many years to come, owing to the natural advantages which Canada possesses both in raw material and water powers, this offering was readily permitted by the government as one that does not conflict with war finance requirements.

The Abitibi is among the largest of the manufacturers of newsprint, sulphite and groundwood pulp. The mill, which is of modern design and construction in every respect, has a newsprint capacity of 62,000 tons per year. The company controls 1,000,000 acres of pulpwood lands, while the capacity of water powers on the property is 48,000 horse-power, of which 28,000 horse-power is developed and in operation.

The new issue is convertible into common stock at par at any time after March 1st, 1921, unless redeemed in the meantime by the company at 110 and accrued interest.

Applications for the stock are being invited by the Royal Securities Corporation, Limited. Subscription lists will close on or before April 30, 1918.

TORONTO'S OUTSTANDING TAXES

A fine index of Toronto's prosperity is afforded by the fact that less than $3,000,000 of taxes are outstanding, although the city levies, in general and local improvement rates, about $20,000,000 per year. Of taxes due in 1917, a little over two million dollars is outstanding—or something in excess of 10 per cent. of the levy. Despite high tax rates, the public has been able to keep up its payments as in peace times, and the regular holding of tax sales has also done much to keep the rolls in good shape. The figures of taxes due at the present date are as follows:—

1915 taxes still due	$ 129,000
1916 taxes still due	698,000
1917 taxes still due	2,165,000
	$2,992,000

On May 1 the city treasurer will proceed to add 6 per cent. per annum to all overdue taxes. The method used is as follows: If $100 was due for 1916 taxes, and was not paid, it was first subject to a straight 5 per cent. (not per annum) addition and became $105. Then on May 1 a year ago, a further 6 per cent. per annum began to be added, and the amount has now become $111.30 if not paid. On May 1 of this year, this sum becomes subject to a further addition at the rate of 6 per cent. per annum, and will be $111.86 by June 1, $112.41 by July 1, and so on. This applies to the 1915 and 1916 taxes in the above. The two millions due for 1917, however, are now being increased by 6 per cent. per annum for the first time.

WAR EFFECTS FELT IN THE UNITED STATES

The New England Letter of the First National Bank of Boston, issued on the 15th of this month, comments upon recent events as follows:—

"The economic disturbances due to the war are becoming more pronounced day by day, yet business on the whole is active and prosperous, and the public suffers chiefly from inconvenience brought about by the necessity of conserving supplies for our army and the armies of our Allies. The volume of business is maintained at as high a level as the shortage of labor permits. The production and distribution of non-essentials have been curtailed, but with few exceptions those who have been engaged in these industries have been able to divert their facilities to the manufacture and distribution of necessities, so that the total volume of business is not curtailed. This is reflected in the figures of bank clearings for March, which were 57.6 per cent. above the average for a period of 16 years, while the excess for the three months to March 31st was 48.8 per cent. Business failures have been materially below the average, so that it is evident that the volume of business is not at the expense of profits, and collections are specially good. The vesting in the War Industries Board of almost complete power over the business of the country is one of the most important steps that has been taken since we entered the war, the object being to coordinate the various activities of the government, and greatly increase our efficiency, both at home and abroad. The shipping situation remains serious, and must continue so, until there has been sufficient time in which to construct the many vessels that are already under way. As a matter of fact, the shipbuilding programme, both as to steel and wooden ships, is in much better shape than wide-spread current reports have indicated. There has been a recent welcome reduction in the amount of tonnage destroyed by submarines, and there is basis for hope that within a reasonably short time the situation may be improved, not only by the fewer sinkings, but by an increase in the new tonnage that will more than cover any losses.

"Basis for optimism is found in the estimates of the winter grain crops. The government's experts estmate an increase of about 142,000,000 bushels in winter wheat over last year's harvest, while private experts figure a larger crop. Winter rye promises to yield materially more than a year ago. Every endeavor will be made to plant a large acreage of spring wheat and corn, as upon our crops depends to a large extent our service in the war. Our Allies look to the United States to supply the food that they have been unable to raise, and upon which success largely depends. The maintenance of the food supplies of the Allied armies is, perhaps, the most important task that has fallen upon the United States, and justifies the restrictions that have been placed upon the domestic consumption of foodstuffs. The country will be fortunate, indeed, if no more stringent regulations are found necessary."

The enormous demands, especially on the part of the government, for iron and steel, wool and cotton, are also referred to. Railroad operating income for January showed a deficit of $2,227,000, as compared with a surplus of $67,000,000 in January, 1917. It is also pointed out that the recent increases in wages will more than offset the 15 per cent. increase in freight rates.

BRITISH COLUMBIA RAILWAY DEAL

The directors and stockholders of the Pacific Great Eastern Railway Company severed their connections with that concern at a formal meeting which took place on April 23rd at the Vancouver headquarters of the company. This meeting has the effect of completely severing the connection that Foley, Welch and Stewart and their assistants had with the Pacific Great Eastern Railway and the Pacific Great Eastern Equipment Company. They still retain an interest in the Pacific Great Eastern Development Company. Under the act which was passed by the legislature the government has two years after the war in which to accept its option to take over all the assets of the concern, and failing to do so, Foley, Welch and Stewart have five years in which to acquire these assets on payment of $50,000.

INCREASE IN BANK CIRCULATION

The monthly bank statement for March has just been issued, and includes the following figures:—

	March, 1918.	Changes during March, 1918.
Note circulation	$ 191,058,404	+ $14,689,108
Reserve fund	114,176,008	+ 12,100
Demand deposits	561,042,236	— 8,224.406
Notice deposits	921,080,803	+ 12,257,815
Total deposits in Canada	1,482,123,039	+ 4,033,400
Deposits elsewhere	196,257,632	+ 13,035,330
Current coin	78,255,033	— 1,748,900
Dominion notes	165,197,554	— 8.603,572
Deposits, central gold reserve	79,420,000	+ 4,650.000
Call loans in Canada	74,257,877	— 2,464,286
Call loans outside	167,296,701	+ 7,057,307
Current loans in Canada	886,995,222	+ 27,632,075
Current loans outside	102,317,679	— 7.360,461
Total liabilities	2,052,899,573	+ 57,664,734
Total assets	2,302,477,611	+ 59,922,013

The most noticeable change is the increase in note circulation, amounting to almost $15,000,000. There has been some decrease in demand deposits, but notice deposits have increased by over $12,000,000. The statement in detail and the usual analysis will be printed in these columns next week.

INSURANCE ACT AMENDED

Bill No. 2, which is an act to amend the Insurance Act of 1917, received its first reading April 18th, 1918.

The bill as presented is as follows:—

(1) Subsection one of section fourteen of the Insurance Act, 1917, is amended by inserting after the word "every" in the second line the word "Canadian."

(2) The said section is further amended by inserting immediately after subsection one the following new subsection:—

(1a) Every British and foreign company carrying on the business of fire insurance shall, before the issue of such license, deposit with the minister in such securities the sum of one hundred thousand dollars.

Section nineteen is repealed and the following is substituted therefor:—

19. Subject to the provisions of section one hundred and twenty-five of this act, if it appears from the annual statements or from an examination of the affairs and condition of any company carrying on the business of fire or inland marine insurance that its assets in Canada, including the deposit in the hands of the minister, exceed by less than twenty-five per cent. the reinsurance value of all its risks outstanding in Canada, together with other liabilities in Canada, the company shall be notified by the minister to increase its said assets in Canada by an amount such that the accepted value of its assets in Canada shall exceed by at least twenty-five per cent. its liabilities in Canada as aforesaid, and on its failure to so increase its assets in Canada within sixty days after being so notified, the minister may withdraw its license.

Section one hundred and twenty-five is amended by striking out the word "fifteen" in the sixth line of subsection one thereof and substituting therefor the word "twenty-five."

Winnipeg, Man., board of valuation and revision reports that the rateable assessment for the current year amounts to $252,528,800, of which $161,709,710 is on land at full valuation and $90,819,000 on buildings on a two-thirds basis.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Grand Mere, Que.—Messrs. Champoign and Vennes have been awarded a block of $40,000 6 per cent. 10-year bonds.

Windsor, Ont.—The council has decided to issue $25,000 worth of debentures as extra cost for collegiate, without taking vote of the ratepayers.

Listowel, Ont.—Messrs. A. Jarvis and Company, of Toronto, have been awarded a block of $40,000 6 per cent. bonds, payable in 20 annual instalments.

Niagara Falls, Ont.—Messrs. A. Jarvis and Company, of Toronto, have been awarded a block of $28,500 5 per cent. bonds, payable in 30 annual instalments.

Belleville, Ont.—The Oxford Securities Corporation of Toronto has been awarded a block of $50,000 6 per cent. 10-year debentures. The proceeds will be used for patriotic purposes.

Mimico, Ont.—At the council meeting on April 22nd, a debenture by-law was passed amounting to $16,460.36 for sewers, and $11,910.96 for water mains. These amounts were for work completed last year.

Victoria, B.C.—The city has awarded a block of $1,000,000 6 per cent. 10-year notes to a syndicate, comprising the Dominion Securities Corporation and the Housser, Wood Company of Toronto, and Messrs. Greenshields and Company, of Montreal.

Hamilton, Ont.—On April 17th, the parks board had before it a recommendation from the board of control that a resolution be passed instructing the city council to authorize an issue of debentures of $37,034, to be known as park fund debentures, and to be used for the cleaning up of the Beckett Drive, Mountain Park and east end purchases. Mr. F. E. Waddell, K.C., city solicitor, advocated the passing of the resolution asked for. The council will assume payment of the principal and interest.

Victoria, B.C.—The corporation of the city offers for sale, in amounts of $100, upwards, the following debentures:—

Due date.	Amount.
15th September, 1918	$ 3,350.00
15th October, 1918	30,000.00
15th September, 1919	3,350.00
15th October, 1919	30,000.00
15th September, 1920	3,350.00
15th October, 1920	30,000.00
15th May, 1921	1,000.00
15th September, 1921	3,350.00
15th October, 1921	30,000.00
15th May, 1922	3,000.00
15th September, 1922	3,350.00
15th October, 1922	30,000.00
15th September, 1923	3,350.00
15th October, 1923	30,000.00
15th September, 1924	3,350.00
15th October, 1924	30,000.00
15th September, 1925	3,350.00
15th October, 1925	30,000.00
15th September, 1926	3,350.00
15th October, 1926	30,000.00
15th September, 1927	1,140.63
15th October, 1927	12,884.18
	$318,174.81

These debentures are a direct obligation of the city of Victoria and are in denominations of $100, $250 and $500, bear interest at the rate of 5 per cent. per annum, payable half-yearly, and are payable as to both interest and principle at the office of the Bank of British North America in either London, New York, Montreal, Toronto, or Victoria at holder's option. They are free from taxation as personal property by the province of British Columbia, and they bear the certificate of the inspector of the municipalities for British Columbia.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from April 2nd to April 12th, 1918:—

School Districts.—Valley City, $2,000 20-years not ex. 8 per cent. annuity; L. L. Brown, Fiske. Viewland, $2,300 10-years not ex. 8 per cent. annuity; Chas. Diebel, Grenfell. Beblo, $1,500 10-years not ex. 8 per cent. annuity; Jas. Carson, Ebeneger Valley.

Rural Telephone Companies.—Tessier, $2,500 15-years not ex. 8 per cent. annuity; G. H. Johnson, Tessier. South Girvin, $1,000 8-years not ex. 8 per cent. annuity; S. J. Stewart, Girvin. Fern Glen, $10,600 15-years not ex. 8 per cent. annuity; H. Daniels, Tisdale. North Forres, $5,700 15-years not ex. 8 per cent. annuity; L. A. Moore, North Forres. South Flaxcombe, $8,400 15-years not ex. 7½ per cent. annuity; G. R. Langrish, Flaxcombe.

The following is a list of debentures reported sold from April 2nd to April 12th, 1918:—

School Districts.—Rippowan, $2,000, Oak Hill, $900; Canada Landed and National Investment Company, Winnipeg. Cavendish, $1,500; Great-West Life Assurance Company, Winnipeg. Morris, $2,500, Petain, $2,200, Melaval, $2,800; Waterman-Waterbury Manufacturing Company, Limited, Regina. Battrum, $450; Saskatchewan Life Assurance Company, Regina. Madison, $2,500, Edenview, $2,000; Kerr, Fleming and Company, Regina

Rural Telephone Companies.—Southcote, $1,650; Nay and James, Regina. Naseby, $11,000, Heron, $1,100, Sylburn, $9,400, Zelma, $8,100, Lanigan, $1,500, Rugg, $11,500; W. L. McKinnon and Company, Regina. Vawn, $11,300, Strongfield, $2,100; J. A. Thompson, Winnipeg. Hafford, $13,200; Great-West Life Assurance Company, Winnipeg. Colgate, $1,600; Bond and Debenture Corporation of Canada, Winnipeg.

Rural Municipality.—Frontier, $7,500; Nay and James, Regina.

COBALT ORE SHIPMENTS

The following is a list of the shipments of ore, in pounds, from Cobalt Station for the week ended April 19th, 1918:—

Coniagas Mines, 93,000; McKinley-Darragh Mines, 63,693; Dominion Reduction Company, 131,000; Buffalo Mine, 307,385. Total, 595,078 pounds, or 297.5 tons.

The total shipments since January 1st now amount to 6,111,386.8 pounds, or 3,055.7 tons.

ADVERTISING EXPENDITURES AND PRODUCTION

It would appear that accountants appointed by the government in England to ascertain the profits earned by concerns there whose output has been commandeered for war purposes have taken the ground that expenditures for advertising cannot be regarded as a prime business cost.

The Associated Accountants' Journal, which is the official journal of the Central Association of Accountants, takes exception to the position taken by the government accountants by saying: "It will be interesting to learn how government accountants, who have disallowed the reasonable cost of advertising as a prime business cost, will reply to the strong case put forward in this booklet by the Association of British Advertising Agents.

"To lay down an arbitrary rule that advertising expenditure cannot be taken into consideration when arriving at cost of production is bound to work grievous injustice in the case of those firms whose costs of production have been brought to their present low figure because outlet was assured to their output through the power of advertising.

"These firms have been in the habit of treating their advertising upon the same basis as other costs of production, and, as such, the advertising accounts have hitherto not only been audited and passed by leading accountants all over the kingdom, but it has been the practice of these accountants to insist upon this course being adopted. All the weight of evidence, therefore, shows that any attempt to differentiate between this and other prime business costs would place a stranglehold upon businesses, dissipate goodwill in the markets of the world, and reduce firms from the position of makers of a 'brand' accepted everywhere by the public as a guarantee of good quality, to the level of manufacturers of unknown, non-guaranteed goods."

The sixteenth annual meeting of the Dominion Association of Chartered Accountants will be held this year in Montreal on the 18th, 19th and 20th of September. Committees of local members are now at work on the arrangements.

BROKERS AND BANKS

Payments May Be Recovered in Bankruptcy for Benefit of Creditors—Voidable Preference

BY M. L. HAYWARD, B.C.L.

When a party in business becomes painfully and financially embarrassed he enters the populous and popular state of bankruptcy, and when he does so the law provides that his assets shall be paid the creditors rateably and proportionately, and in order to arrive at a fair and equitable division, the bankruptcy law further declares that payments already made by the bankrupt under certain conditions may be recovered by the trustee in bankruptcy from the person to whom they were paid for the benefit of all the creditors, on the ground that the payment made by the bankrupt was what is called a "voidable preference."

Now, if A. makes a certain payment to B. and then goes into bankruptcy, the question whether the payment is a "voidable preference" which B. will have to hand back to A.'s trustee in bankruptcy, or whether B. can retain the payment for his own use, is one of vital importance to B., and to a lesser extent, to the other creditors as well. This point frequently arises in connection with dealings between bankrupt stockbrokers and the banks, and in this connection two cases decided by the United States Supreme Court are of considerable importance, as, while there is no bankruptcy law in Canada, there is in the United States, and Canadian stock dealers on a large scale generally resort to the American markets to buy and sell. These United States cases will therefore repay a careful perusal and lay down some important principles.

Clearance Loan.

In the first case, the National City Bank of New York vs. Henry D. Hotchkiss, a firm of New York brokers had been in the habit of getting money from the National City Bank on what is known in New York as a "clearance loan." These loans are explained by the United States Supreme Court as follows:—

"Brokers need large sums to 'clear' or pay for the stocks that they receive in the course of the day, and as the stocks must be paid for before they are received and can be pledged to raise the necessary funds, these sums are advanced by the banks. They are returned later on the same day by making deposits to the borrower's account and drawing a check to the order of the bank."

The other facts of the case taken from the records of the Supreme Court illustrate the uncertainty of a broker's life, as the court goes on to say that "at 10 o'clock on January 19th, the brokers had assets exceeding their liability by nearly half a million dollars. These assets consisted largely in the stock of coal and iron company in which there was a pool. Before 12, there was a break in the market, the stock went down, and at about noon the suspension of the firm was announced. A petition in involuntary bankruptcy was filed at 10 minutes after 4 on the same day. At about 10, the bank made a clearance loan to the bankrupts of $500,000 in the usual way, to enable them to meet their current obligations and to get the stocks deliverable on that day, the bank receiving demand notes, and both parties acting in good faith. The sum was credited in the deposit account of the firm, in addition to $54,319.98 already there, and soon after the bank certified and subsequently paid checks amounting to $535,920.74. During the day the firm made deposits which are not in question, but there remained due upon the loan $166,166.69."

"Voidable Preference."

Naturally, the bank was rather disturbed by this state of affairs, and, the court says, "noticing the drop in the stock, officers of the bank went to the firm, demanded payment or securities to make good the obligations to the bank, and were told of the suspension and that a petition in bankruptcy would be filed. After two hours' discussion some securities were delivered to the bank between 2 and 3 p.m.; and some of the securities bore no relation to the clearance loan; others, and it may be assumed for purposes of argument, most, had been released by the money thus obtained."

Then the trustee in bankruptcy of the bankrupt brokers brought suit against the National City Bank for the return of the securities delivered to the bank by the brokers under the above circumstances, claiming that it was a "voidable preference," and the Supreme Court of the United States held that it was such a preference and that the bank could be compelled to return the securities.

"In the present case," said the court, "it is agreed that it was expected and understood that no portion of the clearance loan was to be used for any purpose other than to clear securities. But, on the other hand, by consent of the bank, as it seems, the loan was put into the general deposit account, which was drawn upon for general purposes; at least, to the extent of the balance above the loan; the securities released were not kept separate, but were used like any other; and no separate account was kept of money received from deliveries of stock so released. What happened as between these parties was simply that all moneys received in the course of the day, from whatever source, went into the firm's deposit account with the bank. So that, even if we were to take it, as a corollary of what was understood, that the use of the clearance loan was expected to enable the firm to repay the loan, it does not appear to have been expected that the proceeds should be appropriated specifically to that end, but simply that the addition of such proceeds to the general funds of the firm would enable the latter to pay within the time allowed."

Trust Moneys.

As a further reason why the bank could not hold the securities, the court laid down that "a trust cannot be established in an aliquot share of a man's whole property, as distinguished from a particular fund, by showing that trust moneys have gone into it. On similar principles a lien cannot be asserted upon a fund in a borrower's hands, which, at an earlier stage, might have been subject to it, if, by consent of the claimant, it has become a part of the borrower's general estate. But that was the result of the dealings between these parties, and it cannot be done away with by a wish or intention, if such there was, that along side of this permitted freedom of dealing on the part of the bankrupts, the security of the bank should persist. It is not like the case of property wrongfully mingled with general funds and afterwards traced. All that the parties agreed, either expressly or by implication, was that the debt incurred at 10 o'clock should be paid by 3. Some banks seem to have required the dealing to be conducted on the footing of a fund identified and subject to a trust at every step; but between these parties there was no attempt to follow a specific fund through a series of changes until it was returned.

"As all trace of the bank's money was lost when it entered the stream of the firm's general property, there can be no right of subrogation. Neither can a claim be upheld on the ground that there was no diminution of the bankrupt's assets, or that the transaction should be regarded as instantaneous and one. The consent to become a general creditor for an hour, that was imported, even if not intended to have that effect, by the liberty allowed to the firm, broke the continuity and established the loan as part of the assets. No doubt many general creditors have increased a bankrupt's estate by their advances, but they have lost the right to take them back. Time sometimes can be disregarded when it is insignificant. But in this case half the time between the loan and the transfer of securities sufficed to change the position of the borrowers from a fortune of half a million to a deficit of double that amount."

The result of the decision, therefore, was to lay down the principle that after a bank makes a "clearance loan" to a broker and credits it to his general deposit account, which loan is to be used to clear securities and to be repaid later in the day, and the bank does not require the securities cleared to be kept separate or that any separate account be kept of the moneys received from the sales of the cleared stock, and the bank demands and receives from the broker securities against his account without regard to their source and with notice at the time of the broker's bankruptcy, the bank is obtaining a "voidable preference," and may be compelled to return the securities.

Securities Might be Sold.

Another interesting point arose in the same case, because after the bankruptcy of the brokers it was agreed between the parties that the securities which had been handed over to the bank and which the trustee in bankruptcy claimed might be sold by the bank "at the best price obtainable and at such times as may seem best to the officers of the bank," and that the proceeds realized from the sale should be dealt with by the court in the same manner as the securities themselves.

The bank, however, did not sell under this agreement; after the date of the agreement there was a heavy decline in the value of the securities on the market, and the trustee in

bankruptcy claimed that instead of taking the securities he was entitled to the value of the securities at the time of the agreement instead of the securities themselves which were then of much less value; but the court held that as it was in the discretion of the bank to sell or not to sell, and the bank in its judgment had decided not to sell, all that the trustee was entitled to was the securities and to nothing by way of damages.

Broker and the Clearance Loan.

In the other case mentioned, Mechanics & Metals National Bank of New York vs. Dudley P. Humphrey, arose under somewhat similar circumstances. In this case the Mechanics Bank had made a clearance loan of $400,000 to a firm of brokers, crediting it to their deposit account on which there was already over $36,000. This clearance loan was made about 10 o'clock, and by noon the bank had certified or paid checks against the brokers' account for over $276,000. Between 11 and 12 the cashier heard that there was trouble in the stock market and that the brokers were in difficulties, and gave orders that no more checks were to be certified. He went further and called on the brokers who gave him an evasive reply as to the financial condition of the firm, and who, when reminded by the cashier that they had made no deposit that day, told him that a deposit of $54,000 was then on its way, which deposit was paid in to the bank after the cashier's order to stop payment. The cashier then pressed the brokers for some securities against their account, which he got and returned to the bank. At forty minutes past 12 the brokers gave notice to the exchange that they were unable to meet their obligations, and a petition in bankruptcy was filed against them shortly after three.

To Recover Securities.

The trustee in bankruptcy then brought action against the bank to recover the securities which the cashier had received from the firm, and also to recover the amount of the deposit made by the brokers after the cashier had forbidden the payment of cheques against the deposit account and a few hours before the petition in bankruptcy.

Acting under the decision in the former case, the Supreme Court held that the trustee was entitled to the securities delivered to the bank; but then the question arose as to the right of the bank to hold the so-called deposit of $54,000. On this point it was held that the bank could not set-off against the $54,000 deposit, the amount which the brokers owed the bank, and that it had to be paid to the trustee of the bankrupt broker.

"The co-called deposit," said Mr. Justice Holmes, "of $54,000, was paid in after the cashier had forbidden the payment of checks against the deposit account, and therefore rightly was held to be a payment and a preference. A set-off properly was denied."

LETTER TO THE EDITOR

MORTGAGE LOANING SITUATION

Sir,—Referring to your issue of the 12th inst., and to an article on page 8 under the heading of "Mortgage Loaning Situation," being a contribution from Mr. S. R. Tarr, editor of the Canadian Finance, Winnipeg, it is made to appear that the government of Manitoba has recently paid as high as 7¾ per cent. for money on short-term borrowing. This is a mis-statement, as the province of Manitoba has not on any occasion paid any such rate for money.

I should feel greatly obliged if you would give publicity to this correction.

Yours truly,
Edward Brown,
Provincial Treasurer.

Winnipeg, Man., April 17th, 1918.

The announcement is made from Montreal that the Royal Bank of Canada intends opening a branch in Barcelona, Spain, in charge of Mr. F. D. Dever, a native of Canada, and for some years supervisor of the bank at Havana. The branch is intended to form a link in the development of Spanish-American business throughout Central and South America, where the bank is well represented.

CONDUCT OF FINANCIAL INVESTIGATIONS

Classes Brought About by Changes of Proprietorship, Admission of Partner and Sale or Purchase of Business

In the course of an address on the above subject before the Incorporated Accountants' Students' Society of London, recently, Mr. F. W. Priest, said: "I propose to divide the subject under three heads as follows:—

(1) Investigations Generally.
(2) Preliminary Considerations.
(3) Practical Points.

Investigations Generally.

"The matters which are submitted to professional accountants for investigation have considerably increased during the last 20 years. They cover a fairly wide range of practice, and have become an important branch of professional work. The classes of investigation which occur most frequently are those brought about by changes of proprietorship, admission of a partner, or the purchase or sale of a business. No prudent business man would put capital into a strange concern without first obtaining the opinion of an expert accountant as to its state of affairs and a general report on the business. Perhaps the best proof of the wisdom of this is that quite a large percentage of such investigations result in negotiations falling through, and generally as a consequence of the investigating accountant's report thereon.

"It is somewhat disappointing to one's own client when matters terminate so, but it is better for him to know that his loss is limited to the amount of his accountant's fee than risk his money in a concern which is not sound.

"Another class of investigation which, before the war, happened quite frequently, was for the purpose of certifying the profits of concerns about to be converted into limited companies.

"Then there are investigations in regard to income tax matters, amalgamations, defalcations; also those arising from shareholders and debenture holders being dissatisfied with the results of the trading or management.

"Meetings of creditors, friendly societies, beneficiaries under wills, board of trade and many others provide work for the investigating accountant.

"Investigations in regard to general office, and even works organizations and costing systems, are occasionally met with.

"Since the war many accountants have been occupied on investigations of businesses under the 'Trade with the Enemy Act.' These are instituted by the board of trade, and are for the purpose of ascertaining whether the proprietors (generally of German or Austrian extraction) have been, directly or indirectly, trading with enemy countries since the outbreak of war.

Preliminary Consideration.

"It is important to clearly understand in whose interests one is acting, the nature of the certificate or report, and for what purpose it is required. The period of investigation will, of course, depend on circumstances and instructions.

"It is not unusual for accountants to be consulted on this point, in which case the object in view and nature of the business must be considered. Also, whether the books have been properly kept and balanced, and if balance sheets and trading and profit and loss accounts have been regularly made up; if so, by whom, and whether they have been audited. Also, whether the accounts have been properly drawn up for the occasion.

"With a knowledge of these particulars it may be possible to decide whether the work will entail much or any checking or preparation of accounts.

"Another important factor is time. It sometimes happens that a report is wanted quickly, and it is left to the accountant to satisfy himself by testing and verifying figures as best he can. All these points have to be borne in mind, and also that the period should terminate at the latest possible date.

"The scope of the work will necessarily vary in different cases, even though the period be the same. Much depends on the state of the books.

"In cases of defalcations and falsifications of accounts the period and scope of the work can only be ascertained by ac-

tual examination of the books and consideration of any special circumstances attaching to each individual case.

"Suppose, for example, an investigation on behalf of a client who is about to purchase a business or a partnership where the goodwill is to be or has been valued on the basis of a number of years purchase of net profits. We will assume that accounts have been prepared, and your instructions are to examine the books and make a general report.

"The trading accounts should be thoroughly tested for the periods under review by applying percentage tests to all items on the debit side making up the turnover, or, in the case of a manufacturing concern, the output also, and it is a good plan to prepare a comparative statement of the percentages, so that each year under review can be studied, and any variations revealed, and, if deemed necessary, explanations sought for.

"The last year or period should receive particular attention, and if any substantial increase in the rate of gross profit be shown, the stock and sales must be closely scrutinized. The stock prices at the end period should be compared with the prices of the previous year's stock, and a few actual invoices here and there examined in order to test the valuation. Also note if a fair allowance has been made in respect of any old stock.

The Manufacturing Concern.

"In the case of a manufacturing concern particulars should be taken of any oncost added to own manufactured stock and work in progress, and compared with the cost accounts if any are kept. Note if any goods on approval have been included in stock, and also how such transactions have been dealt with in the books. I have known instances where goods on approval have been included in the stock, and also in the book debts. This should be guarded against by inspecting the approval book and ledger accounts to satisfy oneself that double value has not been taken. In some cases it is arranged that the stock be valued by an outside expert valuer.

"The sales should be examined, and, if thought necessary, checked to the personal accounts in the sales ledger, with a view to satisfying oneself that the transactions are all *bona fide*. Goods sold just prior to the ending date should receive attention as to whether they were delivered before stocktaking; if not, see that any such goods are not included in the stock. It is quite easy for a mistake of this kind to be made.

"It is also as well to examine the return books to ascertain if any substantial items have been credited to customers' accounts since the date of the last period. Explanation must be obtained for any such items. Fictitious inflation of sales is sometimes adjusted by fictitious credit for returns.

"It should be noticed if all trade discounts have been provided for and a comparative statement of sales is also useful.

Profit and Loss Account.

"The profit and loss account must be examined in detail and note made of any variation in the administration expenses, and that all proper charges have been included in the accounts, whether paid for or outstanding. The question of proper provision for bad and doubtful debts must be gone into. To do this it is advisable to examine the ledger accounts and ascertain the dates when all debts outstanding over a certain amount, according to the magnitude of the business, were made, and note any that in your opinion should be reserved. It is also a good plan to examine the bad debt account, and to note the percentage of bad debts on the turnover. Note whether proper depreciations have been written off.

"Adjustments may have to be made in certain circumstances, where, for instance, the premises are owned by the proprietors and no rent is charged in the accounts, in which case the schedule A assessment on the premises is usually added. And, where partners' salaries or drawings have been charged, these should be deducted from the expenditure, although it may be necessary to substitute a sum for management.

"The average credit given and received should be ascertained, and it is as well to obtain the number of customers on the books, and if the business done is well distributed over the connection.

The Balance Sheet.

"The balance sheet, if it is a matter of proposed partnership, should receive attention as to the financial position and the margin of working capital in the business, and whether there are sufficient realizable assets available to meet the liabilities at their due dates. The effect of any proposed new capital in regard to financial position should be noted. These are important features, as many firms with quite substantial surplus of assets over liabilities are continually and sometimes seriously embarrassed by the surplus not being sufficiently liquid. No business can be considered as in a satisfactory financial position unless there are sufficient liquid assets to provide for the discharge of liabilities as they fall due. Every effort must be made to ascertain that all liabilities have been disclosed; if any doubt on this point, it is advisable to obtain a formal declaration, and in some cases it may be necessary for a declaration as to private liabilities.

"Always make a point of substantiating transactions by documentary proof where possible, and never be put off the scent of something you may suspect by any plausible explanation of some interested party.

"Trading With the Enemy."

"As regards investigations under the trading with the enemy act, these are for the purpose of ascertaining whether the concerns selected by the board of trade for your attention have been trading, directly or indirectly, with enemy countries, or whether any cash has been remitted since the outbreak of war. These inquiries, or inspections, as they are termed, involve a searching examination of correspondence, as well as the books, invoices, statements, cheques, contracts and any other documents.

Correspondence and Invoices.

"Special attention should be directed to the correspondence and invoices, and the books inspected for suspicious transactions, missing pages and erasions. Sometimes a very trifling matter will lead to important disclosures. It is really the small clues that one should be on the alert for, and it is very unlikely that transactions of any magnitude would be openly dealt with in the books.

"When making a report on an investigation, study well your instructions, and always be most careful to state exactly what you have done, setting out clearly what adjustments you consider necessary to the accounts and your reasons, and if you have not been able to satisfy yourself on any particular points they should be mentioned. Any statements made in a report of this kind should be, as near as possible, statements of facts.

"Always be courteous, tactful and cautious in the conduct of your work, and be careful of not being led into premature expression of opinion. It is not necessary to discuss matters with the parties whose books you are examining except for the purpose of obtaining information for your report, subject, of course, to any special instructions. When the work is finished it is your client who is entitled to receive your opinions first hand.

"Investigation work constitutes a very severe test on the abilities of the accountant. All knowledge of affairs are needed in a greater degree than in ordinary audit work. It is not a case of merely checking, vouching and balancing accounts. To be a really expert investigator one needs a wide business experience, with a thorough technical knowledge of how to read and criticize balance sheets and accounts. To one possessing such qualifications this branch of work is intensely interesting."

FIRE LOSS IN BRITISH COLUMBIA FORESTS

The fire season of 1917 was an unusually severe one in British Columbia. Reports made to the provincial forest branch show that, exclusive of the railway belt, a total of 986 fires occurred. In fighting these fires the forest branch expended $88,246. The total area burned over was 136,186 acres, of which only 2,825 acres was merchantable timber land; 16,226 acres contained valuable reproduction, and 159,386 acres were classified as cut-over, old burn not restocking, or unmerchantable mature timber. The total damage done is estimated at $291,726.

SASKATOON CUSTOM RETURNS

Custom returns for the Saskatoon district, which included the Battlefords, totalled $1.167,377 for the fiscal year ended March 31st. These figures show a gain of $497,075 over the figures for the year ending March 31st, 1917, which totalled $670,302. The highest figures for any one month during the year were those of May, 1917, which totalled $171,926, and the lowest was the total of $64.324 in January of this year. The figures for March, 1918, were $116,922, as compared with $77,171 in March, 1917.

MONTREAL STOCK EXCHANGE

The Advantages of buying "Listed" Securities

THERE are many advantages to the investor in buying Securities that are listed on the Stock Exchange.

First: Careful and minute investigation is made into the affairs of a Company. Then certain regulations are made which assure the public of securing an equality of information on the issue of financial statements, dividend notices, and other matters of interest.

Prices on listed securities are established, not by a group of dealers, but by the public at large.

Then there is the advantage of obtaining a daily record of all transactions. Quotations are published in most Newspapers, or can be secured almost instantly by telephone or telegraph no matter where you live.

Any member of the Montreal Stock Exchange can buy or sell for you any Listed or Unlisted Securities, which have a market anywhere in the world.

Write to-day for valuable booklet on investing to the Secretary, Montreal Stock Exchange, Room 431 Stock Exchange Building, Montreal.

Montreal Stock Exchange

NEW INCORPORATIONS

A Steamship Company and a Bridge Company Receive Charters, Both With Capitalization of $1,000,000

The two largest companies incorporated during the past week were: Webster Steamship Company, Limited, $1,000,000, Quebec, Que., and the Manitoba Bridge and Iron Works, Limited, $1,000,000, Winnipeg, Man.

The following is a partial list of charters granted during the past week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The amount noted is the authorized capital, and the persons named are provisional directors:—

Three Rivers, Que.—St. Arnaud Biron and Company, Limited, $99,000; E. St. Arnaud, Joseph E. Biron.

Campbell's Bay, Ont.—The Campbell's Bay Milling Company, Limited, $50,000; Samuel Burrows, Raoul Leger, Pat. Mousseau.

Harold, Ont.—Rawdon Threshing Company, Limited, $5,000; William John Jeffrey, Daniel Sarles, Stanley McMurray.

Ottawa, Ont.—Superior Sales Company, Limited, $500,000; Charles Murphy, Stanley Gardner Metcalfe, Stanley Metcalfe Clark.

Kitchener, Ont.—Riverside Garbage Disposal Company, Limited, $20,000; Archibald B. Campbell, Maggie Campbell, William Frank Balge.

St. Catharines, Ont.—National Rubber Heel Company of Canada, Limited, $200,000; John Michael Ferguson, Joseph Patrick Walsh, Charles Joseph McLaughlin.

Quebec, Que.—Steamer Eric W., Limited, $10,000; M. M. William-Quarrier Stoba, Herbert-Cecil Thorn, Cyril-St. John Griffis. The Webster Steamship Company, Limited, $1,000,000; Messrs. Lorne; Campbell Webster, William Stoba, Herbert-Cecil Thorn. L'Aqueduc Adouard Ruel, Limited, $190,000; Dame Dessanges Blais, Elmire Ruel, Edouard Ruel. Sterling Securities and Agencies, Limited, $18,000; L. J. Adjitor Amyot, Henri Bray, Chausse-gros de Lery. Lauzon Engineering, Limited, $300,000; Joseph Gosselin, Senior, Joseph Gosselin, Junior, Emile Herve Dion.

Winnipeg, Man.—The Manitoba Bridge and Iron Works, Limited, $1,000,000; Thomas Russ Deacon, Hugh Buxton Lyall. Realty Assets Company, Limited, $5,000; Robert S. Ewing, Wayne F. Rondabush, Theodore H. Simpson. The Riding Mountain Cattle Company, Limited, $100,000; John Ames, John Tully, Francis Albert Johns. Utilities Sales, Limited, $5,000; Arthur Lawrence, Anthony Joseph Costigan. Emerson Manufacturing Company, Limited, $50,000; Clarence A. Paulson, Walter M. Paulson. Western Collectors, Limited, $5,000; Alexander William Lewis, Neir Apphouse Cain. William Stanley King.

Toronto, Ont.—Canadian Overseas, Limited, $40,000; Thomas Robinson, Benjamin Harrison Marshall, Richard William Craft. Dominion Mineral Resources, Limited, $40,000; Arthur Lewis McEwen, Percy Garniss Ebbutt, Irene Rouse. The Dyrob Steel Tools, Limited, $100,000; Charles Joseph Eaguley, Thomas Dunlop, Samuel McDiarmid Robertson. National Shoe Manufacturing Company, Limited, $40,000; Bartle Edward Bull, James Shaw, Joseph Montgomery. Toronto Cabinet Company, Limited, $40,000; Armond Whitehead, Robert James Smyth, Mary Agnes Gallagher. Universal Coal Company, Limited, $100,000; Reginald Holland Parmeter, William Symon Morlock, Samuel Davidson Fowler.

Montreal, Que.—La Compagnie des Derves de Goudron du Canada, Limitée, $30,000; Joseph Lebel, Alfred Goyer, Blanche Goyer. La Compagnie de Glace de Cartierville, $20,000; Joseph-Antoine Lalande, Edouard Cousineau, Emery Legault. Laiterie Ville-Marie, Limitée, $49,000; Joseph A. Chenevert, Maurice-K. Carroll, Madame Edouard Langstaff. Quality Dress and Waist Company, Limited, $50,000; Samuel Medine, Charles Abraham Kaplan, Louis Shlakman. The Interprovincial Manufacturing Company, Limited, $200,000; Edouard Fabre, William Langley, Elizabeth May Silver. R. and W. Gelinas, Limited, $49,000; Raoul Gelinas Wilbrey, Gelinas Adelard Lamy, Freddy Gelinas. P. B. Lamarre, Limited, $99,000; Pierre-Basile Lamarre, Louis-Yvon Lamarre, Frederic Etienne Breard. Tivoli Studios, Limited, $9,000; Jacques Lax, Michael-G. Cockels, Speros-T. Prahale. Compagnie des Placages Canadiens Incorporée, $150,000; Arthur-Pierre Beaupre, Victor Martineau, Arthur Jodoin. Lumiere, Limited, $10,000; Samuel-Gerald Tritt, Saul Tritt, Nicholas Swan. P. Pastene and Company, Limited, $100,000; Aubrey Huntingdon Elder, Felix Winfield Haskett, Darley Burley-Smith.

COMPUTATION OF TIME ON LIFE POLICY

Incontestable Clause — Limitation of Time for Action — Observance of Military and Naval Provisions

BY M. L. HAYWARD, B.C.L.

Some interesting points frequently arise in connection with the computation of time on insurance policies, and there are a number of cases, dealing with it decided by the Canadian and American Courts. A leading case is the North American Life Assurance Company vs. Elson, decided by the Supreme Court of Canada in 1903 and reported in Volume 33 of the Canada Supreme Court Reports on page 383 and, is, or should be, familiar to every person interested in life insurance.

In this case the facts were that, by a policy of insurance dated the 27th day of September, 1894, the North American Life Assurance Company insured the life of one, George Elson, for $1,000, and on the day of its date the policy was mailed by the company to their agent at Winnipeg, to be forwarded by him to Elson in British Columbia. The Winnipeg agent forwarded the policy to Elson on October 1st, 1894, and in the ordinary course of the mail Elson would not receive the policy until October 7th.

The policy in question contained the so-called "incontestable clause" in the following words:—

After being in force three years, the only conditions which shall be binding upon the holder of this policy are that he shall make the payments hereon as herein provided, and that the provisions as to military and naval service, proofs of age and death, and limitation of time for action or suit shall be observed. In all other respects after the expiration of the said three years the liability of the company under this policy shall not be disputed.

There was also a provision endorsed upon the policy, which was made expressly a part of the contract, stating that "if, without a permit the insured engages as an occupation in employment on a railroad, steamboat or other vessel, or reside elsewhere than in Canada, Newfoundland, Europe or the United States; or between the 15th days of June and November in any year reside in any part of the United States south of the 26th degree of North Latitude, or in Europe south of the 42nd degree; this policy shall thereupon become and be null and void, and all payments made upon it shall be forfeited to the company."

Decision on Time.

Elson, the insured, paid the premium up to and including the 27th day of September, 1897, but about five months before this date he had, without a permit from the company, engaged in employment upon the Canadian Pacific Railway, which was one of the hazardous employments prohibited by the policy. While working on the railroad Elson was killed on September 30th, 1897, and in an action brought on the policy the insurance company refused to pay.

The question for the decision of the Court then, was when the three-year period named in the incontestable clause began; for, if it began on September 27th, 1894, then the company was bound to pay, while if it did not begin until the policy was received by the Winnipeg agent on October 1st, 1894, or by Elson on October 7th, Elson was not entitled to the benefit of the incontestable clause, and the insurance was not binding.

The Supreme Court of Canada decided that the three years began on September 27th, 1894, so that the decision of the Court was that the company was bound to pay.

"A question was raised," said Judge Davies, "and argued as to the date when the policy came in force and we were of the opinion on the hearing (and in fact the respondent's counsel was stopped on the point) that the policy went into operation and took effect from, at any rate, the date when it was posted by the company in Toronto, 27th September, 1894, for transmission to the insured. If, therefore, the 'incontestable clause' covers breaches of the conditions committed during the three years the policy was in force, the company would be liable, the insured not having been killed until the 30th September, 1897, two or three days after the expiration of the three years."

The decision of the Court, therefore, was that the contract of insurance was completed at least as early as the date of the policy, when the policy was mailed from Toronto, but it is to be noted that the date of the policy and the date of the mailing thereof were the same.

Suppose, however, that the policy had been dated on September 27th, but had not been mailed until October 4th. In that case would the Court have decided that the contract of insurance was completed on the date of the policy, or on the date of the mailing?

This point the Supreme Court of Canada was not called upon to decide, but, in this connection it is interesting to compare with the Elson case the case of Meridan Life Insurance Company vs. Mary C. Milam, recently decided by the Kentucky Court of Appeal. In this case, the policy of insurance was dated on June 8, 1914, and by one of those peculiar coincidences which sometimes happen in real life, the insured actually died on June 8th, 1915.

The policy contained the following provision:—

"This policy shall not be in force until the first premium has been paid thereon, and the policy duly delivered during the lifetime and the good health of the assured.

"In case of death after one year from the date hereof this policy shall be incontestable, except for non-payment of premium."

The application for the insurance, which was made a part of the contract, also provided "that death by my own hands, or occasioned by my own act, within one year from the date of any policy issued hereunder, shall invalidate the insurance and forfeit the payment to the company."

In an action brought on the policy the company set up the following defence:—

(1) That, while the policy was dated on the 8th of June, 1914, it was not actually delivered until June 13th, 1914.

(2) The insured committed suicide on June 8, 1915, which was within one year from the date of the actual delivery of the policy, and would, therefore, render it invalid.

(3) That, even if the one year were to be reckoned from the actual date of the policy, the death of the insured on June 8, 1915, was still within one year from the date of the policy, and that, by the terms of the application, all liability under the policy was annulled on account of the suicide of the insured.

On the first two points the Court decided against the company, holding that the one year in question was to be counted from the date of the policy and not from the date of its delivery.

"We see no merit in this contention," said the Court. "While it is true that insurance companies frequently, and we believe usually, do not deliver a policy upon the day of its date, nevertheless, all the provisions of the policy as to payments of future premiums, its maturity if it runs for a term, and similar provisions, are calculated from the day of its date. Of course, the insured can contract for a policy to be dated on any date after the date of his application; but, as a matter of routine business, policies are usually dated either according to the date of the application, or of its execution, and are subsequently delivered without any question being made upon that subject. But the rights of the parties to the contract are determined by the date, and all future premiums are to be paid accordingly.

Not Lapsed for Failure.

"If Milam had died on June 12, 1915, without having paid his second premium due on June 8, 1915, could it be said that his policy had not lapsed for failure to pay the premium when due, according to the terms of the contract? Under such a state of case would the company concede that his policy was in force on June 12, 1915, and that Milam had until that day to pay the premium? We think not. Furthermore, the policy, by its terms, provides that the period of incontestability shall be calculated 'from the date' of the policy, not from the date of its delivery. So, by the very terms of the policy, the one-year period of incontestability began to run on June 8, 1914."

On the third point, as to whether the death of the assured on June 8, 1915, was or was not within a year from the date of the policy, the Court said:—

"So speaking concretely, the case resolves itself to this: Was June 8, 1915, the day of Milam's death, within or after one year from June 8, 1914?

"The rule in regard to the computation of time is well settled, and is this: When the computation is to be made from the act done, the day on which the act is done must be included; but, when the computation is to be made from the day itself, and not from the act done, then the day on which the act is done must be excluded from the computation.

"In the case at bar, therefore, the year of incontestability must be computed from the dating of the policy, which was an act done on June 8, 1914. Manifestly, therefore, June 8, 1914, must be included in the computation, and the first year of the policy expired on June 7, 1915.

"Otherwise the year would have contained 366 days, instead of 365."

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Cape Breton Electric Company, Limited.—A semi-annual dividend of $3 per share on the preferred capital stock and a dividend of $1.50 per share on the common capital stock of the company, have been declared, both payable May 1, 1918, to stockholders of record at the close of business April 20, 1918.

Western Power Company of Canada, Limited.—The company report for the month of February, 1918, shows operating revenues of $34,270, an increase of 7.2 per cent. compared with February, 1917, and net earnings of $24,035, an increase of 8 per cent., compared with February, 1917. For the twelve months ended February 28th, 1918, the company shows operating revenues of $449,767, an increase of 15 per cent. over the same period in 1917, and net earnings $328,178, an increase of 20 per cent. over the same period in 1917.

Abitibi Power and Paper Company, Limited.—A new issue of $1,000,000 7 per cent. convertible mortgage debenture stock of the company is being offered by the Royal Securities Corporation, at 87 and accrued interest, yielding over 8½ per cent.

The Abitibi Company is one of the largest companies engaged in the production of newsprint paper and sulphite and ground wood pulp. Its mills are located at Iroquois Falls, and have an annual capacity of 62,000 tons of newsprint paper, 21.000 surplus tons of sulphite pulp and 22,500 surplus tons of groundwood pulp. The company controls under lease over 1,000,000 acres of pulpwood lands, with water powers approximately 48,000 horse-power The new issue is convertible into common stock at par any time after March 1, 1921, and is callable at the company's option at 110 per cent. and accrued interest at any time on or before that date.

Dominion Glass Company, Limited.—Another Canadian industrial has entered the list of dividend payers, the directors of the company having declared an initial payment of 1 per cent. on the $4,250,000 common share capital. The dividend is payable July 1st to shareholders of record June 15th, and is described as being for the quarter ending June 30th next. It is not specifically stated whether the dividend inaugurates a 4 per cent. per annum rate, but it is so presumed from the fact that the declaration is for a given three months' period. That period represents the third quarter of the company's current fiscal year, so the outlook is that the shareholders will receive 2 per cent. for the current year, with their stock on a definite 4 per cent. basis as the company turns into its next fiscal year on October 1st next.

The company's recent earning record is generally believed to be satisfactory, and combined with that as a basis for dividend action is the fact that its financial position is known to be strong.

Canadian Car and Foundry Company.—The annual statement of the company shows that the profits, after depreciation, are $2,105,000, being almost double those of last year. After interest charges and adding the surplus from the previous year, the surplus at September 30, was $2,840,000, or twice the amount of the previous year. The following is the profit and loss statement compared with 1915 and 1916:—

	1917.	1916.	1915.
Profits	$2,572,883	$1,292,104	$ 321,839
Depreciation	467.609	350,000	325,000
Balance	$2,105,273	$ 942,104	*$ 3,160
Interest	692,265	588,848	555,311
Net profit	$1,413,008	$ 353,255	*$ 558,471
Previous surplus	1,427,054	1,073,798	1,632,269
Surplus	$2,840,063	$1,427,054	$1.073,798

POWER AVAILABLE AT QUEBEC

Quebec Railway, Light, Heat and Power Company Offers Facilities to Industries

Power shortage is so prevalent throughout the country on account of fuel problems, difficulty in financing new private power projects, and late deliveries and high prices of machinery, that it is rather surprising to find a power company advertising for customers. The Quebec Railway, Light, Heat and Power Company, is soliciting correspondence with manufacturers who want an assured and continuous supply of power at reasonable prices, a good labor market, railway and water facilities and no lack of room for housing schemes for employees.

The company is now developing about 22,000 horse-power at five plants. At St. Feriol, or Seven Falls, on the St. Anne River, 10,000 horse-power is now developed and another 10,000 horse-power could be supplied upon short notice. On the Montmorency River, 2,000 horse-power more can be developed at Montmorency Falls, where 5,000 horse-power is now installed, and at Natural Steps, where 2,000 horse-power is now developed. At St. Gabriel, near Valcartier Camp, on the Jacques Cartier River, the company's plant now develops 2,000 horse-power, but little or no more power can be produced at this particular plant. At Chaudiere, where 3,500 horse-power is now developed, another 2,000 horse-power is obtainable. Taken altogether, including power now developed but not yet under contract, and power which could readily be developed if demanded, the company has upwards of 20,000 horse-power available.

Sites at Montmorency and St. Gabriel.

At Montmorency, the company owns or controls an extensive tract of land which is supplied with water service and served by the company's own railway, connecting at Quebec with the Canadian Pacific Railway, Canadian Northern Railway and Canadian Government Railways. Near the company's land are the towns of Montmorency and St. Louis de Courville. At Montmorency is located the second largest plant of the Dominion Textile Company, employing 1,500 skilled textile workers.

At St. Gabriel, adjacent to Valcartier Camp, the company owns land served by the Canadian Northern Railway. Arrangements for water and land can readily be made with the company by power users, either at Montmorency or at St. Gabriel.

Among the companies which, in 1909, were merged into the Quebec Railway, Light, Heat and Power Company, are the oldest public utilities in Quebec or their successors, including the old Quebec and Levis Electric Light Company, which developed power at Montmorency Falls in 1886, and the Quebec Jacques-Cartier Electric Company, which operated a steam-driven plant in Quebec for many years.

Unrestricted Rights on Rivers.

The company has a franchise to supply light and power in almost every municipality in its district. It has main transformer stations at Quebec, Levis, St. Anne's, Lorette and Beauport. It supplies 64-cycle alternating current, the main transmission lines being operated under from 10,000 to 44,000 volts pressure, which is stepped down to 2,300 volts for the distribution systems. The company has unrestricted rights to use the full flow of all the rivers upon which it is developing power, so that in case of a power shortage at any time in years to come, it has merely to build more extensive storage systems to increase considerably its continuous power output.

W. J. Lynch is general manager of the company, R. A. Wilson treasurer, Arthur Le Moine secretary, and L. Burran electrical engineer. The directors are: Sir Rodolphe Forget, president; Lorne C. Webster, vice-president; Chas. A. Lavigne, L. J. Tarte, Arthur Picard, Paul Galibert, L. G. Morin and Charles Donohue. The last annual statement shows assets amounting to $23,671,347.

Mr. W. A. Rowlands, who, for the past seven years has been in the service of the Union Trust Company, will become manager of the Winnipeg office of that company, succeeding Mr. James K. Pickett, who has succeeded Mr. J. M. McWhinney as general manager of the institution.

CARRIERS BY WATER

Will Be Brought Under Government Control for Statistical Purposes

The new Railway Act, which has been before parliament since 1914, and is being pressed to a third reading this session, will bring carriers by water under government control for statistical purposes, and also, it appears probable, as respects freight tolls. In other words, they will be placed in the same position as are the railways. The Dominion Marine Association has assented to the provisions of the measure as regards statistics, but has asked for modifications with respect to the jurisdiction of the Railway Commission. Until the bill is passed it would be imprudent to predict the result.

It will be of definite value to obtain authentic information with regard to our transportation interests in the inland waters of Canada. At this juncture it is uncertain whether or not ocean carriers will be brought within the scope of the act. Be that as it may, public judgment will approve of the facts being ascertained in relation to capitalization, the number of vessels in operation, earnings and operating expenses, employees, and so on, as to which there is absolutely no data available under existing conditions. The application of a sound and comprehensive statistical system would throw light on a situation which is just now very much in the dark.

On the Great Lakes.

Business on the Great Lakes has been good beyond precedent since the outbreak of war. Canal statistics for 1916—the last edition available—show surprisingly high rates for the moving of wheat from Fort William and Port Arthur during the past two seasons of navigation. For example, there was an increase in the rate to Montreal from 4.58 cents per bushel in 1914 to 7.55 cents in 1916. There has been a tendency in recent years, however, to ship an increasingly rising volume by way of the Georgian Bay ports and Buffalo, not because of lower rates, as might be supposed, but because of the demand for despatch. During the high-pressure months of November and December, when haste is the prime consideration, practically all of the grain goes out by those routes. The average rate last year for the whole season to Georgian Bay was 4.10 cents, as compared with 1.46 in 1914.

The movement to Port Colborne, at the eastern end of Lake Erie, and also to Buffalo, reveals an anomaly in transportation—an anomaly, by the way, which teaches a lesson to those who assume that distance is a controlling factor in determining freight charges, either by water or rail. It is some 380 miles further to Port Colborne than to Port McNicol or Depot Harbor, and yet the average rate per bushel last year to the first-named port was 3.68 cents as against 4.10 to Georgian Bay. To Buffalo, strange to say, the rate was 4.27. This situation is caused in some measure by the value attaching to return cargo. Vessels going to Port Colborne and Buffalo pick up coal for the west, while those unloading at Georgian Bay ports return in ballast. At one time the rates were practically the same, as the value of a quick return to the loading port was regarded as an offset to the return cargo of coal, which paid a low rate of about 30 cents per ton.

Carrying Trade.

There have been exceedingly lean years, however, in the Great Lakes carrying trade. Wheat has been carried to Montreal for as little as three cents per bushel, and for odd cargoes at even less. It has not risen above two cents to Buffalo for a whole season, and for many millions of bushels three-quarters of a cent was all that could be got. In such years the vessel owners went without dividends. During 1917 the highest rates in the history of the trade were paid, although the official figures have not yet been published, and the assumption is warranted that compensation has been found for the deficits of bad seasons. Five cents to Buffalo and eight to ten cents to Montreal are very profitable rates, and yet they were obtained during the rush period last year. Such prosperity will probably be reflected in additions to the operating fleet and larger and better boats. Competition may be relied on to restore the rates to a normal basis.

The Secret of a Wonderful Success

The rise and progress of The Mutual Life of Canada has been one of the romances in the history of Canadian Finance. Less than half-a-century ago a small group of men in an obscure Ontario town determined to establish a Life Insurance Company that would give the public the maximum of service at a minimum of cost. That being the aim it was resolved that the organization should be purely mutual. Five hundred prospective policyholders were gathered and formed the nucleus of the Company. From this small beginning in 1870 the Company has gone forward steadily with more regard to security and mutual serviceableness than big business. The result is that the Company to-day is enjoying a popularity that is phenomenal, writing during the past year more than $20,000,000 paid for assurances.

EDUCATIVE LITERATURE

There is no department of finance of such importance to the average man as Life Insurance, and none, generally speaking, of which he knows less

To those wishing to investigate the possibilities of Life Insurance, the extraordinarily liberal provisions of modern Policies, the CERTAINTY of the protection afforded, the comparative advantages of various Plans, the value of Insurance as an investment, and so forth, The Great-West Life Assurance Company will be pleased to send fully explanatory pamphlets in which the various phases of Life Insurance are clearly referred to. The Company will, at the same time, be pleased to give personal advice and information, and these explanations will be none the less freely given though the applicant has no immediate intention of insuring.

The Great-West Policies are widely known for their liberality and value. Rates are low, and the profit returns to Policyholders remarkably high.

BRITISH COLUMBIA'S INDUSTRIAL POSITION

The Hon. John Hart's Budget Speech in the Legislature—Progress of Agricultural Enterprise

(Staff Correspondence.)

Vancouver, B.C., April 18, 1918.

Discussing the progress of agricultural and industrial enterprise in the province during the past year, Hon. John Hart, in his first budget speech in the legislature, was able to announce some encouraging figures. Mining alone showed a decrease from the value of 1916, when it was $42,290,462, compared with $37,182,570 in 1917. It must not be taken from the difference between these totals that there has been any decline in the mining industry itself, the explanation being found in the cumulative effect of adverse influences on the industry as a whole. These may be summarized as industrial troubles, reduced prices for metals in the last part of the year, less demand for lead and zinc for munition purposes, and economic conditions which severely handicapped the production of gold. A very good feature in connection with the mining was the net increase in coal production of 76,324 tons (2,240 lbs), bringing it close to the pre-war figure. A new record was made by the collieries on Vancouver Island, the production being 1,698,236 tons, as compared with 1,492,761 tons in 1916, and an increase over the previous record year of 1910 of 72,305 tons. Big metallurgical companies are developing on a large scale, so that record figures may be looked for.

The value of agricultural production in 1917 is placed at $1,750,000 more than in 1916, the increase being largely due to enhanced prices of nearly all the products of the farm. Nevertheless, this is a good showing, considering the large number of men from the rural districts who are at the front.

Fishery Products.

Fishery products of the province for the fiscal year ended March 31, 1917, totalled $15,311,954, a gain over the previous year of $773,634. The total value of the fishery products of the entire Dominion for that fiscal year was $39,208,378, a gain of $3,347,670 over the previous year, and of the total value British Columbia produced 39.30 per cent. The province again, as in recent years, leads all the provinces in the value of its fishery products. The salmon pack was the largest in the history of the industry, notwithstanding that the sockeyes did not run to the Fraser River in comparable numbers with former years. Halibut, owing to increased prices, had a gain of $1,016,962; cod had an increase of $254,000, while whaling products doubled, with a total of $318,015.

Products of the forest were valued at $48,913,115, as compared to $35,528,000 in 1916. This is a very large increase, and it is expected that the returns of the present year will show an increase over even that large figure. The following comparative table shows where gains were made:—

	1916.	1917.
Lumber	$21,075,000	$28,225,000
Pulp	3,520,000	7,447,000
Shingles	4,500,000	6,900,000
Boxes	1,833,000	1,611,000
Piles and poles	650,000	467,695
Mining props and posts	1,000,000	546,883
Miscellaneous	1,150,000	1,425,815
Woodworking industries	1,650,000	2,145,880
Lath	150,000	142,282
	$35,528,000	$48,913,115

Paper and Shipbuilding.

The manufacture of paper showed an increase of 22½ per cent.; pulp, 85 per cent.; shingles, 21 per cent.; and lumber 22½ per cent. With new and large pulp and paper plants coming into operation, further increases may be looked for.

The minister made little reference to the big shipbuilding industry, except to refer to it as creating a strong demand for material from the forests. He confined himself to the great lines of production from provincial resources. The aggregate figures of production for 1917 will show an increase of between 30 and 40 per cent. over 1916. Furs are not mentioned in this report, although this nets close to two million dollars a year to trappers.

This showing is particularly good, when it is remembered that shipping tonnage is very scarce. When this is to be had and the world's markets are again available, British Columbia should enter into a great era of productive activity.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Belleville, Ont.—April 20—Two large barns and many bales of hay, owned by Mr. H. E. Fairfield, were destroyed. Estimated loss, $2,500.

Corbyville, Ont.—April 14—Distillery plant, grain elevator and large stock of grain and malt were damaged. Estimated loss, $100,000. The following companies are interested: Royal, $355,000; Phœnix of London, $267,800; Glens Falls, $62,200; Guardian, $250,000; Union, $175,000; North America, $135,000; Hartford, $150,000; North British, $150,000; Royal Exchange, $150,000; Northern, $150,000; Norwich Union, $150,000; Commercial Union, $125,000; Liverpool and London and Globe, $100,000; Western, $100,000; Yorkshire, $150,000; Employers, $100,000; Continental, $100,000; Globe and Rutgers, $75,000; Rochester German, $50,000; Phenix of Hartford, $50,000; Westchester, $50,000; Alliance, $50,000; Acadia, $50,000; Providence Washington, $50,000; Alliance of Philadelphia, $40,000; Caledonia, $25,000.

Fredericton, N.B.—April 20—Ten homes in section known as Sandyville were destroyed. Estimated loss, $30,000.

Goderich, Ont.—April 15—Storehouse, owned by Mr. Crystal and occupied by Peter McEwen, was destroyed. Estimated loss, $1,000. Insurance carried, $450.

Hantsport, N.S.—April 13—Shipbuilding plant of Messrs. Fanquier and Porter was damaged. The following companies are interested: Ætna, $1,400; Hartford, $1,400; St. Paul, $1,400; North British and Mercantile, $1,400; North American, $1,500; British-American, $1,500; Ocean, $1,500; New York Underwriters, $1,500; Continental National, $1,500; Palatine, $1,500; Guardian, $1,400. BANK OF MONTREAL AND B.N.A. UNION PROCEEDS

The holding of a meeting of shareholders of the Bank of British North America in London, England, on April 23rd was preparatory to the final meeting which will be held next month for the closing up of the deal with the Bank of Montreal, according to the local officials of the bank in Toronto. The amalgamation of the two banks under which the Bank of Montreal is purchasing the Bank of British North America will not be finally completed for about two months, in view of certain formalities which have to be carried through in Canada as well as in England, said one official. "At present the bank is doing business as usual. The name of the Bank of British North America will not disappear until the amalgamation is completed some time this summer," he added. The meeting held in London was marked by the presence of only seven shareholders, eight directors, and three reporters, and the president explained that in the long history of the bank it had never been necessary to use proxies at meetings, which, however, are necessary at the final meeting to approve of the sale.
